DOCUMENT RESUME

ED 031 587 VT 009 007

Microfiche Collection Of Clearinghouse Documents Reported In Abstracts Of Research and Related Materials In Vocational and Technical Education (ARM), Summer 1969.

Ohio State Univ., Columbus. Center for Vocational and Technical Education.

Spons Agency-Office of Education (DHEW), Washington, D.C.

Pub Date 69

Note-7,417p.

EDRS Price MF-$26.75 HC Not Available from EDRS.

Descriptors-*Annotated Bibliographies, Clearinghouses, *Educational Research, Indexes (Locaters), Information Dissemination, Resource Materials, *Technical Education, *Vocational Education

Documents announced with VT numbers only in the Summer 1969 issue (VT 009 006) of "Abstracts of Research and Related Materials in Vocational and Technical Education" (ARM), are included in this microfiche set. Microfiche availability for these documents is shown on the ARM resume as MF AVAILABLE IN VT-ERIC SET. The microfiche set is arranged in the following sequence: (1) a Vocational-Technical (VT) number index to documents in the microfiche collection, (2) the author index, the vocational and supporting services index, and the subject index from ARM, and (3) the full text of documents listed in the VT number index. The tests are filmed continuously in VT number sequence. (BS)

INTRODUCTION

This collection of microfiche consists of the documents which are announced with VT number only in the Summer 1969 issue of Abstracts of Research and Related Materials in Vocational and Technical Education (ARM). Microfiche availability is shown in the resume as MF AVAILABLE IN VT-ERIC SET. The documents are grouped in VT number sequence and filmed continuously as a microfiche set. These documents are not available on microfiche as individual items, but are obtainable only through purchase of this set, or from agencies who have this set and have the capability of reproducing microfiche. The microfiche set includes the following sections:

1. Vocational Technical (VT) Number Index to Microfiche Collection of Clearinghouse Documents Reported in ARM, Summer 1969.

2. Selected indexes from ARM, Summer 1969.

   a. Personal and Institutional Author Index.
   b. Vocational and Supporting Services Index.
   c. Subject and Identifier Index.

   The documents identified in the indexes with an ERIC Document (ED) number are usually available as separate documents from the ERIC Document Reproduction Service (EDRS). Information about EDRS Service can be found in ARM or RIE. Items not available through EDRS will include a source of availability. The page numbers shown in these indexes refer to the location of the abstracts in ARM, Summer 1969.

3. The full text of documents listed in the Vocational Technical (VT) Number Index to Microfiche Collection of Clearinghouse Documents Reported in ARM, Summer 1969.

VT 004 971 appearing on page 751 of ARM Summer 1969 lists availability as "MF AVAILABLE IN VT-ERIC SET". This statement should be "DOCUMENT NOT AVAILABLE FROM EDRS". Copies of the document are available from Institute for Community Development and Services, Continuing Education Service, Michigan State University, East Lansing, Michigan 48823.

Guidelines and Procedures: Directed Work-Experience Programs in Vocational Agricultural Education.

COOPERATIVE PLANNING
VT 001 528 736
Training in the Perspective of Technological Change.

COOPERATIVE PROGRAMS
VT 008 208 679
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Business and Office Education General Meetings.

COOPERATIVES
VT 001 563 770
Worker-Owned Plywood Companies, An Economic Analysis.

CORE CURRICULUM
VT 003 520 683
A Study of Recommendations for Technical Education Curricula.

COST EFFECTIVENESS
VT 006 602 ED 026 488 675
A Cost-Benefit Study of Post-High School Technical Education in Oklahoma.
VT 007 310 ED 026 504 676
Vocational Education.
VT 008 213 718
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Department of Research and Evaluation General Meetings.
VT 008 218 680
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Board Members Meeting.

COUNSELOR ROLE
VT 005 127 699
Occupational Information Conference Report (Oxnard, California, October 11, 1967).

COURSE EVALUATION
VT 004 571 712
The Effectiveness of a Distributive Education Preparatory Course on Student Progress in Distributive Education II.

COURSE ORGANIZATION
VT 005 767 ED 024 784 761
An Introduction to Teaching Vocational Technical Education.

COURSES
VT 001 745 663
Code Book of Industries, Occupations and Course Titles.

CULTURALLY DISADVANTAGED
VT 006 721 ED 022 925 675
Procedural Guide for Program Development in New Careers.

CURRICULUM
VT 002 425 ED 024 759 682
Guide to Organized Occupational Curriculums in Higher Education.

CURRICULUM DESIGN
VT 007 249 ED 023 913 740
The Design and Evaluation of Vocational Technical Education Curricula Through Functional Job Analysis.

CURRICULUM DEVELOPMENT
VT 003 400 ED 025 458 682
Institute for Home Economics Teachers on Initiating, Developing, and Evaluating Programs at the Post High School Level. Volume I.
VT 004 002 683
A Functional Analysis of Paramedical Occupations. Condensation of the Final Report.
VT 004 303 ED 024 763 730
The Development of Pre-Vocational Education Literacy Courses for Use with Computer-Assisted Instruction of Disadvantaged Youths and Adults. Final Report.
VT 006 370 ED 025 616 745
A Planning Study to Determine the Feasibility of a Research Project Concerning Employment Opportunities and Training Needs in Farming and Off-Farm Agricultural Business and Industry.
VT 007 031 ED 022 965 717
The Implementation and Further Development of Experimental Cluster Concept Programs. Interim Report.
VT 007 375 ED 023 931 683
Workshop Report: Distributive Education Project Development Workshop, June 19-30, 1967.
VT 007 376 ED 023 932 684
Regional Workshops in Project Development for Distributive Education Curricula.
VT 007 377 ED 023 933 684
Workshop Report: Distributive Education Project Development Workshop. July 30-August 11, 1967.
VT 007 472 ED 026 509 684
Development of Multi-Media Programmed Instructional Materials for the Training of Law Enforcement Officers. Final Report.
VT 007 473 ED 025 645 684
Development of Multi-Media Programmed Instructional Materials for the Training of Law Enforcement Officers. Initial Curriculum Study.
VT 007 501 ED 026 514 767
Selected Readings in Business and Office Occupations--Designed Especially for the Classroom Teacher.
VT 007 682 ED 026 524 685
Institute for Home Economics Teachers on Initiating, Developing, and Evaluating Programs at the Post High School Level. Volume II.

CURRICULUM EVALUATION
VT 004 581 ED 022 880 683
Teaching Basic Production Economic Principles to Secondary School Students of Vocational Agriculture: An Evaluative Case Study.
VT 004 965 712
Evaluation Problems of the UICSM (University of Illinois Committee on School Mathematics) Curriculum Project.
VT 005 939 ED 022 911 673
The Development and Improvement of Directed Work-Experience Programs in Expanded Vocational Education Offerings in Agriculture at the Secondary School Level. Final Report.
VT 007 761 ED 027 405 685
A Pilot Study to Determine the Need for Curriculum Modification in Vocational-Technical Education in New Hampshire.
VT 007 917 ED 027 423 686
The Process and Product of Machine Shorthand Programs in New York State Schools.

CURRICULUM PLANNING
VT 004 964 668
Administration and the Educational Program.
VT 007 469 677
Zoned Analysis Techniques in Planning and Curriculum Development.

CURRICULUM RESEARCH
VT 003 520 683
A Study of Recommendations for Technical Education Curricula.
VT 007 472 ED 026 509 684
Development of Multi-Media Programmed Instructional Materials for the Training of Law Enforcement Officers. Final Report.

THE DAILEY VOCATIONAL TESTS
VT 001 338 748
Counselor's Guide to Georgia Area Vocational-Technical Schools.

DATA PROCESSING
VT 007 371 ED 023 927 722
A Guide for Planning Facilities for Occupational Preparation Programs in Data Processing.

DEAF EDUCATION
VT 005 013 ED 025 593 731
Annotated Bibliography of Instructional Media; Vocational Education for the Deaf.
VT 005 014 ED 025 594 731
Trends in Vocational Education for the Deaf. Report of the Workshop, 1967.
VT 005 015 ED 025 595 731
Trends in Prevocational Education for the Deaf. Report of the Workshop, 1967.

DECISION MAKING
VT 004 964 668
Administration and the Educational Program.

DEMONSTRATION PROGRAMS
VT 007 127 ED 022 968 733
Development of Human Resources Through a Vocationally Oriented Educational Program for Disadvantaged Families in Depressed Rural Areas. Interim Report 1.

DEMONSTRATION PROJECTS
VT 005 767 ED 024 784 761
An Introduction to Teaching Vocational Technical Education.

DENTAL ASSISTANTS
VT 001 693 682
The Dental Assisting Curriculum--Content and Scope.

DENTAL AUXILIARIES
VT 005 732 ED 023 835 683
Greater Utilization of Dental Technicians. Report of Training.
VT 005 733 ED 023 836 672
Greater Utilization of Dental Technicians. II. Report of Clinical Tests.

SUBJECT AND IDENTIFIER INDEX

Page

DENTAL HYGIENISTS
VT 006 463 707
Licensed Dental Hygienists in Iowa.

DENTISTRY
VT 005 732 ED 023 835 683
Greater Utilization of Dental Technicians. Report of Training.
VT 005 733 ED 023 836 672
Greater Utilization of Dental Technicians. II. Report of Clinical Tests.

DENTISTS
VT 005 733 ED 023 836 672
Greater Utilization of Dental Technicians. II. Report of Clinical Tests.

DEPARTMENT STORES
VT 004 900 697
Department Stores, Labor Market Developments.

DEPRESSED AREAS (GEOGRAPHIC)
VT 005 945 ED 021 145 701
Geographic Factors in Employment and Manpower Development.

DEVELOPING NATIONS
VT 004 849 ED 024 768 696
Manpower and Employment Policies for Developing Countries.
VT 004 974 668
Tapestry for Tomorrow, The Ford Foundation Program in the Middle East.

DICTIONARIES
VT 001 905 770
Definitions of Terms in Vocational, Technical, and Practical Arts Education.

DICTIONARY OF OCCUPATIONAL TITLES
VT 002 611 ED 023 795 692
Worker Requirements and Methods of Entry into Home and Community Occupations Related to Home Economics.

DIFFUSION
VT 007 304 ED 023 922 763
Personal and Situational Variables which Inhibit or Stimulate the Adoption of Agricultural Occupations Curricula.

DIRECTORIES
VT 002 407 ED 019 445 665
Technician Education Yearbook, 1965-1966.
VT 002 425 ED 024 759 682
Guide to Organized Occupational Curriculums in Higher Education.
VT 003 546 ED 021 975 666
Technician Education Yearbook, 1963-1964.
VT 004 953 731
Guidelines for Compiling a Directory of Community Services in Rehabilitation and Employment of Handicapped Men and Women.
VT 006 243 ED 023 845 673
Technician Education Yearbook, 1967-1968.

DISADVANTAGED ENVIRONMENT
VT 008 166 734
Effective Trade and Industrial Programs for the Disadvantaged Persons with Special Needs.

Page

DISADVANTAGED GROUPS
VT 004 303 ED 024 763 730
The Development of Pre-Vocational Education Literacy Courses for Use with Computer-Assisted Instruction of Disadvantaged Youths and Adults. Final Report.
VT 005 943 732
Barriers to Employment of the Disadvantaged.
VT 005 947 ED 021 147 673
New Developments in Manpower Programs.
VT 007 125 ED 022 966 733
Development of Human Resources Through a Vocationally Oriented Educational Program for Disadvantaged Families in Depressed Rural Areas. Interim Report 3.
VT 007 126 ED 022 967 733
Development of Human Resources Through a Vocationally Oriented Educational Program for Disadvantaged Families in Depressed Rural Areas. Interim Report 2.
VT 008 166 734
Effective Trade and Industrial Programs for the Disadvantaged Persons with Special Needs.

DISADVANTAGED YOUTH
VT 004 212 ED 022 863 730
Workshop on Nonprofessional Careers for Disadvantaged Youth.
VT 005 037 ED 016 872 770
Research Visibility. Vocational Education is People--Youth With Special Needs.
VT 007 127 ED 022 968 733
Development of Human Resources Through a Vocationally Oriented Educational Program for Disadvantaged Families in Depressed Rural Areas. Interim Report 1.
VT 007 158 ED 023 897 733
Youth with Special Needs in Non-Metropolitan Ohio High Schools.

DISTRIBUTIVE EDUCATION
VT 001 617 660
Distributive Education in Jefferson County. A Reference Manual for Distributive Education Coordinators.
VT 001 623 661
State-Local Plan for Administration of Distributive Education.
VT 001 680 661
An Administrative Handbook for Vocational Distributive Education in Indiana.
VT 001 800 663
Standard Industrial Classification for Use in Distributive Education.
VT 002 943 682
Potential for Food Handling and Distribution Training in Connecticut.
VT 004 182 ED 022 862 758
Needed Improvements in Distributive Teacher Education.
VT 004 571 712
The Effectiveness of a Distributive Education Preparatory Course on Student Progress in Distributive Education II.
VT 005 428 714
Five Year Follow-up Survey of Distributive Education. 1957 - 1961.
VT 005 644 760
The Historical Development of a Post High School Distributive Education Program with Implications for Teacher Education.

Page

VT 005 037 ED 016 872 770
Research Visibility. Vocational Education is People--Youth With Special Needs.
VT 005 401 743
Massachusetts Vocational Education Research Coordinating Unit, Second Report for the Period October 1 to December 31, 1967.
VT 005 405 744
Quarterly Technical Progress Report; Sixth, October 1, 1967 - December 31, 1967.
VT 005 406 744
New Mexico Research Coordinating Unit, Progress Report, December 1, 1967 - February 29, 1968.
VT 005 555 744
Establishment of an Occupational Research and Development Coordinating Unit for the State of Rhode Island. Progress Report, January 1 to March 31, 1968.
VT 006 230 673
A Plan for Disseminating Vocational Education Research Materials.
VT 006 628 ED 024 801 762
Trade and Industrial Teacher Education: A Research Critique and Model for Action.
VT 006 910 ED 022 954 745
Abstracts of Studies in Vocational Education.
VT 007 194 ED 026 500 745
Selected Proceedings and Information from the 1967 Summer Workshop in Research in Vocational-Technical Education.
VT 007 229 ED 023 908 771
Home Economics Education, Research Summary.
VT 007 468 ED 025 644 763
Trade and Industrial Teacher Education and Certification: Report of a National Invitational Research Development Seminar.
VT 008 085 ED 028 290 755
Selected Bibliography of Theses and Research in Family Economics and Home Management.
VT 008 208 679
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Business and Office Education General Meetings.
VT 008 209 755
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Vocational Guidance General Meetings.
VT 008 210 718
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Research Section Meetings.
VT 008 213 718
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Department of Research and Evaluation General Meetings.
VT 008 751 ED (See Oct.'69 RIE) 771
Abstracts of Research and Related Materials in Vocational and Technical Education (ARM), Spring 1969.
VT 008 784 ED (See Oct.'69 RIE) 771
Microfiche Collection of Clearinghouse Documents Reported in Abstracts of Research and Related Materials in Vocational and Technical Education (ARM), Spring 1969.

EDUCATIONAL RESEARCHERS
VT 002 335 ED 022 845 742
Special Training Project for Educational Researchers in the Nation's Large Cities. December 1, 1966-January 31, 1967. Final Report.

EDUCATIONAL RESOURCES
VT 005 013 ED 025 593 731
Annotated Bibliography of Instructional Media; Vocational Education for the Deaf.

EDUCATIONAL SOCIOLOGY
VT 004 568 725
Technology and Educational Reform in Early America.

EDUCATIONAL SPECIFICATIONS
VT 006 618 ED 022 924 721
A Guide for Planning Facilities for Home Economics Occupational Preparation Programs.

EDUCATIONAL STATUS COMPARISON
VT 007 814 ED 026 534 754
Vocational Guidance in Secondary Education. Results of a National Survey.

EDUCATIONAL STRATEGIES
VT 004 965 712
Evaluation Problems of the UICSM (University of Illinois Committee on School Mathematics) Curriculum Project.

EDUCATIONAL TRENDS
VT 005 014 ED 025 594 731
Trends in Vocational Education for the Deaf. Report of the Workshop, 1967.
VT 005 015 ED 025 595 731
Trends in Prevocational Education for the Deaf. Report of the Workshop, 1967.
VT 005 236 ED 024 775 759
An Anthology of Teacher Education in Agriculture.

ELECTRONIC DATA PROCESSING
VT 005 250 752
Computerized Vocational Information System (CVIS).

ELECTRONICS INDUSTRY
VT 005 179 700
A Study of the Re-Employment and Unemployment Experiences of Scientists and Engineers Laid Off from 62 Aerospace and Electronics Firms in the San Francisco Bay Area During 1963-1965, Executive Summary.

ELEMENTARY EDUCATION
VT 004 569 725
The Development of Agricultural Education in India.

EMPLOYEE ATTITUDES
VT 006 380 ED 025 617 706
Workers' Attitudes to Technical Change: An Integrated Survey of Research.

EMPLOYER ATTITUDES
VT 001 723 710
Part-Time Cooperative Industrial Education as Viewed by Cooperating Employers in Ames, Marshalltown and Newton.
VT 002 981 692
What the Employer Looks for in the High School Business Graduate.

Page

VT 006 297 ED 026 484 703
Analysis of Tasks in Three Home Related Occupations.
VT 006 301 ED 024 789 703
A Comparative Study of the Employee Skills/Training Acceptable to Employers Under Varying Degrees of Labor Market Stringencies.
VT 007 761 ED 027 405 685
A Pilot Study to Determine the Need for Curriculum Modification in Vocational-Technical Education in New Hampshire.

EMPLOYMENT
VT 007 782 ED 026 533 734
Education, Employment, and Negro Equality.

EMPLOYMENT EXPERIENCE
VT 004 902 697
Hired Farmworkers in the United States.
VT 004 958 698
Unemployment Insurance Claimants, 1962-1963, Characteristics and Benefit Experience of New York Workers.
VT 005 638 ED 025 600 714
A Nationwide Evaluation of MDTA Institutional Job Training Programs.

EMPLOYMENT LEVEL
VT 004 902 697
Hired Farmworkers in the United States.

EMPLOYMENT OPPORTUNITIES
VT 000 415 ED 025 582 688
A Survey of Demand in Selected Metalworking Occupations for Major Areas in Idaho.
VT 000 870 ED 025 583 688
A Study of the Employment Problems and Prospects of a Selected Group of Male Occupationally Oriented High School Graduates.
VT 001 191 688
Seven Basic Areas of the World of Work; Introduction and Summary.
VT 001 503 ED 026 452 689
Project '80; Rural Michigan Now and in 1980. Economic Prospects of Farmers.
VT 001 620 660
Employment Trends in Selected Service Occupations in the San Francisco Bay Area.
VT 003 894 ED 022 855 729
The Mentally Retarded: Their Special Training Needs.
VT 004 579 ED 022 878 694
Off-Farm Agricultural Occupations in Montana: Employment and Education.
VT 004 900 697
Department Stores, Labor Market Developments.
VT 004 971 751
The Young Job-Seeker's Guide to Technical Occupations and the Skilled Trades, Michigan, 1966.
VT 005 826 ED 027 375 701
Michigan Technician Need Study. The Present and Projected Demand for Technically Trained People in Michigan.
VT 006 346 ED 024 791 704
Employment Opportunities and Competencies Needed in Farm Occupations in Selected Counties in Kentucky.

SUBJECT AND IDENTIFIER INDEX

Page

VT 006 470 ED 023 857 707
Occupational Education for Meat Inspection and Laboratory Animal Caretaker Jobs.

EMPLOYMENT PATTERNS
VT 004 813 ED 022 885 696
Estimating Agricultural Employment from a Sample of Employers.
VT 005 946 ED 021 146 702
Review of Manpower Developments in 1967.
VT 006 304 704
Report of Conference on Unions and the Changing Status of Women Workers. 1964.
VT 006 311 704
Report of Arrowhead Regional Conference on the Status of Women in Northern Minnesota (Duluth, Minn., July 17, 1964).
VT 006 365 ED 023 852 705
Wages and Labour Mobility.
VT 006 383 ED 024 794 706
Economic Background to Manpower Planning and Control.

EMPLOYMENT PRACTICES
VT 001 567 690
Area Wage Survey, The Portland, Oregon-Washington, Metropolitan Area, May 1966.
VT 001 568 690
Area Wage Survey, The Greenville, South Carolina, Metropolitan Area, May 1966.
VT 002 981 692
What the Employer Looks for in the High School Business Graduate.
VT 006 301 ED 024 789 703
A Comparative Study of the Employee Skills/Training Acceptable to Employers Under Varying Degrees of Labor Market Stringencies.

EMPLOYMENT PROBLEMS
VT 000 870 ED 025 583 688
A Study of the Employment Problems and Prospects of a Selected Group of Male Occupationally Oriented High School Graduates.
VT 004 941 698
The Employment Service Goes to an Armour Plant Closing.
VT 005 943 732
Barriers to Employment of the Disadvantaged.
VT 006 140 732
Joblessness and Poverty in Urban Slums. A Reprint from the 1967 Manpower Report.
VT 006 377 ED 023 854 706
Manpower Problems in the Service Sector.

EMPLOYMENT PROGRAMS
VT 003 777 ED 023 801 725
The Manpower Development and Training Act: A Review of Training Activities.
VT 004 212 ED 022 863 730
Workshop on Nonprofessional Careers for Disadvantaged Youth.
VT 004 921 697
Community Organization for Employment Development.
VT 005 020 ED 026 470 699
Target: Employment.
VT 005 947 ED 021 147 673
New Developments in Manpower Programs.
VT 006 721 ED 022 925 675
Procedural Guide for Program Development in New Careers.

Page

EMPLOYMENT PROJECTIONS
VT 000 415 ED 025 582 688
A Survey of Demand in Selected Metalworking Occupations for Major Areas in Idaho.
VT 001 503 ED 026 452 689
Project '80; Rural Michigan Now and in 1980. Economic Prospects of Farmers.
VT 003 369 MP 000 159 742
Development of Models for Projecting Employment by Industry and by Occupation.
VT 003 601 ED 026 459 742
The New York State Department of Labor's Manpower Projections for the State and Its Areas: A Preliminary Report on Methodology.
VT 004 617 695
Michigan Technician Needs Study, Summary Report.
VT 004 962 698
State Plan Inventory. Section 3-A, Projections of Employment for the Year 1980.
VT 005 572 701
Manpower in Oklahoma, State Summary. Preliminary Release.
VT 005 826 ED 027 375 701
Michigan Technician Need Study. The Present and Projected Demand for Technically Trained People in Michigan.
VT 006 383 ED 024 794 706
Economic Background to Manpower Planning and Control.

EMPLOYMENT QUALIFICATIONS
VT 001 191 688
Seven Basic Areas of the World of Work; Introduction and Summary.
VT 002 611 ED 023 795 692
Worker Requirements and Methods of Entry into Home and Community Occupations Related to Home Economics.
VT 002 981 692
What the Employer Looks for in the High School Business Graduate.
VT 004 642 696
The Training Specialist in Industry.
VT 006 357 ED 024 792 705
Occupational Commonalities: A Base for Course Construction.

EMPLOYMENT SERVICES
VT 001 828 664
Youth Employment Program of the United States Employment Service.
VT 004 921 697
Community Organization for Employment Development.
VT 004 941 698
The Employment Service Goes to an Armour Plant Closing.
VT 006 161 702
Developments in the Community Employment Program.

EMPLOYMENT STATISTICS
VT 003 369 MP 000 159 742
Development of Models for Projecting Employment by Industry and by Occupation.
VT 004 925 ED 022 888 698
Farm Labor Developments. Employment and Wage Supplement.
VT 005 433 ED 022 899 670
Nursing in the South.
VT 006 383 ED 024 794 706
Economic Background to Manpower Planning and Control.

Page

EMPLOYMENT TRENDS
VT 001 526 689
A Least Squares Analysis of Colorado Nonfarm Employment, 1939-1963, With Projections to 1970.
VT 001 620 660
Employment Trends in Selected Service Occupations in the San Francisco Bay Area.
VT 004 900 697
Department Stores, Labor Market Developments.
VT 004 962 698
State Plan Inventory. Section 3-A, Projections of Employment for the Year 1980.
VT 005 946 ED 021 146 702
Review of Manpower Developments in 1967.
VT 006 383 ED 024 794 706
Economic Background to Manpower Planning and Control.

ENGINEERING EDUCATION
VT 002 069 ED 019 429 724
Six Decades of Service, 1903-1963.

ENGINEERING TECHNICIANS
VT 004 942 ED 024 770 750
Engineering Technology Careers; Career Guidance Information for Engineering Technicians.
VT 005 241 ED 024 776 700
Technician Career Opportunities in Engineering Technology.

ENGINEERS
VT 005 179 700
A Study of the Re-Employment and Unemployment Experiences of Scientists and Engineers Laid Off from 62 Aerospace and Electronics Firms in the San Francisco Bay Area During 1963-1965, Executive Summary.

ENTRY WORKERS
VT 004 263 ED 022 864 693
A Study of the Opportunities for, Requirements of, and Knowledges, Abilities, and Related Characteristics Needed by Beginning Office Workers in the State of Connecticut.
VT 006 301 ED 024 789 703
A Comparative Study of the Employee Skills/Training Acceptable to Employers Under Varying Degrees of Labor Market Stringencies.

ENVIRONMENTAL INFLUENCES
VT 006 380 ED 025 617 706
Workers' Attitudes to Technical Change: An Integrated Survey of Research.

ENVIRONMENTAL RESEARCH
VT 006 295 ED 026 482 703
Recognized Problems of Single Girls in Iowa Entering the Work World Following High School Graduation.

ENVIRONMENTAL TECHNICIANS
VT 006 409 ED 025 618 761
Program of Teacher Education for Environmental Technology (POTEET).

EQUAL OPPORTUNITIES (JOBS)
VT 004 665 ED 022 883 696
Equal Employment Opportunities for Women Under Title VII of the Civil Rights Act of 1964.

VT 001 898 710
Manual for Institutional Self-Study--Community Colleges, Technical Institutes, Industrial Education Centers.
VT 004 994 713
The Navajo Rehabilitation Project, Pre-Vocational Laboratory. Navajo Rehabilitation Project Technical Report No. 8.

EVALUATION NEEDS
VT 004 965 712
Evaluation Problems of the UICSM (University of Illinois Committee on School Mathematics) Curriculum Project.

EVALUATION TECHNIQUES
VT 002 436 ED 025 587 711
Evaluation in Vocational Education.

EXHIBITS
VT 005 175 669
A Manual for Planning and Conducting an Agricultural Mechanics Fair.

EXPERIMENTAL CURRICULUM
VT 008 205 678
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Apprenticeship and Manpower Training Programs.

EXPERIMENTAL PROGRAMS
VT 004 845 ED 025 466 731
Mental Health and Manpower Employment Adjustment for Psychiatric Patients.
VT 007 031 ED 022 965 717
The Implementation and Further Development of Experimental Cluster Concept Programs. Interim Report.

Page

VT 008 211 679
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Secondary Department General Meetings.

EXTENSION AGENTS
VT 004 574 ED 022 874 694
Training Needs of County Agricultural Extension Agents in Quebec, Canada.

FACILITIES
VT 004 975 720
A Progress Report on Area Vocational-Technical School Developments to June 30, 1966.

FACILITY EXPANSION
VT 001 707 720
Area Vocational Technical Schools and Programs, A Summary of Developments by States.

FACILITY GUIDELINES
VT 001 430 720
A Greenhouse for Vocational Agriculture in Kentucky.
VT 004 850 720
Industrial Arts Facilities.
VT 005 730 720
D. E. Classroom Layouts.
VT 006 220 721
Educational Specifications for Practical Nursing Facilities.
VT 006 618 ED 022 924 721
A Guide for Planning Facilities for Home Economics Occupational Preparation Programs.
VT 006 805 ED 026 496 721
School Shop Development: Research and Planning.
VT 007 370 ED 023 926 722
A Guide for Planning Facilities for Occupational Preparation Programs in the Machine Trades.
VT 007 371 ED 023 927 722
A Guide for Planning Facilities for Occupational Preparation Programs in Data Processing.
VT 007 725 ED 027 401 722
A Guide for Planning Facilities for Occupational Preparation Programs in Business and Office Occupations.
VT 008 232 ED 028 301 721
Guide for Planning Industrial Arts Laboratory Facilities.

FACILITY REQUIREMENTS
VT 007 725 ED 027 401 722
A Guide for Planning Facilities for Occupational Preparation Programs in Business and Office Occupations.

FACTOR ANALYSIS
VT 007 469 677
Zoned Analysis Techniques in Planning and Curriculum Development.

FACTOR STRUCTURE
VT 005 482 ED 024 780 752
Planned and Unplanned Aspects of Occupational Choices by Youth. Final Report.
VT 007 469 677
Zoned Analysis Techniques in Planning and Curriculum Development.

VT 006 668 ED 023 869 762
Industrial Education for the Visually Limited.

PARTICIPANT CHARACTERISTICS
VT 004 958 698
Unemployment Insurance Claimants, 1962-1963, Characteristics and Benefit Experience of New York Workers.

PERIODICALS
VT 006 386 ED 022 052 725
Trends in Training--Six Years of CIRF Abstracts.

PERSONNEL SELECTION
VT 006 301 ED 024 789 703
A Comparative Study of the Employee Skills/Training Acceptable to Employers Under Varying Degrees of Labor Market Stringencies.

PHYSICAL FACILITIES
VT 006 220 721
Educational Specifications for Practical Nursing Facilities.

PLANT SCIENCE
VT 001 430 720
A Greenhouse for Vocational Agriculture in Kentucky.

POLICY
VT 005 734 672
Guidelines for Project Grants for Improvement in Nurse Training.
VT 006 377 ED 023 854 706
Manpower Problems in the Service Sector.
VT 008 387 764
Proceedings of the National Association of Industrial and Technical Teacher Educators (NAITTE) Executive Committee Business Meetings at the Annual Vocational Convention of the American Vocational Association. 1968.

POST HIGH SCHOOL GUIDANCE
VT 004 976 751
Ohio Notebook of Public Technical Education Programs, 1965-1966.

POST SECONDARY EDUCATION
VT 003 400 ED 025 458 682
Institute for Home Economics Teachers on Initiating, Developing, and Evaluating Programs at the Post High School Level. Volume I.
VT 004 976 751
Ohio Notebook of Public Technical Education Programs, 1965-1966.
VT 005 644 760
The Historical Development of a Post High School Distributive Education Program with Implications for Teacher Education.

SUBJECT AND IDENTIFIER INDEX

VT 006 602 ED 026 488 675
A Cost-Benefit Study of Post-High School Technical Education in Oklahoma.
VT 007 682 ED 026 524 685
Institute for Home Economics Teachers on Initiating, Developing, and Evaluating Programs at the Post High School Level. Volume II.
VT 008 212 679
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Post Secondary Department General Meetings.

POWER STRUCTURE
VT 008 206 679
Dynamics of the Organizational Power Structure.

PRACTICAL ARTS
VT 001 905 770
Definitions of Terms in Vocational, Technical, and Practical Arts Education.

PRACTICAL NURSES
VT 002 139 691
A Study of Practical Nurses Who Have Been Licensed in Iowa But Are Not Presently Employed in Iowa as Practical Nurses.
VT 006 220 721
Educational Specifications for Practical Nursing Facilities.

PRACTICAL NURSING
VT 000 830 658
School Program for Practical Nurses.
VT 005 724 ED 024 782 760
A Clinical Workshop in Mental Health and Psychiatric Nursing for Instructors in Schools of Practical Nursing. Final Report.

PREDICTIVE ABILITY (TESTING)
VT 004 180 MP 000 343 729
The Occupational Success of the Retarded, Critical Factors, Predictive Tests and Remedial Techniques. Summary.

PREDICTIVE MEASUREMENT
VT 001 818 ED 026 454 758
Clinical Evaluation of Predictive Data for Prospective Home Economics Teachers.

PRESERVICE EDUCATION
VT 005 767 ED 024 784 761
An Introduction to Teaching Vocational Technical Education.
VT 007 488 ED 025 650 763
A Description and Evaluation of Vocational Teacher Training Programs in the State of Rhode Island.

PREVOCATIONAL EDUCATION
VT 004 303 ED 024 763 730
The Development of Pre-Vocational Education Literacy Courses for Use with Computer-Assisted Instruction of Disadvantaged Youths and Adults. Final Report.
VT 004 571 712
The Effectiveness of a Distributive Education Preparatory Course on Student Progress in Distributive Education II.

RESEARCH SEMINAR IN VOCATIONAL-TECHNICAL EDUCATION, UNIVERSITY OF WYOMING, SUMMER, 1967
VT 007 194 ED 026 500 745
Selected Proceedings and Information from the 1967 Summer Workshop in Research in Vocational-Technical Education.

RESEARCH TOOLS
VT 004 903 ED 024 769 743
Training and Reference Manual for Job Analysis.

RESOURCE GUIDES
VT 006 218 ED 026 481 753
Aviation--Where Career Opportunities are Bright; Counselor's Guide.

RETIREMENT
VT 005 263 ED 025 596 700
The Length of Working Life for Males, 1900-60.

RETRAINING
VT 005 218 ED 026 472 700
Training and Retraining Older Workers, an Annotated Bibliography.

RHODE ISLAND VOCATIONAL EDUCATION RESEARCH COORDINATING UNIT
VT 005 555 744
Establishment of an Occupational Research and Development Coordinating Unit for the State of Rhode Island. Progress Report, January 1 to March 31, 1968.

ROLE PERCEPTION
VT 004 964 668
Administration and the Educational Program.

RURAL AREAS
VT 007 126 ED 022 967 733
Development of Human Resources Through a Vocationally Oriented Educational Program for Disadvantaged Families in Depressed Rural Areas. Interim Report 2.
VT 007 158 ED 023 897 733
Youth with Special Needs in Non-Metropolitan Ohio High Schools.

RURAL ECONOMICS
VT 002 039 ED 025 585 728
The People Left Behind; Seminar on Manpower Policy and Program.

RURAL ENVIRONMENT
VT 002 039 ED 025 585 728
The People Left Behind; Seminar on Manpower Policy and Program.

RURAL FAMILY
VT 007 125 ED 022 966 733
Development of Human Resources Through a Vocationally Oriented Educational Program for Disadvantaged Families in Depressed Rural Areas. Interim Report 3.

SUBJECT AND IDENTIFIER INDEX

Page

VT 007 126 ED 022 967 733
Development of Human Resources Through a Vocationally Oriented Educational Program for Disadvantaged Families in Depressed Rural Areas. Interim Report 2.

RURAL FARM RESIDENTS
VT 004 963 ED 025 592 699
Adaptation of Rural and Foreign Workers to Industry, International Joint Seminar.

RURAL YOUTH
VT 001 630 ED 024 757 749
Educational and Vocational Goals of Rural Youth in North Carolina.
VT 004 324 MP 000 380 730
Rural Youth in Crisis.
VT 007 127 ED 022 968 733
Development of Human Resources Through a Vocationally Oriented Educational Program for Disadvantaged Families in Depressed Rural Areas. Interim Report 1.

SAFETY EDUCATION
VT 008 207 679
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Industrial Arts General Meetings.

SALARY DIFFERENTIALS
VT 002 183 ED 025 586 691
Costs and Returns for Investments in Technical Schooling by a Group of North Carolina High School Graduates.

SALES OCCUPATIONS
VT 004 900 697
Department Stores, Labor Market Developments.

SAMPLING
VT 004 813 ED 022 885 696
Estimating Agricultural Employment from a Sample of Employers.

SCHOOL DISTRICTS
VT 001 650 661
School District Organization. The Vocational School and the Intermediate District.

SCHOOL HOLDING POWER
VT 005 156 ED 022 892 752
Holding Power/Large City School Systems.

SCHOOL INDUSTRY RELATIONSHIP
VT 008 205 678
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Apprenticeship and Manpower Training Programs.
VT 008 216 740
Education for Jobs in a Technological Society.

SCHOOL ORGANIZATION
VT 004 955 668
Research Opportunities in Comprehensive Public Junior Colleges--Inter- and Intra-College Organizational Problems.

SCHOOL PLANNING
VT 004 850 720
Industrial Arts Facilities.
VT 006 805 ED 026 496 721
School Shop Development: Research and Planning.

Page

VT 008 232 ED 028 301 721
Guide for Planning Industrial Arts Laboratory Facilities.

SCHOOL ROLE
VT 001 507 ED 021 960 736
Vocational Education in the Public Schools.

SCHOOL SHOPS
VT 006 805 ED 026 496 721
School Shop Development: Research and Planning.
VT 008 232 ED 028 301 721
Guide for Planning Industrial Arts Laboratory Facilities.

SCHOOL SYSTEMS
VT 004 964 668
Administration and the Educational Program.

SCIENTISTS
VT 005 179 700
A Study of the Re-Employment and Unemployment Experiences of Scientists and Engineers Laid Off from 62 Aerospace and Electronics Firms in the San Francisco Bay Area During 1963-1965, Executive Summary.

SEASONAL LABORERS
VT 004 925 ED 022 888 698
Farm Labor Developments. Employment and Wage Supplement.

SECONDARY EDUCATION
VT 001 617 660
Distributive Education in Jefferson County. A Reference Manual for Distributive Education Coordinators.
VT 001 623 661
State-Local Plan for Administration of Distributive Education.
VT 004 569 725
The Development of Agricultural Education in India.

SECONDARY GRADES
VT 007 734 ED 027 403 685
The Feasibility of Teaching History of Technology in Vocational and Pre-Technical Secondary Schools.

SECONDARY SCHOOLS
VT 001 515 748
Reducing the School Dropout Rate--A Report on the Holding Power Project.
VT 007 814 ED 026 534 754
Vocational Guidance in Secondary Education. Results of a National Survey.

SELF CONCEPT
VT 004 582 ED 022 881 695
Managerial Perception and Success in Farming.

SELF EVALUATION
VT 001 898 710
Manual for Institutional Self-Study--Community Colleges, Technical Institutes, Industrial Education Centers.
VT 004 176 ED 022 861 711
Evaluative Criteria for Vocational Technical Programs.

SEMINAR ON MANPOWER POLICY AND PROGRAM, WASHINGTON, D.C., DECEMBER 14, 1967
VT 002 039 ED 025 585 728
The People Left Behind; Seminar on Manpower Policy and Program.

SEMINAR ON MANPOWER POLICY AND PROGRAM, WASHINGTON, D.C., NOVEMBER 17, 1966
VT 004 592 ED 020 349 695
Systems Design and Nature of Work. Seminar, 1966.

SEMINAR ON STATISTICS IN STATE VOCATIONAL REHABILITATION AGENCIES, SAN FRANCISCO, CALIFORNIA, NOVEMBER 28-30, 1966
VT 004 972 ED 026 469 712
Statistics in Vocational Rehabilitation. Proceedings of a Seminar, 1966.

SEMINARS
VT 004 592 ED 020 349 695
Systems Design and Nature of Work. Seminar, 1966.
VT 007 634 ED 025 667 754
National Seminar on Vocational Guidance. 1966. Follow-Up Study.
VT 007 635 ED 025 668 754
National Seminar on Vocational Guidance. 1966. Final Report.

SENIORS
VT 003 810 ED 026 461 750
The Northwest Missouri State College Studies; Volume XXVII, Number 3, Educational and Occupational Aspirations of High School Seniors, Part I.
VT 003 811 ED 026 462 750
The Northwest Missouri State College Studies; Volume XXVII, Number 4, Educational and Occupational Aspirations of High School Seniors. Part II.

SERVICE OCCUPATIONS
VT 001 620 660
Employment Trends in Selected Service Occupations in the San Francisco Bay Area.
VT 005 235 670
Tentative Work Material for Occupational Home Economics Programs.
VT 006 297 ED 026 484 703
Analysis of Tasks in Three Home Related Occupations.

SERVICE WORKERS
VT 001 613 749
Survey of Pupil Interest in Three Home Economics Related Occupations: Child Care Aide, Clothing Construction Aide, Food Service Occupations.

SERVICES
VT 006 377 ED 023 854 706
Manpower Problems in the Service Sector.

SEX (CHARACTERISTICS)
VT 001 567 690
Area Wage Survey, The Portland, Oregon-Washington, Metropolitan Area, May 1966.
VT 001 568 690
Area Wage Survey, The Greenville, South Carolina, Metropolitan Area, May 1966.

SUBJECT AND IDENTIFIER INDEX

SIMULATION
VT 008 208 679
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Business and Office Education General Meetings.

SKILL DEVELOPMENT
VT 005 126 738
The Role of Industrial Arts in Tomorrow's Schools.

SKILLED OCCUPATIONS
VT 001 021 ED 017 643 724
Apprenticeship Past and Present.
VT 004 971 751
The Young Job-Seeker's Guide to Technical Occupations and the Skilled Trades, Michigan, 1966.

SLUM ENVIRONMENT
VT 005 943 732
Barriers to Employment of the Disadvantaged.

SMALL BUSINESS
VT 001 249 659
A Survey of Federal Government Publications of Interest to Small Business.

SOCIAL CHANGE
VT 004 324 MP 000 380 730
Rural Youth in Crisis.
VT 005 477 671
New Horizons in Vocational Technical Occupational Education. Summary of a Pennsylvania Conference.

SOCIAL STRUCTURE
VT 007 126 ED 022 967 733
Development of Human Resources Through a Vocationally Oriented Educational Program for Disadvantaged Families in Depressed Rural Areas. Interim Report 2.

SOCIAL VALUES
VT 007 125 ED 022 966 733
Development of Human Resources Through a Vocationally Oriented Educational Program for Disadvantaged Families in Depressed Rural Areas. Interim Report 3.

SOCIAL WELFARE
VT 004 974 668
Tapestry for Tomorrow, The Ford Foundation Program in the Middle East.

SOCIOECONOMIC INFLUENCES
VT 001 336 689
Ex-Farm Operators in a Low-Income Area.
VT 003 811 ED 026 462 750
The Northwest Missouri State College Studies; Volume XXVII, Number 4, Educational and Occupational Aspirations of High School Seniors. Part II.
VT 005 943 732
Barriers to Employment of the Disadvantaged.
VT 006 140 732
Joblessness and Poverty in Urban Slums. A Reprint from the 1967 Manpower Report.

SOCIOECONOMIC STATUS
VT 004 578 ED 022 877 766
The Relationship of Socio-Economic Status of Pupils to Their Comprehension of Reference Materials Written at Different Levels of Readability.

SOCIOLOGICAL STUDIES
VT 004 485 ED 026 463 743
Youth in Transition. Volume I.

SOUTHEASTERN PENNSYLVANIA REGIONAL SEMINAR FOR SECONDARY PRINCIPALS AND COUNSELORS, JUNE 28-30, 1965
VT 005 477 671
New Horizons in Vocational Technical Occupational Education. Summary of a Pennsylvania Conference.

SOUTHERN STATES
VT 005 433 ED 022 899 670
Nursing in the South.

SPECIAL EDUCATION
VT 001 579 728
Some Programs of Vocational Education for Persons with Special Needs in Wisconsin.
VT 001 583 728
Summary and Evaluation of the Vocational Special Needs Pilot Program.

SPECIALISTS
VT 004 642 696
The Training Specialist in Industry.

SPEECHES
VT 005 236 ED 024 775 759
An Anthology of Teacher Education in Agriculture.
VT 008 166 734
Effective Trade and Industrial Programs for the Disadvantaged Persons with Special Needs.
VT 008 167 678
Tomorrow, Today.
VT 008 168 678
Speeches Presented at the National Conference on Exemplary Programs and Projects. (Atlanta, March 12-14, 1969).
VT 008 203 678
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Agricultural Education Division General Session.
VT 008 205 678
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Apprenticeship and Manpower Training Programs.
VT 008 206 679
Dynamics of the Organizational Power Structure.
VT 008 207 679
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Industrial Arts General Meetings.
VT 008 208 679
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Business and Office Education General Meetings.
VT 008 209 755
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Vocational Guidance General Meetings.
VT 008 210 718
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Research Section Meetings.
VT 008 211 679
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Secondary Department General Meetings.
VT 008 212 679
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Post Secondary Department General Meetings.
VT 008 214 680
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Adult Education Department Meetings.
VT 008 215 718
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. NAITTE Research Committee.
VT 008 216 740
Education for Jobs in a Technological Society.
VT 008 217 680
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Supervision and Administration.
VT 008 218 680
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Board Members Meeting.

STANDARDS
VT 001 693 682
The Dental Assisting Curriculum--Content and Scope.
VT 005 213 ED 026 471 670
Criteria for the Evaluation of Educational Programs in Nursing Leading to an Associate Degree.
VT 005 527 671
Public Health Service Grants for Training Projects, Policy Statement.

STATE ACTION
VT 001 838 664
Developing Human Resources, A Report of Progress in New Jersey Vocational-Technical Education Since January 1965.

STATE AGENCIES
VT 001 828 664
Youth Employment Program of the United States Employment Service.
VT 004 969 751
Careers with the State of Minnesota.
VT 004 972 ED 026 469 712
Statistics in Vocational Rehabilitation. Proceedings of a Seminar, 1966.

STATE DEPARTMENTS OF EDUCATION
VT 004 831 667
Projected Program Activities with Estimate of Total Expenditures for Vocational Education--Fiscal Year 1967.
VT 005 864 672
Annual Report to the Governor and the Members of the 107th General Assembly, 1967.

STATE FEDERAL AID
VT 001 815 664
Progress in Technical Vocational Education Programs Under Title III of the George-Barden Act, Fiscal Years 1959-1964.

STATE FEDERAL SUPPORT
VT 001 703 662
Criteria, Standards and Policies for Vocational Business and Office Education.

STATE LEGISLATION
VT 001 707 720
Area Vocational Technical Schools and Programs, A Summary of Developments by States.

STATE LICENSING BOARDS
VT 006 578 ED 023 861 708
State Licensing of Health Occupations.

STATE PROGRAMS
VT 001 623 661
State-Local Plan for Administration of Distributive Education.
VT 001 680 661
An Administrative Handbook for Vocational Distributive Education in Indiana.
VT 001 689 662
Vocational Agriculture in the Next Five Years, 1963-1968.
VT 001 704 663
Long Range Plans, Wisconsin State Board of Vocational, Technical and Adult Education.
VT 001 838 664
Developing Human Resources, A Report of Progress in New Jersey Vocational-Technical Education Since January 1965.
VT 004 176 ED 022 861 711
Evaluative Criteria for Vocational Technical Programs.
VT 004 831 667
Projected Program Activities with Estimate of Total Expenditures for Vocational Education--Fiscal Year 1967.
VT 005 401 743
Massachusetts Vocational Education Research Coordinating Unit, Second Report for the Period October 1 to December 31, 1967.
VT 005 405 744
Quarterly Technical Progress Report; Sixth, October 1, 1967 - December 31, 1967.
VT 005 406 744
New Mexico Research Coordinating Unit, Progress Report, December 1, 1967 - February 29, 1968.
VT 005 555 744
Establishment of an Occupational Research and Development Coordinating Unit for the State of Rhode Island. Progress Report, January 1 to March 31, 1968.
VT 005 563 671
Model State Emergency Health Service Plan.
VT 005 864 672
Annual Report to the Governor and the Members of the 107th General Assembly, 1967.

STATE STANDARDS
VT 000 830 658
School Program for Practical Nurses.
VT 001 578 659
Criteria for Determining Approval of Vocational Units and Fractional Units in Home Economics.
VT 001 623 661
State-Local Plan for Administration of Distributive Education.
VT 001 650 661
School District Organization. The Vocational School and the Intermediate District.
VT 001 680 661
An Administrative Handbook for Vocational Distributive Education in Indiana.
VT 001 703 662
Criteria, Standards and Policies for Vocational Business and Office Education.
VT 003 804 666
Guidelines for Preparatory Programs, Trade and Industrial Services.
VT 005 567 671
Essentials and Requirements for Reimbursable Office Education Programs, Part I-V.

STATE SUPERVISORS
VT 007 635 ED 025 668 754
National Seminar on Vocational Guidance. 1966. Final Report.

STATE SURVEYS
VT 001 347 770
A Survey of Junior College Work Experience Education Programs, 1962-1963.
VT 004 962 698
State Plan Inventory. Section 3-A, Projections of Employment for the Year 1980.
VT 005 572 701
Manpower in Oklahoma, State Summary. Preliminary Release.

STATISTICAL ANALYSIS
VT 001 526 689
A Least Squares Analysis of Colorado Nonfarm Employment, 1939-1963, With Projections to 1970.

STATISTICAL DATA
VT 001 815 664
Progress in Technical Vocational Education Programs Under Title III of the George-Barden Act, Fiscal Years 1959-1964.
VT 005 058 699
Manpower and Immigration.
VT 006 374 ED 023 853 705
Occupational Employment Statistics.

STATISTICS
VT 004 972 ED 026 469 712
Statistics in Vocational Rehabilitation. Proceedings of a Seminar, 1966.

STENOGRAPHY
VT 006 471 ED 022 920 767
A Study of the Block-of-Time Scheduling in the Secondary Business and Office Education Program in Ohio.
VT 007 917 ED 027 423 686
The Process and Product of Machine Shorthand Programs in New York State Schools.

STUDENT ATTITUDES
VT 005 770 ED 024 786 753
Differences in Some Initial Attitudes of Students Who Complete and Students Who Drop Out in the Wellesley, Massachusetts Adult Education Program.

STUDENT CHARACTERISTICS
VT 001 847 664
They Came to Contra Costa College, 1966-67.
VT 004 573 ED 022 873 712
Characteristics and Performances of High School Graduates and Non-Graduates in One-Year Programs in the Community College System of Institutions in North Carolina.
VT 007 158 ED 023 897 733
Youth with Special Needs in Non-Metropolitan Ohio High Schools.

STUDENT DEVELOPMENT
VT 005 126 738
The Role of Industrial Arts in Tomorrow's Schools.

STUDENT ENROLLMENT
VT 001 800 663
Standard Industrial Classification for Use in Distributive Education.
VT 001 838 664
Developing Human Resources, A Report of Progress in New Jersey Vocational-Technical Education Since January 1965.
VT 001 847 664
They Came to Contra Costa College, 1966-67.
VT 002 425 ED 024 759 682
Guide to Organized Occupational Curriculums in Higher Education.

STUDENT EVALUATION
VT 000 778 710
Trade and Industrial Education Program Analysis Questionnaire.
VT 001 723 710
Part-Time Cooperative Industrial Education as Viewed by Cooperating Employers in Ames, Marshalltown and Newton.
VT 005 746 714
Estimating the Clothing Construction Ability of 8th, 9th, 10th, and 11/12th Grade Pupils.
VT 005 747 714
Evaluation Materials in Family Relations, Tenth Grade.
VT 005 748 715
Evaluation Materials in Family Relations, Eleventh and Twelfth Grade.
VT 005 749 715
Evaluation Materials in Housing, Ninth Grade.
VT 005 750 715
Evaluation Materials in Housing, Tenth Grade.
VT 005 751 715
Evaluation Materials in Foods, Tenth Grade.
VT 005 752 716
Evaluation Materials in Clothing, Tenth Grade.
VT 005 753 716
Evaluation Materials in Clothing, Ninth Grade.

SUBJECT AND IDENTIFIER INDEX

Page

VT 005 754 716
Evaluation Materials in Child Development, Ninth Grade.
VT 005 755 716
Evaluation Materials in Child Development, Eleven and Twelfth Grade.
VT 005 756 717
Evaluation Materials in Family Relations, Ninth Grade.
VT 005 757 717
Evaluation Materials in Foods for Ninth Grade.

STUDENT INTERESTS
VT 001 613 749
Survey of Pupil Interest in Three Home Economics Related Occupations: Child Care Aide, Clothing Construction Aide, Food Service Occupations.

STUDENT LEADERSHIP
VT 001 603 749
So You Want to Be an Officer in the F.F.A.

STUDENT NEEDS
VT 008 211 679
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Secondary Department General Meetings.

STUDENT OPINION
VT 001 527 749
Education and Career Study.

STUDENT PROBLEMS
VT 005 515 753
Color Perception and Color Blindness.

STUDENT PROJECTS
VT 007 375 ED 023 931 683
Workshop Report: Distributive Education Project Development Workshop. June 19-30, 1967.
VT 007 377 ED 023 933 684
Workshop Report: Distributive Education Project Development Workshop. July 30-August 11, 1967.

STUDENT TESTING
VT 005 515 753
Color Perception and Color Blindness.

SUBEMPLOYMENT
VT 005 943 732
Barriers to Employment of the Disadvantaged.

SUBPROFESSIONALS
VT 006 721 ED 022 925 675
Procedural Guide for Program Development in New Careers.

SUCCESS FACTORS
VT 000 602 766
Race and Socioeconomic Status as Moderators in Predicting Machine-Shop Training Success.
VT 001 818 ED 026 454 758
Clinical Evaluation of Predictive Data for Prospective Home Economics Teachers.
VT 004 582 ED 022 881 695
Managerial Perception and Success in Farming.
VT 005 607 ED 025 599 760
The Successful Teacher in Technical Education: The Preparation of the Successful Teacher.

SUMMER INSTITUTES
VT 006 416 ED 022 918 761
Institute for Home Economics Teacher Educators on Preparing Teachers for Occupational Programs. Final Report.

SUMMER MANPOWER RESEARCH INSTITUTE, AMES, IOWA, JUNE 12-16, 1967
VT 006 376 ED 026 485 745
An Interdisciplinary Approach to Manpower Research.

SUPERVISION
VT 008 217 680
Speeches Presented at the Annual Vocational Convention of the American Vocational Association. Supervision and Administration.

SYSTEMS APPROACH
VT 004 592 ED 020 349 695
Systems Design and Nature of Work. Seminar, 1966.
VT 007 469 677
Zoned Analysis Techniques in Planning and Curriculum Development.

TASK ANALYSIS
VT 006 297 ED 026 484 703
Analysis of Tasks in Three Home Related Occupations.

TAXONOMY
VT 007 249 ED 023 913 740
The Design and Evaluation of Vocational Technical Education Curricula Through Functional Job Analysis.

TEACHER BACKGROUND
VT 007 492 763
Profiles of Trade and Technical Teachers: Revised Summary Report 1968.

TEACHER CERTIFICATION
VT 007 468 ED 025 644 763
Trade and Industrial Teacher Education and Certification: Report of a National Invitational Research Development Seminar.

TEACHER CHARACTERISTICS
VT 001 818 ED 026 454 758
Clinical Evaluation of Predictive Data for Prospective Home Economics Teachers.
VT 002 729 ED 024 761 758
Teacher Model; A Model to Guide Curriculum Development for the American Industry Project.
VT 004 678 759
Profiles of Minnesota Day School Trade and Industrial Teachers in the Area Vocational Schools.
VT 005 607 ED 025 599 760
The Successful Teacher in Technical Education: The Preparation of the Successful Teacher.
VT 006 668 ED 023 869 762
Industrial Education for the Visually Limited.
VT 007 492 763
Profiles of Trade and Technical Teachers: Revised Summary Report 1968.

TEACHER EDUCATION
VT 001 485 758
A Follow-Up Study of the First Fifty Graduates of Trade Technical Education.
VT 004 182 ED 022 862 758
Needed Improvements in Distributive Teacher Education.
VT 004 530 ED 022 868 759
An Evaluation of Selected Aspects of Agricultural Education Programs in the Inter-Regional Land-Grant Institutions of the United States.
VT 005 037 ED 016 872 770
Research Visibility. Vocational Education is People--Youth With Special Needs.
VT 005 236 ED 024 775 759
An Anthology of Teacher Education in Agriculture.
VT 005 594 739
New Horizons in Industrial Arts.
VT 005 644 760
The Historical Development of a Post High School Distributive Education Program with Implications for Teacher Education.
VT 006 409 ED 025 618 761
Program of Teacher Education for Environmental Technology (POTEET).
VT 006 416 ED 022 918 761
Institute for Home Economics Teacher Educators on Preparing Teachers for Occupational Programs. Final Report.
VT 006 628 ED 024 801 762
Trade and Industrial Teacher Education: A Research Critique and Model for Action.
VT 006 674 ED 025 622 762
An Analysis of Metal Finishing Technology and its Status in Industrial Teacher-Education.
VT 007 468 ED 025 644 763
Trade and Industrial Teacher Education and Certification: Report of a National Invitational Research Development Seminar.
VT 007 488 ED 025 650 763
A Description and Evaluation of Vocational Teacher Training Programs in the State of Rhode Island.

TEACHER EDUCATORS
VT 008 387 764
Proceedings of the National Association of Industrial and Technical Teacher Educators (NAITTE) Executive Committee Business Meetings at the Annual Vocational Convention of the American Vocational Association. 1968.

TEACHER EVALUATION
VT 000 778 710
Trade and Industrial Education Program Analysis Questionnaire.
VT 005 607 ED 025 599 760
The Successful Teacher in Technical Education: The Preparation of the Successful Teacher.

TEACHER EXPERIENCE
VT 005 644 760
The Historical Developments of a Post High School Distributive Education Program with Implications for Teacher Education.

TEACHER PERSISTENCE
VT 006 503 ED 022 921 762
Factors Related to the Tendency of Iowa State University Agricultural Education Graduates to Not Enter or to Leave the Vocational Agriculture Teaching Profession.

Eleven students participated, ranging in age from 41 to 69 with formal education from 1 year of elementary school to high school graduation. A social worker and a professional nurse assumed the major teaching responsibility and specialists in other fields contributed. Training took place in a geriatric center and included personal care, psychological aspects of illness, transmission of illness, nutrition, body function, provision of a safe and comfortable home environment, hygiene, grooming, and cleaning, cooking, and laundering. Some problems relating to the trainees were lack of physical stamina, inhibiting racial attitudes, conflicting cultural patterns, emotional insecurity and family instability, problems in relating to authority, and limited abilities to read, write, and conceptualize. Eighty-two percent completed the course Jobs and 73 percent were subsequently employed in the health field. Specific benefits to trainees were improvement in grooming and hygiene, development of feelings of self-worth, increased ability to communicate, and improved living standards. (JK)

Chio CAP 66-8375

Dear Miss Foshay:

It is with pleasure that I am transmitting, herewith, the Fifty Seven Week Final Report of Chio CAP 66-8375, the Homemaker-Health Aide training project of Mansfield Memorial Homes.

Eleven (11) different trainees took the 3 basic three (3) month courses and the two (2) advanced career courses. A total of 30 were enrolled since the basic course work was repeated by some trainees once and others twice. We are pleased to report that 82% completed the course work and that 73% are now gainfully employed in the health field. All who completed the course were given opportunities to work in the health field.

It is interesting to note that the level of formal education was not important in the ability of the trainees to achieve the training goals, although simple reading and writing did have a bearing on their attainments. Those with higher formal education grasped concepts more readily, but actual overall performance did not appear to be related to the amount of formal education.

Although personal appearance was not high in the priority when being interviewed for selection since this aspect was considered part of the training, attitudes and interests reflecting flexibility and desire to work with people rather than things were considered vital. Our experience corraborated this pre-judgement. Rigidities in adaptability of certain long time behaviors which became evident were insurmountable in most instances and the trainers had to mobilize other more flexible behaviors to by-pass these rigidities wherever possible so as to elicit learning responses. In this context the trainer's knowledge of the individual trainee's past experience including positions held aided considerably in relating to new content.

October 16, 1967

Among the components considered necessary for successful training as our fifty seven weeks were analyzed are:

1. skill and knowledge of a professional health team in which a professional medical social worker is an integral member
2. high quality training setting so that qualitative standards of personal care can be emulated
3. a one to one trainee-patient ratio
4. an absolute maximum of ten trainees at any one time for proper supervision and guidance
5. continuous relationships with the community to make overt the latent demand for home services so as to provide sufficient home training assignments
6. intensive continuous individualized attention
7. repetition and repetition as a major key to learning
8. the equal willingness of trainers and trainees to learn each others' vocabulary
9. learning by doing with the recognition that traditional classroom reading and writing techniques are not appropriate.

That there were various difficult situations to resolve is evident. Cultural pattern conflicts, such as a male finding it hard to accept authority from a female, were involved. Social unrest produced not only discriminatory feelings between the darker skin Negro trainee and the lighter skin Negro trainee but also produced a fear of entering some homes in portions of the city on the part of both white and Negro trainees, most apparent during and after the Detroit rioting.

Individual health problems were more pronounced than with other employees of the sponsor, Mansfield Memorial Homes, regardless of the ages of the latter. This appeared to be related to cultural patterns of not being accustomed to regular medical and dental check-ups. As a result, a lack of stamina was evident in a high percent of the trainees.

In addition, the trainees were unable to conceptualize and reason from the general to the specific or from a specific to the general. This limited the teaching methodology. Emotional insecurities and family instabilities made it necessary to consistently reassure the trainees while at the same time offering appropriate critique.

October 16, 1967

This necesitated the useage of the professional social worker through consultation and periodically direct contact with the trainee. Further, the trainees experienced difficulties in relating to authority and most specifically to the lines of authority traditional to the health field.

A question is raised as to the durability of future work time because of the impoverished ego structure and/or health and stamina of many of the trainees. This points to our recommendation that training for any duration should include built-in components to follow a trainee for one year and then two years after completion of the training. The data to be obtained and assessed would be invaluable to training programs and to the health field and, of course, to those being trained.

On the positive side, apart from the fact of on-going employment on either a part or full time basis depending upon preferences relating to one's own health or other factors including sources of income, were many individual factors such as:

1. growth of self worth feelings
2. personal grooming enormously enhanced
3. ability to communicate increased
4. capacity to observe multiplied manifold
5. increased involvement in social groups.

In addition to the basic course content, advanced career courses as food service aides, physical therapy aides and occupational therapy aides were given. Other health areas which also appear to be open for advanced training are in the care of the post partum patient, specialized child care such as the retarded and severely physically disabled and as speech therapy aides.

Our findings, while indicative that effective training of sub-professional health practitioners can take place, also holds more profound implications for training programs in the future as attempts are made to fill the increasing shortage of personnel in "quickie" two (2) week workshops for the unskilled. Effective training and learning for sub-professionals takes time if good standards of health care are what we seek and if we are truly desirous of opening up health careers for people previously deprived of such opportunities. Thus, future training courses of this kind should be designed to recognize that a minimum of three and up to nine months for others be included in the time portion of this design, so that such training may be meaningful and effective.

October 16, 1967

Further implications of training based on "learning by doing" suggests that formal classroom approaches, reading assignments and other traditional educational techniques are not valuable and have only a minimal place in this training. Even visual learning through watching demonstrated procedures apparently has only minor value.

In overcoming problems of the trainees' learning and performance, then, our most successful techniques were:

1. repetition of demonstrations and content
2. re-emphasis on performance standards
3. close observation and supervision of their work, and
4. individual evaluation conferences.

The trainees invariably learned more by doing a task themselves, rather than to just be shown or told how to do it.

Thus, the techniques of a professional health team as a faculty, the physical environment of a high quality care setting and repetitive practice of procedures under close professional nurse supervision were found to be among the most significant factors in successful training of Homemaker-Health Aides.

This is, indeed, a highly difficult task, but that it can be accomplished with an enormous amount of energy and dedicated professional talent has been demonstrated.

A momentous training project with import of potential unprecedented magnitude locally and elsewhere has been completed. To all who made this possible - the trustees of Mansfield Memorial Homes, the United States Office of Economic Opportunity, the United States Public Health Service, the United States Administration on Aging, the Mansfield-Richland County Departments of Health, the Richland-Morrow Counties Community Action Program, the Homemaker-Health Aide Advisory Council and to all professionals and citizens who cooperated and especially to the trainees themselves - this service and the enrichment of hopefully all similar services in existance or to be established by training efforts in the United States will remain in grateful tribute. It will be a rare household which will in the years ahead remain untouched by Homemaker-Health Aide services. And many a household will find a new worker adding to its income and its feeling of belonging in an evolving prestigious position.

October 16, 1967

Your views and critique are highly valued and most cordially invited.

Yours sincerely,

Jerome Kaplan

Jerome Kaplan,
Executive Director and
Project Director

JK:sa

Evaluation of the Homemaker-Health Aide Training Project

I. Fulfillment of the Purposes for this Pilot Training Project

The main purposes for Mansfield Memorial Homes to be involved with a pilot training program for Home Health Aides have been met. First of all, we have established methods for training people to become Homemaker-Health Aides. In so doing we learned to delineate the necessary ingredients to successfully train unskilled people in how to give sub-professional health care. We have been able to teach our trainees not only how to give health care but also how to undertake homemaking activities in the variable environment of individual homes.

Secondly, we have had a period of experience in determining when homemaker-health aide service is appropriate or when other kinds of care such as institutional or outpatient therapy or meals on wheels service would be more applicable. On varied occasions we have found that a combination of home services meets patients' needs better than just one service or type or care.

A minimum of two years additional is required to develop more fully Homemaker-Health Aide service requests. We have found that one year was grossly insufficient time to have the number of clients necessary for on-the-job training of Homemaker-Health Aide trainees nor did it give us adequate opportunity in determining appropriateness of Homemaker-Health Aide service as compared to other kinds of service available.

We started this project knowing that the community needed Homemaker-Health Aides. However, only with time and continued effort to acquaint the citizenry and its special publics with the knowledge that such a service exists will it be possible to reach a high percentage of those persons who need Homemaker-Health Aide service.

Finding employment in the health field for untrained persons was another goal of the training project. This was successfully accomplished. Of the eleven (11) different people who began the training program one (1) male had to discontinue training because of his health and one (1) female voluntarily dropped out because of lack of interest. A third trainee, also female, did not graduate from the program although she completed the course work and because of her health and lack of interest is not currently employed by her own choice. Five (5) of the remaining eight (8) are employed as Home Health Aides on either a full time or part time basis according to the amount of time they feel able to work. One of the former trainees (male) is affiliated with the Planned Parenthood Clinic of the local CAP and the two (2) remaining women are working as aide-companions to a chronically ill older woman. Seventy three percent (73%) of the trainees, therefore, have remained in the health field and are making a definite contribution to the health needs of the community.

The present employers of Homemaker-Health Aides were on the Homemaker-Health Aide Advisory Council so that they were well informed about the training project. Prior to employment of a Homemaker-Health Aide, conferences were held with the employer so that the general abilities of the aide were discussed and the specific strengths and weaknesses were identified. This approach is invaluable in providing continued knowledgable supervision of the aide.

II. Necessary Training Elements

A. Full Professional Health Team

One of the necessary elements for training Homemaker-Health Aides is the use of professional personnel with both a social worker and a professional nurse responsible for the overall teaching and supervising.

Other professionals are required as well, so that all the specialized techniques such as ambulating a hemiplegic or serving an appetizing and nutritious meal can be taught by those who know their own field best. The skill and knowledge of a full professional health and nutrition team are requisites, not only as teachers but also as consultants for designing the type and amount of home care to be given. The involvement of a food specialist, speech, physical and occupational therapists, social worker and professional nurse helped to make important contributions to the total training of the Homemaker-Health Aides so that it is difficult to conceive an attempt to train without such a complement of professionals.

B. Professional Health Setting

Another important element in the training of Homemaker-Health Aides is the setting or environment of the training center. We have been fortunate to have the facilities of the GERIATRIC CENTER of Mansfield Memorial Homes available for our use. The GERIATRIC CENTER is accredited as an extended care facility by the Joint Commission on Accreditation of Hospitals and so certified for Medicare by the Social Security Administration. In this building we had a classroom for demonstration. The building further made it possible for the trainees to practice techniques with GERIATRIC CENTER patients and to give personal care under a one to one supervision ratio prior to being placed in home situations. With active therapy departments within the GERIATRIC CENTER there was ample opportunity for close professional supervision of appropriate techniques via demonstration, observation and then practice by the aide trainees. The GERIATRIC CENTER also has a kitchenette-dinette so that homelike cooking equipment was available.

At the GERIATRIC CENTER the trainees had the opportunity to observe modern and progressive care in its highest sense which can be given to the

chronically ill or aged person, ranging from that care related to special dieting needs and means of supplying the patients with food that is physically and psychologically acceptable to providing them with interesting and appropriate diversional activities. The meticulous personal care given to the patients by the nursing staff set excellent examples of quality standards for the trainees to meet when they were the ones giving care.

C. Close Professional Supervision

We found that the trainees needed intensive individulaized attention and direction and that with a maximum of ten in a class we were able to give each one the kind and the amount of supervision that was necessary.

Since each trainee learned at his own rate of speed it is difficult to arbitrarily set a time on course length particularly when teaching those with a variance of intelligence, formal education and past experience. At the end of the first course we wondered if some of our trainees could ever learn enough to be safe, successful Homemaker-Health Aides. We ourselves learned, however, that with added time, constant evaluation and much repetition they could learn.

D. Adequate Course Content, and Repeated Review

In general predicated on our experience, the basic content of the training for Homemaker-Health Aides needs to include:

(1) how to give personal care to people of all ages with emphasis on both the physical abilities and the limitations of those served,

(2) the understanding of psychological effects of illness,

(3) how illness can be transmitted,

(4) normal nutrition,

(5) normal functions of the body,

(6) responsibilities of local public agencies,

(7) the signs and symptoms of illness,

(8) how to provide for a safe, comfortable home environment,

(9) how to clean, cook, and do the laundry using various kinds of equipment,

(10) instruction on good hygiene for the trainee and her patient,

(11) how to achieve good grooming habits,

(12) the relationship between the Homemaker-Health Aide and the employing agency, and

(13) how to improvise in order to give nursing care in diverse settings.

III. Career Advancement

A. Our Methods for Increasing Skill and Understanding Beyond the Core Curriculum

We have trained Homemaker-Health Aides in several areas of career advancement, and, in most instances the Homemaker-Health Aides responded enthusiastically to the specialized area selected. We gave advanced training in the following areas: physical therapy, occupational therapy, nutrition, aide in a protective living residence for the elderly, and as a constant companion to a chronically ill woman. The physical therapist did the instructing of the aide in his department. The food specialist taught the Homemaker-Health Aides in her department by giving intensified teaching and practice on the proper way to store food, plan and prepare meals and how to serve meals. The occupational therapist taught the aide assigned to this department the fundamentals of diversional activity and how to help patients resume the normal activities of daily living. In the other health and nursing component areas of career advancement, the Homemaker-Health Aides were given further training from the Chief Trainer and other professional nurses.

B. Other Areas for Career Advancement

Homemaker-Health Aides could be trained as speech therapy aides, have advanced training in child care, care of the post partum patient among other potential areas. Then, as the need for these special skills arise, the specially prepared Homemaker-Health Aide would be the one given the home assignment.

IV. Administration

A. Internal Administration

The project director was the Executive Director of Mansfield Memorial Homes in which capacity he is directly responsible to the trustees of Mansfield Memorial Homes. He served as the supervisor of the Chief Trainer, who was the deputy director of the training project. The Chief Trainer had the responsibility to train the aides, to coordinate the contributions of the total professional team and to work closely with the project director in creating a climate favorable to translating a community need into actual requests for service.

B. The Advisory Council

An advisory council representing all local health and health related bodies was developed, which included elected membership from the trainees. The council proved to be instrumental as a 'sounding board' for ideas. Regularized reporting was made to the Council. All trainees who were employed, were hired by agencies represented on the council.

At this juncture, attention is called to the minutes of the meetings which were distributed to the sponsor, the council and other involved, interested parties.

The importance of the council lay as a 'sounding board' for ideas, not as a promulgator of ideas. Further, it gave community approval to a much needed service. In addition, it oriented itself to the Homemaker-Health Aide project so that over a period of months the training concept was incorporated within its 'muscles' to the point where several agencies were willing to hire trainees when so approached.

C. Trainee Roles in the Advisory Council

The elected trainees did not undertake any leadership roles in the Council. Their presence, however, probably kept the Council from becoming

involved in issues not directly related to the training project. Membership on the Council did give to the trainees important feelings of status which were then transmitted to all trainees and assisted in the elevation of the Homemaker-Health Aide concept.

V. The Development of Forms

The development of concise, meaningful and workable forms ranging from trainee application forms to the ones used by the receipient of Homemaker-Health Aide service in evaluating the service received, have contributed to organization, clarity, and means of communicating information.

All the forms that have been developed for this training project were the result of the joint efforts of the Project Director, Chief Trainer and Social Worker. These forms, all to be found in the body of the material heretofore forwarded to everyone involved in Ohio CAP 66-8375 and included in the appendix, are:

1. Application for Homemaker Home Health Aide Training
2. Applicant Interview Questionnaire
3. Job Description Homemaker Home Health Aide
4. Certificate of Health
5. Performance Report
6. Letter of Commitment for Employment
7. Trainee Questionnaire
8. Trainee's Evaluation of Training
9. Patient's Daily Record
10. Referral Form For Homemaker Health Aide Service
11. Client/Agency Evaluation Form
12. Recruitment and Homemaker Health Aide service available leaflets
13. Certificate of Graduation

VI. Interviewing Prospective Trainees

Before beginning to interview applicants, conferences were held with the Chief Trainer, Social Worker, Richland-Morrow Counties (Ohio). CAP Assistant Director and the Project Director on which interviewing techniques would best elicit the information and attitudes which were believe to be essential. We agreed that we must determine whether the applicant was genuinely interested in working with all kinds of people, exhibited flexibility, was able to follow simple directions, had a personality suitable to working with those who are ill or debilitated, was interested in learning a marketable skill, give evidence of emotional maturity as well as other areas listed on the interviewing form. We were not concerned whether or not the applicant had achieved a particular level of formal education. We felt, however, that simple reading and writing should not be beyond the capabilities of the applicant. We did not feel that we should let personal appearance and grooming sway our opinion of the applicant one way or the other since we planned on instructing the trainees in these areas to the degree that they needed improvement.

The reason for our concern with attitudes and interests was that we knew these to be exceedingly difficult to modify. On the other hand we felt that the applicant who was interested in doing this kind of work, who liked people, et al, could successfully become a Homemaker-Health Aide with proper training and with the standard of instruction directed toward the level of the trainee's understanding. Thus, selection of applicants was consciously undertaken in such a way so that those selected would have a greater degree of success in a Homemaker-Health Aide training program than haphazard acceptance of anyone who may apply.

During the initial interview, obtaining information related to the applicant's previous work experience was of particular importance. Some of the applicants had worked in commercial laundries, in restaurants, one had most

recently worked at a car wash, another was a railroad baggage handler. Others had done day work as domestics or had been regular baby sitters. Knowing the work background of the trainees made it possible to relate to their past experience in an understanding manner when introducing new material.

VII. The Effects of Past Experiences, Education, Sex and Age on the Functioning and Performance of the Trainees

A. Optimum Past Experience as a Factor

It seems that the most helpful past experience for a Homemaker-Health Aide is that of having done domestic service on a daily basis. For the most part those who had this kind of experience adjusted to not only performing housekeeping activities with diverse equipment in equally diverse environments more readily but quickly adjusted to giving care in first one home and then in another home. More important is the fact that these women did not resent assignments which were primarily with housekeeping components rather than health care components.

Contrary to what was originally thought would happen, throughout the time of the training project we received only one (1) referral for Home Health Aide service that could have been as appropriately filled by a male Aide as by one of the women. During the time that we had men in the training program we did not have any home assignments for them. Our service requests related to intimate personal care for women and/or housekeeping skills that were beyond the abilities of the male trainees. The occasional child care situations that came up were also too complex in nature so that it was not possible to assign our male trainees to them.

The cultural milieu era represented by the background and age of the men who entered the program was such that they had rather definite ideas as to what was "women's work" and what they felt was "man's work."

Giving personal care to men was acceptable to them but some household tasks were not acceptable. For example, ironing was a task that they could not accept as being something that they might do even though it was helpful to the total family situation.

B. Previous Work Experience as a Factor

Because of previous household experience it would seem that women who are trained as Homemaker-Health Aides are the most useful for this kind of service rather than men. Our culture has also frowned on the male being the dominant factor in household duties.

C. Sex as a Factor

Reference is hereby made to the above items, VII A. and B., for the components which made it difficult to either locate home placements for men or to be able to accept certain home placements.

D. Formal Education as a Factor

The formal education of our trainees varied from a year or so of elementary education to those who graduated from high school. Those who had more formal education seemed to grasp concepts more readily but actual overall performance was not related directly to the amount of previous education of the trainee. Native intelligence appeared to influence their learning ability and type of performance.

E. Age and Personal Health as a Factor

Our trainees age range was from forty-one (41) years to sixty-nine (69) years. Before each began the training program their personal physicians stated in writing that their health was good and that they would be able to carry out the vigorous activities of Home Health Aide work. Of the eleven (11) different people who undertook training, nine (9) had health problems that significantly interferred with the work they did or the ability to report for work. We are not referring to illnesses such as colds, gastro-intestinal upsets or other similar, common, transient ills.

The nature of the health problems that our trainees had seems to be related to those more commonly associated with this age group than in younger age groupings and also to their cultural patterns in that they were not accustomed to regular medical and dental checkups, nor did their dietary habits contribute to maintaining good health. Five (5) of the trainees were hypertensives. Of these, two (2) periodically were absent from work or found it necessary to return home during working hours because of their hypertension. Two (2) of the hypertensives were well controlled with medication and their particular chronic condition presented no problems. The other hypertensive usually had no problems as long as she did not try to work too quickly or was not under any kind of stress. This, however, did not make for efficient functioning as a Homemaker-Health Aide.

Several of the trainees had dental problems that resulted in two of them having full mouth extractions, which required hospitalization, while two others had some abscessed teeth that were subsequently extracted.

A number of the Homemaker-Health Aides had arthritis. They were not absent from work because of their arthritis but five (5) were unable to bend down far enough to use good body mechanics in picking up something from the floor. Because of their particular affliction, cleaning things close to the floor was difficult for them.

The two (2) men that were in the training program were unable to tolerate prolonged periods of time standing so this interfered with their work performance.

Some of the trainees exhibited low work tolerance and seemed to need frequent rest periods. As the training continued, a few of these trainees did improve on the amount of work that they could accomplish without resting.

In considering the above, then, it does seem that age is a factor that presents problems with health that would not be as common in those under forty-five (45) years of age.

Age may have been a factor in some of the rigidity of thinking and performing that we encountered during the training periods. On the other hand one of our most flexible Homemaker-Health Aides was also one of the oldest so that we cannot make the statement that all the older trainees exhibited areas of rigidity. Without, however, having undertaken a detailed lifetime personal record and case history and analysis of each trainee, which was not the purpose of this project, it is difficult to assess the cause with the effect. Therefore, the rigidity experienced may have been the same basic behavior patterns of 20-50 years prior.

VIII. Counseling Trainees

From the initial phase of the Homemaker-Health Aide training, the social worker was available to the trainees for individual counseling as needed, including both personal therapeutic counseling as well as maximizing community resources on behalf of the individual trainee, with a specific problem. Such counseling was viewed by the social worker as an ancillary service. Her primary responsibility to the training project was the role of a faculty member. Nevertheless, the easy accessibility to skilled casework services was an added ingredient in terms of a positive training experience for the Homemaker-Health Aide trainees.

A. Maximizing Community Resources

On behalf of three (3) trainees, the social worker worked with the following community agencies: Richland County Welfare Department, including an unsuccessful referral to Title V Work Training program;

Richland County Treatment Center and its Amputee Clinic; Social Security office; and, the Veteran's Service office.

The social worker's knowledge of these agencies, their policies and their available funds was translated into simple understandable terms for these trainees resulting in improved knowledge on the part of certain trainees

in their use of these community agencies. One trainee found it impossible to accept this new knowledge and did not make effective use of the social worker's services in this area.

One trainee who had to leave training for health reasons was enabled to procure a new and better fitting leg prosthesis through the combined resources od Medicare and local philanthropic funds after a social worker referral to a specialized Amputee Clinic in which the trainee's physician also participated.

B. Individual Counseling

The social worker's activities in this area included individual interviews with each trainee, as part of joint evaluation interviews with the Chief Trainer. The chief contribution of the social worker in such interviews would appear to have been in her assistance to each trainee to face certain realities both about his or her particular capacities and in employment following the training period. Motivational techniques were used to test out and stimulate the trainees to become actual workers in the health field. These techniques included ego-supportive approaches to help the trainees to identify with the values and standards of the health field (i.e., the line of authority from physician to R.N. to L.P.N. and Aide, including Homemaker-Health Aide and acceptance of this structure), encouragement of the trainee in terms of his importance as a member of the health team and others.

C. Evaluation

The social worker's observations during the course of the training period suggested that only limited goals could be maintained realistically for this particular group of trainees. The prevalence of numerous health problems during the training period suggested that under actual work conditions, certain trainees might not be able to maintain steady and regular attendance and work performance for health reasons.

The impoverished ego structures of the trainees suggested further that in the unprotected work situation, certain trainees might eventually return to their unemployed condition, being unable to endure the normal stresses and strains of actual work experience. Underlying emotional instability as well as unstable family situations was observed on the part of several trainees which here again would work against successful employment following the training period.

In other words, the social worker had continuing serious questions as to whether such a training project, given under optimum conditions by a full professional team in a high quality health setting could be effective for the majority of the trainees. Such questions can only be answered by the actual demonstrated work experience of the trainees in the months following termination of training.

IX. Summary of the Accomplishments and the Problems of this Training Project

A. Positive Results

1. Personal Changes

We had success in the personal changes that were a direct result of the training. The trainee's grooming habits noticably improved. They began to take pride in their appearance and the cleanliness of their hair. For example, one who had been dying her black hair red, decided that her natural coloring was more attractive and let her hair return to its normal color. Some of the others cut their hair, or in other ways selected a hair style that was pleasing to the eye.

A few of the trainees who had not been in the habit of bathing very frequently began to include this hygiene habit in their daily routine. They took very good care of their uniforms so that they looked neat and clean day after day. Usually their shoes were polished and in good repair. These changes in grooming and hygiene certainly did not occur overnight or even in a week or for a few, a month, but gradually over a period of months with the

encouragement of how nice they looked, these changes did take place.

2. Development of Pride

With the emphasis on how much people with health skills such as they were learning are needed and that they were the first in this area of the state to learn how to be homemakers-health aides, we encouraged the development of pride in themselves and in what they were doing. Many came to us exhibiting a feeling of shame for the kinds of work they had done in the past and for their lack of formal education, but they identified quickly and closely with this training program and referred to themselves as the "pioneers". Whenever there were visitors touring the training center we introduced the Homemaker-Health Aides and their feelings of self worth grew as they learned that we regarded them as being important members of our staff and community.

3. Increased Ability To Communicate

The ability to communicate increased. We used lay vocabulary in discussing anything of a medical nature and found that in time we were able to use some medical terms and that in turn, the trainees not only understood these terms but began to use them too. We stressed our interest in their observations of the patients and the home environment and because of this the trainees related things that they had noticed and also ideas they had to improve such things as the safety of the home or a more efficient way to organize a particular patient's household tasks. The trainees communicated very little initially regarding their patient assignments so the improvement was quite noticeable.

4. Influence of a Steady Income

The influence of a steady income had its impact on the trainees, too. For example one woman has moved four times since November of 1966. Each time she moves it is to an apartment that is a little larger and has more conveniences. She is now living in a three room apartment with central heating,

a shower with hot and cold running water, a gas range, refrigerator and she has a telephone. Others who are becoming more middle class in the way they live do things such as a beauty shop visit once in a while, buy used cars on the installment plan, join social weight reducing clubs among other new variations in social living.

B. Problems Experienced

1. Lack of Stamina

Of the problems we have encountered during the training period, probably the lack of stamina and the poor health of our trainees compared to our other staff was one of the largest.

2. Insufficient Home Placements

The initial lack of sufficient Homemaker-Health Aide clients posed the difficulty of our not being able to have intensive training experience in individual homes to the extent we felt was desirable.

3. Social Unrest

Periodically problems arose because of the current social unrest. Our Negroes discriminated against each other on the basis of the amount of pigmentation some of them had as compared to the amount others had. The location of some of the client's homes was such that many of the Homemaker-Health Aides were afraid to go to this section of town after the Detroit rioting. One of our Negro Homemaker-Health Aides did not want to be assigned to any Negro clients. So race consciousness has had its impact on this project.

4. Effect of Cultural Patterns

We experienced some impediment in the learning and performance of the aides because of their cultural patterns. Our Italian found it hard to accept authority, particularly from women; we had to be very careful so that his ego was in no way bruised. We found his thinking to be very rigid and stereotyped. He was either vocally happy or even more vocally, unhappy.

In all he did,he appeared to be compelled to fit some sort of classic Neopolitan mold.

We also found that our Negro trainees had their own vocabulary with which we became familiar while they increased their vocabulary. An example of the difference in the meaning of a word is the word "bread" which the trainees used to refer to their pay checks. If a friend or far relative died our Negroes felt it imperative to attend the funeral. This resulted in their missing a day or part of a day depending upon whether the funeral was in town or not.

5. Difficulty in Accepting Certain Terminology

For all the trainees the use of socially acceptable terms for elimination was difficult to remember, especially in times of stress. As a result the four letter words which they were accustomed to using were verbalized rather than using their newer vocabulary.

C. Other Special Common Problems

There were certain problems identified as common to all of the trainees. These included their inability to learn effectively through the written or printed word, their inability to apply abstract general health concepts and principles to specific patient situations, their resistance to the authority of professional staff and the prevalence of many emotional and family problems which hindered or retarded effective learning.

1. Traditional Classroom Reading and Writing Techniques Not Appropriate

It was repeatedly evident throughout that the trainees were unable to make effective use of this printed matter for learning despite simplified terms and sentence structure. This approach was abandoned therefore, and used in only a limited way. The trainees had difficulties in transmitting their learning experience in written form as evidenced in writing up their work. It is clear, therefore, that these traditional classroom reading and writing techniques of learning are not useful or appropriate to this type of training course.

2. Inability to Conceptualize

Secondly, the trainees found it extremely difficult to handle an abstract concept and apply it to a specific patient situation. They appeared unable to grasp essential similarities in two (2) stroke patients and only found it possible to discuss each patient separately. They had difficulty in carrying over from one patient to another, so that much time had to be spent by the trainees in helping to broaden the trainees' capacity to do a comparable job with each patient. To put it another way, most of these trainees could not reason effectively from the general to the specific and thus did not have available to them the capacity to maintain a standard of procedure or care from one situation to the next. This was truly a limiting factor to their learning.

3. Emotional Insecurity and Family Instability

A substantial degree of emotional insecurity and family instability was observed among the trainees. These included shaky economic situations, heavy debts with many credit problems, marital problems, problems of child care and with their children generally.

Many personal insecurities were revealed by the trainees in the training discussions and in certain instances proved to be a considerable hindrance to effective learning. Constructive criticism with an eye to improving training and work performance was extremely threatening. Almost always the trainees would react sharply as if under personal attack and apparently were unable to view themselves or their work with much objectivity. A frequent response was to recount specific examples of work done well by the particular trainee, as a method of overcoming the ego blow sustained through the criticism.

4. Relating to Authority and Structure

Many trainees appeared to experience difficulties in relating to authority and most specifically to the lines of authority traditional to the health field. This resistance often expressed itself in passivity, reluctance

to participate in classroom discussion or in clinical demonstrations. Another related method of handling discomfort with authority was in a degree of obsequiousness, or 'apple polishing' with an underlay of resentment only apparent in later comments. Certain aggressive trainees were more forthright in open expressions of disagreement and hostility against the trainer or training coordinator. There appeared to be a deficiency of self-discipline observable in these and other incidents with certain trainees.

In addition to these problem areas there were, as noted earlier, certain other special problems. Specifically identified were 1) rigidities in attitude, related to long-time subcultural minority and/or ethnic group patterns, 2) health problems of some severity with irregular attendance and 3) physical fatigue related to these.

5. Rigidities in Attitude

Of the eleven trainees, 9 were Negro, 2 Caucasian; of the latter two, one was of Italian descent. Of the 9 Negroes, three were of lighter color and were subjected to some hostility by the Negroes of darker pigmentation. Colorful ethnic language describing various bodily functions proved to be deep-seated and difficult to root out. The Italian cultural pattern of supreme masculine authority made it difficult for this male trainee to accept easily, ideas, guidance or direct authority from the woman R.N. trainer. Old folk myths and folk stereotypes in Negro cultural patterns relating to skin care, medications, illness and demands of family members proved stubbornly resistant to modern health concepts and procedures. The wall of passive defense erected for generations by Negroes was clearly observed in these older Negro trainees. It was a real deterrent initially, less so in the later phases of training, to effective training and learning and to free communication.

6. Fatigue

The health of the trainees was generally less good than the other employees of Mansfield Memorial Homes. Of the 11, 5 suffered from hypertension, moderate to severe in degree. Other health conditions noted were diabetes, arthritis, dental problems and in one instance the presence of suspected psychosomatic illness, resembling moderate degree of mental depression. Some of these health conditions appeared stabilized and did not present problems in terms of the training course. In others, irregular attendance related to illness was a negative factor for effective training. In several, fatigue factors related to these chronic health problems appeared to be relevant to low level of work performance.

D. Productive Training Techniques Identified

1. Complete Professional Health Team

It appears that the use of the complete professional health team as faculty for training sub-professional health practitioners is essential in presenting to trainees excellence in standards and variety of skills in the separate disciplines of the professional health team. This technique presents in understandable form the team work concept, so necessary for trainees to grasp and begin their understanding of the importance of their own role in the team effort. We include a professional medical social caseworker as an integral part of the team.

2. High Quality Health Setting

A second factor found effective in training is the use of the high quality health care setting, where standards of care in actual daily practice can be observed and experienced first-hand by the Homemaker-Health Aide trainees.

3. Learn by Doing and by Repetition

Because of the inability of these trainees to learn through use of printed material, repetition of basic concepts many times in the classroom was found to be an effective though time-consuming substitute. Since it was evident that these trainees learned best through repetition, first-hand viewing and most importantly, by actual doing, a large share of content was devoted to "muscle" learning under close supervision. Frequent practice of procedures on a patient with supervising professional nurses at hand became in the majority of instances, the most productive technique of any utilized.

4. Time, Time, time

This finding, while indicative that effective training of sub-professional health practitioners can take place, also holds more profound implications for training programs in the future as attempts are made to fill the increasing shortage of personnel in the health field with "quickie" 2 week workshops for sub-professionals. Clearly, effective training and learning for sub-professionals takes time if good standards of health care are what we seek. Thus, future training courses of this kind must be designed with longer periods of time included in the design, so that such training can be meaningful and effective.

Further implications of training based on "learning by doing" suggests that formal classroom approaches, reading assignments and other traditional educational techniques are not valuable and have only a minimal place in this kind of training. Even visual learning through watching demonstrated procedures apparently has only limited value.

E. Conclusion

<u>In overcoming problems of the trainees' learning and performance, our most successful techniques were:</u>

1. repetition of demonstrations and content
2. re-emphasis on performance standards
3. close observation and supervision of their work, and
4. individual evaluation conferences.

The trainees invariably learned more by doing a task themselves, rather than to just be shown or told how to do it.

Thus, the techniques of a complete professional health team as a faculty, the physical environment of a high quality care setting and repetitive practice of procedures under close professional nurse supervision were found to be the most significant factors in successful training of sub-professional health practitioners as Homemaker-Health Aides.

This is, indeed, a highly difficult task, but that it can be accomplished with a great amount of energy and professional talent has been demonstrated during this momentous period of July 25, 1966 to September 1, 1967.

1. Applicant's Interests, including special likes and dislikes.

2. Applicant's reasons for wanting training. Are goals realistic?

3. Applicant's evaluation of own present skills for the position. Appraisal by interviewer of these as valid and realistic, if possible. Self appraisal?

4. Applicant's feelings and attitudes toward both illness generally and the aging process.

5. Applicant's capacity to be flexible, with human relationships and with illness demands.

6. Overall personal appearance and characteristics. (Cleanliness? Voice? Speech? Teeth?)

7. Physical health. Impression of vigor regardless of age.

8. Literacy. Capacity to read, write and understand directions.

9. General impression of intellectual capacity, regardless of educational level.

HOME HEALTH AIDE TRAINING PROJECT

Ohio 66-8375

JOB DESCRIPTION - HOMEMAKER HOME HEALTH AIDE (Man or Woman)

Summary of Duties

Works in the homes of homebound patients under the supervision of a graduate registered nurse and performs many tasks which do not require professional training or education; gives a variety of personal care services to the patient including bath, care of mouth, skin and hair; assists patient to bathroom or in using bed pan, helps patient in and out of bed, assists with ambulation; helps patient with prescribed exercises which patient and home health aide have been taught by appropriate professional personnel; assists with medications, ordinarily self-administered, that have been specifically ordered by a physician; performs such incidental household services as are essential to the patient's health care at home and necessary to prevent or postpone institutionalization, including menu planning, grocery shopping, cooking, errands to pharmacy or other store, laundry and light household cleaning; performs other assigned duties as appropriate.

Performance Requirements

Responsibility for: handling and serving patients in a manner conducive to their safety and comfort; adhering without exception to instructions issued by Nurse Supervisor; performing duties in accordance with established methods and techniques and in conformance with recognized standards; providing maximum home health aide services within limits defined by delegated tasks, maintaining good housekeeping standards.

Physical Demands: Good physical and mental health; constant standing and walking during work periods; turning, stooping, bending, stretching, and lifting to assist patients; make beds, move and operate household equipment and perform other related tasks; visual and hearing acuity.

Special Demands: Genuine interest in people and in caring for sick persons in the home setting; patience and tact in dealing with patients, their families and visitors; flexibility and capacity to use initiative in utilizing equipment and supplies available in the home in an effective way; some judgement in recognizing symptoms indicative of change in patient's condition or adverse reactions to treatments; awareness of own limitations in emergencies and corresponding duty to report emergencies to Nurse Supervisor immediately in all instances where a higher skill and judgement is required.

Qualifications:

Education: No formal level of education required; must be able to read and write, to understand and carry out directions and instructions, to record messages and keep simple records.

Training and Job Knowledge: Must be certified as a graduate of a Home Health Aide training course which has provided specific knowledge of procedures and techniques involved in administering simple treatments and providing related patient-care services.

Working Environment - Works indoors in patient's home with much variety in conditions as to light, ventilation of rooms, bathrooms, stairs, cooking areas with a variety of cooking and cleaning equipment and supplies available. Possibility of cuts, minor burns, and other normal household accidents. May be exposed to communicable diseases. Possibility of strains (back and other) due to moving or ambulating patients and use of equipment.

I_____, have read the above job description and fully understand the conditions set forth therein, and if employed as a Home Health Aide, I will perform these duties to the best of my knowledge and ability.

HOMEMAKER HEALTH AIDE TRAINEE

PERFORMANCE REPORT

CONFIDENTIAL

Date _____

Name _____ Dept. _____
(Last) (First) (Initial)

(end of 1st month) ☐ (2nd month) ☐ (3rd month) ☐

To The Trainee: This report is designed to provide you with a written record of your supervisor's appraisal of your training so that you will know how you stand and also how you can be effective as a Homemaker Health Aide Trainee. This appraisal is based on your chronological record and other evidence of work performance.

PERFORMANCE STANDARDS GUIDE

QUALITY OF WORK – accuracy, precision, completeness, organization of work; freedom from significant error (disregard quantity).

QUANTITY OF WORK – rapidity of work produced; the amount of work accomplished in a given time; the dispatch with which a task of known difficulty is completed (disregard quality).

DEPENDABILITY – industry; diligence; attentiveness; perseverance; application to duties; concentration on the task at hand.

ATTITUDE – enthusiasm for work; willingness to conform to job requirements, to follow rules and regulations, and to accept suggestions for work improvement; cooperation.

INITIATIVE – resourcefulness; self-reliance; self-starting qualities; alertness; making constructive suggestions.

JUDGMENT – grasping situations and drawing conclusions based on sound reasoning and weighing of outcomes; recognizing and coping with emergencies.

RELATIONSHIPS WITH PEOPLE – getting along with others; effectiveness in dealing with the public, other employees and patients.

GOOD HOUSEKEEPING – personal appearance; attention to neatness, cleanliness, hygienic measures, orderliness, care of equipment, materials and supplies; safety.

ATTENDANCE AND PUNCTUALITY – constructive use of sick leave; promptness in notification of absence; daily reporting habits; use of breaks and other time privileges.

SUPERVISORY ABILITY – proficiency in organizing, laying out and getting out work; leadership.

OVER-ALL RATING – the over-all rating must be consistent with factor ratings and comments, but there is no prescribed formula for computing the over-all rating.

RATING

1	2	3	4	5
Far below Standard	Somewhat below Standard	Standard	Above Standard	Outstanding

Narrative Summary of Rating

Your strong points (where you do your best job; also why items 4 or 5 were checked).

Improvement needed (No one is perfect – this is where you can improve; also why items 1 or 2 were checked).

Comments on Trainee Conference(s): Date(s) of Conference _____

(Chief Trainer) (Date Submitted)

HOMEMAKER/HOME HEALTH AIDE (DRAFT)
of
MANSFIELD MEMORIAL HOMES, INC.

Date_____

This is to certify that _____
(Name of Employing Agency)

agrees to employ _____, who has successfully
(Name)

completed the Home Health Aide training program with the following provisions:

1. The extent of commitment of employment by such agency will be realistically related to the current total community demands for such Homemaker/Home Health Aide services at the time of completion of the training course.

   NOTE: The agency agrees that efforts will be made to awaken and stimulate the community to awareness of the projected Home Health Aide Service during the training period.

2. Employment will be offered to the Homemaker/Home Health Aide on the same basis as that for staff of the agency, including six months probationary period, close supervision and periodic job evaluations. It is to be noted that all employees, including Registered Nurses, Certified Social Workers et al are on a six (6) month probationary period with the agency from the date of employment regardless of their training.

3. Continued employment beyond the probationary period will be offered to the Home Health Aide on the same basis as that for staff of the agency. There will be no subsequent screening of applicants for initial employment upon the successful completion and graduation of the Homemaker/Health Aide training course.

4. The agency will pay the Home Health Aide on an hourly basis, starting at a level consistent with local rates but no lower than the Federal minimum wage, the number of hours per week to be related to actual job assignments, community demand and available sources of funds to meet the actual cost of service.

5. The agency will pay an additional sum per month to the Home Health Aide to cover cost of the Home Health Aide's transportation by bus, or as mileage reimbursement for those Home Health Aides' who are using their own cars, such sum to be determined by the agency on a uniform basis at the time of employment.

6. The agency will provide 2 uniforms at the time of acceptance as a trainee. Additional uniforms are the responsibility of the Home Health Aide. Laundry of uniforms will be by Mansfield Memorial Homes at regular intervals as with other Mansfield Memorial Home employees.

7. The agency will include the employed Home Health Aides in all benefits available to its Nurses Aide staff on the same basis as the Nurses Aide staff, including Social Security coverage, Workmen's Compensation, and any additional fringe benefits which may be developed for agency staff in the future.

8. The agency will include the employed Home Health Aides in its regular appropriate refresher training institutes which are available to the staff of the agency, as part of its continuing in-service training program, and will undertake special content for the Home Health Aide, as indicated.

9. The agency's personnel policies and practices, as set out in Manual of Personnel Policies will apply equally to employed Home Health Aide, including, among others, holidays, sick leave, vacation time, jury duty, separation from employment, grievance procedures, pay days, annual physical examinations, annual tbc skin tests and chest x-rays.

10. The agency fully complies with Title VII of the Civil Rights Act of 1964 and Executive Order Number 11246, which prohibit discrimination because of race, color, religion, sex or national origin.

Trainee Questionnaire

NAME_____ DATE_____

PLEASE MARK T FOR TRUE AND F FOR FALSE.

_____ 1. Cheese is a source of protein.

_____ 2. Most older people are doing very well both mentally and physically.

_____ 3. Kindergarten age children suck their thumbs because something is lacking in their diet.

_____ 4. Most people over the age of 70 are forgetful.

_____ 5. Anybody can use crutches without any special training.

_____ 6. Older people should be encouraged to be as active as is possible for them.

_____ 7. Laxatives should be used as soon as someone thinks they are constipated.

_____ 8. The Public Health department is concerned with sanitation, safe water supply and and the health needs of the community.

_____ 9. The children of a broken home may show how they feel by having temper tantrums, refusing to eat, go to bed and so on.

_____ 10. Meals on Wheels serves one hot, well-balanced meal a day.

_____ 11. Special diets are those for people who have certain food dislikes.

_____ 12. We should not treat very old people like children.

_____ 13. Retarded or dull children can never be taught to learn anything.

_____ 14. There are four basic food groups from which to select when planning well-balanced meals.

_____ 15. There are certain safe and easy ways to help weak or sick people from a bed to a chair.

_____ 16. All older people are "cantankerous" or bad tempered.

_____ 17. In order to work with people you need to be able to make adjustments.

_____ 18. Patients like to know about your problems and personal life.

_____ 19. It is not important if the patient urinates or passes his water every hour or two.

_____ 20. The patient and what he needs is your first concern.

_____ 21. If the patient has a headache it is a good idea to give him an aspirin.

_____ 22. Your personal cleanliness and hygiene is important to your patients.

_____ 23. It is not important to encourage an older person's wish to do things for himself.

24. Your arrival at your assigned home on time is important.

25. A social worker is not an important member of the health services team.

26. Aging and death are part of the whole life process.

27. Making a bed first on one side and then the other saves both effort and time.

28. Germs can enter our bodies from the food we eat, the air we breathe, an opening in our skin, dirty hands and so forth.

29. The Geriatric Center is another name for Mansfield Memorial Homes.

30. Someone who is chronically ill will be well again in a reasonable length of time.

31. A young child's temperature should always be taken by rectum.

32. The patient's home should be taken care of in a way that is acceptable to him and his family.

33. There are some times during childhood when children aren't growing much and as a result don't have much appetite.

34. A hot water bottle should be filled with boiling water.

35. The public health nurse helps the patient with his shopping.

36. Whenever your patient's bowels don't move you should give him an enema.

37. If throw rugs are used in the home of an elderly or disabled person they should be of the non-skid type.

38. When picking something up to carry it, be sure to bend from the waist only.

39. Teeth should be brushed after each meal or snack.

40. Even if you don't feel very well yourself you should make every effort to get to your assignment for that day.

41. If a patient wants to give you a little gift you should take it so his feelings won't be hurt.

42. Digesting food is one example of normal body function.

43. The occupational therapist helps people, who have been sick, get jobs again.

44. Some people need more sleep and rest than others.

45. It is a good idea to skip breakfast or just have coffee especially if one is trying to lose weight.

46. Bathing, not only cleanses the skin but, gives a sense of well-being and social acceptance.

47. Older people have very little oil in their skin.

48. We should not have long fingernails because they can be dangerous.

49. Bed pans and urinals should be cleaned by first rinsing with cold water.

50. Since milk is the most nearly perfect food, babies should be encouraged to drink it and you shouldn't worry whether or not they eat any other foods.

COMMENTS: This will help both you and the Training Program.

1. Were there any questions that were not clear ? Yes ( ) No ( )

2. If you answered yes, write the numbers of any questions that were not clear to you.

3. Were there any words you did not understand? Yes ( ) No ( )

4.. If you answered yes, what were these words that you did not understand?

TRAINEE'S EVALUATION OF TRAINING

Name _____ Date _____

Do you want more practice in: (Please check)

Exploring Careers in Modern Agriculture Related to Land Use and Conservation; A Teacher's Plan for Use with Ninth and Tenth Grade Classes. Teacher Education Series, vol. V, no. 3.

Pennsylvania State Univ., University Park. Coll. of Agriculture. Dept. of Agricultural Education

MF AVAILABLE IN VT-ERIC SET.

Pub Date - 64 59p.

*TEACHING GUIDES; *AGRICULTURAL OCCUPATIONS; *CONSERVATION EDUCATION; *OCCUPATIONAL GUIDANCE; ACHIEVEMENT TESTS; UNITS OF STUDY (SUBJECT FIELDS); GRADE 9; GRADE 10

This guide is designed for teacher use in an agricultural careers orientation planning course and a conservation unit for high school freshmen and sophomores. It was developed as part of a study to compare three methods of training. Major problem areas of the Land Use and Conservation Unit are: (1) Soils and Conservation, (2) Land Capabilities, (3) Conservation Plans, (4) Conservation Services, (5) Testing and Soil Fertility, and (6) Forest and Wildlife Conservation. The Agricultural Occupations Unit includes problem areas: (1) Occupational Information, (2) Modern Agriculture, (3) Exploring Occupations, (4) Opportunities in Agriculture, and (5) Planning My Educational Program. Community situation, learning objectives, and additional references are given for each problem area. Objective-type tests for each unit are included. The suggested time allotment is 18 hours. The abstract of the study for which the materials were developed is included. (DM)

LAND USE AND CONSERVATION

A RESOURCE UNIT
FOR USE BY INSTRUCTORS IN PREPARING A TEACHING PLAN
FOR NINTH AND TENTH GRADE CLASSES

Problem Areas	Dates to be taught
1. Soils and Conservation - Why Is It Necessary to Become Acquainted with Soils and with the Conservation of Soil and Water?	_____
2. Land Capabilities - What Are Land Capability Classes and Why Are They Important?	_____
3. Conservation Plans - How Shall a Soil and Water Conservation Program Be Planned?	_____
4. Conservation Services - Which Conservation Programs and Services Should Be Used?	_____
5. Testing and Soil Fertility - Why Is It Essential to Sample Soil Correctly, to Interpret Test Results Accurately, and to Follow Recommendations Carefully?	_____
6. Forest and Wildlife Conservation - Why Is It Important that We Use Our Forest and Wildlife Resources Wisely?	_____

INTRODUCTION

Current Situation in Community - Students fail to understand:

1. The importance of soil and water conservation.
2. The important decisions which need to be made in land use planning.
3. The necessity of planning a comprehensive conservation program.
4. The place of Government programs and services in conservation.
5. The efficient methods that must be used to increase soil fertility.
6. The importance of forests, wildlife, and recreation to our expanding population.

Learning Objectives - To develop student understanding and appreciation of:

1. The relationship between conservation and standard of living.
2. The factors involved in proper land use classification.
3. The methods to use in planning a comprehensive conservation program.
4. The responsibilities of the Government and the land owner in conservation.
5. The importance of testing soils, interpreting results, and following recommendations.
6. Methods to use in developing forest, wildlife, and recreational resources.

Advance Teacher Preparation:

1. Order visual aids and other materials as indicated in the advance teacher preparation section of each problem area.
2. Make advance arrangements for field trips and resource people.
3. Review objectives and suggested learning activities for each problem area.
4. Assemble booklets and references for each problem area.

Problem Area 1

SOILS AND CONSERVATION - Why Is It Necessary to Become Acquainted with Soils and with the Conservation of Soil and Water?

Current Situation in Community - Students have partial knowledge of:

1. Fundamentals of soil formation
2. Importance of soil and water in land use
3. Importance of conserving soil and water

Learning Objectives:

1. To develop student understanding and appreciation of:
   a. Origin, makeup and importance of soil
   b. Importance of water
   c. Relationship between conservation and standard of living

Advance Teacher Preparation:

1. Review the films: Birth of the Soil and Topsoil
2. Read:
   a. Your Soil - Crumbly or Cloddy?
   b. Our Land and Its Care, pp. 1-17 and 20-25.
   c. Soil Conservation at Home, pp. 1-9.
   d. Land Use and Management Program, pp. 1 and 4.
   e. Gustafson: Using and Managing Soils, Chapter 1.
   f. Foster: Approved Practices in Soil Conservation, pp. 19-31, 44-48.
   g. Knuti, Korpi, Hide: Profitable Soil Management, Chapter 2.

Student Learning Activities:

1. Have each student take the quiz on this problem area.
2. Ask students to look for the important concepts in the film, Birth of the Soil, (10 min.), which you as teacher have identified.
3. After showing the film, discuss the following key points with the class and suggest that important ideas be copied in the student notebook:
   a. What soil is and why it is important.
   b. The composition of an average soil.
   c. On the blackboard, develop with the students a list of the factors important in soil formation. Explain each.
4. With this background, make the following reading assignments followed by a supervised study period and/or reading outside of class:
   a. Your Soil - Crumbly or Cloddy?
   b. Our Land and Its Care, pp. 1-17 and 20-25.
   c. Soil Conservation at Home, pp. 1-9.
   d. Land Use and Management Program, pp. 1 and 4.
5. Have students make a simple drawing of a soil profile so that they are able to recognize and identify various soil layers.
6. Discuss what is meant by "conservation" and why it is important.
7. Have the class make a soil monolith at two different sites (one good type and one poor type).

8. Have students explain how topsoils and subsoils differ in the following characteristics and why each is important:

   a. Color

   b. Texture - (demonstrate how to estimate soil texture by feel)

   c. Structure - (refer to soil monolith)

   d. Moisture-holding capacity

   e. Ease of water and air movement

   f. Depth of soil favorable for root growth

9. Discuss the following key questions:

   a. What are the important factors which reduce the productiveness of Pennsylvania soils?

   b. What steps can a farmer take to increase the productivity of his soils?

   c. How do types of soil affect the city and suburban dweller?

   d. What is the economic importance of soil and water conservation to our Nation?

10. To summarize the study of this problem area, show the class the film, Topsoil.

Suggested List of Additional Learning Resources:

1. Soil Erosion - The Work of Uncontrolled Water. U.S.D.A., S.C.S. A.I.B. 260.

2. How to Control a Gully. U.S.D.A., Farmers' Bulletin 2171.

3. Sediment Is Your Problem. U.S.D.A., S.C.S., A.I.B. 174.

4. How to Recognize Erosion in the Northeast. U.S.D.A., S.C.S., A.I.B. 27.

5. Teaching Soil and Water Conservation. U.S.D.A., S.C.S., Pa. 341.

6. An Outline for Teaching Conservation in High School. U.S.D.A., S.C.S., Pa. 201.

7. Soil Monoliths, local Soil Conservation Service office.

Quiz - Problem Area 1

Circle T for true or F for false.

T F 1. Plants, like people, require air, water, and food.

T F 2. Renewable resources include soil, coal, wildlife, and iron.

T F 3. Soil texture refers to the size of soil particles.

T F 4. Each new family in the U.S. needs, on the average, about one acre for living space, transportation and service facilities.

T F 5. Public agricultural land produces practically all of our Nation's food.

T F 6. Crumb and granular structured soils are unfavorable for plant growth.

T F 7. Soils, like people, have varying capabilities.

T F 8. Permeability is of little importance to the farmer and suburban land owner.

T F 9. A soil survey is an inventory of soil resources.

T F 10. Most soils are composed of layers called horizons.

Problem Area 2

LAND CAPABILITIES - What Are Land Capability Classes and Why Are They Important?

Current Situation in Community - Most students do not understand the basic, important decisions which need to be made in selecting the proper use for each type of soil on each field or suburban lot.

Learning Objectives:

1. To develop student understanding and appreciation of:
   a. Major soil areas of the state
   b. Factors involved in classifying land according to land use capability classes
   c. The necessity for making maximum use of each acre

Advance Teacher Preparation:

1. Review the film: Raindrops and Soil Erosion
2. Read:
   a. Pennsylvania Teaching Guide to Natural Resources Conservation, p. 28
   b. What Is a Conservation Farm Plan?
   c. Agricultural Land Resources, pp. 2-9
   d. Land Use and Management Program, pp. 2-7
   e. Foster: Approved Practices in Soil Conservation, Chapter 1
3. Arrange for field trip to an unplanned farm with S. C. S. personnel as resource persons. Each student needs a clipboard.

Student Learning Activities:

1. On a Pennsylvania map have each student designate six major soil areas of the State. Write a brief general description of the soil in your community.

2. Make the following reading assignment and explain when students are to do the reading:

   a. What Is a Conservation Farm Plan?

   b. Agricultural Land Resources, pp. 2-9

   c. Land Use and Management Program, pp. 2-7

3. On a field trip have:

   a. Students make a simple map of the farm showing need for soil and water conservation.

   b. The S. C. S. representative discuss the following with the class:

      (1) What is the importance of land use classification (or of making a land capability inventory)?

      (2) How can areas or fields be divided and identified for classification purposes?

      (3) Why is depth of soil important?

      (4) What is the importance of permeability (air and water movement in the soil)?

      (5) Why are color and amount of surface soil important?

      (6) Why are texture and structure important physical features?

(7) One or more methods of determining percent of slope and length of slope. Also, have students demonstrate how to determine percent of slope.

(8) Kinds and degree of erosion

(9) Stoniness

(10) Explain how the soil drainage class is determined

(11) Into what two broad groups can all land be classified?

c. Have students judge three or more sites using the land use and management score card.

4. Summarize this problem area with the film, Raindrops and Soil Erosion.

5. Have each boy make a map, similar to the one in activity #3, for his own farm or lot.

Suggested List of Additional Learning Resources:

1. The Measure of Our Land. U.S.D.A., S.C.S., Pa. 128.

2. Soil and Water Conservation Pays Dividends. International Harvester Co., Chicago, Illinois.

3. Work Unit Technical Guide - Vol. I and Vol. II, Soil Conservation Service (consult local County Work Unit Conservationist).

Problem Area 3

CONSERVATION PLANS - How Shall a Soil and Water Conservation Program Be Planned?

Current Situation in Community - A great many students do not understand:

1. The purpose of a comprehensive conservation program for a farm or suburban lot.
2. How to plan a comprehensive conservation program.

Learning Objectives:

1. To develop student understanding and appreciation of:
   a. Why a farmer, a rural non-farm and/or suburban landowner should have a conservation plan.
   b. How a farmer, a rural non-farm and/or suburban landowner may have a conservation plan prepared.

Advance Teacher Preparation:

1. Have students bring in the conservation plans for their home farm or place of residence. If not available, borrow sample plans from the local S. C. S. office.
2. Review the film: Beyond Tomorrow
3. Read:
   a. One Step at a Time
   b. Soil Conservation at Home, pp. 11-17
   c. Soil Conservation Districts--what they are, how they work, how S. C. S. helps them

d. Man is the Steward, pp. 6-11

e. Conservation Agreement Form

4. Arrange for S. C. S. personnel as resource persons

Student Learning Activities:

1. Introduce the problem area with the film, Beyond Tomorrow, (26 minutes). Advise students to note the destructive cycles illustrated, the conservation planning involved, practices explained, etc.

2. After a discussion of the important points of the film, make the following reading assignments:

   a. One Step at a Time

   b. Soil Conservation Districts--what they are, how they work, how S. C. S. helps them.

   c. Man is the Steward, pp. 6-11

   d. Work Unit Technical Guide, Vol. I

   e. Conservation Agreement Form

3. Examine with the students the sample conservation plans and discuss with them what is meant by a conservation plan for a farm, a rural non-farm or suburban lot. Include color coding system, symbols, etc.

4. Discuss the main job of the Soil Conservation District:

   a. List the names and addresses of the local directors.

   b. How are the directors chosen?

   c. How does a landowner become a "cooperator" with the district?

   d. What organization is responsible for furnishing technical assistance to the district?

5. Ask the S. C. S. representative to take the students through the next step following the field trip in problem area 2. Have him discuss with the class the procedure for a farmer or non-farm landowner to follow in preparing a conservation plan.

   a. Important decisions that need to be made in farm planning:

      (1) Consider soil types, crops, livestock, woodlot, wildlife

      (2) Conservation measures needed such as drainage, strip cropping, contouring, terracing, etc.

   b. Who writes the recommendations for the plan?

   c. How would a plan for a residential tract differ from one for a farm?

   d. How is a conservation plan put into operation?

   e. What other people or organizations might be interested in this type of planning?

Suggested List of Additional Learning Resources:

1. Grass Makes Its Own Food. U. S. D. A., A. I. B. 223
2. Soil and Water Conservation Pays Dividends, pp. 8-20, I. H. C.
3. The Measure of Our Land. U. S. D. A., S. C. S., Pa. -128
4. Strip Cropping for Conservation and Production, U. S. D. A. Farmers' Bulletin 1981
5. Grass Waterways in Soil Conservation. U. S. D. A., Leaflet 477
6. Pennsoil. U. S. D. A., S. C. S., Harrisburg, Pa.

Problem Area 4

CONSERVATION SERVICES - Which Conservation Programs and Services Should Be Used?

Current Situation in Community - Students need to understand:

1. How Government programs and services fit into the total conservation program.
2. That many landowners use some of the services available, but are not acquainted with others.

Learning Objectives:

1. To have students:
   a. Learn how to obtain the services of various agricultural agencies.
   b. Become aware of the responsibilities of both the Government and the landowner and/or the operator in putting services and practices into use.

Advance Teacher Preparation:

1. Contact the County A. S. C. S. office manager as one of the resource persons for this problem area. Ask him to secure copies of the current Handbook of the A. C. P. in Pennsylvania, the current County A. S. C. S. Handbook, and of various forms used.
2. Also contact the County Supervisor of the Farmers Home Administration in your county. Ask him to discuss conservation loans available.

3. Read:

   a. A Conservation Partnership

   b. Man is the Steward, p. 12

Student Learning Activities:

1. Point out to your students that this topic is a logical follow-up to problem area 3. After a conservation program has been planned, how can a landowner with limited finances carry it out? Have students read:

   a. A Conservation Partnership

   b. Man is the Steward, p. 12

2. Ask your county A. S. C. S. office manager to discuss and answer questions on:

   a. The A. C. P. Program of the U. S. D. A.

   b. The conservation services available in your county.

   c. How a landowner may obtain the services in which he is interested.

   d. The extent of cost-sharing available in your county.

   e. The responsibilities of participating farmers. (Maintenance must be emphasized).

3. Request the County Supervisor of F. H. A. to discuss and answer questions on:

   a. Types of conservation loans available for carrying to completion conservation practices.

   b. How a landowner may obtain a loan.

4. Discuss the following key questions:

   a. What is the main job of the Agricultural Extension Service in a total conservation program?

   b. When would you use the services of the Pennsylvania Game Commission?

   c. When would you use the services of the Pennsylvania Fish Commission?

   d. When would you use the services of the Pennsylvania Department of Forests and Waters?

Suggested List of Additional Learning Resources:

1. Answers to Questions about the Agricultural Conservation Program. U.S.D.A., A.S.C.S., Pa. 293

2. What Vocational Agriculture Teachers and Supervisors Should Know About A.C.P. Department of Agricultural Education.

Problem Area 5

TESTING AND SOIL FERTILITY - Why Is It Essential to Sample Soil Correctly, to Interpret Results Accurately, and to Follow Recommendations Carefully?

Current Situation in Community - Students need to recognize:

1. That soils of low fertility are more subject to erosion than fertile productive soils.
2. The most economical ways to increase soil productivity.

Learning Objectives:

1. To have students understand and appreciate:
   a. The importance of testing soil and how to develop skill in taking soil samples.
   b. The importance of lime, its effect on acid soils, how to determine the amount of lime needed, the kinds of liming materials available and when and how each should be applied.
   c. How to interpret and apply soil test results in setting up fertilizing plans.

Advance Teacher Preparation:

1. Review the slide set, filmstrip, or leaflet on How to Take a Soil Sample.
2. Secure necessary sampling equipment.
3. Obtain soil test kit and field information forms from County Agent.
4. Read:
   a. How to Get Good Soil Samples

b. Fertilizer Facts - duPont

c. Field Records

Suggested Learning Activities:

1. View and discuss the slides, filmstrip, or the leaflet on How to Take A Soil Sample.

2. Discuss with the students the pamphlets:

   a. How to Get Good Soil Samples.

   b. Fertilizer Facts - the section on soil testing.

3. Demonstrate correct soil sampling procedures in the field:

   a. Discuss the proper time for sampling soil.

   b. Describe and show how to make a composite sample.

   c. Explain the value of the information sheet in applying for a complete soil test and how it is compiled.

4. Have students take soil samples on home farm or lot, prepare and send them in for testing.

5. What are the essential elements needed by plants?

6. On the blackboard, list the important factors to consider in selecting and applying lime.

7. List the important factors to consider in selecting and applying fertilizers.

8. Discuss the type of soil fertility records available:

   a. What records should be kept and why?

   b. Who should assist the farmer in setting up a soil fertility program?

Suggested List of Additional Learning Resources:

1. Know What's in Your Fertilizer Bag. Am. Potash Institute
2. Our Land and Its Care, pp. 18-45. Nat. Plant Food Institute
3. Soils, Phosphates, and Mixed Fertilizers. W.R. Grace and Co., Davison Chmical Division, Baltimore 3, Md.
4. Soil Fertility Records. U.S. Steel Corp., Pittsburgh, Pa.
5. For the Record. Spencer Chemical Co., Kansas City, Mo.
6. Crops and Soils Record Book. The Pennsylvania State University, Agricultural Extension Service

Problem Area 6

FOREST AND WILDLIFE CONSERVATION - Why Is It Important that We Use Forest and Wildlife Resources Wisely?

Current Situation in Community - Most students do not understand:

1. The importance of the forests or the values of wildlife in this state.
2. The many benefits to be derived from proper forest and wildlife management.

Learning Objectives:

1. To develop student understanding and appreciation of:
   a. Importance of forests, forest products, and wildlife.
   b. Multiple uses of our forests.
   c. Proper wildlife management.

Advance Teacher Preparation:

1. Review the film: The Brandywine - A Watershed at Work or Return to Eden.
2. Read:
   a. Our Forest Bounty
   b. Conservation on Farm Woodlands
   c. Forest Land Use - Everybody's Concern
3. Review:
   a. Water for Farm and City
   b. Rural Areas Prosper Through Small Watershed Program

c. More Wildlife Through Soil and Water Conservation

d. A Conservation Project for Future Farmers

e. Food and Cover for Farm Wildlife

f. Outdoor Recreation on the Nation's Farmland

g. What is a Watershed?

4. Arrange for resource persons: District Service Forester; Game Protector; Fish Warden.

Student Learning Activities:

1. Discuss with the students the place and importance of forestry in Pennsylvania.

2. Invite the district forester in for a discussion on managing our Pennsylvania forests for "multiple uses."

   a. Production of Wood and Wood Products.

   b. Water.

   c. Recreation.

   d. Scenic Beauty.

3. Discuss the possibilities of a school forest laboratory and/or a school nursery.

4. Assign one or more students to report on each of the following pamphlets:

   a. More Wildlife Through Soil and Water Conservation.

   b. Outdoor Recreation on the Nation's Farmland.

   c. Water for Farm and City.

d. What is a Watershed?

e. Rural Areas Prosper Through Small Watershed Program.

f. Food and Cover for Farm Wildlife.

g. A Conservation Project for Future Farmers.

6. Ask the local game protector to serve as a resource person to discuss:

a. The Pennsylvania Game Laws

b. The carrying capacity of game lands in your area

c. Why wildlife must be harvested like any other crop

d. How the type of habitat determines the kinds of wildlife found in the area.

e. How the carrying capacity of lands may be improved

f. A Conservation Project for Future Farmers

g. Hunter Safety Program

7. Arrange for the local fish warden to discuss:

a. The Pennsylvania Fish Laws

b. How fish are limited by the carrying capacity of their environment

c. The effects of strip-mining on fishing

d. How to manage a farm pond for best fishing results

8. Discuss the pressing state-wide need for increased private recreational facilities and the possibilities in your area for:

a. Vacation farms

b. Picnicking and sports areas

c. Fishing waters

d. Camping, scenery, and nature recreation areas

e. Hunting areas

f. Hunting preserves

g. Selling, recreation land or recreation use rights

9. Summarize this problem area with one of the films: The Brandywine - A Watershed at Work or Return to Eden

Suggested List of Additional Learning Resources:

1. Better Hunting and Fishing on Small Watershed Projects, U.S.D.I., Cir. 100
2. Making Land Produce Useful Wildlife, U.S.D.A., Farmers' Bulletin 2035
3. Make Your Farm Pond Safe, U.S.D.A., S.C.S., Pa. 396
4. How You Can Become A Tree Farmer - American Forest Products Industries, Inc.
5. Growth of A Tree - American Forest Products Industries, Inc.
6. Soil Conservation Tips for Sportsmen, U.S.D.A., S.C.S., Pa. 400
7. Land of Plenty, Farm Equipment Institute

EXAMINATION ON LAND USE AND CONSERVATION

ON THE SEPARATE ANSWER SHEET, PLEASE BLACKEN THE LETTER FOR THE BEST ANSWER TO EACH STATEMENT.

1. The greatest amount of damage to the topsoil in the U.S. has been caused by
   a. improper fertilization
   b. erosion
   c. leaching
   d. improper crop rotation

2. The most valuable resource in the following list is
   a. men with intellectual capacity and understanding
   b. iron ore deposits
   c. virgin timberland
   d. crude oil deposits

3. The most important reason for conservation is to
   a. increase the yearly amount of rainfall
   b. reduce a farmer's income tax
   c. prevent drought
   d. insure an adequate water supply for this country

4. The most important practice in soil and water conservation is
   a. terracing
   b. strip cropping
   c. land use planning
   d. crop rotation

5. The total depth in inches of topsoil and subsoil of desirable texture and structure normally needed for the growth of adapted crops is
   a. 56" to 60"
   b. 36" to 40"
   c. 20" to 26"
   d. 10" to 15"

6. On similar types of soil, farmers who use soil and water conservation practices
   a. make less money than farmers who do not
   b. make the same amount of money as farmers who do not
   c. make more money than farmers who do not
   d. quit farming because of a price decline sooner than farmers who do not

7. Texture of surface soil refers to
   a. the rate at which water moves out of the soil
   b. the color of topsoil
   c. the depth of topsoil
   d. the proportion of gravel, sand, silt, and clay (size of soil particles)

8. Which one of the following is not a renewable resource
   a. iron
   b. forests
   c. soil
   d. wildlife

9. Modern conservation has taken a positive approach to conservation which stresses
   a. limiting the use of certain natural resources
   b. forbidding the use of certain natural resources
   c. wise and compatible use of certain natural resources
   d. no set policy concerning the use of certain natural resources

10. Soil structure refers to
    a. the fitness of soil for cultivation
    b. the grouping or arrangement of soil particles
    c. the strength of soil particles
    d. the color and depth of topsoil

11. The most widespread hazard limiting land capability is
    a. excess water
    b. unfavorable soil
    c. adverse climate
    d. susceptibility to erosion

12. Soil, water, plants, and animals are
    a. dependent upon each other
    b. competitors
    c. not related to each other
    d. only distantly related to each other

13. Percent slope is important because
    a. it can be easily measured by use of an Abney level
    b. steeper slopes make the use of farm machinery difficult
    c. it can be measured in more than one place on a long slope
    d. it affects the speed at which water will flow and cause erosion

14. Conservation farm planning involves
    a. determining what crops to grow on your land
    b. deciding how much livestock to keep on your farm
    c. conserving the soil for the future while increasing production efficiency
    d. determining when to remodel the farm buildings

15. Making the decision to practice effective conservation depends largely upon
    a. possessing technical "know-how"
    b. creating the proper attitude
    c. what a neighbor does
    d. the state of fertility of the soil

16. A soil survey map of a farm will show
    a. land capabilities, soil types, slope, erosion, drainage and fertility
    b. the kinds of soil on the farm
    c. the use to be made of each acre
    d. the kind of protection each acre needs

17. The conservation farm plan is based on
    a. the finances available for carrying out the practice
    b. the soil survey map and the needs of the farm enterprise
    c. the suggestions of the Soil Conservation Service personnel
    d. the practices used on neighboring farms

18. The organization responsible for furnishing technical assistance to the soil conservation district is the
    a. State Agricultural Stabilization and Conservation Service
    b. State Agricultural Extension Association
    c. State Soil Conservation Commission
    d. U. S. Soil Conservation Service

19. The main job of a soil conservation district is to help
    a. farmers finance conservation practices
    b. local contractors with soil and water conservation jobs
    c. farmers make and carry out conservation plans
    d. farmers put recommendations into effect immediately

20. When purchasing a home site in a suburban area, select one where the soil has
    a. a deep rooting zone and is of loamy texture and good structure
    b. a balanced nutrient supply
    c. the proper degree of acidity for the plants to be grown
    d. a balanced nutrient supply and proper reaction for plant growth

21. A community land use plan suggests
    a. that each landowner must take care of his own conservation problems
    b. that suburban communities do have erosion and water runoff problems
    c. how private and public improvements and land uses should be related to each other
    d. that the Soil Conservation Service can do little to aid in suburban development

22. The practices included in your county agricultural conservation program are
    a. determined at the Federal level
    b. determined at the State level
    c. the ones farmers already use to the extent needed in the county
    d. selected by representatives of agricultural agencies and organizations within the county

23. The Farmers Home Administration may
    a. lend farmers money for certain conservation practices
    b. assist farmers with technical conservation problems
    c. carry out conservation research work
    d. provide loans for automobiles

24. A watershed refers to
    a. a privately owned area that drains into a particular stream or other body of water
    b. the land area that drains into a particular stream or other body of water
    c. a Federally owned area that drains into a particular stream or other body of water
    d. none of the above

25. A complete soil test indicates whether the soil needs
    a. calcium
    b. phosphorous
    c. potassium
    d. lime, phosphorous and potassium

26. A soil sample should be taken to plow depth which is usually
    a. 2-3 inches
    b. 4-5 inches
    c. 6-8 inches
    d. 9-12 inches

27. How much money a farmer spends for fertilizer depends upon
    a. the market value of the product
    b. the cost of the fertilizer
    c. the productive capacity of the soil
    d. product value, fertilizer cost and soil productivity

28. Subsoil
    a. has no definite effect on plant growth and land use
    b. has a definite effect on plant growth and land use
    c. examination will not indicate leaching or weathering
    d. with different horizons and physical properties is desirable

29. In regard to water potential, Pennsylvania has
    a. more rivers and streams than any other state in the U. S.
    b. the same number of rivers and streams as its largest border state
    c. the same number of rivers and streams as the average state in the U. S.
    d. fewer rivers and streams than any other state in the U. S.

30. Forests are valuable to man for
    a. the approximately 5,000 different wood products
    b. the wildlife produced
    c. the recreational opportunities
    d. all of the above factors

31. Water
    a. is industry's most important raw material
    b. consumption by agriculture exceeds that by industry
    c. use in the U. S. has risen slowly since 1900
    d. problems in the U. S. are of little importance

32. When the pH of a soil is 5.5, it is said to be
    a. neutral
    b. acid
    c. basic
    d. fertile

33. The two forces of nature which are the <u>primary</u> causes of soil erosion are
    a. soil type and slope
    b. wind and soil type
    c. raindrops and wind
    d. water and slope

34. The following soil will hold the most water per cubic foot
    a. fine sand
    b. soil high in humus
    c. silt loam
    d. clay loam

35. Soil conservation practices should
    a. be followed regardless of profits realized
    b. be carried out to maintain soil fertility
    c. increase fertility, production and profits over a period of years
    d. be carried out to obtain maximum production in any one year

36. One of the most serious pollutants of our fishing waters is
    a. silt
    b. tree stumps
    c. sand
    d. gravel

37. Wildlife habitat development should
    a. not be considered in land use planning
    b. be considered a part of a basic land use and conservation plan
    c. be a responsibility of the hunter and fisherman
    d. not be a part of the cropland or woodland areas

38. Cropland practices helpful to wildlife are
    a. clean fall plowing
    b. early season mowing of watercourses and headlands
    c. cropping systems that include grass-legume meadows
    d. burning of fence rows and crop residues

39. Recreation business for farms
    a. can increase the acreage in cropland
    b. can aid in reducing the tax base
    c. is not likely to expand in the future
    d. may provide additional income to farmers

40. Recreation
    a. is a multi-million dollar industry that depends upon clean, attractive water
    b. has limited relation to land use and conservation
    c. facilities available have little effect on attracting industry and labor to an area
    d. will be of less importance in future years

AGRICULTURAL OCCUPATIONS

A RESOURCE UNIT FOR USE BY INSTRUCTORS IN PREPARING A TEACHING PLAN FOR NINTH AND TENTH GRADE CLASSES

Problem Area	Dates to be taught
1. Occupational Information - Why Is It Essential for Students to Study Occupational Information?	_____
2. Modern Agriculture - What Does Modern Agriculture Involve?	_____
3. Exploring Occupations - What Are the Three Important Steps?	_____
4. Opportunities in Agriculture - Why Is There a Challenging Future in Agriculture?	_____
5. Planning my Educational Program - How Shall I Prepare for an Agricultural Occupation?	_____

INTRODUCTION

Current Situation in Community:

1. Parents and high school students lack information concerning the scope of and the employment opportunities in modern agriculture.
2. High school students need to learn how to obtain and evaluate occupational information.

Learning Objectives:

1. To develop student understanding and appreciation of:
   a. Why occupational information is important now.
   b. The modern concept of agriculture.
   c. The important steps in exploring occupations.
   d. The career possibilities in the broad field of agriculture.
   e. The procedure for securing and using information and guidance about various careers in order to be realistic in the selection of a vocational goal.
   f. Post-high school preparation for and advancement in production, distribution, technical and professional occupations.

Advance Teacher Preparation:

1. Discuss this unit with the school guidance counselors and administrators.
2. Check student information available in the school guidance office - test scores, grades, class rank, etc.

3. Become thoroughly familiar with career possibilities in agriculture.
4. Order visual aids and other materials as indicated in the advance teacher preparation section of each problem area.
5. Review objectives and suggested learning activities for each problem area.
6. Assemble booklets and references for each problem area.

Problem Area 1

OCCUPATIONAL INFORMATION - Why Is It Essential for Students to Study Occupational Information?

Current Situation in Community:

1. Students may not realize that thought should be given to the selection of a broad occupational field early in their high school years.
2. Students are not aware of the importance of making correct occupational choices.
3. Students have not thought about the possibility of changing jobs perhaps several times during their lifetime.

Learning Objectives:

1. To develop student understanding and appreciation of:
   a. The importance of exploring various occupations at this time in order to locate broad areas of agricultural interests.
   b. The importance of broad, basic agricultural training for our rapidly changing economy.
   c. The importance of choosing a life's work.

Advance Teacher Preparation:

1. Review film: Personal Qualities for Job Success or Choosing Your Occupation or filmstrip - Look at your Future.
2. Read: Your Future is What You Make It., pp. 3-15 or How to Get and Hold the Right Job, pp. 1-7 and pp. 15 & 16. Exploring Careers in Modern Agriculture, pp. 1-8.

Student Learning Activities:

1. List on the chalkboard various jobs in agriculture that students can name quickly in the community, county and state.

2. Ask students to look for the important points stressed in one of the films or in the filmstrip, Look at Your Future. (Initiative, good personal appearance, business-like work habits, willingness to take criticism, ability to get along with others).

3. After showing the film, discuss the key points to be copied in the students' notebooks.

4. With this background, discuss Your Future is What You Make It, pp. 3-15, or How to Get and Hold the Right Job, pp. 1-7, 15-16.

5. After the students have read, Exploring Careers in Modern Agriculture, pp. 1-8, discuss:

   a. Meaning of (1) career (2) occupational information and occupational guidance (3) skilled worker, technician, professional worker.

   b. Major satisfactions people receive from work.

   c. Why people are satisfied in many different kinds of jobs.

6. Explain the common mistakes (blind spots or career hazards) that are responsible for much of the faulty thinking of students about occupations. Examples would include: the outdoor fallacy, parental influence, appeal of glamour or adventure, immediate chance for a job, social status or prestige, failure to consider opportunities for employment, one-track ambition or close-mindedness, mistaken aptitudes, occupations of the future, and the idea that "anyone can succeed in any occupation if he works hard."

Problem Area 2

MODERN AGRICULTURE - What Does Modern Agriculture Involve?

Current Situation in Community:

1. Many persons still believe that agriculture is farming only.
2. Parents and students do not realize the tremendous size and scope of the total agricultural industry.
3. Parents and students do not think of the modern American farmer as a large purchaser of goods and services.

Learning Objectives:

1. To develop student understanding and appreciation of:
   a. The modern concept of agriculture.
   b. The effect of modern agriculture upon the entire American economic system.

Advance Teacher Preparation:

1. Review films: A Step Ahead, A New Word for Farming or Careers In Agriculture.
2. Read: Exploring Careers in Modern Agriculture, pp. 9-15.
   Now--10 Years Later Still Fewer, Larger, Richer, pp. 1-26.
   Background on Our Nation's Agriculture.

Student Learning Activities:

1. Advise students of the concepts to look for in the films:
   a. Exploring Careers in Modern Agriculture, pp. 9-15.

b. Now--10 Years Later Still Fewer, Larger, Richer, pp. 1-26.

3. Discuss the key points in each reference under #2.

a. What is meant by the following terms:

(1) Agindustry

(2) Agribusiness

(3) Off-farm agricultural occupations

(4) Agricultural professions

b. Explain:

(1) The change in number and size of farms

(2) The changes in the output per farmer

c. What phases of the agricultural industry are expanding and employing more people?

d. Why are farmers important purchasers?

e. Describe the modern American farmer

Problem Area 3

EXPLORING OCCUPATIONS - What Are the Three Important Steps?

Current Situation in Community - Students are not aware of:

1. Efficient procedures to follow in considering various occupations.
2. The importance of a thorough investigation of occupations.
3. The various factors which affect the choice of a career.

Learning Objectives:

1. To develop student understanding and appreciation of:
   a. The value of education and training.
   b. The three important steps in exploring occupations:
      (1) Looking at the job.
      (2) Individual appraisal.
      (3) Matching the individual with a job.

Advance Teacher Preparation:

1. Ask a guidance counselor to serve as a resource person.
2. Check: Student information available from school guidance office - various test scores, grades, class rank.
3. Review: Filmstrip and record or the booklet: There's a Future in Your Farm Background. Your Future is What You Make It, pp. 3-15 or How to Get and Hold the Right Job, pp. 1-7 and 15-16.
4. Read: Exploring Careers in Modern Agriculture, pp. 16-20

Student Learning Activities:

After the students have viewed the filmstrip and have read Exploring Careers in Modern Agriculture, pp. 16-20,

1. Review the types of work in the various occupational areas as given by the U.S. Bureau of Census.
2. Discuss the values of education and training in the future world of work.
3. Explain the three important steps in considering any occupation.
4. Discuss with the students the major divisions of a career brief or occupational study outline, and the importance of them in making valid occupational comparisons.
5. What are the main sources of occupational information?
6. Have a school guidance counselor serve as a resource person in discussing:

   a. The importance of considering many factors in occupational exploration.

   b. Various approaches to be used in making an individual appraisal:

      (1) Self-appraisal - preferences, interests, abilities

      (2) Appraisal by others - teachers, guidance counselors, others

      (3) Appraisal through tests

   c. A suggested procedure for matching the individual with a job.

Problem Area 4

OPPORTUNITIES IN AGRICULTURE - Why Is There a Challenging Future in Agriculture?

Current Situation in Community - Many high school students and parents:

1. Think more about farm crop surpluses than they do about rural communities and youth employment opportunities.
2. Are not aware of the importance of the total agricultural industry.
3. Have not given much thought to our rapidly expanding population or to automation.

Learning Objectives:

1. To develop student understanding and appreciation of:
   a. The vast number and variety of agricultural occupations other than farming and ranching.
   b. How and why agricultural occupations are classified.
   c. The importance of as much education and training as one can secure.
   d. The effect of the population "explosion" and automation on career opportunities in agriculture.

Advance Teacher Preparation:

1. Review: Set of slides on Careers in Agriculture.

   Film, Dynamic Careers through Agriculture.

   Exploring Careers in Modern Agriculture, pp. 21-26.

   There's a New Challenge in Agriculture.

   There's a Future in Your Farm Background.

Student Learning Activities:

1. Review the list of agricultural occupations suggested by students in problem area #1.
2. Ask students to identify various agricultural occupations represented in the slides and/or discussed in the reference booklets.
   a. How many of them can be found in your county or state?
3. Discuss Exploring Careers in Modern Agriculture, pp. 21-26, emphasizing the expanding opportunities in agricultural occupations other than farming and ranching.
   a. What is the basis for determining whether an occupation is agricultural or non-agricultural in nature?
4. Discuss the three broad classifications of agricultural occupations and list examples of each.
5. Explain how lists of occupations such as in Hoover: Handbook of Agricultural Occupations, fit into the above classification.
6. Help students to make a list of the various agricultural careers mentioned in the film, Dynamic Careers through Agriculture. Discuss the important ones.

Problem Area 5

PLANNING MY EDUCATIONAL PROGRAM - How Shall I Prepare for an Agricultural Occupation?

Current Situation in Community - Many high school students and parents:

1. Have not given much thought to agricultural occupations other than farming.
2. Have not given enough study to the type of high school program a rural youth should pursue.

Learning Objectives:

1. To develop student understanding and appreciation of:
   a. Various occupations other than farming related to the broad area of Land Use and Conservation.
   b. Why a particular high school program should be followed.

Advance Teacher Preparation:

1. Become thoroughly acquainted with the career briefs and the occupational brochures available.
2. Read: How to Get and Hold the Right Job, p. 8.
   Exploring Careers in Modern Agriculture, pp. 27-50.
3. Review: Your Future is What You Make It, pp. 3-15.
4. Provide a manila folder for each student.
5. Arrange for a field trip or for resource personnel.

Student Learning Activities:

1. Guide each student in the development of an occupational interest folder in which he may place occupational information of special interest to him. Included may be such items as newspaper clippings, magazine articles, occupational brochures, advertisements, notices of training programs, scholarships, etc.
2. Discuss important factors to consider in preparing for a vocation.
3. Arrange for students to become familiar with materials available in the high school guidance office dealing with agricultural occupations.
4. From the following list, have each student choose an occupation in which he is interested. By making use of the career briefs, brochures, and other references available, have each student prepare and present a report to the class.

Soil Conservation Aid	Spreader Operator - bulk lime & fertilizer
Soil Conservationist	Veterinarian
County Agricultural Agent	Nursery Employee
Custom Farm Machine Worker	Horticulturist
Farm Machinery Serviceman	State or National Forest Employee
Teacher of Agriculture	Agronomist
Farm Supply Store Employee	Entomologist
Professional Forester	Landscape Architect
Game Management Employee	Lumberman or Saw Mill Employee
Agricultural Engineer	Grounds Maintenance Employee

5. By means of a field trip or by bringing resource people into the classroom, arrange for one informed person from a non-professional and one from a professional agriculture occupational field to discuss and answer questions on types of jobs, working conditions, and employment opportunities, familiar to each of them (e.g., farm machinery and equipment representative; work unit conservationist).
6. On the basis of the information learned in the unit, have each student develop a vocational and educational plan for himself with the understanding that it may be tentative and need to be revised as he progresses through school.

EXAMINATION ON AGRICULTURAL OCCUPATIONS RELATED TO LAND USE AND CONSERVATION

ON THE SEPARATE ANSWER SHEET, PLEASE BLACKEN THE LETTER FOR THE BEST ANSWER TO EACH STATEMENT.

1. Modern agriculture includes
   a. production farmers
   b. those who provide supplies and services for farmers
   c. those who process and distribute agricultural products
   d. all of the above groups

2. Individual employees receive satisfaction from different types of work mainly because of
   a. basic individual differences
   b. the wages or salaries paid
   c. the status of the job
   d. the hours of work

3. Occupational information is concerned with
   a. the nature of an occupation
   b. the entrance requirements of an occupation
   c. the advantages and disadvantages of an occupation
   d. all of the above in addition to related information

4. Occupational guidance refers to the process of
   a. exploring a single occupational field
   b. assisting you as an individual to explore various fields of work
   c. explaining to you the technical know-how of a job
   d. studying the Dictionary of Occupational Titles

5. With a technician type of worker
   a. the "know-how" usually exceeds the "know-why."
   b. the "know-why" usually exceeds the "know-how."
   c. the amount of "know-how" and "know-why" may be equal
   d. no training is usually needed

6. U. S. farms have become
   a. larger in number and smaller in acreage
   b. fewer in number and larger in acreage
   c. larger in number and larger in terms of dollars invested
   d. fewer in number and smaller in terms of dollars invested

7. Farmers invest approximately the following percentage of their gross on-farm income in materials and services for further production
   a. 75%
   b. 50%
   c. 33%
   d. 25%

8. Agindustry is a relatively new term which refers to
   a. the industries producing agricultural commodities
   b. the industries supplying and servicing those engaged in agricultural production
   c. the industries making agricultural commodities available to consumers
   d. the agricultural producing, supplying, servicing, and distributing industries

9. Farming and its allied industries
   a. are independent of each other
   b. are distantly related to each other
   c. are dependent upon each other
   d. compete with each other

10. The average farmer can now provide food for himself and
    a. 35 other people
    b. 25 other people
    c. 15 other people
    d. 2.5 other people

11. Vocational agriculture instruction is valuable for those agricultural occupations other than farming which
    a. service the needs of farmers
    b. market products for farmers
    c. require a knowledge of farming and/or involve working with rural people
    d. process products for farmers

12. Non-farming agricultural occupations employ approximately
    a. twice or three times as many people as are employed in farming
    b. as many people as are employed in farming
    c. two-thirds as many people as are employed in farming
    d. one-half as many people as are employed in farming

13. Of the total 66 million persons employed in the U.S. in 1960 approximately
    a. 33 million were working in agriculture
    b. 22 million were working in agriculture
    c. 11 million were working in agriculture
    d. 5.5 million were working in agriculture

14. New opportunities in agricultural occupations other than farming are mainly in the fields of
    a. processing and marketing of agricultural products
    b. supplying equipment and technical services to farmers
    c. providing professional agricultural services
    d. processing, marketing, supplying equipment and services

15. Agricultural professions refer to a group of occupations requiring
    a. technical training
    b. training in various skills
    c. college or university training
    d. practical work experience

16. Adequate education and training is going to be a necessity in the future world of work because of
    a. the increasing competition for employment
    b. better paying jobs
    c. the shorter work week
    d. the labor union regulations

17. In considering an occupation an individual needs to
    a. analyze the job
    b. appraise his own qualifications accurately
    c. strive to match his qualifications against those needed in the job
    d. perform each of the above three steps

18. The best single method for a student to learn about an occupation is
    a. through properly supervised on-the-job experience
    b. to interview workers in the occupation
    c. by means of field trips
    d. by reading occupational literature

19. In a career brief it is essential to include
    a. a description and nature of the work
    b. the educational and personal qualifications needed
    c. a description of the work, qualifications needed, and opportunities available
    d. the entry and advancement opportunities in the occupation

20. In making an individual appraisal, ask yourself
    a. Do I prefer working with things?
    b. Do I prefer working with people, ideas or things?
    c. Do I prefer working with people?
    d. Do I prefer working with facts, figures, ideas?

21. Employers are interested in hiring individuals with the following basic qualifications
    a. willingness to work and to assume responsibility
    b. dependability, responsibility, resourcefulness, cooperativeness
    c. cooperativeness and dependability
    d. resourcefulness and self-reliance

22. In matching your qualifications with the job requirements
    a. consider your preferences, interests, abilities and personality
    b. secure advice from teachers, counselors, parents and others
    c. consider what kind of work you would like to be engaged in ten years from now
    d. carefully weigh all of the above statements

23. To determine whether an occupation is agricultural, one must consider
    a. the nature of the work and the experience or training required to perform it
    b. whether it is done by a farmer
    c. whether it is done on a farm
    d. whether it is done for a farmer by a technician

24. Agricultural occupations are usually classified into
    a. occupations in agricultural production
    b. non-professional off-farm occupations in agricultural business and industry
    c. the agricultural professions
    d. all of the above three groups

25. Other things being equal, a prospective employee for an agricultural occupation who has an agricultural background normally
    a. is at a disadvantage
    b. is neither at an advantage nor a disadvantage
    c. has a definite advantage
    d. should not mention it

26. Non-professional occupations in agindustry
    a. require no training beyond high school
    b. may require some training beyond high school
    c. may require a college degree
    d. are few in number and varied

27. A soil conservationist
    a. works with farmers in preparing land use plans
    b. is employed by the County Commissioners
    c. is required to have two years of college training
    d. works under State Civil Service regulations

28. A soil conservation aid
    a. must furnish his own on-the-job transportation
    b. draws up specifications for small watershed projects
    c. assists in layout and construction of soil and water conservation practices
    d. is required to have a college degree

29. A county agricultural agent
    a. must take a minimum of 18 credits in education courses while in college
    b. works largely with commercial organizations
    c. is required to take a two-year college course
    d. serves as a part of three governmental units - Federal, State and County

30. A custom farm machine worker
    a. must have business ability, mechanical ability, and safety awareness
    b. performs a minor part of his work outdoors
    c. has steady employment throughout the year
    d. has no need for training beyond high school

31. A teacher of agriculture
    a. is qualified for any other job
    b. must have a college or university degree with a minimum number of credits in education
    c. may obtain his degree at any one of three large universities in Pennsylvania
    d. is an employee of The Pennsylvania State University

32. A farm machinery serviceman
    a. usually starts employment as a manager following high school graduation
    b. does not have seasonal peaks of work
    c. needs to know principles as well as basic skills
    d. has little need for post-high school training

33. A professional forester
    a. may perform woodlot management services or specialize in industrial forestry
    b. needs no college training
    c. works largely out of doors
    d. is employed by the U. S. Forest Service

34. A farm supply store employee
    a. performs most of his work outdoors
    b. needs no knowledge of record keeping
    c. should enjoy dealing with rural people and with agricultural supplies
    d. should have a college degree

35. An agricultural engineer
    a. needs good foundation in history, mathematics, philosophy and foreign languages
    b. may design machinery, lay out drainage systems or conduct research
    c. aids farmers with their livestock problems
    d. is required to have three years of college training

36. A spreader operator for bulk lime and fertilizer application
    a. has a decreasing opportunity for employment in Pennsylvania
    b. works regular hours the year round
    c. will be exposed to no health hazards
    d. needs to know how to maintain and operate equipment safely

37. A veterinarian
    a. has very distant working relations with medical doctors
    b. may specialize in the treatment of large and/or small animals and/or wildlife
    c. is required to have completed a four-year college program
    d. is most often employed by a governmental agency

38. A nursery employee
    a. is required to have a college degree
    b. has decreasing opportunities for employment
    c. usually works for the State Forest Service
    d. needs a knowledge of the principles of plant growth

39. A horticulturist
    a. is in a slowly expanding occupation
    b. needs a thorough knowledge of livestock production
    c. may be concerned with fruits, vegetables, flowers, and/or ornamental plants
    d. is required to complete a two-year college course

40. A game management employee
    a. interprets game laws, manages game, inspects wildlife killed and investigates crop damage
    b. performs most of his work indoors
    c. normally has a territory of several states
    d. works regular hours throughout the year

VT 000 602
Tenopyr, Mary L.
Race and Socioeconomic Status as Moderators in Predicting Machine-Shop Training Success.

MF AVAILABLE IN VT-ERIC SET.
Pub Date - 67 17p; Presentation to the American Psychological Association, Washington, D.C., Sept. 4, 1967.

*TRADE AND INDUSTRIAL EDUCATION; *RACIAL DIFFERENCES; *RACE AND SOCIOECONOMIC STATUS; *SUCCESS FACTORS; MACHINE TOOL OPERATORS; RACIAL FACTORS; NEGROES; NEGRO EMPLOYMENT; ANGLO AMERICANS; *JOB APPLICANTS; VERBAL ABILITY; NONVERBAL ABILITY; CULTURAL BACKGROUND; PERFORMANCE FACTORS; TEST VALIDITY; PREDICTIVE ABILITY (TESTING)

Because of differential racial performance on verbal general intelligence tests, culture-fair tests have been developed to emphasize pictorials, spatial, or figural content. A random sample of 187 Anglos, 283 Negroes, and 30 Spanish-Americans was selected from a population of 1,152 who applied for machine shop trainee jobs with a large firm. Variables were treated with analysis of covariance to yield the following results: (1) With socioeconomic status controlled, significant differences between races were found in verbal comprehension, numberical ability, and space visualization, (2) The largest difference was associated with the spatial tests, and (3) Negro job applicants would be put to a greater disadvantage with culture-fair tests. An additional study was conducted to determine whether unfair racial discrimination would result if machine shop training success was predicted on the basis of common regression equations. Selected were 84 Anglos and 83 Negroes hired by a large company in 1966. The socioeconomic status difference between the two groups was not significant, and the tests were found to be equally valid for both with respect to all criteria. The use of Anglo regression lines or common Anglo-Negro regression lines would result in unfair discrimination favoring, not penalizing, the Negro. (DM)

VT000602

ED0 31587

RACE AND SOCIOECONOMIC STATUS AS MODERATORS IN PREDICTING MACHINE-SHOP TRAINING SUCCESS[1]

Mary L. Tenopyr[2]
California State College at Los Angeles

STUDY I

It has been reasonably well-established that Negroes, on the average, score lower than Anglos on tests of the general intelligence variety (e.g., Shuey, 1958; Dreger and Miller, 1960; United States Department of Labor, 1965). Relatively little is known, however, about the two groups' relative performances on tests developed on the basis of group-factor theories of mental functioning. Possibly because of differential racial performance on highly verbal general intelligence tests, it has been implied (e.g., Lawshe and Balma, 1966) that the greatest racial differences in test performance are most likely to occur on verbal tests. There have been suggestions that the cause of fair employment could be aided, in some instances, by replacing verbal tests with tests of a more culture-free nature (Pennsylvania Human Relations Commission, 1967). The so-called culture-free or culture-fair tests which have been developed to date have emphasized pictorial, spatial, or figural content and minimized verbal content (Lambert, 1964).

VT000602

There is a small, but increasing, body of evidence suggesting that the greatest racial differences on tests may not be associated with the verbal abilities, but instead are more likely to be attributable to abilities in the non-language areas. Fifer (1964) found Negro children to score relatively higher on a verbal test than on reasoning, numerical and space tests. Studies by Davidson, Gibby, McNeil, Segal, and Silverman (1950) and by De Stephens (1953) indicated that the performance subtests of the Wechsler contribute somewhat more to ethnic differences than do the verbal subtests. For low socioeconomic status children, Higgins and Sivers (1958) found significant differences between Colored Raven Progressive Matrices means for Caucasians and Negroes, but did not find significant differences between Stanford-Binet means for the same groups, Vernon (1965) in comparing test performance of native British children and Negro Jamaicans, found the smallest differences between the two groups were for verbal tests and that largest differences were for spatial tests such as the Kohs Blocks. Moore and MacNaughton (1966) in a study of job applicants at a southern petroleum refinery, found that the use of essentially non-verbal, spatial-type tests resulted in greater score differences between whites and Negroes than did the use of more verbal tests.

The evidence presented suggests that the Negro job applicant may be at a greater disadvantage when so-called "culture-fair," spatial tests are used in selection, than when verbal tests are utilized. The primary objective of the investigator was to provide, on the basis of a job applicant sample, further empirical information regarding the question of whether verbal or spatial tests yield the larger racial difference in test performance. It is recognized that the degree of generalization which can be made from a study of this type is

limited and highly dependent upon the recruiting methods of the employer and the nature of the applicant populations involved.

A second purpose of the investigator was concerned with whether there are racial differences in the organization of abilities, i.e., do the same tests measure the same factors for Anglos and Negroes? Again, a study on a job applicant sample and limited data could be expected to yield only suggestive, not definitive, information.

METHOD

Subjects. Subjects for this study were 500 applicants for machine-shop trainee jobs with a large firm. These applicants were randomly selected from a population of 1,152 applicants. A small proportion of the applicants was already employed in the company concerned and in jobs at a lower level than the machine-shop jobs. The sample comprised 187 Anglos, 283 Negroes, and 30 Spanish-Americans. The employer had made special efforts to recruit applicants from the low socioeconomic areas of the community. Members of the sample had an average of 11.9 years of education; their mothers' average education was 11.1 years.

Variables. Data relative to the following variables were obtained for the sample:

1. Employee Aptitude Test 1, Verbal Comprehension, a five minute vocabulary test.
2. Employee Aptitude Survey Test 2, Numerical Ability, a ten-minute computational test with three parts involving whole-numbers, decimals, and fractions, respectively.

3. Employee Aptitude Test 5, Space Visualization, a five-minute test requiring visualization in three dimensions from a two-dimensional presentation.
4. Composite score, a score developed for selection purposes and derived by multiplying the Space Visualization score by two and then adding the Numerical Ability score.
5. Age in years
6. Socioeconomic Status, a measure derived on the basis of the work of Heath (1958) and Bianchini, Danielson, Heath, and Hilliard (1966) and developed by first equally weighting the applicant's education and his mother's education and then equally weighting the sum of these with the applicant's rating of the status level of his father's job.

Data Analysis. A mean and a standard deviation were computed for each variable, as were coefficients of correlation between all pairs of variables, for the whole sample and for each ethnic group separately. For each test, the difference between unadjusted means for Anglos and Negroes was tested, and an analysis of covariance with racial status as the treatment variable and socioeconomic status as the covariate was conducted. Box's (1949) test of differences between dispersion matrices was applied to the Anglo and Negro covariance matrices for the three tests and, then, for five-variable matrices in which the part scores for the Numerical Ability test were considered separately.

RESULTS

Coefficients of correlation, means and standard deviations for the whole applicant sample appear in Table 1. The tests were moderately intercorrelated, and the correlations between socioeconomic status and the tests were relatively low. The latter fact may indicate that the socioeconomic measure was not accounting for many of the cultural background factors which could have affected

test performance, or it could be merely a reflection of restriction in range of socioeconomic status for the sample. For a beginning trainee job, one could expect the socioeconomic-status level of applicants to be uniformly low.

In Tables 2, 3, and 4 are reported the coefficients of correlation, the means, and the standard deviations for the separate ethnic groups. The test means were consistently higher for the Anglos than for the Negroes and the Spanish-Americans. In view of the small N for Spanish-Americans and the likelihood that the sample was not representative of the Spanish-American community in the locality, no further computations involving this group were done. The Negro applicant sample was significantly lower in socioeconomic status than the Anglo sample and was slightly, but significantly older.

All of the differences between unadjusted Anglo and Negro test means were highly significant, as indicated in Table 5. The smallest relative difference was for Numerical Ability Part I, involving simple computations with whole numbers. The largest relative difference was for the Space Visualization test. As also indicated in Table 5, the same situation obtained when socioeconomic status was controlled, and differences between adjusted means were tested. All F's associated with differences between adjusted means were highly significant, and the F for Numerical Ability Part I was the smallest and that for Space Visualization was the largest. None of the preliminary tests of difference between slopes for the two groups resulted in a significant F; thus, it may be assumed that the correlation between socioeconomic status and score was the same for the two groups for each test.

The application of Box's test resulted in a chi square of 11.56 ($p > .05$) for the three-variable matrices for Anglos and Negroes. This result suggests

that neither the variances for the tests nor the correlations between tests were different for the two groups, and it may probably be assumed that the tests were measuring the same factors for both groups.

When Box's test was applied to five-variable matrices, including covariances for Verbal Comprehension, the three parts of Numerical Ability, and Space Visualization, the resultant chi square was 74.78 ($p < .01$). Whether the significance of the result is attributable to differences in variances, to differences in correlations, or to a combination of both is questionable.

The coefficients of correlation between parts of the Numerical Ability test appear to be somewhat lower for Negroes than for Anglos. Data provided by the test publisher (Psychological Services, Inc., 1963) suggest that recency of arithmetic training affects some correlations between parts of this test; the less recent the training of the examinees, the lower the intercorrelations.

Since the Negro sample was older than the Anglo sample, it could be assumed that the arithmetic training of the former group was less recent, and hence, the intercorrelations between parts of the Numerical Ability test could be expected, as was found, to be lower for that group. It is suggested, then, that the possible racial differences in factor structure for the tests found when the part scores of the Numerical Ability test were considered separately, may have been a function of the difference in age of the Anglo and the Negro samples.

SUMMARY AND DISCUSSION

For 500 machine-shop trainee job applicants, including 187 Anglos, 283 Negroes, and 30 Spanish-Americans, it was found that, with a socioeconomic status measure controlled, there were, for Anglos and Negroes, highly significant differences between means on three Employee Aptitude Survey Tests: Verbal Comprehension, Numerical Ability, and Space Visualization. The largest

difference between means for the two groups was associated with the spatial, not the verbal test. This finding provides further evidence that Negro job applicants might be put to as great a disadvantage or an even greater disadvantage if verbal employment tests were replaced with spatially-oriented "culture-fair" tests.

Relative to the question of whether the same tests measure the same abilities for both Anglos and Negroes, results of the study indicated, for the tests concerned, that it was likely that the same abilities were being measured for both groups. Certainly, further research regarding possible differential organization of abilities for Anglos and Negroes is advisable.

STUDY II

The question of the extent to which the use of tests or other selection devices results in unfair discrimination, either purposeful or accidental, in the selection process has been a subject of considerable attention by many individuals and organizations, since the famed Motorola case. (Bryant, 1963) A test is merely a measuring device and, as such, cannot, in and of itself, be unfairly discriminatory. A test, however, can be used in such a manner that unfair discrimination results.

Determining whether test use leads to the unfair penalization of certain groups in the selection process is not a simple matter. Certainly, mere comparisons of average test performances of distinct groups or of differences in rejection rates for the groups are not sound bases for deciding whether the use of a test is unfair. Evidence of differential test validity for groups is not, alone, evidence of unfair discrimination in the use of a test. The following definition of unfair discrimination is, therefore, used throughout this study:

> Unfair discrimination, as suggested by Cleary (1966), results when in the use of a measuring device or devices to predict a criterion, consistent nonzero errors of prediction are made for members of any subgroup of the population. In other words, unfair discrimination occurs if too high or too low a criterion score is consistently predicted for members of any subgroup.

If evidence of unfair discrimination, is found in a given selection situation, the possibility of establishing different regression equations or passing scores for different subgroups should be considered. In order to optimize prediction, when the question of unfair discrimination is not necessarily involved, different regression equations are advisable when test validities differ for subgroups.

The research model required in determining the advisability of different regression equations is one involving subgroup analysis or moderator variables (Saunders, 1956). Several government agencies (Fair Employment Practice Commission--State of California, 1965; Equal Employment Opportunity Commission, 1966; Office of Federal Contract Compliance, 1967) have suggested that employers conduct research in which a moderator-variable model is implied. Either race or socioeconomic status has been suggested as a possible moderator by these agencies and by others (Guion, 1966; Wallace, Kissinger, and Reynolds, 1966).

The primary question to be answered by this study was whether unfair racial discrimination, as defined, would result if criteria of machine-shop training success were predicted on the basis of common regression equations, involving three tests and based on a sample of both Anglos and Negroes. It was questioned whether Negroes performed better in training than did Anglos at the same test-score levels and whether the establishment of different regression equations

for the two groups would be advisable.

The second major question to which the study was devoted was whether a common regression line, in the same prediction situation, would be applicable to persons at different socioeconomic levels, within a limited range; i.e., are different regression equations advisable for different socioeconomic groups?

METHOD

Subjects. Subjects (S's) were 167 males, including 84 Anglos, and 83 Negroes, who were hired into industrial machine-shop trainee jobs in a large company in 1966. These men were selected for training on the basis of a minimal cutting score on a composite formed by scores on the Space Visualization test and the Numerical Ability test in a 2:1 ratio. The employer had markedly lowered test performance requirements for entrance into training. Included among the S's were trainees from six separate classes. Excluded from the sample were members of other large minority groups such as the Spanish-Americans, and persons who were in training for so short a period that no criterion data could be obtained.

Training Course. The machine-shop course, lasting 16 weeks, consisted of eight-weeks of training in the training department and eight weeks of on-the-job training in a production department. Half of the first eight-weeks' training was devoted to general subjects such as mathematics, precision measurement, blueprint reading, and metallurgy, and half involved, actual set-up and operation of either milling machine or an engine lathe. There were no racial or socioeconomic group differences relative to the percentage assigned to each type of machine.

Independent Variables. The predictors utilized were the three tests described in Study I, race, and the socioeconomic status measure, previously mentioned.

Dependent Variables. The following ten, criteria, some of them experimentally dependent, were of primary interest:

1. Final grade, general--based on the sum of standard scores on eight weekly objective tests on the general subjects mentioned earlier. Reliability of the grade was estimated to be .84 based on the Spearman-Brown method.
2. Final grade, machine--based on the sum of standard scores on eight weekly objective tests about the operation of the type of machine to which the trainee was assigned. Based on the Spearman-Brown method, the reliability coefficient of the grade was .62.
3. Final grade, total--based on the sum of the final grade, general, and the final grade, machine. Reliability of the total grade was .84, as determined through the Spearman-Brown method.
4. Machining rating after eight weeks, a rating involving machining proficiency and made by the machine shop instructor using a simple graphic rating scale with short descriptive phrases as cues. No reliability estimate was obtained for this criterion.
5. Performance rating after 16 weeks--sum of two ratings made by the employee's supervisor using a 9-item rating scale. The reliability estimate, possibly spuriously high, for this criterion was .93, based on rating and rerating with a two-week period intervening.
6. Short performance rating after 16 weeks--a criterion consisting of the sum of ratings on three items chosen on an *a priori* basis, from the longer rating form and involving quality, quantity, and over-all performance of work. The rating-rerating reliability coefficient was .97.

7. Completion of class or not--a measure of turnover during the 8-week classroom phase of training. Person's who completed the class were coded "1," and those who did not were coded "0."
8. Completion of course or not--a measure of turnover during the whole 16-week course. Person's completing the course were coded "1;" those not completing were coded "0."
9. Completion of class vs. discharge--A criterion formed by coding those who completed the 8-week class as "1" and coding those who were discharged for any cause or resigned when performance was marginal as "0."
10. Completion of course vs. discharge--A criterion formed in the same manner as the one just discussed, but based on the whole 16-week course.

Other criteria were based on test performance during each quarter of the 8-week class.

Moderator Variables. The two variables used as bases for subgrouping were race, and socioeconomic status, as defined in Study I. For computation of coefficients of correlation, Anglos were coded "1" and Negroes, "0;" persons above the socioeconomic status mean for trainees were coded "1," and those below the mean, "0."

Data Analysis. Means, standard deviations, and coefficients of correlation were computed for the whole trainee sample and for the Anglo and the Negro samples separately. For each racial subgroup, coefficients of correlation corrected for the effects of restriction in range of the composite score were computed and compared. To avoid being refined computations on estimated

data and to obviate problems caused because there was differential restriction in range for the subgroups, no computations involving these corrected coefficients were done.

For each of the ten primary criteria, separate R's and regression equations involving the three tests were computed for the whole sample, the separate racial subgroups, and the separate socioeconomic-status subgroups.

Analysis of covariance procedures were then applied for each of the ten criteria to test the differences between Anglo and Negro regression equations and those between the separate regression equations for the high and the low socioeconomic status groups. Computational methods employed in these analyses were formulated by Beaton (1964)

RESULTS

The Negroes selected for training scored significantly lower on all of the tests than did the Anglos. The socioeconomic status difference between the two groups was not significant. On the composite score, which was the basis for selection, the Anglo standard deviation was 21.0 and the Negro standard deviation was 17.0. For the applicant sample, the respective standard deviations for the groups were 25.5 and 25.0. Consequently, it is suggested that there was somewhat greater restriction in range for the Negro sample.

Coefficients of correlation, means, and standard deviations for the whole sample appear in Table 6. Verbal Comprehension and Numerical Ability had their highest correlations with criteria based on grade in the general portion of training, with total grade, and with the machining rating. The numerical test was particularly highly correlated with the general grades. There were very few significant validity coefficients for Space Visualization, possibly because this was the variable subject to the greatest restriction in range. None of the tests was significantly correlated with either the on-the-job training criteria

or the turnover criteria.

Although the criteria based on class grades and ratings were substantially intercorrelated, in some cases partially as a result of experimental dependence, the correlations between class-performance criteria the other criteria were low, most of the r's, not significant. Race, variable 5, was significantly correlated with most criteria. In some instances, race was the only independent variable with a significant validity coefficient. For predicting most criteria, socioeconomic status, variable 6, had essentially zero validity coefficients.

Coefficients of correlation, means, and standard deviations for Anglos appear in Table 7. The same data for Negroes are reported in Table 8. For each group the general pattern of correlations was the same as that for the whole sample. The possibility that restriction in range on some variables was greater for Negroes than for Anglos may account for the validity coefficients for Negroes appearing to be generally lower than those for Anglos.

In Table 9 are reported the R's, the regression equations, the results of the analyses of covariance, and the results of putting Negro test means into each of the three regression equations for each criterion. For the first four criteria, based on 8-week class performance, at least the R for the whole sample was significant. Only one significant R, that for Negroes relative to criterion 8--course completion or not, was found for the remaining criteria, all based upon either on-the-job performance or turnover.

The column labelled "Test of Slopes" in Table 9 indicates the F's resulting from the analysis-of-covariance test of differences between slopes for the Anglo and the Negro regression lines. None of the F's is significant; therefore it may be assumed, relative to each criterion, that the tests' validities were the

same for Anglos and Negroes.

The F's reported in the column labelled "Test of Intercepts" are comparable to the F's resulting from a test of the differences between adjusted means in an ordinary analysis of covariance. The null hypothesis essentially was: "With test performance controlled, there is no difference between Anglo and Negro criterion performance." Six of the ten F's resulting from the tests of intercepts were significant. In all six of these instances, Negro criterion means were lower than those for Anglos. Since test performance was controlled, the lower criterion means for Negroes cannot be attributed to lower Negro test means. Another way of interpreting these data is that race, in each of the six instances involved, was an effective predictor of the criterion, when test scores were controlled. Further evidence relative to the question of whether Negroes' criterion performance was better than that of Anglos at the same score levels is presented in the last column of Table 9. Here the result of, for each criterion, putting the Negro test means into the three regression equations, one for the whole sample, one for Anglos, and one for Negroes is shown. The bottom number in each group of three represents the actual criterion mean for Negroes. Although significant in only six of the ten instances, the general trend was that putting the Negro means into regression equations based on either Anglos alone or on both Anglos and Negroes resulted in predicting Negro criterion performance to be higher than it actually was.

The data reported in Table 10 are similar to those reported in the immediately preceding table. For the first four criteria and the ninth criterion, all based upon performance in the 8-week class, the R's for both socioeconomic groups were significant. Only one other R was significant. The R's and the regression equations for the whole sample were reported previously in Table 9. The results of the two tests of the differences between regression equations for the two socioeconomic groups indicated that, in none of the ten instances, could

either the validities of the tests or the mean criterion performance adjusted for test-score differences be considered different for the two groups.

SUMMARY AND DISCUSSION

For 167 machine-shop trainees, including 84 Anglos and 83 Negroes, who had been administered three tests: Verbal Comprehension, Numerical Ability, and Space Visualization and had been selected partially on the basis of the latter two tests, R's involving the three tests and ten training achievement criteria, some of them experimentally dependent, ranged from substantial to zero.

With respect to all criteria, the tests were found to be equally valid for Anglos and Negroes. Assuming that unfair discrimination results whenever, for any subgroup of the population, the criterion scores predicted from test results are consistently higher or lower than actual criterion scores, it was found, relative to six of the ten criteria, that the use of the common Anglo-Negro regression line would result in unfair discrimination. This discrimination, however, would favor, not penalize, the Negroes. In each of these six instances, the use of a regression line based on Anglos alone would, again, favor, not penalize the Negroes.

For two groups, each representing a slightly different socioeconomic level, the test validities, relative to each criterion, were the same. When test performance was controlled, in no instance were there differences in criterion performance for the two socioeconomic groups.

The exact reasons for this study's results, which are possibly contrary to popular opinion, are far from clear. In five of six instances in which significant differences between intercepts were found, the criterion was based essentially on supervisors' or instructors' ratings. It is difficult,

if not impossible, either to prove or to disprove the possible contention these ratings were subject to racial bias. The raters were all Anglos; however, the production departments to which the trainees were assigned were well-integrated; more than 20% of the employees in some of these departments were Negro.

The question of whether there wereunmeasured cultural differences between the Anglos and the Negroes in the sample deserves further considerations. The socioeconomic status measure employed in the study could not be expected to account for all cultural influences which might affect either test performance or achievement in training. One culturally based factor which might be particularly relevant in explaining the results of the study is achievement motivation. Partially because test results can be easily quantified, much attention has been directed toward the effects of discrimination and cultural disadvantage on test performance. But, could not one expect achievement motivation to be affected as much or even more by these environmental factors?

The results of this study leave many questions unanswered. Certainly any decision on whether different regression equations should be applied for different racial groups should be deferred pending cross-validation. It is suggested that more research relative to the achievement motivation of the low-socioeconomic-status Negro be conducted. A preliminary step would be the development of motivational level indicators which could be used in an employment setting. Motivational training programs should be developed and evaluated.

In conclusion, it should be emphasized that the results of this study apply only to the specific situation and to the subpopulations of Negroes

and Anglos involved; generalization from these results should be done with extreme caution.

*PROGRAM EVALUATION; *TRADE AND INDUSTRIAL EDUCATION; *TEACHER EVALUATION; *STUDENT EVALUATION; SECONDARY SCHOOLS; *EVALUATION CRITERIA; CHECK LISTS
OHIO

In order to have an instrument to evaluate trade and industrial education programs in Ohio, a supervisors' workshop group in 1950-51 determined that Section D-10 of "Evaluating Criteria," prepared by the Cooperative Study of Secondary School Standards, should be modified. The results of this effort are presented in the form of instructions and evaluative checklists for organization, nature of offerings, physical facilities, instructional staff, instructional activities, instructional aids and materials, and methods of student progress evaluation. Committees may use these program evaluation criteria as a guide in local evaluation of vocational programs in secondary schools. (EM)

FOREWORD

During the local supervisors workshops for 1950-1951, it was determined that an organized procedure for an analysis of Trade and Industrial Education programs was needed. Copies of available evaluative plans were studied and an effort made to determine which, if any, of these plans might be followed. Among those studied were Section D- 10 for Vocational Industrial Education as taken from the 1950 Evaluative Criteria Cooperative Study of Secondary School Standards.

As a result of considerable study, the workshop participants determined that Section D- 10 of the Evaluative Criteria seemed to be the most logical to be used as the basis for any evaluation material. It was agreed, however, that as stated Section D- 10 was too general to be of the greatest value to local programs and that each item should be expanded in terms of practical application.

The workshop participants believed that a program should be analyzed for purposes of improvement and that evaluation tended to imply comparison between programs. Therefore, this plan is being called a program analysis in preference to the term program evaluation. This Program Analysis Questionnaire is the result of many hours of work by the workshop participants and by an editing committee.

The questionnaire has been further refined and the procedures altered to make it more adaptable for use by the state staff in cooperation with local school people in making an analysis of a Trade and Industrial Education program in a local community.

INTRODUCTION

On the pages to follow will be found a program - analysis questionnaire for analyzing a local trade and industrial education program. This questionnaire was prepared by the members of the Fifth Annual Ohio Trade and Industrial Supervisors' Workshop.

It will be noted that the format used is similar to that in Section D-10 of the Evaluative Criteria, 1950 Edition[1], as prepared by the Cooperative Study of Secondary School Standards.

It will be noted that each of the four sections making up the questionnaire is preceded by a statement of guiding principles. This statement is followed by a series of evaluative questions, the answers to which tend to analyze one particular phase of the program. Following each evaluative question is a series of checklist questions. The markings of the checklist questions are intended to provide the factual basis for the choice of an answer to the evaluative question.

The following instructions for marking the checklist and evaluative questions should be studied and followed carefully for they are important to the effective analysis of the program.

CHECKLISTS:

The checklists consist of questions about the provisions for, conditions of, and characteristics found in good trade and industrial education programs. Some of them may not be applicable to all programs. Answers to the checklist questions are intended to provide a factual basis for checking the evaluation.

Following are suggested symbols which may be used in marking the checklist questions:

5 indicates a strongly affirmative answer
4 indicates an affirmative answer
3 indicates a doubtful answer
2 indicates a negative answer
1 indicates the question does not apply

COMMENTS:

An explanatory comment should accompany each checkpoint question receiving a doubtful or negative marking.

[1] Evaluative Criteria, 1950 Edition. Section D-10, Industrial Vocational Education. General Committee in Charge of Cooperative Study. Washington, D. C.: Cooperative Study of Secondary School Standards, 744 Jackson Place.

POLICIES GUIDING THE ORGANIZATION AND ADMINISTRATION OF A PROGRAM ANALYSIS

1. An analysis will be made only upon request.

2. Such requests will be studied by the supervisory staff and a program analysis provided when justified on the basis of need.

3. The program analysis will be conducted by the supervisory staff with the assistance of the teacher education staff, as needed.

4. Analysis guides will be made available for use in local in-service programs.

5. Results of a program analysis will be kept confidential for the local schools.

6. A written report will be made available to the local administration.

7. No charge will be made for the services of the Trade Industrial staff who will make the analysis or for the final report.

8. No less than two staff members will conduct an analysis. Additional staff members will be utilized as needed.

9. An analysis exam will consist of two staff members plus one observer from the local school administrative staff. Each exam will evaluate two trade areas per day.

PROCEDURES FOR A PROGRAM ANALYSIS

1. Approve request for survey.

2. District supervisor to meet with the local school administrator to:

   a. Review the analysis guide and procedures with the administrator.
   b. Determine scope of the analysis.
   c. Set date and time for survey (date must be cleared with State Office.)
   d. Determine personnel to be contacted and when during analysis.
   e. Review plans for staff orientation.
   f. Determination of local administrative personnel to participate as observers.

3. Visiting staff will meet on the evening before the analysis with the local person in charge to:

   a. Review plans and procedures.
   b. Make a working schedule .
   c. Make assignments - including local observer.

4. Observation of school program and interview personnel in accordance with assignments.

5. Reporting Results:

   a. Following the analysis visits the staff will meet immediately to report major recommendations.
   b. The report will include a listing of general recommendations plus the check list copy. An original and two carbons will be returned.
   c. Written report will be sent to the superintendent.

SECTION I - ORGANIZATION

GREEN

STATEMENT OF GUIDING PRINCIPLES

The local program of trade and industrial education should be so organized as to provide in a manner as efficient as possible the training needed by youth and adults for entrance into or advancement in the occupations of the community.

1. How satisfactory are the attitudes and practices of the administrative staff as they pertain to the trade and industrial education program?

CHECKLIST:

a. Is there evidence that the Board of Education accepts and supports trade and industrial education as an integral part of the total school program? . . . . . ( )

b. Are adequate funds provided and equitably budgeted to each trade and industrial class? . . . . . ( )

c. Are the responsibilities of each staff member clearly defined and is the necessary authority granted to the individual to carry out his responsibilities? . . . . . ( )

d. Is there evidence that the superintendent understands, accepts and supports trade and industrial education as an integral part of the total school program? . . . . . ( )

e. Is there evidence that the principal understands, accepts and supports trade and industrial education as an integral part of the total school program? . . . . . ( )

f. Is there evidence that the principal encourages participation of trade and industrial teachers in school and community affairs? . . . . . ( )

g. Is there evidence that the principal seeks the advice and counsel of trade and industrial personnel regarding matters pertinent to their department? . . . . . ( )

h. Is there evidence that the school staff understands and supports trade and industrial education as an integral part of the total school program? . . . . . ( )

i. Is there evidence that the guidance service of the school provides valid and adequate occupational information, dependable selective processes, and follow-up of student progress? . . . . ( )

SECTION I - ORGANIZATION (Continued)

j. Is there evidence that the other special services of the school such as library, psychological, and health are available to students in the trade and industrial classes? . . . . . ( )

k. Is there evidence that adequate clerical help is provided for the trade and industrial education personnel? . . . . . ( )

l. Is there evidence that there is an efficient system for obtaining equipment and supplies? . . . . . ( )

m. Is there evidence of an efficient custodial service? . . . . . ( )

n. Is there evidence that there is an efficient system of handling and accounting for funds used in the trade and industrial programs? . . . . . ( )

o. Is there evidence that the person immediately in charge of the program is consulted regarding the employment of all trade and industrial personnel? . . . . . ( )

p. Is there evidence that the administrative personnel keeps the entire teaching staff informed regarding the plans for and progress of the trade and industrial program? . . . . . ( )

COMMENTS:

SECTION I - ORGANIZATION (Continued)

2. How adequately is the trade and industrial education program supervised?

CHECKLIST:

a. Is the program under the direction of a person who is well qualified in training and experience? . . . . . ( )

b. Is there evidence of satisfactory leadership? . . . . . ( )

c. Is there evidence that there is an organized and functioning plan for the improvement of instruction? . . . . . ( )

d. Are adequate records of achievement, placement, and follow-up maintained? . . . . . ( )

e. Is there evidence that all the areas of training are being adequately supervised? . . . . . ( )

f. Is there evidence that interested groups such as teachers, students, advisory committees, and employers have confidence in and respect for the supervision provided for the program? . . . . . ( )

g. Is there evidence that the person charged with the responsibility of the supervision of the trade and industrial education program understands and supports the program of general education? . . . . . ( )

h. Is there evidence that the person responsible for trade and industrial supervision cooperates with the personnel in the general education program? . . . . . ( )

i. To what extent does the trade and industrial education representative advisory committee function? . . . . . ( )

j. Is the representative advisory committee drawn from employee and employer groups? . . . . . ( )

k. To what extent do craft committees function in the trade areas represented in the program? . . . . . ( )

l. Is there evidence that special groups or specialists from business and industry are used as consultants? . . . . . ( )

SECTION I - ORGANIZATION (Continued)

m. Is there evidence that the special services such as health and guidance are used? . . . . . ( )

n. Is there evidence of a wholesome supervisory relationship with the trade and industrial education staff? . . . . . ( )

o. Is there evidence that other duties of the supervisor do not interfere with adequate supervision of the trade and industrial education program? . . . . . ( )

p. Is there evidence of a planned and functioning program of public relations? . . . . . ( )

COMMENTS:

SECTION I - ORGANIZATION (Continued)

3. How satisfactory are the local time schedules for students enrolled in industrial education classes?

   a. Are state standards pertaining to time requirements for in-school manipulative, related, and general education classes being met? . . . . . ( )

   b. Are state standards pertaining to time requirements for cooperative trade and occupational classes being met? . . . . . ( )

   c. Do existing class schedules permit in-school students to participate in school activities such as athletics, student councils, and clubs? . . . . . ( )

   d. Are state standards pertaining to time requirements for apprenticeship training being met? . . . . . ( )

COMMENTS:

SECTION II - NATURE OF OFFERINGS

YELLOW

STATEMENT OF GUIDING PRINCIPLES

The nature of offerings should be determined and evaluated on the basis of individual and community needs. The term "community" should be thought of as the area in which those enrolled in the program are or may be employed.

1. How adequate are the procedures used to determine the areas of instruction to be offered?

CHECKLIST:

a. Has an occupational survey been made in the past five years? . . . . . ( )

b. Has a survey of student needs and interests been made recently? . . . . . ( )

c. Was the existing program of trade and industrial education appraised in terms of these surveys and/or recent valid data? . . . . . ( )

d. Does the person directly in charge of trade and industrial education maintain contacts with representatives of employee groups? . . . . . ( )

e. Does the person directly in charge of trade and industrial education maintain contacts with representatives of business and industrial management? . . . . . ( )

f. Does the person directly in charge of trade and industrial education maintain contacts with the employment service and other community groups in regard to employment patterns? . . . . . ( )

COMMENTS:

SECTION II - NATURE OF OFFERINGS (Continued)

2. To what extent is trade and industrial education available?

CHECKLIST:

a. Is there an in-school program? . . . . . ( )

b. Is the in-school program based on adequate knowledge of the needs and employment opportunities? . . . . . ( )

c. Is there an adult program? . . . . . ( )

d. Is the adult program based on adequate knowledge of the needs and employment opportunities? . . . . . ( )

COMMENTS:

SECTION II - NATURE OF OFFERINGS (Continued)

3. How adequately does the trade and industrial education program meet the needs of individuals and the community?

CHECKLIST:

a. To what extent do the placement and follow-up records reveal that the needs of in-school youth were met? . . . . . ( )

b. Is there evidence that the training given to adults meets their needs? . . . . . ( )

c. To what extent does the training being given meet the needs of the community for trained workers as revealed by the most recent occupational survey or other indicators of needs? . . . . . ( )

d. To what extent is needed training given to adults with a limited educational background? . . . . . ( )

e. To what extent is needed training given to in-school youth of limited ability? . . . . . ( )

f. To what extent are the training needs of both the males and females of the community being met? . . . . . ( )

g. Is there evidence that the training being given the in-school students and adults contributes to effective citizenship? . . . ( )

h. Is there evidence that the training being given contributes to better human relations between the employee and his employer, and the employee and his fellow workers? . . . . . ( )

i. Do the in-school students have a functioning social organization based upon their trade interest? . . . . . ( )

COMMENTS:

SECTION II - NATURE OF OFFERINGS (Continued)

4. To what extent do the learning activities provide for the development of an understanding and appreciation of good workmanship?

CHECKLIST:

a. To what extent do the demonstrations made exhibit a high degree of good workmanship? . . . . . ( )

b. To what degree do the jobs or projects completed by the trainees show evidence of a high degree of good workmanship? . . . . . ( )

c. To what extent does an interview with the teacher and/or observation of the students at work indicate that the students possess an adequate degree of job know-how? . . . . ( )

d. Is there evidence to indicate that the trainees have a desire to develop further skills and acquire further knowledge? . . . . . ( )

COMMENTS:

SECTION III - PHYSICAL FACILITIES

BLUE

STATEMENT OF GUIDING PRINCIPLES

The physical facilities for a program of trade and industrial education should be selected or constructed, arranged, and maintained to provide for the efficient and safe training of youth and adults for entrance into, or advancement in, the occupations of the community.

1. How desirable is the site of the building in which trade and industrial education classes are held?

CHECKLIST:

a. Is there room for expansion? . . . . . ( )

b. Is the building site in a desirable section of the community? . . . . . ( )

c. Is the site readily accessible? . . . . . ( )

d. Are public transportation and parking facilities adequate? . . ( )

e. Is the building site convenient to the school(s) serving as the source of student supply? . . . . . ( )

COMMENTS:

2. How adequate is the housing provided for the trade and industrial education program?

CHECKLIST:

a. Are the facilities appropriate for the activity for which they are being used? . . . . . ( )

b. Do the facilities permit expansion? . . . . . ( )

c. Have administrative facilities such as office space, conference rooms, and storage rooms been provided? . . . . ( )

d. Does the building meet state, local, and industrial codes, and/or requirements such as toilets, washrooms, corridor widths, stairs, heating, ventilating, lighting, exits, fire escapes, and others? . . . . . ( )

e. Can facilities required for adult classes be used independently of the rest of the building? . . . . . ( )

f. Are the facilities of adequate size to house all training being given? . . . . . ( )

COMMENTS:

3. To what extent does the layout or floor plan for the manipulative areas make possible effective instruction?

CHECKLIST:

a. Does the instructor have an adequate view of all activities? . . . . . ( )

b. Are the manipulative areas sufficient in size for the proper placement of all necessary equipment? . . . . . ( )

c. Is the equipment so arranged as to provide for efficient and safe instruction and operation? . . . . . ( )

d. Are storage facilities adequate and convenient? . . . . . ( )

e. Are receiving and shipping facilities adequate and convenient? . . . . . ( )

f. Is the number, size, condition, and location of student shop and laboratory lockers satisfactory? . . . . . ( )

g. Are washrooms and toilet facilities adequate and convenient? . . . . . ( )

COMMENTS:

SECTION III - PHYSICAL FACILITIES (Continued)

4. To what extent does the layout or floor plan for the trade technology areas make possible effective instruction?

CHECKLIST:

a. Is the technology laboratory located near or adjacent to the manipulative areas? . . . . . ( )

b. Are the room sizes adequate? . . . . . ( )

c. Are there adequate provisions for using visual aids? . . . . . ( )

d. Are there adequate and convenient storage facilities? . . . . ( )

e. Are washrooms and toilet facilities adequate and convenient? . . . . . ( )

5. How adequate and appropriate are the tools and/or equipment available in the manipulative areas?

CHECKLIST:

a. Are the manipulative areas suitably equipped with the types and varieties of tools and/or equipment to make possible effective training? . . . . . ( )

b. Is the number of tools and/or items of equipment adequate? . . . . . ( )

c. Is the quality of tools and/or items of equipment comparable to those used in business and industry? . . . . . ( )

d. Is the size of tools and/or items of equipment comparable to that of those used in local business and industry? . . . . . ( )

e. Are the tools and/or items of equipment maintained in a satisfactory working condition? . . . . . ( )

f. Is there a functioning plan for the replacement of obsolete, unsafe, and worn out tools and/or items of equipment? . . . . . ( )

g. Are the tools and/or items of equipment found in the shop or laboratory necessary for the successful operation of the existing program or that planned for the future? . . . . . ( )

COMMENTS:

SECTION III - PHYSICAL FACILITIES (Continued)

6. How adequate are the tools and/or items of equipment available for use in the trade technology area?

CHECKLIST:

a. Does the equipment and/or furniture have sufficient flexibility of movement to permit effective demonstration grouping for learning, and independent study? . . . . . ( )

b. Are adequate tools and/or items of equipment available for experiments and/or demonstrations? . . . . . ( )

COMMENTS:

7. How safe are the tools and/or items of equipment and the physical facilities provided for trade and industrial education?

CHECKLIST:

a. Are all tools, machines, and equipment properly guarded? . . ( )

b. Are the floors normally free from hazards, and if necessary, properly marked so as to provide work areas and aisles? . . ( )

c. Are adequate facilities provided for the storage and/or disposal of inflammable materials? . . . . . ( )

d. Is adequate equipment provided for giving a fire alarm, calling the fire department, and extinguishing fire? . . . . . ( )

e. Is all electrical equipment properly installed, fused, controlled, guarded, and designated? . . . . . ( )

f. Is all gas, oil, or air equipment properly installed, controlled, guarded, and designated? . . . . . ( )

SECTION IV - DIRECTION OF LEARNING

A. Instructional Staff

PINK

STATEMENT OF GUIDING PRINCIPLES

The instructional staff should be made up of competent individuals functioning as a cooperative group, having common goals, and motivated by high ideals.

1. To what extent do the personal qualifications and professional attitudes of the instructor contribute to efficient learning on the part of the students?

CHECKLIST:

a. Is the instructor properly groomed and satisfactorily dressed for the instruction to be given? . . . . . ( )

b. Does the instructor have a desirable personality? . . . . . ( )

c. Is there evidence that the instructor has the respect and confidence of the students? . . . . . ( )

d. Is there evidence that the instructor is sincere, loyal, and conscientious in regard to his work? . . . . . ( )

e. Is there evidence that the instructor arouses the students' interest in learning? . . . . . ( )

f. Is there evidence that the instructor reacts favorably to advice and constructive criticism? . . . . . ( )

g. Does the instructor have good physical and mental health? . . ( )

h. Is there evidence that the instructor's attitude toward his job stimulates the development of desirable attitudes toward work on the part of the students? . . . . . ( )

i. Does the instructor use good tone quality, good grammar, and no improper expressions in his speech? . . . . . ( )

j. Is there evidence that the instructor has a sincere interest in and a good understanding of the age group which he instructs? . . . . . ( )

k. Is there evidence that teaching is the primary interest of the full-time instructor and of the part-time instructor while on the job? . . . . . ( )

SECTION IV - DIRECTION OF LEARNING (Continued)

l. Is there evidence that the instructor participates cooperatively in all phases of the school program in which he should be concerned? . . . . . ( )

m. Is there evidence that the instructor recognizes the importance of the objectives of the other departments within the school? . . . . . ( )

n. Is there evidence that the instructor is acquainted with and follows the accepted code of ethics of the school in which he works? . . . . . ( )

COMMENTS:

2. To what extent does the instructor possess the professional qualifications necessary for effective trade and industrial teaching?

CHECKLIST:

a. Is the instructor properly certified? . . . . . ( )

b. Has the instructor qualified for advanced certification according to the years of his teaching experience? . . . . . ( )

c. Has the instructor developed further professional qualifications beyond certification by advanced training? . . . ( )

d. Has the instructor made any professional contributions such as writing for publication, preparing instructional materials, developing instructional methods, or holding office in professional organizations? . . . . . ( )

e. Does the instructor belong to and participate in accepted national, state, and local professional organizations? . . . . . ( )

f. Is there evidence that the instructor has knowledge of safety, first aid, and hygiene as it applies to the trade taught? . . . . . ( )

g. Is there evidence that the instructor willingly participates in the teacher-improvement program, and departmental and staff meetings? . . . . . ( )

h. Is there evidence that the instructor is familiar with the Ohio Plan of Trade and Industrial Education? . . . . . ( )

COMMENTS:

3. To what extent does the instructor's business or industrial experience and knowledge of current practices provide him with an adequate degree of competency for the instruction being given?

CHECKLIST:

a. Is there evidence that the instructor's trade or occupational experience was successful? . . . . . ( )

b. Is there evidence that the instructor's trade or occupational experience is sufficiently recent? . . . . . ( )

c. Is there evidence that the instructor's trade experiences were sufficiently varied? . . . . . ( )

d. Is there evidence that the skills and knowledge taught by the instructor are acceptable to business and/or industry? . . . . . ( )

e. Is there evidence that the instructor makes frequent and purposeful visits or contacts to businesses or industries to keep himself abreast of his trade or occupation? . . . . . ( )

f. Is there evidence that the instructor makes frequent use of current periodicals to keep him abreast of this trade or occupation? . . . . . ( )

COMMENTS:

SECTION IV - DIRECTION OF LEARNING (Continued)

B. Instructional Activities

STATEMENT OF GUIDING PRINCIPLES

The instructional activities should aim to develop saleable trade skills and knowledge, desirable behavior patterns, and acceptable social traits.

1. How satisfactorily does the instructor follow a plan of instruction that contributes to efficient learning on the part of the student?

CHECKLIST:

a. Is there a course of study for each trade taught which includes all the skills and knowledge concerning which instruction should be given? . . . . . ( )

b. Has the course of study been reviewed and approved by an advisory committee? . . . . . ( )

c. Is there evidence that the instruction given is based on the course of study? . . . . . ( )

d. Is there evidence that each day's instruction has been carefully planned? . . . . . ( )

e. Is there evidence that the instruction is so planned that individual learners are encouraged to develop their highest skills and to advance at their maximum rates? . . . . ( )

f. Is there evidence of planning to provide for correlation between the manipulative and technological phases of the training? . . . . . ( )

COMMENTS:

SECTION IV - DIRECTION OF LEARNING (Continued)

2. To what extent does the instructor use the most effective teaching methods in each learning situation? . . . . . ( )

CHECKLIST:

a. Do the instructional methods used seem to secure the attention and interest of the students being taught? . . . . . ( )

b. Do the instructional methods used appear to develop in the student a desire to learn? . . . . . ( )

c. Do the methods used appear to be the most effective means of developing the skills or providing the information being taught? . . . . . ( )

d. Do the methods used motivate good participation on the part of the students? . . . . . ( )

e. Do the methods used make possible instructor evaluation of student progress? . . . . . ( )

f. Is there evidence that the instructor is aware of the individual differences of the learner and teaches accordingly? . . . . . ( )

g. Is there evidence that the instructor chooses wisely from such methods of instruction as lecture, demonstration, conference, resource persons and panels, student committee reports, and business or industrial visitations? . . . . ( )

h. Is there evidence of correlation between the instruction given in the manipulative phases of the trade or occupation and the related technology taught? . . . . . ( )

COMMENTS:

3. Do the methods used by the instructor in the organization and management of the activities in the manipulative and trade technology areas contribute to effective learning on the part of the students?

CHECKLIST:

a. Are the methods of management patterned after those found to be effective in business and industry? . . . . . ( )

b. Is there an efficient student personnel system? . . . . . ( )

c. Is there evidence that the students willingly accept their responsibilities of organization and management? . . . ( )

d. Is there evidence of cooperative planning for organization and management duties? . . . . . ( )

e. Is there an efficient system of handling, conserving, and recording the issuance of materials and supplies? . . . . . ( )

COMMENTS:

C. Instructional Aids and/or Materials

STATEMENT OF GUIDING PRINCIPLES

Appropriate instructional aids and/or materials should be selected and used to stimulate interest, to facilitate learning, and to make possible either individual or group instruction.

1. How satisfactorily do the instructional aids and/or materials used by the instructor meet the specific needs of the students in each manipulative or trade technology class?

CHECKLIST:

a. Are there sufficient up-to-date textbooks and are they used effectively? . . . . . ( )

b. Are manuals, handbooks, periodicals, and manufacturer's publications used effectively? . . . . . ( )

c. Are visual aids, such as films, slides, mock-ups, and cut-aways used effectively? . . . . . ( )

d. Are the machines and tools being used in such a manner as to provide the most effective training? . . . . . ( )

e. Is efficient use made of materials and supplies? . . . . . ( )

f. Is there evidence that instructional aids and/or materials selected for use are appropriate and timely? . . . . . ( )

COMMENTS:

SECTION IV - DIRECTION OF LEARNING (Continued)

2. How effectively does the instructor motivate and guide the students in the use of instructional aids and/or materials?

CHECKLIST:

a. Is there evidence that the students can readily locate and use the instructional aids and/or materials they need? . . . . . ( )

b. Is there evidence that the instructional aids and/or materials used by the student indicate a correlation between his manipulative and trade technology instruction? . . . . . ( )

COMMENTS:

D. Methods of Evaluating the Progress of Students

STATEMENT OF GUIDING PRINCIPLES

Evaluation should be a continuous process; an integral part of instruction concerned with measuring individual growth and development and intended to improve the quality of instruction.

1. Is there an effective plan for the evaluation of student progress used by the instructor?

CHECKLIST:

a. Does the instructor use a rating scale to measure the degree of student progress in trade technology classes? . . . . ( )

b. Does the instructor use a rating scale to measure the degree of skill that a student develops in manipulative work? . . . . . ( )

c. Does the instructor use a rating scale to measure the development of personal and social qualities? . . . . . ( )

d. Does the instructor use a rating scale to measure the development of work qualities and habits? . . . . . ( )

e. Does the instructor also use tests of an appropriate type to measure student progress when necessary? . . . . . ( )

f. Does the instructor schedule his evaluation or tests at the completion of the job, project, or unit of instruction? . . . ( )

g. Does the instructor give periodical tests in keeping with the local school policies? . . . . . ( )

COMMENTS:

SECTION IV - DIRECTION OF LEARNING (Continued)

2. Are there reliable and valid records kept by the instructor which reveal the student's progress?

CHECKLIST:

a. Does the instructor post progress charts which give the essential information regarding each student's current assignment and past record of areas of training? . . . . . ( )

b. Does the instructor keep a grade book in which he records data not listed on progress charts, but which is essential for the determination of a grade or mark for the student? . . . . . ( )

c. Does the instructor maintain a file for each student which contains the student's learner profile charts, complete job plan sheets, work records, and other pertinent information? . . . . . ( )

d. Does the instructor maintain an accurate record of attendance for each student enrolled in his class? . . . . . ( )

COMMENTS:

SECTION IV - DIRECTION OF LEARNING (Continued)

3. Does the instructor secure information by interviews and/or conferences to evaluate student progress?

CHECKLIST:

a. Does the instructor discuss with each student his individual progress? . . . . . ( )

b. Does the instructor-coordinator discuss with employers of students their progress? . . . . . ( )

c. Does the instructor visit with the parents for the purpose of discussing the student's progress? . . . . . ( )

d. Does the instructor discuss with craft committee members the progress of students? . . . . . ( )

e. Does the instructor seek the counsel of other staff members who can help him evaluate student progress? . . . . ( )

COMMENTS:

SECTION IV - DIRECTION OF LEARNING (Continued)

4. How effectively does the instructor use the information provided by rating scales, records of measurement, and individual interviews and/or conferences to improve instruction?

CHECKLIST:

a. Does the instructor re-teach the skills and knowledge which in an evaluation of group learning indicates that they have not been mastered by the students? . . . . . ( )

b. Does the instructor provide further help for any individual whose skills and knowledge have been found inadequate when evaluated? . . . . . ( )

c. Does the instructor take action to revise his plan of instruction or improve his teaching methods when either have been revealed as unsatisfactory? . . . . . ( )

Results of Survey to Ascertain if the Arlington County Public Schools' Industrial Education Program is Organized and Attuned to Present Trends.

Arlington County Public Schools, Va. Dept. of Industrial Education
MF AVAILABLE IN VT-ERIC SET.
Pub Date - Mar66 27p.

*INDUSTRIAL EDUCATION; TEACHER ATTITUDES; INDUSTRIAL ARTS; ADMINISTRATOR ATTITUDES; *TRADE AND INDUSTRIAL EDUCATION; *EDUCATIONAL OBJECTIVES; *PROGRAM EVALUATION; SURVEYS
*ARLINGTON COUNTY PUBLIC SCHOOLS; VIRGINIA

In 1965 a survey was conducted to ascertain whether the curriculum was attuned to present trends, goals, and objectives and to find out if program organization was properly planned for the students. A paper covering the objectives of industrial arts, an explanation of the industrial education program, and proposals for additional courses was written, reviewed, and rewritten. Each staff member submitted his philosophy, goals, and beliefs for industrial education, and from these, 36 statements were compiled. The paper, a chart which differentiated industrial arts and vocational education, the statements with instructions for their evaluation against six criteria, and a cover letter were mailed to county teachers, principals, and counselors, teacher educators, state directors and supervisors, and national leaders. The returns were tabulated in three groups: (1) county instructors, (2) supervisors, teacher educators, national leaders, and (3) principals and counselors. Statements receiving highest agreement concerned (1) development of safe working ability, (2) wise selection and safe use of hand and power tools, (3) development of attitude of perceiving practical problems as challenges, (4) provision for concrete achievement for slow learners, (5) improvement of students' self concept, and (6) personal awareness of social and personal traits which are essential for success. One of the seven conclusions was a comparison of statement rankings indicates considerable difference between teachers and administrators regarding the purpose, place, and methods of instruction for industrial education. Purpose of the Survey

In late September, 1965 it was suggested that a survey be conducted to ascertain if the existing Arlington County Public Schools' Industrial Education Curriculum was attuned to present trends, goals and objectives and if the organization of the total program was properly planned for Arlington County students.

The findings of the survey are presented in the following manner:

1. A condensation of each statement that was evaluated with comments concluded by comparing the tabulation of the returns.
2. A chart showing the computed means - appendix i
3. A graph used for comparison of the various means - appendix ii
4. General Findings
5. Conclusions.

Proceedings of the Survey

A committee of Industrial Education Instructors and the Industrial Education Supervisor drafted a paper which contained information pertaining to Industrial Education and its place and purpose in the total school curriculum; Industrial Arts - its purpose; the broad objectives for Industrial Arts and how they were formulated; an outline of the total Industrial Education program and the reasons for the organization of the program. Included were descriptions of the Day Trade Program, Trade Extension Programs, and proposals for additional course offerings.

This draft was published and mailed to the total Arlington County Industrial Education staff. Each member was requested to criticize, edit and re-write any part of the draft that did not agree with his

philosophy or ideas; and then return his edited draft to the committee.

The comments, suggestions and ideas received from all members of the staff were included in a final paper which indicated agreement of the total staff.

The second step of the survey was to have each staff member submit, in statement form, his philosophy, goals, and beliefs for Industrial Education. The statements which had similar context were grouped and re-written into a single statement. From all of the returns there emerged thirty-six statements.

Each statement was placed in a list to be evaluated using the following three broad categories:

1. Depth of study for the junior high student
2. Depth of study for the senior high student
3. Importance of the statement toward fulfilling the philosophy of education for the Arlington County Public Schools.

The third phase of the survey was to assemble a packet which contained - the final paper, a chart showing the differences between Industrial Arts and Vocational Education, a list of statements with the instructions for their evaluation, and a cover letter requesting an evaluation of the total program including suggestions for deletion, addition or innovation to the existing total Industrial Education Program.

These packets were mailed to the Arlington County Industrial Arts teachers, secondary principals, assistant principals and head guidance counselors. Within the state of Virginia requests were sent to the State Industrial Education staff, teacher-educators, and local direc-

tors and supervisors of Industrial Education programs. Copies were sent outside of the state to the national leaders in the H.E.W. and American Industrial Arts Association.

A small number of copies were mailed; however, it is believed the sampling received from the leaders in the county and state was adequate to determine valid conclusions. Responses to the mailed packet were as follows:

76% - Arlington Industrial Education staff

33% - Arlington County guidance counselors and administrators

90% - Teacher-educators and local supervisors

100%- National leaders

The fourth step of the survey was to compile information from the returned evaluated forms into workable charts. To expedite tabulating the returns were divided into three groups:

1. Arlington County Industrial Education instructors
2. State supervisors, teacher-educators, local supervisors and national leaders.
3. Local administrators and guidance counselors

Each statement had been evaluated six ways and grouped into three broad categories. The criteria used for evaluation was <u>one</u> as the lowest rating of importance and <u>ten</u> as the highest rating. Means, rather than medians, were made and are graphically presented in four manners for comparison, evaluation and rank. The means were computed for the following:

I. a. Mean for each statement related to depth of study in junior high school as determined by <u>all groups</u>.

b. Mean for each statement related to depth of study in junior high school as determined by each group.

II.

a. Mean for each statement related to depth of study in the senior high school as determined by all groups.

b. Mean for each statement related to depth of study in senior high school as determined by each group.

III.

a. Mean for each statement related to its importance to the total program as determined by all groups.

b. Mean for each statement related to its importance to the total program, as determined by each group*.

* appendix i

The final step was to make a comparison of group evaluations to (1) ascertain patterns, (2) make statements of general findings, and (3) make statements of conclusions.

COMMENTS CONCLUDED BY COMPARING THE TABULATION OF THE RETURNS

The following summary of each statement was made by comparing and ranking the results received from each group.

1. "to develop an awareness of the contributions and impact industrial technology has upon society."

   Returns indicated that the statement received one of the five lowest overall evaluations and was considered to have little importance for the development of students. Teacher-educators and supervisors thought it should be studied in depth in the senior high schools.

2. "to develop an awareness that family life is ever changing due to automation"

   Returns showed this statement to have one of the five lowest overall evaluations. Teachers, supervisors and teacher-educators believed there should be a depth study made in the senior high grades.

3. "Utilization of human resources are desirable if today's citizens are to function intelligently."

   This statement does not warrant study in depth at the junior or senior high level, but should be included in total curriculum. State supervisors and teacher-educators believe this should be studied in depth.

4. "aware of man's attempt to control his environment"

   Returns indicated this statement to be one of the less important studies for senior high, and received one of the five lowest overall evaluations.

5. "Insight into the interdependence of industry, government and business." This statement received one of the five lowest ratings. Teacher-educators and supervisors felt it should be studied to some depth at the senior high level.

6. "Appreciation for the industrial products which are taken for granted"

   Returns showed this statement had an overall rating as one of the five least important studies.

7. "Awareness of the contributions to society of persons engaged in industry"

   This should be studied in some depth at the junior high level and was considered of lesser importance to senior high students.

8. "Awareness of the need for all people to cooperatively work together."

   Returns indicated that a depth study should be made in the junior high schools. Overall a study should be included in the total program as it can be important to achieve the philosophy of education.

9. "Awareness of the dignity of labor and that life and work are compatable"

   Returns showed that a depth study should be made at the junior high level and a lesser study made at the senior high.

10. "a positive attitude toward continuing education"

    All groups indicated a depth study should be made at both levels and it is of average importance in achieving the philosophy of education.

11. "a favorable attitude toward the conservation and use of tools, materials and machines"

    All groups believed this statement to be of importance to the total curriculum and believed it should help to achieve the philosophy of education.

12. "become aware of concepts and structures of industry"

    Returns indicated that all groups believed this statement to be of importance. State leaders believed it to be of extreme

importance for study in the senior high. Little value was given to achieving the philosophy of education.

13. "Awareness of the major subdivisions of industry."

    Returns showed that the state leaders believed this statement to be of extreme importance to the senior high student. Other groups gave it little importance and it was ranked as one of the five lowest.

14. "to discover and develop vocational - industrial or technical skills"

    All groups ranked this as one of the five lowest for junior high students, and placed average importance for senior high. A rather high evaluation was given to its importance to the overall program.

15. "discover and develop his avocational interest"

    All groups evaluated this statement as above average and indicated it was important to the total curriculum.

16. "perform industrial research in the school or shop library"

    Returns indicated that a depth study should not be made in junior or senior high; state leaders placed a high evaluation for senior high study. A rather high evaluation was given to its importance to the overall program.

17. "View industrial plants while they are engaged in production."

    Results showed this statement to have little importance for junior high and average importance to senior high. This statement received one of the five lowest evaluations for junior high. State leaders placed great importance on the study for senior high students.

18. "select, care and use wisely industrial products."

Returns indicated varied beliefs with little importance stressed for junior high study while great emphasis should be placed in senior high study.

19. "develop ability to work safely"

This statement received the highest ranking of importance by all groups. This evaluation could have been predetermined.

20. "to wisely select and safely use hand and power tools."

This statement received one of the five highest rankings of importance by all groups. This evaluation could have been pre-determined.

21. "attitude of perceiving practical problems as challenges and not obstacles"

This statement received one of the five highest evaluations as to importance by all groups.

22. "use democratic process to arrive at a solution for manufacturing an item in the school shop."

Returns indicated a depth study should be made at the junior high level, while a lesser study should be made at the senior high.The returns showed the statement to have average importance for achieving the philosophy of education.

23. "concrete achievement for those who cannot make abstract concepts."

Great emphasis was given to this statement by all groups. It was ranked one of the five highest for senior high study.

24. "to improve self concept through successful completion of a project"

    This statement ranked as one of the five highest for depth of study in junior high and senior high school. The highest overall evaluation was given to this statement for achieving the philosophy of education.

25. "Student should become aware of and develop insight into his behavioral patterns"

    "Returns indicated this statement to be of little importance for junior high study but had significant importance to senior high study. In an overall evaluation it was indicated as being important for the philosophy of education.

26. "to convey thoughts, words or pictures by means of electromechanics or graphic arts."

27. "an understanding of the handcraft industries, their organization, management, tools, products, processes and occupation involved in production."

28. "an understanding of technical achievements of man concerned with methods and processes used in creating articles of value for mass consumption."

28. "an understanding of technical achievements of man concerned with methods and processes used in creating articles of value for mass consumption."

29. "the tools and procedures used in technology of product maintenance and the enhancement of product value."

30. "technology of harnessing and controlling power including its sources, creation, transmission and the use of power devices and vehicles."

Statements 26 - 30 described the activities of the various laboratories. Returns seemed to indicate that specific laboratories for study were not of significant value to junior high students; by comparison a considerably higher importance was given for providing specific laboratories for senior high students. This was unanimously indicated by each group. The returns indicated that general shops should be organized in junior high and unit shops should be organized in the senior highs.

31. "awareness of the industrial design in his total environment."
Returns indicated this statement to be of average importance for study in the junior high and slightly above average in the senior high.

32. "awareness of how some of the major materials are produced"
This showed slightly above average in importance for study in both junior and senior high.

33. "Engage in learning experience of designing, planning, engineering, fabricating and completing an article or transmit his ideas of design, engineering and fabricating"
Returns showed this statement should receive an average study in the junior high and much greater depth of study should be made

in the senior high. It is important to help fulfill the philosophy of education.

34. "Apply his learned body of knowledge with his hands to determine the practicability of his ideas."

    This statement showed to be of average importance to junior high and extremely important to senior high. The statement was evaluated as one of the five highest in importance to assist in fulfilling the philosophy of education.

35. "Should engage in learning experience of exploring and experimenting with tools and materials"

    This statement was evaluated as one of the five most important for both junior and senior high school students, and is of great value to achieve the philosophy of education.

36. 'Become aware of the social and personal traits essential to success as a worker and student"

    This statement was evaluated as one of the more important studies for both junior and senior high and was considered of great importance in fulfilling the philosophy of education.

STATEMENT OF GENERAL FINDINGS

Comparing the lowest mean as evaluated by the total group for a statement to the highest mean as evaluated by the total group for a statement, there is a range from 5.26 to 7.74; therefore, all statements presented for evaluation have value to the total program. The following conclusions then become the degree of value of each statement to the total program rather than elimination of study from the total program.

The list to be evaluated had thirty-six statements and each statement was to be evaluated, using six criteria. This required an evaluator to make two hundred and sixteen evaluations. Ranking, as determined by each group using the mean for each criteria, is shown below.

RANKING BY CRITERIA EVALUATIONS OF EACH GROUP

Number of Evaluations		Highest Group	Middle Group	Lowest Group
122		S.S., T.E.	I.E.I.	A, C.
25		S.S., T.E.	A, C.	I.E.I.
	147	S.S., T.E.		
46		I.E.I.	S.S., T.E.	A, C.
7		I.E.I.	A, C.	S.S., T.E.
	53	I.E.I.		
10		A, C.	S.S., T.E.	I.E.I.
6		A, C.	I.E.I.	S.S., T.E.
	16	A, C.		
Total	216			

Code:

S.S., T.E. - Supervisors, State, Teacher Educators
I.E.I. - Industrial Education Instructors
A, C. - Administrators and Counselors

The evaluations, as ranked, can be interpreted to indicate that teacher-educators and supervisors within the state have, by comparison to the other groups, greater insight into the total industrial education program and through their leadership they are attempting to broaden the scope of Industrial Education.

Administrators indicate, by their seventeen highest evaluations, a need for the teacher to place greater emphasis on helping

the student to build a better self-concept and to help the student discover his abilities.

In order to ascertain any established pattern by a group or groups, the evaluated statements were divided into four categories; those that would aid in:

1. Developing broad understanding or concepts
2. Developing manual skills
3. Developing problem solving skills
4. Developing self concepts and self discovery

Each statement was placed into one of the above categories and was ranked from high to low according to its mean as each group had evaluated the statement. By comparing the ranking of statements by each group the following is implied:

1. In grades 7 - 12 equal emphasis should be placed upon the instruction provided to students for; (a) the study of the broad understandings of conservation and use of tools, materials and machines, (b) developing the broad concepts of the structure of industry, (c) developing an appreciation for industrial design (d) providing the knowledge of how some materials are produced.
2. In the junior high school additional teaching emphasis should be placed on (a) developing the broad understanding of the impact of technology upon society (b) developing an appreciation for the industrial products (c) becoming aware of the contributions workers make to society.
3. The statement rankings indicated that junior high school students should be provided the opportunity to discover

and develop avocational interests followed by a senior high experience that would provide the opportunity for students to develop manual skills for pre-vocational or vocational training.

4. According to the returns all students should be given the opportunity to (a) explore and experiment with tools and materials, (b) test their ideas through the fabrication of materials.

5. The returns indicated that junior and senior high students should design, plan, engineer, fabricate and complete a project.

6. Industrial field trips were not thought too important to junior high instruction. They were believed to be important to senior high instruction.

7. All students are users and consumers of manufactured goods; yet it was felt that the knowledge required for the selection, care and use of industrial products was of little importance to junior high students and of great importance to senior high students.

8. The returns indicated that at all grade levels industrial education teachers should place greater emphasis upon teaching cooperate work habits, the dignity of labor, positive attitude towards continuing education, perceiving practical problems as challenges, democratic group process; helping the student to imporve his self-concept through his successful completion of his projects. The returns emphasized the importance of helping the student recognize his behavioral patterns, and helping the student to become aware of the social and personal traits which are important for success as a worker or student.

CONCLUSIONS

The evaluated returns were divided into three groups as submitted by (1) administrators, (2) Industrial Education instructors, (3) State supervisors, teacher-educators and local directors. The mean was computed for each statement as evaluated by each group and then used for the purpose of ranking and comparing that mean with other groups. All returns were computed to find an overall mean for each statement which was then ranked by importance and compared to each group mean.

From ranking and comparing, the following are concluded:

I. All groups gave a high evaluation to a number of statements which were related to the student's self-appraisal and to the student's learning about himself and little importance was given to the type of laboratory that was provided. This indicates that emphasis should be placed on the development of persons rather than things. This follows the Arlington County philosophy of education and the belief of the industrial education staff.

II. The Junior High Industrial Arts program should provide for the exploration of tools, materials and processes developed in a General Shop environment. The General Shop organization is used in Arlington County Public Schools.

III. The Senior High program should provide the opportunity for the student to develop some pre-vocational or vocational manual skill. Arlington County has organized for the senior students the General Unit Shop and the Unit Shop which provides the facilities for a study in depth in a limited area.

Example: General Metals, Printing, Auto Mechanics. Vocational training is provided through a cooperate work program. Day Trade classes are provided in printing and auto mechanics. A day trade Cosmetology program is in the planning stage.

IV. In junior high school greater emphasis should be placed upon teaching the broad understandings of industry and its place in our technological society. This is in agreement with the definition of Industrial Arts as stated in the Arlington County Public Junior High Industrial Arts Curriculum Guide.

V. Students should plan, design, engineer and fabricate projects. This justifies instruction in design, shop mathematics, problem solving, and research. A county-wide student plan sheet, designed by teachers, is used for this purpose. This plan sheet has virtually eliminated in the county, teacher prepared job sheets which permit little thinking on the part of the students. A more sophisticated program Research and Development, will be inaugurated in a senior high in 1966.

VI. Comparison of statement rankings indicate that between Industrial Education instructors and Administrators there is a considerable difference regarding the purpose, place and methods of instruction for industrial education.

VII. Comparison of statement rankings indicate that between the state leaders and the Arlington County staff, there is a slight difference of opinion regarding the purpose, place and methods of instruction for Industrial Education. This would indicate that

Arlington County Industrial Education Staff is attuned to the State of Virginia.

VII. None of the returns suggested additions, deletions or innovation to the existing program. Therefore, it can be concluded that the Arlington County Public School offerings and organization of its Industrial Education Program is in agreement with present trends, objectives and philosophy.

Supplementary Information on Instructional Material

Provide information below which is not included in the publication. Mark N/A in each blank for which information is not available or not applicable. Mark P when information is included in the publication. See reverse side for further instructions.

(1) Source of Available Copies:
Agency ERIC only
Address
Limitation on Available Copies - Price/Unit
(quantity prices)

(2) Means Used to Develop Material:
Development Group Teachers in program & instructional Dean
Level of Group Registered nurses with B.S. and/or M.S. degrees
Method of Design, Testing, and Trial Designed to bring all teaching School and Clinical under school instructors. Now being tried for adequacy. First approved by State Board of Nursing.

(3) Utilization of Material:
Appropriate School Setting Milwaukee Technical College
Type of Program 12-Month Practical Nursing Program
Occupational Focus as above
Geographic Adaptability Wisconsin only
Uses of Material Course planning
Users of Material Instructors of students in Practical Nursing Program

(4) Requirements for Using Material:
Teacher Competency Registered Nurses with at least B.S. degree
Student Selection Criteria shown in publication
Time Allotment shown in publication

Course Summary Sheets

Outlines of Instruction

(These courses are in the process of revision and rearrangement.)

Three new courses are being constructed as follows:

1 - Nurs 106 MEDICAL AND SURGICAL NURSING 2
(This is at present included in parts of 105, 107, and American Red Cross First Aid.)

2 - Nurs 116 DIET THERAPY
(At present included in Nurs 111. Nurs 111 will include normal nutrition and pregnancy, and aged diets only.)

3 - Nurs 118 DRUGS AND THEIR ADMINISTRATION

Department of Practical Nursing

A Presentation to the State Board of Nurses

A Plan for Curriculum Revision

The Milwaukee Institute of Technology Practical Nursing faculty hereby present to the Wisconsin State Board of Nursing a plan for revision of curriculum so that the controlling institution (The Milwaukee Institute of Technology) through the nurse director/faculty counselor will have responsibility for the total educational program from the time of recruitment and enrollment through graduation of the student.

Several factors have influenced the faculty in attempting this revision:

1. The National League for Nursing "Criteria for the Evaluation of Educational Programs in Practical Nursing"[1] has given incentive and has pointed up the need for revision so that the entire program will be the responsibility of the controlling institution.
2. The Wisconsin State Department of Nurses, the Wisconsin State Board of Vocational and Adult Education, and the Administration at the Milwaukee Institute of Technology have recognized the weakness inherent in the present curriculum because the responsibility for the entire program has been divided between the so-called controlling institution and the cooperating agencies. This is evidenced by the fact that the cooperating agencies have subsidized the students with educational stipends which in turn implies that service demands at times may take precedence over educational needs of the student. This has been evidenced by many weekend terms of duty of all students in nearly all the affiliating areas, and usually under the supervision of other

[1]"Criteria for the Evaluation of Educational Programs in Practical Nursing," National League for Nursing, Department of Practical Nursing Programs, 1965.

than the clinical instructors. The cooperating agencies have also very generously employed the clinical instructor or instructors for the students assigned to their cooperating agency. These clinical instructors have in all cases had other dutied assigned them by the agency besides those of the student practical nurse; and rightly so, since the school was not paying for their services to the student.

These factors have been paramount in the consideration for a revision of curriculum. However, until the Vocational Act of 1964 was passed, there was not money enough to pay for the enlarged instructional staff necessary for the revised curriculum. With the aid given from this source, it seems that, at long last, the school can assume its entire responsibility as the controlling educational institution.

The Administration and Faculty of the Practical Nursing Program wish to thank the Wisconsin State Board of Nursing for the consideration of this curriculum revision.

SECTION I

Philosophy and Objectives

Philosophy of MIT

A stated philosophy of the Milwaukee Institute of Technology in the 1963-64 Annual Descriptive Report is as follows: "The primary mission of all schools is to provide vocational and technical training which will lead toward employment, or to provide retraining which may lead to advancement or to a vocational competence in a new or different skill."

Philosophy of the Practical Nurse Faculty

The faculty of the Practical Nursing Program of the Milwaukee Institute of Technology believe that practical nursing is an integral and essential part of all nursing, and that qualified persons can be prepared, in a relatively short period of time, to meet the nursing needs of the community for practitioners who can function safely and efficiently under the direction of a registered nurse or a physician. This belief is founded upon the knowledge that the educational needs of the student must be well defined, that the learning experiences must be carefully selected and supervised, and that the individual must be challenged to become a mature, well-adjusted person, capable of making sound judgments within the scope of her preparation.

Purpose

The purpose of the Practical Nursing curriculum is to provide effective educational and clinical experiences to enable qualified persons to become safe,

competent, licensed practical nurse practitioners, who, working under the supervision of a registered nurse or physician, can assist in meeting the nursing needs of the community.

Purpose (continued)

The objectives are:

Objectives

1. To assist the student to acquire knowledge, to develop skills, and to learn the ability to exercise judgment in nursing situations under the direction of a professional nurse or physician.
2. To assist the student to develop wholesome attitudes, appreciations, and ideals for a successful, happy life.
3. To impart to the student the concepts of good patient care and to instruct her in the practical use of these concepts.
4. To prepare the student to function effectively as a member of a team in various health and social community services.

SECTION II

Organization and Administration

Origin of Practical Nursing at MIT

Practical nurse training was introduced as an organized program at the Milwaukee Institute of Technology in September, 1947, by the Board of Vocational and Adult Education. Because of America's rapidly expanding population, the longer life span of the average individual, and the increase in chronic illness among aging people, there has developed a great need for additional nursing services. The supply of professional nurses is not enough to meet these demands, so a program was started to educate persons to do practical nursing. The trained practical nurse supplements the services of the professional nurse. The program provides effective school and clinical experiences that will result in a development of the skills and related knowledges required to perform safely and intelligently the duties of a practical nurse.

Organizational Plan

The Organizational Chart, Exhibit I, shows the lines of authority and the channels of communication within the controlling educational institution, and the relationship with the personnel of the cooperating agencies.

Administrative Responsibility

The nurse director/faculty counselor has the responsibility for the total program and she in turn is accountable to the director of the controlling educational institution (MIT).

Policies and Finances

The controlling educational institution determines the policies and provides the financial resources for the entire program through local, state, and federal funds.

Instructor Responsibilities

The instructor of the practical nursing program is responsible for those students assigned to her area of instruction in teaching, supervising, evaluating, guiding, and counseling.

On-the-spot disciplinary action is to be carried out by by the instructor in a rational, fair manner when the welfare of the patient is at stake, or when the learning and well-being of fellow associates is hampered by the student's actions. All such disciplinary actions are to be reported as soon as possible to the nurse director/faculty counselor. Further action, if needed, will be the responsibility of the faculty counselor to either take action, or refer the student to the guidance counselor and/or the school psychologist.

Instructor's Professional Assignment

The instructor's professional assignment will provide time for student evaluations, faculty meetings, curriculum development, and in-service education. The percent of her load will be equated to that of other instructors in the controlling institution in accordance with a school policy, but the difference in her kind of responsibilities to those of other disciplines will be considered in her assignment.

It is recognized by the administration that the control cannot be too rigid, but that there needs to be much creativity and flexibility in planning the curriculum so that improvement will not be stymied.

Flexibility of Control

The personnel department has on file each instructor's qualifications, and all personnel policies for the faculty are provided in writing in the procedure manual provided for each faculty member.

Personnel Policies:

These include:

Qualifications for the position (See under Faculty, Section IV) Salary scale and promotion policies.

a. Qualification for Position

The vacation for the practical nurse faculty is the same as the other Milwaukee Institute of Technology faculty during the school year, which includes the school recesses and holiday time.

b. Vacations

Sick leave is provided by the school and includes fifteen days per year accumulative to 120 days.

c. Sick Leave

Since the practical nurse program is a 365-day program, the faculty may be assigned to work an additional period of time during the summer, at the same rate of pay as during the academic year.

d. Summer Work

The school provides for a sabbatical leave for purposes of study following six years of successful teaching on a full-time basis. During this time, the instructor is paid one-half of her monthly salary.

e. Leave of Absence for Study

A State Teacher Retirement plan is provided, and this is paid in accordance with the monthly salary of the instructor. It is deducted from the bi-monthly checks, and the state contributes approximately an equal amount to the fund. This plan is coordinated with social security.

f. Retirement Plan

A major medical insurance program is provided for the employee of the Milwaukee Institute of Technology. This includes both in- and out-patient medical care, as well as for all prescribed drugs. The premium is paid by the school. An employee may elect to include his or her family.

g. Major Medical Insurance Plan

The instructor may elect to come under the group life insurance plan. The individual pays one-half of the premium, and the school pays the rest.

h. Group Life Insurance Plan

After three years of successful teaching, the instructor will come under the provisions of the State Tenure Laws.

i. Tenure

The total program is financed by the controlling institution with money made available through local, state, and federal funds.

Finance and Budgets

Yearly, each instructor is given an opportunity to make a budget for equipment and supplies needed for the betterment of her area of instruction. These budgets are first approved by the nurse director/ faculty counselor and then submitted to the director

of the school for further action by the director and business manager in consultation with the faculty counselor.

Finance and Budgets (continued)

Agreements between the controlling institution (The Milwaukee Institute of Technology) and the cooperating agencies will be drawn up by joint action. The responsibilities of each party will be identified, and special care will be given to indicate the new approach whereby the controlling institution will have full control of the students' learning experiences. Plans for annual review will be written into the agreement. A sample agreement is attached as Exhibit II.

Agreements

An advisory committee has been functioning, and its advice is sought, either as a committee or individually as community citizens. The members composing this committee were selected from all groups concerned with the education of practical nurses. Representation is as follows:

Advisory Committee:

a. Composition

1. a Registered Nurse
2. a Licensed Practical Nurse
3. a Hospital Administrator (from a hospital connected with the practical nursing program)
4. a Director of Nursing (from a hospital which affiliates with the practical nursing program)
5. a Licensed Physician
6. a Public Health Nurse
7. Lay Person

See Exhibit IV.

Minutes are kept of all committee meetings.

Minutes

The program is sensitive to the community nursing needs and is assisted in publicity for purposes of recruitment of students by community resource people, committees, television announcements, newspaper releases, and a specially prepared brochure that is sent to all surrounding community high school guidance counselors. Another means of publicity for purposes of recruitment is the supplying of resource people for career day and future nurse programs.

Publicity Media

SECTION III

Curriculum

Curriculum Plan

a. Relationship of Weeks and Months in each Semester and Summer Session

The curriculum plan over the total program for the typical student is shown in Exhibits A^1, A^2, and B. In Exhibit B, the chart shows the proposed number of hours of instruction for each subject taught in relation to the weeks and months for each semester and summer session. The total hours of instruction will be approximately 1356 - 55' periods or 1243 clock clock hours.

b. Comparison of Old and Revised Curriculum

Exhibit D chart shows the comparison between the old curriculum and the revised as to hours and weeks of clinical experiences.

c. Relationship of Hours of Lecture, Laboratory, and Clinical Experience

In Exhibit A^1, there is shown a relationship of lecture hours, school laboratory hours, and clinical experience hours. The number of hours and weeks spent in each type of clinical area is shown. The weeks in clinical experience is the same as at present; that is, 42 weeks. However, because the experiences are carefully selected and because service to the cooperating agency is only incidental to the students' educational needs, it is thought that there will be a better application and understanding of the selected learning experiences received than in the old curriculum plan.

d. Primary Difference Between Old and Revised Curriculum

The primary difference between the old and the revised curriculum plans is that the total program will be provided by the controlling educational institution. This means that there will be a need for more

instructors paid by the controlling institution; there will be fewer students per instructor in the clinical areas; all students, at all times, will be under the direction of an instructor provided for them by the controlling institution, and all experiences will be selected to meet the students' educational needs.

d. Primary Difference Between Old and Revised Curriculum (continued)

The ratio of instructors to students will increase as the students become more secure and more competent until there will be twice as many students per instructor in the final clinical practicum (from one instructor for nine students to one for eighteen students).

e. Ratio of Instructors to Students

The overall ratio of students per instructor is not as high as it seems at first glance, since in the school lectures there will be either a 1:36 or a 1:72 ratio, but due to the small numbers of students that can be accommodated in the specialized areas of pediatrics and obstetrics, the ratio will of necessity be low in these areas, approximately one instructor for five or six students.

The date of admittance for each class and the rotation to the different areas is shown in Exhibit C. This chart can be used as a Master plan for the classes admitted through February, 1968. Two classes will be admitted each year at the beginning of each semester.

f. Admission and Rotation Dates

An explanation of the Master plan chart in Exhibit C above is as follows:

The entire year is divided into two semesters and one nine-week practicum. Each semester is divided into three six-week periods excluding days for school recesses. Each semester extends over 18-plus weeks. Basic nursing is taught at the school for approximately three weeks before the student is taken into the medical and surgical area of the cooperation agencies. In the medical and surgical area, the student will be introduced to the patients, and will learn to communicate with them and to develop an awareness of their needs. She will perform simple basic nursing procedures assigned by her instructor.

g. Explanation of Master Plan Chart

First Semester

a. First Six Weeks

In the second period of six weeks, the student will remain in the medical and surgical area for clinical experience. She will learn to plan and give nursing care to selected patients "in a variety of nursing situations that are relatively free of complexity,"[1] and in which the patient's condition is comparatively stable, such as encountered in care of the aged and chronic patients in all age groups. The student's experiences will proceed from the simple to the more complex as she nears the end of the second six weeks, depending upon her ability to acquire nursing skills and to learn nursing principles. She will spend two consecutive days each week in this area and will have theory classes the other three days. There will be concurrent application of theory to practice.

b. Second Six Weeks

[1]"Criteria for the Evaluation of Educational Programs in Practical Nursing," National League for Nursing, Department of Practical Nursing Programs, 1965.

First Semester (continued)
c. Third Six Weeks

The third six-week period of the first semester, the student remaining in the medical and surgical areas will be given, in accordance with her capabilities, a chance to care for the more acutely ill and convalescent patients. She will learn to plan and give care to groups of selected patients. Working under the instructor's supervision, she will be taught to assist with more complex procedures, learning to give standard or routine medications, to perform routine treatments, and to do other functions that fall within the accepted roles of the licensed practical nurse. This also will be on two consecutive days each week, with concurrent theory classes taught at school.

Second Semester

At the beginning of the second semester the student will be rotated into the different specialties, i.e., obstetrics, six weeks; pediatrics, six weeks; and mental nursing, six weeks; and will spend three consecutive days each week in the clinical area. Concurrent theory will be taught at school and each instructor will help the student in meaningful application of theory to practice.

Care of Mothers and Newborn

In obstetrics, she will be rotated between nursery and the postpartum care areas. She will learn to plan and give competent, understanding care to mothers who have had uncomplicated pregnancies. She may be allowed to observe some of the complications of pregnancy if opportunity permits. She will be allowed to observe a normal delivery and to assist in the care of the newborn baby, and give routine medications and treatments.

Pediatric Nursing Care

In the second six-week period of the second semester, the student will be rotated into pediatrics, where she will learn to plan and give care to the various age groups of childhood. She will learn to understand the stages of development of children and their normal differences, in addition to having an opportunity to cope with the care of the sick child and to learn how his behavior may be affected by illness. She will have an opportunity to observe individual differences and will help in planning for play therapy. She may assist in giving routine medications and treatments if allowed by hospital policy.

Care of the Mentally Ill

The last six weeks of the second semester, the student will spend in the care of patients with mental illnesses. She will learn to plan, observe, and care for the various types of mentally ill patients. During this period she will help in planning for their rehabilitative therapy and will spend time learning to help the patient communicate. The student will be helped to recognize the different forms of mental illness, and to learn that each patient may show a variety of psychotic symptoms. She will assist in giving medications and treatment to these patients.

Practicum

Following a four-week vacation, the student will go back to the medical-surgical area of her first semester's clinical experience to spend the next eight weeks in practice on a team relationship. She will gradually learn to assume the duties expected of the licensed practical nurse. She will be assisted by

her instructor as needed but on a much less personal relationship. The ratio of numbers of students to instructors will be doubled during this period. Here she will spend approximately 35 hours in clinical practice and clinical classes and one or more periods in advanced medical-surgical classes back at school with other classmates from the various practicum areas.

Practicum (continued)

The last week of her year's program will be spent in the mornings at the same place of medical-surgical nursing and in the afternoons at school where she will have planned conferences with her instructors. Evaluations and achievement reviews will be planned during this week, and the student will be assisted in making application for licensure.

Conferences, Evaluations, and Achievement Testing

In Exhibit A[2], course numbers and titles are shown - three new courses will be added; they are:
Nurs 106 Medical-Surgical Nursing 2; Nurs 116 Diet in Disease; and Nurs 118 Medications. The outlines of instruction for all courses will be found in Appendix B.

Courses Offered in Program, Including Outline of Instruction

SECTION IV

Faculty: Qualifications, Responsibilities, and Functions

Nurse Faculty Composition

The faculty for the practical nursing program beginning in September, 1966, will be increased to include 15-16 full-time, and 2-3 part-time, nursing instructors in addition to the nurse director/faculty counselor. The number of faculty will depend upon the number of areas into which she will accompany students, the number of students, and the percent load she may carry as per school policy.

Non-Nurse Faculty

Non-nursing faculty members will teach in Normal Nutrition, Diet in Disease, Communication Skills, and possibly in Body Structure and Function courses.

Secretarial Help

Full-time and a part-time records secretaries are presently employed. The faculty counselor has a full-time secretary, and the faculty have a student secretary who works the number of hours needed to provide adequate assistance to the faculty.

Guidance Counselor

A nurse guidance counselor, who has had twelve years of teaching experience in the practical nursing program prior to the present appointment, interviews and admits the prospective students in accordance with the admission policies set up by the nursing faculty. See Exhibit III.

The qualifications, responsibilities, and functions are as follows:

Faculty Counselor

A. Faculty Counselor

Qualifications

1. Qualifications of the Faculty Counselor of the Practical Nursing Program.

   a. She shall have completed a Master's degree in nursing with at least twelve hours in education.

   b. She shall hold a currently valid Wisconsin Certificate of Registration as a nurse.

   c. She shall have academic preparation in administration of nursing education, educational principles, curriculum development, teaching, guidance and counseling, current trends in nursing on a graduate level, applied social sciences, and research.

   d. She shall have met certification requirements of the State Board of Trade and Industrial Teachers Certification as applied to the professional nurse.

   e. She shall have completed at least five years in varied nursing experiences, including instruction and assistant to one educational administrator of nursing.

Responsibilities

2. Responsibilities of the Faculty Counselor

   She shall be responsible for carrying forward the total program and for delegating duties and responsibilities to the various members of the faculty in conformity with general school policies, and with the State Administrative Code for such programs.

Functions

3. Functions of the Faculty Counselor

   a. To administer the total program and to be responsible to the director of the Milwaukee Vocational Technical and Adult Schools.

   b. To delegate duties and responsibilities to the faculty as deemed necessary for the efficient management of the program.

   c. To review reports of progress from the faculty and take appropriate action when necessary to enhance the total program.

3. Functions of the Faculty Counselor (continued)

Faculty Counselor

Functions (continued)

d. To evaluate and approve the budget for the department of nursing and route it on for final approval by the director and assistant director.

e. To see that adequate and fair schedules are formulated for all the nurse instructional staff in accordance with school policies.

f. To make periodical evaluation of all instructional nursing staff and assist in upgrading the performance of this staff.

g. To interview, evaluate records, and recommend applicants to the school director for additional instructional staff as needed.

h. To assign subjects to be taught, duties, and activities to each instructor.

i. To approve all rotation schedules and assignments of students to clinical laboratory experiences.

j. To direct nurse faculty on the extended campuses with respect to the student's clinical experiences and progress.

k. To work with the department of student services in maintaining complete, accurate records of all phases of the program. Individual student records are accurately recorded and the necessary copies sent to the state department of nurses.

l. To help the faculty in formulating policies and records on health, welfare, promotion, and graduation.

m. To recommend for appointment by the school director an advisory committee to the program.

n. To hold specific and general meetings with the nursing faculty for the purpose of improving and evaluating the program.

o. To visit, approve, and recommend to the school director additional clinical facilities as needed.

3. Functions of the Faculty Counselor (continued)

Faculty Counselor

Functions (continued)

p. To prepare an annual report to the state department of nursing and to the state department of vocational education.

q. To carry out such additional administrative duties as necessary for improvement of the total program.

B. Instructor

Instructor

1. Qualifications of the Instructor

Qualifications

a. She shall have completed a Bachelor's degree in an accredited college or university with a major in nursing or nursing education or its equivalent.

b. She shall hold a currently valid Wisconsin Certificate of Registration as a nurse.

c. She shall have had two years of practical experience in nursing service.

d. She shall have had at least six months of teaching experience in an accredited school of nursing.

e. She shall meet certification requirements of the State Board of Trade and Industrial Teachers Certification as applied to the professional nurse.

2. Responsibilities of the Instructor

Responsibilities

a. An instructor in the practical nursing program shall, under the guidance of the faculty counselor, be responsible for the preparation and delivery of all instructional material assigned to her.

b. She shall guide, confer with, and evaluate students in their performance in the school and in the clinical areas under her supervision.

c. She shall assist in carrying forward the total program of practical nursing.

3. Functions of the Instructor

Functions

a. To prepare course outlines and objectives for courses assigned to her to teach.

b. To evaluate periodically and assist in improving the instructional programs both at the school and in the clinical areas.

3. Functions of the Instructor (continued)

Instructor

Functions (continued)

c. To implement well-balanced clinical experiences for each student.

d. To engage in appropriate professional and academic activities and development.

e. To be an active member of her professional organizations.

f. To guide, supervise, and counsel the student assigned to her in the learning processes necessary for acquisition of subject matter, proficiency in skills, and use of judgment.

g. To help interpret the school's program and policies to the hospital personnel.

h. To make out student evaluations and prepare and administer tests.

i. To carry out other duties concerned with the efficient management of the practical nursing program as assigned by the faculty counselor in accordance with school policies, such as:

(1) Student health program
(2) Clinical laboratory experience schedules
(3) Records and reports
(4) Career Day and promotional talks
(5) Exhibit window displays
(6) Participation in the preparation and implementation of extracurricular activities

C. Secondary Instructor (a fully qualified instructor who has a secondary assignment)

Secondary Instructor

1. Qualifications of the Secondary Instructor

Qualifications

a. She shall have completed a Bachelor's degree in nursing.

b. She shall have academic preparation in educational psychology, sociology, and clinical specialities.

c. She shall have completed one year of satisfactory nursing care experience in an approved hospital. (Note.--Exception: Provisional or emergency approval.)

2. Responsibilities of Secondary Instructor

Responsibilities

a. She shall be responsible for the instruction, supervision, and evaluation of students assigned to her specific area under the direction of the instructor.

b. She shall relate and implement the school's objectives to the hospital personnel. She shall keep anecdotal records on each student under her teaching supervision.

c. She shall report to the instructor concerning student performance and problems and work together for the betterment of the clinical program.

3. Function of Secondary Instructor

Functions

a. To make out student daily assignments based on student and patient needs in line with the objectives for the clinical experience.

b. To supervise, counsel, and guide the student in all clinical areas assigned to her.

c. To make out student evaluations in conference with the instructors who assist her in the teaching of the student.

d. To assist in the planning and teaching of classes under the direction of the instructor.

e. To assist the instructor in preparation of tests and in carrying out of school policies.

f. To engage in appropriate professional and academic activities and development.

Ratio of Instructors to Students in Clinical Area

The ratio of instructors to students will be higher when in the cooperating agency's clinical areas when students are giving direct nursing care than in the classroom. See Exhibits E and F. In the classroom there will be a 1:36 up to 1:72 ratio, while in the clinical area it may vary from 1:5 to 1:18.

Time will be provided for regular weekly faculty meetings where the faculty will be able to develop the curriculum, plan for implementing the program, develop appropriate objectives, and discuss and resolve student problems, insofar as possible. Records shall be kept of these meetings.

Faculty Meetings

The faculty has set up and will maintain standards of student admissions, progression, and graduation. They will evaluate the achievement of the student according to these standards. The student will be counseled by the instructor assigned to her, as needed.

Faculty Group Activities

SECTION V

Students

Selection of students is delegated to a nurse guidance counselor who is fully acquainted with school policies and requirements for admission. Any major deviation from these must reflect the policies for admission in line with the school's admission requirements. When questions arise on advisibility of admission, a conference is held with the faculty counselor, the student service counselor, and the guidance counselor. Here action is taken and followed through by the guidance counselor. See Exhibit III (Student Selection and Admission) and Exhibit IV (Admission forms).

Admission Policies and Selection of Students

Personnel policies will be made available through a practical nurse student handbook. This is in the process of being prepared.

Student Handbook

A full-time school physician and a full-time registered nurse are available during regular school hours for immediate or emergency health problems. Referral to the student's own physician is made. Each student is encouraged to carry a hospital and medical insurance plan and liability insurance. All students have a terminal X-ray and V.D.R.L. test within the last week of the program. Seven days' sick leave is allowed each student.

Health Care after Admission

Each student has a scheduled conference at mid-term, at the end of each semester, and at the completion of each clinical area. Special conferences can be arranged with faculty, faculty counselor, guidance counselor, and/or school psychologist upon the request of either the student or the instructor.	Counseling and Guidance
Students with financial problems are referred to the guidance counselor in charge of scholarships and loans. Faculty recommendation, as to nursing potential, will be made as necessary for these scholarships and loans.	Scholarships and Loans
Each class receives four weeks of vacation within the one-year program in addition to the scheduled school recesses.	Vacation
A letter system of grading is used based on percentage score: A - 93-100; B - 85-92; C - 77-84; D - 70-76. Final examination in most courses counts 1/3 of final grade. Students must maintain a 2.0 grade-point average to remain in good standing. Mid-term and final grades are sent to the student by the student service department each semester.	Grading System
Permission for outside employment may be granted by the faculty counselor only if a "C" average is maintained in all subjects.	Outside Employment
Provision within the school week will be made for study time and conferences. A balance of classroom and clinical experience will be in approximately a 1:2 ratio.	In-School Time

A practical nurse student chorus under the direction of a school music director performs in all school functions, capping, and graduation exercises. Noontime assemblies, at which time movies are shown, are open to all students. Students are encouraged to participate in student council activities when there is no conflict with scheduled classes. An orientation tea is held the first week of school, and usually the event is held as a big sister-little sister affair. A capping ceremony, with a formal tea, is held after the first six weeks. Parents, relatives, and friends are invited.

February and June graduation exercises are held and a reception given afterward for all.

Swimming or gymnastics is available to all students during the noon hours.

Student Activity

SECTION VI

Facilities and Resources

School Facilities

Ample room has been provided for the practical nursing students. The following rooms are designated and set aside for use by the students of this department: two rooms for 26 students; one room for 72 students; one room for 80 students with TV facilities; one demonstration-lecture room for 50 students; one fully equipped procedure laboratory for 22-24 students; and a tiered room for 125 students.

Other rooms and laboratories are made available when necessary - such as: a fully equipped anatomy and physiology laboratory and a demonstration nutrition room with work area - stove - sink - and refrigerator. Since all these rooms have been assigned to the nurse director/faculty counselor for the Health Occupations departments, they can be used as scheduled by her without prior approval. Office space is provided each instructor.

Teaching Aids

Teaching aids and materials are available at any time. These include teaching machines: opaque projector, 35 and 16 mm projectors, films, record players, tape recorders, overhead projectors, blackboards, manikins, Chase dolls (3), skeletons, bones, microscopes, sterilizers, scales, and all fundamental nursing teaching aids.

The clinical facilities in cooperating agencies will be sufficient when the final surveys are made in March, for additional areas.	Clinical Facilities
All cooperating agencies are approved or licensed by appropriate authorities.	
Agreements will include provision for conference rooms, locker rooms, dining facilities, and office space provided by the cooperating agencies.	Conference Rooms, etc., at Cooperating Agencies
The school's library holdings for practical nursing number 918 and are sufficient. Budget arrangement allows for requisitions in numbers sufficient to keep the books current as well as to add additional volumes. These are available to the student during the school day and on school evenings, Monday through Friday.	Library Holdings
The school will furnish an adequate and current supply of reference books, periodicals, and other materials pertinent to the practical nursing program at the coordinating agencies, as well as in the study areas provided for practical nursing students at school. These will be for the use of both students and instructors in meeting the objectives of practical nurse education.	References, etc., Available at Cooperating Agencies

SECTION VII

Records

All student records are kept on file in the student service office and are available to the faculty and faculty counselor on call. The student records are kept in order and properly recorded by the record secretaries. Strictly confidential material is sealed and opened only at the request/or by the nurse director/ faculty counselor or her representative. Student records are kept up-to-date, and are accurate.	Student Records
Minutes of all meetings are kept on file in the faculty counselor's office, as well as by each individual instructor, since copies are made available to all practical nursing faculty.	Minutes of Meetings
School bulletins and brochures are kept current and available in all faculty offices. School printing services are utilized for this use.	Bulletins and Brochures
A master plan of the curriculum is kept in the faculty counselor's office.	Master Curriculum Plan
Provision for microfilming old records is made and utilized after five years have passed.	Microfilming of Records

SECTION VIII

Evaluations

Evaluation of Controlling Institution

The organization and administration of the controlling institution is examined periodically by the State Department of Nurses to ensure the effective functioning of its facilities and the learning experiences which have been constructed for the students. Annual Reports to the State Department of Nurses and to the State Board of Vocational and Adult Education help in evaluating the effectiveness of the organization and administration of the controlling institution.

Evaluation of Faculty Members

Regular evaluations of each faculty member are made by the nurse director/faculty counselor to determine individual contributions in achieving the program's objectives and personal and professional growth. Class visitation, review of lesson plans, review of course objectives, and personal conferences are the avenues regularly used for evaluation.

Curriculum Evaluation

Periodic assessment is made by the faculty and faculty counselor of the curriculum in light of the beliefs and objectives of the program. A questionnaire is prepared so that the students may assist in evaluating the program by answering pertinent questions.

Evaluation of Clinical Resources

Clinical resources and facilities are evaluated periodically to determine whether needs of the program

are being met. Avenues for evaluation are through visits, teacher reports on clinical resources and facilities, and student growth and adjustment while on clinical experience assignments.

Evaluation of Clinical Resources (continued)

Regular meetings will be held with hospital directors of nurses, head nurses, school instructors, and the nurse director/faculty counselor for the purpose of reviewing objectives, evaluating the effectiveness of the program, and discussing both future needs and problems which may have arisen.

Student achievement, in theoretical and clinical situations, is evaluated by standardized tests, teacher-made tests, and performance throughout the entire program. National League for Nursing achievement tests are also used for evaluating student achievement and program effectiveness. Students participate in evaluating their achievement through self-evaluation and reviewing evaluations made by the faculty.

Evaluation of Student Achievement

Students have an opportunity to evaluate the entire educational program at the end of the course as a means of assessing its total effectiveness.

Student Evaluation of Program

Graduate performance on the State Board Test Pool Examination has been satisfactory in relation to national means. Each state board examination return is separately evaluated to assess the effectiveness of teaching and student performance.

Evaluation of Graduates (State Boards)

A follow-up of graduates is made through a questionnaire sent to graduates and to their places of employment to determine the level of functioning of the graduates in nursing service where they are employed, and to help determine how well the program prepared them for jobs and success in state board performance. Studies are also made of admissions to and withdrawals from the program.

Follow-up of Graduates

All evaluation data are reviewed periodically to improve the program.

SECTION IX

Cooperating Agencies - Present and Proposed

Present Cooperating Agencies

A. The cooperating agencies affiliating with the Milwaukee Institute of Technology Practical Nursing Program for the past several years are as follows:

1. Deaconess, providing three areas for affiliation - medical-surgical, pediatrics, and obstetrics.
2. St. Luke's, providing three areas for affiliation - medical-surgical, pediatrics, and obstetrics.
3. St. Michael, providing one area for affiliation - medical-surgical.
4. Waukesha Memorial, providing three areas for affiliation - medical-surgical, pediatrics, and obstetrics.
5. Milwaukee Children's, providing one area for affiliation - pediatrics.
6. Mental Health Center - North Division, providing one area for affiliation - mental.

Conference Between Cooperating Agencies and School Authority

B. All of these cooperating agencies above were visited by the Milwaukee Institute of Technology director and the nurse director/faculty counselor. In conference with the hospital administration and the director for nursing service, the proposed revised program was explained and the appropriate charts and explanations were left for the administration of the hospital to study, evaluate, and decide on whether they wished to continue or to withdraw from affiliation with the practical nursing program.

In due time the following decisions were conveyed to the faculty counselor:

Results of Conferences

1. Deaconess: would cooperate with the proposed revised program in all three areas mentioned above.

1. Deaconess

2. St. Luke's: would cooperate with the proposed revised program in all three areas mentioned above. (There had been some question concerning the possibility of losing the pediatric area because the University of Wisconsin-Milwaukee wanted it for their students. Hower, the Director of Nursing indicated that they could cooperate in all areas as per the proposed program.)

2. St. Luke's

3. St. Michael: would cooperate with the proposed revised program in medical-surgical area as before, and would also cooperate in the maternity area.

3. St. Michael

4. Waukesha Memorial: would cooperate in all three areas as before. However, due to advance information given to the school at the state level that Waukesha Vocational School planned on starting a practical nursing program in February, 1967, and wished to affiliate at the Memorial Hospital, the school was reluctant to continue in an affiliating agreement with Waukesha Memorial for the following reasons:

4. Waukesha Memorial

a. The Waukesha Vocational School would no doubt draw students from all surrounding areas, making it impossible for the Milwaukee

Reasons for Withdrawing from Affiliation with Waukesha Memorial Hospital

Reasons for Withdrawing from Affiliation with Waukesha Memorial Hospital (continued)

Institute of Technology to obtain students living near Waukesha as in the past.

b. Any student sent to Waukesha Memorial from that area by the Milwaukee Institute of Technology would not have their tuition paid as in the past (if under 21 years of age).

c. It has been hard to find students from Milwaukee who can afford to either drive to or room in Waukesha because of the additional expense.

d. Any instructor sent to Waukesha from the Milwaukee area would have to have mileage paid by the Milwaukee Institute of Technology, adding expense to the program.

e. Most important in the consideration was the fact that a closer school had been selected for students and if Waukesha were still considered as a cooperating agency, at least two additional instructors, if not three, would have to be employed, adding greatly to the expense of the program. Compare Exhibit F - Plan I and Exhibit F - Plan II.

Since Waukesha Memorial Hospital has been an excellent, up-to-date cooperating agency it was with deep regret that it seemed necessary to sever relationships, but the additional cost to the Milwaukee Institute of Technology program needed to be considered. Therefore, at this time, it seems likely that we will withdraw from affiliation with this fine hospital after the present classes have been phased out in February of 1967. The new

class A of September, 1966, would then not be sent to Waukesha.

5. Milwaukee Children's: would cooperate with the proposed program providing two instructors be sent so that students could be assigned to two different areas.

5. Milwaukee Children's

6. Mental Health Center: would cooperate, providing that the practical nursing students be transferred to the South Division on Wards 10 and 12. These two wards had previously been utilized by the Milwaukee Institute of Technology, but the students had been withdrawn pending improvements of the quality of nursing at South Division. This, to some extent, has been accomplished and since the North Division patient count has been lowered considerably, it was deemed unwise to have the practical nursing students continue at North Division. Therefore, the State Department of Nurses has been notified of the Milwaukee Institute of Technology's desire to have South Division surveyed for affiliation.

6. Mental Health Center

C. Misericordia Hospital has asked to affiliate with the Milwaukee Institute of Technology in medical-surgical and obstetrical areas, and the school has asked the State Department of Nurses to survey Misericordia for affiliation. If approved, this would possibly be considered in lieu of Waukesha Memorial Hospital.

Proposed New Facility

D. An explanation of the two proposed plans for clinical affiliation follows. The charts in Exhibit E - Plan II and Exhibit F - Plan II show the ratio of instructors to students needed if affiliation were continued with Waukesha Memorial Hospital and a new affiliation initiated at Misericordia Hospital.

Explanation of Exhibits E and F - Plan II

In Exhibit E - Plan I and Exhibit F - Plan I, the ratio of instructors to students is shown if Misericordia Hospital affiliates instead of Waukesha Memorial. It will be noted that there is an increase of two instructors in Plan II and the ratio of instructors to students will be higher if Plan I is utilized, cutting down on the expense of operating the program.

Explanation of Exhibits E and F - Plan I

The faculty of the Milwaukee Institute of Technology offer this presentation to the State Board of Nursing for consideration of revision of curriculum to start September, 1966. Any further explanation will be provided if the Board so desires. The nurse director/faculty counselor and one or two other practical nursing faculty members would like to be present to personally present this document to the Board of Nursing at their April meeting.

Conclusion

Thank you.

Mary D. Vick

Mary D. Vick and Faculty of the
Milwaukee Institute of Technology
Practical Nursing Program

AGREEMENT

Between

THE MILWAUKEE INSTITUTE OF TECHNOLOGY
Service and Health Occupations Division
Department of Practical Nursing

and

_____ HOSPITAL
Located at _____
_____

PART I - BASIS and PURPOSE OF THE AGREEMENT

The Milwaukee Institute of Technology, A Division of the Milwaukee Vocational Technical and Adult Schools, and the _____ Hospital acknowledge a public obligation to contribute to education for practical nursing for the benefit of students and for community needs.

In this agreement, the term "Hospital" shall refer to the above-named hospital; and the term "Institute" or "School" shall refer to the Milwaukee Institute of Technology.

The Institute has established a program in practical nursing which requires the clinical facilities of the Hospital for laboratory practice.

The Hospital has clinical facilities suitable for the educational needs of the program in practical nursing in the areas of medical-surgical nursing, obstetrical nursing, and pediatric nursing.

It is to the mutual benefit of both the Institute and the Hospital that students have opportunities for clinical education as students and future practitioners.

PROVISIONS

The following agreement is effected by the proper authorizing bodies of both parties. The agreement is to be governed by the following general concepts of cooperative action:

PART II - RESPONSIBILITIES AND PRIVILEGES OF THE INSTITUTE

A. For the Program in General

The Institute shall assume full responsibility for offering an educational program eligible for accreditation by the Wisconsin State Board of Nursing.

B. For the Learning Experiences at the Hospital

1. The Institute shall provide the necessary faculty for the program in practical nursing who are both qualified teachers and competent registered nurse practitioners.

2. The Institute's faculty will plan, develop, implement, and be responsible for all clinical instruction over which they have direct supervision and control, and for the evaluation of students.

3. The Institute shall provide an orientation period during which nurse faculty can become familiar with Hospital policies, practices, and facilities before instructing students in the Hospital.

4. The Institute shall develop a "Clinical Instruction Plan" for using the Hospital's clinical areas to meet the educational goals of the curriculum in nursing. This plan will be made available to the Hospital at a mutually agreed upon time prior to the beginning of the school year and subject to revision in instances where conflicts with Hospital patient care responsibilities seem to exist.

5. The Institute's faculty shall be responsible for learning and observing the policies and regulations of both the Institute and the Hospital as they apply to the circumstances of clinical teaching.

6. The Institute's faculty shall have reasonable opportunity to serve as resource persons to the Hospital staff in matters contributing to the quality of patient care, such as serving on Nursing Care committees and sharing knowledge as clinical experts.

7. The Institute will assume responsibility for the health and welfare of the students in accordance with the requirements of the Students Health Program and will meet the requirements of the Wisconsin Administrative Code (N3.05(4)(b) on health, and the Hospital standards of health.

C. School Privileges

The Institute has the privilege of regularly scheduled meetings with the Hospital staff including both selected floor personnel and administrative level representatives for the purpose of interpreting, discussing, and evaluating the educational program in practical nursing, as arranged by the Hospital Education Coordinator.

PART III - RESPONSIBILITIES AND PRIVILEGES OF THE HOSPITAL

A. General Responsibilities

1. The Hospital shall maintain standards which make it eligible for approval as a clinical facility for instruction in an accredited program in practical nursing.

2. The Hospital shall permit the faculty and students of the Institute to use its patient care and patient service facilities for clinical education according to a plan approved by the Wisconsin State Board of Nursing. Details of such educational use may be described in the "Clinical Instruction Plan" submitted to the Hospital Education Coordinator and reviewed prior to the arrival of students. It shall be mutually satisfactory to both the educational goals of the Institute and the patient care standards of the Hospital.

B. Facilities and Supplies

1. The Hospital shall make available for educational purposes rooms or areas where groups of students may hold discussions and receive clinical instruction from the Institute's faculty to include:

   a. Areas for demonstration of Hospital equipment,
   b. Areas for clinical conferences,
   c. Desk space where the teacher may make clinical assignments and plans.

2. The Hospital shall permit the educational use of such supplies and equipment as are commonly available for patient care.

3. The Hospital shall provide the following facilities and services to students of practical nursing and faculty:

   a. Locker and dressing areas to change into uniform,
   b. Access to cafeteria or dining room facilities,
   c. Emergency medical care consistent with Hospital policies concerning volunteers.

4. The Hospital shall provide access to sources of information for educational purposes:

   a. Charts, nursing station references such as Kardex, Nursing Care Plans, etc.,
   b. Procedure guides, policy manuals,
   c. Standard clinical references such as medical dictionary, information on diagnostic tests, drugs, and standard references suitable to the clinical area and care program.

5. The Hospital shall allow the use of teaching aids, such as audio-visual equipment, models, and charts.

C. Staff Participation in Education Program

1. The Hospital staff may participate in education on the request of the instructor. This may be in the role of resource persons, clinical experts, or assisting in the planning and implementation of aspects of clinical education. Such participation will be voluntary and shall not interfere with assigned duties.

2. The Hospital shall designate a staff member who will serve as Hospital Education Coordinator for all educational use of the Hospital facilities.

3. The Hospital staff may refuse access to its clinical areas to any student of practical nursing who does not meet its Employee Standards for safety, health, or ethical behavior.

4. The Hospital staff may resolve any problem situation in favor of the patient's welfare and restrict the student involved to the observer role until the incident can be resolved by the staff in charge and the instructor.

5. It is recognized that the Hospital must operate in an efficient manner for the safety and welfare of the patient, but the Hospital accepts the responsibility that it must offer a true teaching experience to the student.

PART IV - STATUS OF STUDENTS

A. Students will have the status of learners and will not replace Hospital staff.

B. Students are subject to authority, policies, and regulations of the Institute. They are subject during clinical assignment to the same standards as are set for Hospital employees in matters relating to the welfare of patients.

PART V - LIABILITY STATUS OF THE CONTRACTING AGENCIES

A. Students and instructor shall carry malpractice public liability and compensation insurance during their clinical experiences.

PART VI - DURATION OF AGREEMENT

This agreement shall be continuing, to be reviewed in June of each year. It may be modified at any time by mutual consent of the Institute and the Hospital. It may be terminated after one year's written notice, to be agreed upon by both the Institute and the Hospital.

Any changes in the agreement shall be in the form of a rider to be attached.

EXHIBIT III

Student Selection and Admission

A. Qualifications

1. Age

   Applicants must be 18 years of age through 55, determined, in part, by physical fitness.

2. Education Requirement

   Students under 20 years of age should have graduated from high school. Those over 20 years of age, who have not finished high school, must take and pass the equivalency test.

3. Health

   A complete health examination is required before admission. Applicants may obtain this from their private physicians. This is to include serological tests, chest X-ray, tuberculin skin test, and immunization, as required by the Practical Nursing Department. (See immunization record sheet.)

4. Pre-Entrance Tests

   California Reading Test.
   California Mental Maturity Test.
   Pre-Nursing Test - N.L.N.

5. Character and Work References

   The school will consult selected references in respect to character and work qualities.

6. Citizenship

   Proof of United States citizenship or declaration of intent to become a citizen.

B. Admission of Classes

Classes begin two times each year at the beginning of each semester in September and February (starting 9/66).

One day of planned induction and orientation shall precede the actual starting date for the class. Notice of this induction day date will be mailed to students prior to entrance.

Please answer all of
the following questions

Name of Applicant: _____

Address: _____

I. GENERAL HISTORY

1. Date of Birth: _____ Age: _____

2. Height: _____ Weight: _____ _____

3. How would you rate your own general health: Good ☐ Fair ☐ Poor ☐

4. Are you pregnant now? _____

II. MEDICAL HISTORY

1. Significant Family History:

Mother living? _____ If no, cause of death? _____

Father living? _____ If no, cause of death? _____

Number of brothers and sisters living: _____ Ages: _____

Number of brothers and sisters dead: _____ Cause of death: _____

_____

2. Are you subject to or have you ever been subject to:

a. Dizzy spells? _____

b. Fainting spells? _____

c. Blackouts? _____

d. Convulsions? _____

3. Are you subject to or have you ever been subject to:

a. Mental disorders? _____

b. Nervous disorders? _____

c. Migraine headaches? _____

d. Emotional upsets? _____

e. Epilepsy? _____

f. Have you ever been in an institution for a mental or nervous disorder?

_____

3. Have you ever had an operation? ____

If yes, kind of operation(s): _____

Date(s): _____

4. Are you subject to allergic reactions such as:

a. Eczema? _____

b. Psoriasis? _____

c. Hayfever? _____

d. Asthma? _____

e. Sinusitis? _____

If yes, are you on medication? _____ Type of medication: _____

5. Have you had rheumatic fever? _____ Date: _____

Have you had growing pains? ____ If so, duration: _____

6. Are you subject to: Pneumonia _____ or Bronchitis _____

7. Have you ever had tuberculosis? _____ Date: _____

8. a. Do you have any difficulty hearing? _____

b. Have you ever worn a hearing aid? _____

9. a. Do you have any difficulty seeing? _____

b. Do you wear glasses or contact lenses? ____ If so, state which: _____

10. Do you have any menstrual disturbances? ____ If yes, does it interfere with your work? _____ In what way? _____

11. State any health or physical handicaps that you may have.

_____

12. Are you a diabetic? ____ If so, are you on insulin? _____

13. Have you had any childhood communicable diseases? ___ If so, what? _____

14. Do you have varicose veins? _____

Contrasting Present Versus Projected Clinical Experience Plan

PRESENT CLINICAL EXPERIENCE PLAN

FIRST TRIMESTER

Orientation - 4 hrs x 8 wks = 32 hrs.

SECOND TRIMESTER

Medical-Surgical:

Convalescent 30 hrs x 11 wks = 330 hrs.
Chronic 30 hrs x 6 wks = 180 hrs.

THIRD TRIMESTER

Care of Mothers & Infants -
30 hrs x 6 wks = 180 hrs.
Care of Child-30 hrs x 5 wks = 150 hrs.
Care of Mental -
30 hrs x 6 wks = 180 hrs.

Totals 42 wks *1052 hrs.

*1052 hours of experience includes approximately 10 weekends (300 hrs.)

PROJECTED CLINICAL EXPERIENCE PLAN

FIRST SEMESTER - 18+ Weeks

Basic Medical-Surgical Clinical Nursing -
7 hrs x 3 wks = 21 hrs.

Medical-Surgical: (All ages)

Chronic-Aged - 14 hrs x 6 wks = 84 hrs.
Convalescent - 14 hrs x 6 wks = 84 hrs.

Christmas Recess

SECOND SEMESTER - 18 Weeks

Care of Mothers & Infants -
21 hrs x 6 wks = 126 hrs.
Care of Child- 21 hrs x 6 wks = 126 hrs.
Care of Mental Patient -
21 hrs x 6 wks = 126 hrs.

Spring Recess

Vacation - 4 wks.

SUMMER SESSION - 9 Weeks

Practicum (Advanced Medical-Surgical)

35 hrs. x 8 wks = 280 hrs.
15 hrs. x 1 wk = 15 hrs.
295 hrs.

TOTALS: 42 Weeks
*862 Hours, includes 84 planned clin. classes

*862 hours of selected supervised experience and planned clinical classes - school instructors for all phases of the program.

VT 001 028
Procedures for Conducting a Vocational Education Community Study.

Ohio State Dept. of Education, Columbus. Div. of Vocational Education
MF AVAILABLE IN VT-ERIC SET.
Pub Date - Feb66 17p.

*VOCATIONAL EDUCATION; *COMMUNITY SURVEYS; *GUIDELINES; AREA VOCATIONAL SCHOOLS; *PROGRAM PLANNING

The purpose of these procedures is to provide guidance to local communities in the initial planning for a joint vocational school. Topics discussed are the survey request, the interval between the survey request and the survey planning meeting, the survey planning, the interval between the survey planning meeting and the survey dinner, the survey and the period after the survey dinner meeting. The appendixes contain orientation talk which can be given at a study planning meeting and a suggested agenda for planning meeting for executive heads. (SL)

Foreward

The Division of Vocational Education in Ohio has, in its philosophy, accepted as one of its functions the assistance to local communities on matters pertaining to vocational education. This includes guidance and help from the beginning phase of community discussion.

The Division of Vocational Education, during its years of service in many and varied experiences through contacts in giving help and guidance from small to large communities who possess all kinds of concepts and purposes of vocational education, has accumulated a storehouse of valuable information which can be shared back with local schools. Since much of this experience and information has come about through helping local schools solve their problems, the Division of Vocational Education has tried to make available this information to communities who have had limited experience and are not in a position nor have time to make studies to become versed in all phases and accumulate this storehouse upon which to make a decision for a program.

Recent federal legislation and particularly the Vocational Act of 1963, which has provided more federal aid for vocational education, has catalyzed the local interest in vocational education beyond the conception of most educators. Many communities have no knowledge of vocational education, its purpose, how it may differ from other forms of education, for whom it is intended, how it can serve youth, adults, business and industry of the community, how to go about getting the community acquainted with vocational education and involved in making decisions about it, how to go about getting a program established, how to conduct a community survey for the establishment of a vocational school, how to plan or select a curriculum, the physical facilities and equipment needed, the orientation of a student body to the vocational curriculum opportunities and their responsibilities in choosing a vocational program, and the cost financing and administration of vocational education.

In order to guide and help the community in that phase of discussion and planning for a Joint Vocational School, the supervisory staff always stands ready as in the operational phase. Now, to serve as a written complement, this procedure for helping a community in its discussion and planning phase has been set to words. It in no way dictates the procedure that may be followed, but suggests only a plan whereby the State staff may assist local communities in conducting a vocational education study. Other plans may be used and the State staff will be most happy to participate, for it congratulates the educational leaders and their community on their foresight in studying and planning a vocational education program.

PROCEDURES FOR CONDUCTING A VOCATIONAL EDUCATION COMMUNITY STUDY

The Study Request

The individual or Superintendent of Schools desiring to initiate a community vocational study will communicate this interest in writing to the State Director of Vocational Education.

The Director of Vocational Education will notify the supervisor of each vocational education service involved and designate a vocational staff member as Study Coordinator to assume the State's responsibility for the arrangements and details of the study.

Between the Study Request and the Study Planning Meeting

The Study Coordinator will discuss with the Superintendent of Schools, who initiated the request for a vocational community study, his responsibilities:

1. To form a Vocational School Committee with a representative from each school district involved.
2. To orient the facalties of the schools. The State staff personnel will be available if requested.
3. To orient any community representative who will attend the study planning meeting.
4. To select local representatives from the vocational, guidance, and administrative staffs who will work with the State staff representatives for guidance and each vocational education service and who will develop Vocational Service Committees which will work with them as study teams to perform the local action activities particular to each phase of the study.
5. To arrange for the Study Planning Meeting.
6. To secure information called for in:
   Table 1:--Enrollments and Tax Rates and Duplicates by School Districts.
   Table 2:--Number of Working Certificates Issued 19__--19__.
   Table 3:--Number of High School Graduates Who Entered Post High School Educational Institutions 19__.
   Table 4:--High School Enrollment Trends, Grades 9-12, 19__--19__ for the School Districts Involved.

At the Study Planning Meeting

The Superintendent will have at the Study Planning Meeting:

1. The selected local representatives from vocational guidance, and administrative staffs who will act as chairman of the local Vocational Service Committees for guidance and each of the vocational education services.
2. Any other staff members and any community representatives who have been oriented and whom he desires to have present.

Total		

The Study Coordinator will have at the Study Planning Meeting:
1. A staff member from the Guidance Service.
2. A staff member of each participating vocational service.

The Study Coordinator will orient those present to the purpose of the meeting.

The Superintendent will report on participating schools and pupil population, grades 10 and 11 and 11 and 12.

The Superintendent will introduce the local representative who will be chairman of the local Vocational Guidance Committee.

The Study Coordinator will introduce the State staff representative from Guidance Service who will direct the student vocational interest inventory.

The State staff representative for guidance will discuss:
1. The method of orienting the student body in grades 10 and 11.
2. The administering, scoring, and evaluating procedures for the student vocational interest inventory.

The Study Coordinator will discuss dates and build a schedule with State staff and local administrators for:
1. Orienting pupils and administering student interest inventory.
2. Scoring the vocational interest inventory.
3. Summarizing results.

The Study Coordinator and Superintendent will introduce remaining State staff members and local representatives acting as chairman of the Vocational Service Committee for the local action activities. The Study Coordinator will indicate that each of the vocational services have a plan of activities to discuss with the local chairman of the Vocational Service Committee. The plan includes:
1. The organization of the Vocational Service Committee for each vocational service by the Chairmen of the Vocational Service Committee and the Superintendent.
2. The function of these committees which includes:
   a. Working in cooperation with the Vocational School Committee and the assigned State representative from the Division of Vocational Education to arrive at the areas of vocational education; i.e., identifies occupations, to be included in the study.
   b. Selecting the local industries, businesses, establishments, and services to be included in the survey.
   c. Preparing questionnaires for business and industries on employment, employment policies, training needs, etc., and their interests in both secondary and adult programs.
   d. Conducting interviews with business, industries, and local organization representatives.
   e. Selecting representative to attend Study Dinner Meeting and give future community support.
   f. Preparing materials, if nay, to be sent out with study dinner invitations.

The Study Coordinator will discuss the dinner meeting and the individual service sessions and determine dinner meeting, date, time, and possibly place.

The Vocational School Committee will:

1. Provide and finance by board of education or local community group the facilities including dining room and dinner service, find auxiliary rooms seating 40 persons except Trade and Industrial Education, 80 persons, public address system, and visual aids screens.
2. Provide finance and print the program. The dinner meeting usually includes:
   a. Introduction of local people, the genesis of the study plus setting the stage for the meeting by the chairman of the Vocational School Committee.
   b. Introduction of State staff and reporting of vocational education picture in Ohio by the Coordinator.
   c. Report on vocational guidance and student vocational interest inventory by State guidance representative.
   d. Dispersion of participants into vocational area meeting by letters of invitation.
3. Send letters of invitation.
4. Provide follow-up techniques for dinner meeting attendance.
5. Provide publicity.

Between the Study Planning Meeting and the Study Dinner

The chairman for Guidance Service Committee and the Vocational Guidance Service Committee, with the help of the State staff representative from guidance, will administer the student vocational interest inventory to the 10th and 11th grade pupils of each school district involved in accordance with the instruction from the Division of Guidance and Testing and in accordance with the prepared schedule. If a graduate follow-up study is included in the study, it is conducted by the local staff and coordinated by Business Education with analysis by the Guidance Staff.

The Vocational Service Committees will also furnish the Superintendent a list of representatives, who have agreed to participate in the survey and attend the survey dinner, two weeks before the survey dinner. Suggested minimum numbers are: Agriculture 25, Business Education 30, Distributive Education 25, Home Economics 20, and Trade and Industrial Education 8 for each occupational area involved in the survey.

The Vocational Service Committees will determine occupational areas to be included in the study, prepare forms for collecting information and statistics, and collect said information and statistics before the Study Dinner Meeting or make arrangements for and deliver to the Superintendent information forms and instruction sheets to go with dinner invitations, with invitations lists, two weeks before study dinner.

The Vocational School Committee extends an invitation, by letter, over the signature of the Vocational School Committee chairman, the Superintendent of those representatives of community, business, industries, and organizations, selected by the Vocational Service Committees and others to attend and par-

ticipate in the study dinner, two weeks before the meeting. Included in the letter will be study form on which the persons contacted can list statistics and information needed by the Vocational Service Committees unless the Vocational Service Committees have adopted another method for securing this information.

The Superintendent will or will have done a follow-up by post card if time permits, and again by phone on the day of or before the study dinner meeting of the participants from the community.

The Superintendent will arrange for the study dinner meeting to be held in a place where dinner service may be had and where the group may be divided into individual vocational services for a presentation by the State staff representatives from the Division of Vocational Education.

The Superintendent will administer public relations and public information.

The chairman of each Vocational Service Committee will contact the State staff representative and secure for the study dinner meeting those pieces of equipment such as screens, projectors, etc. as requested by the State staff representatives of the Division of Vocational Education.

At the Study Dinner Meeting

The Superintendent will:

1. Chair the dinner meeting.
2. Make introductions.
3. Report on genesis and purpose of the study.

The Study Coordinator will:

1. Present a background of Vocational Education in Ohio for the study report.
2. Call upon the State staff representative for guidance to present a summary of the student interest inventory and make pertinent remarks there upon.
3. Direct local participants to divide into groups according to areas of vocational education and assemble in assigned rooms.

The State staff representative for the Vocational Education Service will conduct the group survey activities necessary for the completion of the study report and collect the needed data in the group meetings for each vocational service with the help of the local school staff representative who chairs the Vocational Service Committees. The State staff representative will also describe the vocational program under consideration for the particular vocational serivce.

After the Survey Dinner Meeting

The State staff representative for each vocational service will prepare and type the chapter pertaining thereto and file with the Director of Vocational Education.

The Director of Vocational Education will approve the typed reports of each vocational service.

The Study Coordinator will compile the introductory material and publish the final report approximately one month after the date of the study.

APPENDIX A

ORIENTATION FOR STUDY PLANNING MEETING

Orientation for Study Planning Meeting will be taken from the following material:

The staff of the Division of Vocational Education is here on invitation of the chairman of your Vocational School Committee to help you plan your Vocational Education Community Study. Since we have helped many school systems conduct studies, we have found some of the pitfalls and lost motion, and short cuts, effective moves and efficient procedures which will bring you the most action for your efforts.

You are here to receive help and guidance in planning and conducting your study so that your efforts will bring you desired results.

But, why have a study? What will a study contain? How will a study help us? What are the objectives of a study? What will a study do for us that we cannot do without it? What are the goals of a study? These may be some of your questions.

Why have a study? Let us examine this, answer some of those questions, and see how a study may help you turn the dream of a vocational school into reality.

To turn the dream of a vocational school into reality, it takes reliable information upon which to base valid conclusions, much technical knowledge and careful planning of the vocational program, equipment, and physical facilities, considerable public relations to produce an interested public, and educated in the needs and values of a vocational education program, to mention only a few.

To plan a vocational school, information of all kinds is needed. A study may include information on demography and related aspects as: pupil population by grades, pupil population growth, non-college bound pupil population, drop out population, population growth, population density, births, deaths, student vocational interest inventories, anticipated enrollments in various types of programs in Ohio high schools; on employment aspects as: employment by industrial divisions, by level of occupations, and employment by occupations within industrial divisions, projected employment needs by level of occupations, and by occupations within industrial divisions, the place of women in employment, the distribution of employment between agriculture and non-agriculture pursuits, labor force employed within county and outside, rate of unemployment, employment in major industries, business organizations, and interest in vocational education program by representatives of selected industries, businesses, and organizations; on economic aspects as: financial information on income, estimated building and equipment costs, estimated operating costs, and tax rates and duplicates; on adjacent areas as: employment in major industrial divisions that would furnish employment to commutors; on recommended vocational program aspects as: estimated enrollments, recommended vocational programs recommended areas for related and academic facilities and recommended vocational and academic professional staff.

Now a study will serve as a planned method of systematically retrieving this information for drawing the conclusions. It will not only serve as a guide for directing the procurement of the information, it will serve as a time guide to prevent delay.

Some of the information will be supplied by the schools through Executive Heads and Community Vocational Committees as: pupil population by grades, pupil population growth, non-college bound pupil population, drop out population, population growth, and tax rates and duplicates; some by citizens, businesses, industries, and organizations of the community through Vocational Service Committees as: employment and unemployment policies in selected industries, businesses, and organizations; and most of the others by the various services of the Division of Vocational Education.

In this way, the community is first brought into the act and your public relations activities are brought into play. Now you are using your study as a tool with the community to accomplish your goal. The Vocational Service Committees through their contact with local businesses, industries, and interested groups may diffuse the survey information.

To culminate the activities of information gathering, a dinner meeting will be held. This will start the planned diffusion of the study information to the people in order that they may become better educated on the topic of vocational educations and needs and sufficiently learned to spearhead the movement for support in the community.

Now why do you have a study? To give you a planned order of action to collect information on demographic, employment, economic and related aspects; to help draw conclusions on number and kinds of vocational programs, estimated enrollments, building facilities, equipment, financing, teaching personnel, and school districts to be involved; and to involve the public in a study of your vocational needs and the requirements to fulfill these needs in order that they may become an interested public educated in the needs and values of a vocational education program and willing to support a program.

These are the answers to why you should have a study, what a study may contain, how it may help you, and so on.

This is your study, your issues are at stake. This will be your vocational program and your school. If your study falls short and if your levies and bond issues do not pass, then it is your loss.

- -

Have each person take a sheet of paper and write down today's date at the top of the page. Have each person write down "dinner meeting" at the bottom of the page.

- -

First order of the day is to plan the activities between the top of the page and the bottom of the page. The second order of the day is to plan the dinner meeting.

APPENDIX B

PLANNING MEETING FOR EXECUTIVE HEADS

The Study Coordinator will discuss and locate responsibility for the following items appropriate with the Superintendent of Schools and the Executive Heads:

Financing of dinner meeting.
Place of dinner meeting.
Vocational School Committee.
Vocational School Committee chairman.
Responsible for preparing, printing, and paying for dinner meeting program by Vocational School Committee chairman.
Responsibility for publicity by Vocational School Committee.
Sample invitation letter for committee chairman.
Number of study reports needed.
Financing of Joint Vocational School.
Continued foundation financial support of local school districts for pupils who attend Joint Vocational School.
Formation of a Joint Vocational School board.
Procedure for each school district to become a part of the Joint Vocational School District.
Voting of money in a Joint Vocational School District for the support of the Joint Vocational School.

Follow-Up Study of 1963 St. Louis Park Graduates.

Saint Louis Park Public Schools, Minn.
MF AVAILABLE IN VT-ERIC SET.
Pub Date - Dec65 11p.

*GRADUATE SURVEYS; *HIGH SCHOOL GRADUATES
*ST. LOUIS PARK; MINNESOTA

Information was gathered during the school year 1964-65. Post card and telephone returns were obtained from 484 of the 488 graduates. Data indicated that 67 percent started college, 13 percent had dropped out of college at the time of the study, 26 percent were employed, 84 percent of the college students were attending colleges in Minnesota, and 16 percent in out-of-state colleges. The highest number of majors were in education (27) and business, economics, accounting, advertising, distributive education (24). Seventy-one percent of the working girls held clerical and office positions. The non-college group more frequently mentioned business education, language arts, and mathematics subjects as being most helpful. The college group more frequently mentioned social studies, language arts, science, and mathematics subjects as being most helpful. Other data include: schools attended, majors of graduates attending college, jobs held by graduates, future plans of graduates, and employers who hired graduates. (PS)

ED0 31587

December, 1965

For several years follow-up surveys have been conducted with St. Louis Park students approximately one and one-half years after graduation from high school. Attached is a copy of the Survey for the Class of 1963. The information was gathered during the school year 1964-65.

This data may have possible implications for modification or change in our program. It is hoped that this material will be of some use to you and that the survey data might be discussed if you find that it relates to your work and the school's program.

The purpose of such a study is to gather information as to what happens to our graduates after they leave high school and to get reactions from former students as to how they now view their school experiences. From this it is hoped that we can better evaluate our guidance and counseling services, curriculum, and other facets of the school program so that these services to present and future students might be improved.

If you have any suggestions as to the kinds of information or responses which might be helpful for your department, please let me know. Perhaps such changes can be incorporated into some of our future surveys.

ST. LOUIS PARK PUBLIC SCHOOLS

FOLLOW-UP STUDY OF 1963 ST. LOUIS PARK GRADUATES

There were 488 graduates in the Class of 1963---237 boys and 251 girls. A double postcard, such as the sample shown below, was sent to each graduate. At a later date another similar postcard was sent to those who failed to respond to the first mailing.

For those individuals who had not responded to either of the two mailings, a telephone call was made. Where possible, we talked directly with the former student, and sometimes with a parent. Hence, the information is not always as complete as where the card was sent in by the former student.

SAMPLE POSTCARD USED IN THIS STUDY

Name:_____ Married?_____
Married Name:(girls)_____
Present Address:_____
Attending school at:_____ Present Major:_____
If Univ. of Minn., what college?_____ Undecided on Maj._____
What do you plan to be doing 5 years from now?_____
Started college but dropped?_____ What college?_____
Now working as (Job Title)_____ at_____

TABLE I - RETURNS

RETURNS	ALL GRADUATES		GIRLS		BOYS	
	Number	Percent	Number	Percent	Number	Percent
Post Card Returns	311	64%	157	63%	154	66%
Telephone Returns	173	35%	93	36%	80	33%
TOTAL RETURNS:	484	99%	250	99%	234	99%

TABLE II - CURRENT STATUS OF 1963 GRADUATES

STATUS	ALL GRADUATES		GIRLS		BOYS	
	Number	Percent	Number	Percent	Number	Percent
Employed	130	26%	80	32%	50	22%
Attending College	264	54%	122	48%	142	60%
Started College But Dropped	67	13%	40	16%	27	11%
Other Post-High Training:	48	9%	29	11%	17	8%
Military Service	39	7%	0	0%	39	16%
Unemployed	5	1%	1	1%	4	1%
Married	48	9%	43	18%	5	2%

COMMENTS ON TABLE II:

1. 67% of the 1963 graduates started college. This is 9% less than the Class of 1962, but more like other classes which have usually been around 70% in recent years.

2. At the time of the study, 13% of the class had dropped out of college, which is somewhat less than usual. The rate of retention in college was considerably higher for boys than for girls. More girls than boys were early college dropouts.

3. 26% of all graduates were employed at the time of the survey. There were more girls than boys, possibly due to the fact that a number of boys were in the military services, and more boys than girls persisted in their college work.

4. 29 girls and 17 boys received training beyond high school other than college. (Also, additional boys received training in military services.)

TABLE II (continued)

Table II - continued:

SCHOOLS ATTENDED WERE THE FOLLOWING: (other than college)

		Girls	Boys
Practical Nursing Studies		10	
Abbott	(1)		
General Hospital	(1)		
Methodist Hospital	(2)		
Mt. Sinai Hospital	(1)		
St. Barnabas Hospital	(1)

Univ. of Wisconsin		3	
Waldorf			1
Washington "U", St. Louis		1	
Wellesley		1	
Wheaton		1	1

COMMENTS ON TABLE III:

1. 60% of those attending college are at the University of Minnesota (Mpls.-St. Paul campuses)--68 girls; 91 boys.

2. 84% of the Park graduates in college were attending colleges in Minnesota and 16% in out of State colleges. These percentages are identical to last year's study, class of 1962.

(continued)

Table III Comments (continued)

3. A total of 108 boys and girls were attending the College of Liberal Arts at the U. of M.

4. Most boys attending college were at the University of Minnesota--91 at U. of M. and 52 at other Minnesota colleges or out of State schools.

5. 68 girls at U. of M. (52 at other Minnesota colleges or out of State schools)

6. Highest student attendance for colleges other than U. of M. were: Mankato 21; St. Olaf-12; St. Cloud-10; Gustavus-6.

7. Students were in attendance at 46 different colleges in the nation.

TABLE IV - MAJORS OF PARK GRADUATES ATTENDING COLLEGE:

Social Work	2	1	1
Sociology	14	12	2
Special Education	1	1	
Speech Therapy	8	7	1
Physical Therapy	2	2	
Undecided	42	7	35
Did not specify	7	4	3

COMMENTS ON TABLE IV:

1. 51 college students were undecided or did not specify a major, indicating uncertainty as to vocational choice at this point (versus last year, 61).
2. The highest number of stated majors were: Education (27); Business, Economics, Accounting, Advertising, Distributive Education (24); Pre-Medicine (18); Psychology (17); Sociology and Social Work (16); Art (16); English & Literature (16); Foreign Language (11); History (10); Speech Therapy (8).
3. Education majors were most often girls; boys predominated as business majors.
4. 45 students indicated majors in sequences which deal heavily in science and/or math. (Engineering, nursing,med. tech., pharmacy, etc.)
5. More kinds of majors are being specified above than in earlier studies.

TABLE V: FULL-TIME JOBS HELD BY 1963 GRADUATES:

	GIRLS		BOYS
Clerical & Office	57	Cook	1
Secretary	19	Promotions	1
Clerk Typist	4	Order Clerk	2

No answer	24	Lawyer	1
		Minister	1
		Traveling	1
		Real Estate	1
		Policeman	1
		Working (unspecified)	24
		Undecided	42
		No answer	33

COMMENTS ON TABLE VI:

1. Eight times more boys than girls expected to be pursuing further education. Apparently many boys saw the need for graduate work beyond the four-year degree.

2. Teaching and/or marriage and family life figure heavily in girls' future plans.

*OCCUPATIONAL SURVEYS; *LABOR FORCE; *JOB ANALYSIS; EDUCATIONAL NEEDS; *EMPLOYMENT QUALIFICATIONS; *EMPLOYMENT OPPORTUNITIES
FOND DU LAC COUNTY; WISCONSIN

In February 1966, an occupational survey of 1,340 employers was made. These firms employed 19,700 workers who represented an estimated 85 percent of the total non-agricultural employees in the county. The identified job openings were analyzed in terms of their significance to "Data," "People," and "Things" as defined in Volume II of the "Dictionary of Occupational Titles." The analysis categorizes each job opening in these ways: (1) its relationship to data, people, and things, (2) its level of complexity, (3) its educational requirement, (4) its experience requirement, (5) its promotion potential, and (6) the date of anticipated openings. Some of the findings were: (1) 35.8 percent of the job openings related to things, 28.6 percent related to data-things, 17.8 percent related to data-people, 9.7 percent related to data, and 5.3 percent related to people, (2) 40 percent required a high school education, 17.2 percent had no educational requirements, 15.8 percent required less than high school education and 24 percent had other requirements, (3) 20.3 percent of the job openings required experience, and (4) 65.6 percent of the job openings had promotion potential. Tabular data indicate current openings and anticipated openings for 1966, 1968, and 1971. (EM)

INTRODUCTION

The new third edition of the Dictionary of Occupational Titles (D.O.T.) has provided a unique opportunity to develop this analysis of the Fond du Lac County Occupational Needs Census. This report analyzes the job openings in this census by their significant relationship to Data, People, and Things as defined in Volume II of the D.O.T.

These classifications are found in the fourth (Data), fifth (People), and sixth (Things) digits of the occupational codes. Within each classification of Data, People, and Things are nine levels of complexity. These levels descend in complexity from 0 to 8. All levels, except 8, show a significant relationship to Data, People, or Things. The succeeding pages explain the hierarchy within and the definitions of Data, People, and Things.

This analysis categorizes each job opening in the following ways:

1. The WORK AREA--the job opening's significant relationship to Data, People, or Things, or a combination of them. There are seven Work Areas.

2. The WORKER FUNCTION--the level of complexity within the Work Area.

3. The DATE when the job opening occurs, the EDUCATIONAL requirement, the EXPERIENCE required, and the PROMOTIONAL possibilities of the job openings.

Parts I through VII of this analysis are designated by the seven Work Areas: DATA; DATA-PEOPLE; DATA-THINGS; DATA-PEOPLE-THINGS; PEOPLE-THINGS; PEOPLE; and THINGS.

EXPLANATION OF RELATIONSHIPS WITHIN DATA, PEOPLE, THINGS HIERARCHIES

(Taken from the Third Edition of the Dictionary of Occupational Titles)

Much of the information in this edition of the Dictionary is based on the premise that every job requires a worker to function in relation to Data, People, and Things, in varying degrees. These relationships are identified and explained below. They appear in the form of three hierarchies arranged in each instance from the relatively simple to the complex in such a manner that each successive relationship includes those that are simpler and excludes the more complex.[1] The identifications attached to these relationships are referred to as worker functions, and provide standard terminology for use in summarizing exactly what a worker does on the job by means of one or more meaningful verbs.

A job's relationship to Data, People, and Things can be expressed in terms of the highest appropriate function in each hierarchy to which the worker has an occupationally significant relationship, and these functions taken together indicate the total level of complexity at which he must perform. The last three digits of the occupational code numbers in the Dictionary reflect significant relationships to Data, People, and Things, respectively.[2] These last three digits express a job's relationship to Data, People, and Things by identifying the highest appropriate function in each hierarchy to which the job requires the worker to have a significant relationship, as reflected by the following table:

DATA (4th Digit)	PEOPLE (5th Digit)	THINGS (6th Digit)
0 Synthesizing	0 Mentoring	0 Setting-Up
1 Coordinating	1 Negotiating	1 Precision Working
2 Analyzing	2 Instructing	2 Operating-Controlling
3 Compiling	3 Supervising	3 Driving-Operating
4 Computing	4 Diverting	4 Manipulating
5 Copying	5 Persuading	5 Tending
6 Comparing	6 Speaking-Signaling	6 Feeding-Offbearing
7	7 Serving	7 Handling
8) No significant relationship	8 No significant relationship	8 No significant relationship

[1] As each of the relationships to people represents a wide range of complexity, resulting in considerable overlap among occupations, their arrangement is somewhat arbitrary and can be considered a hierarchy only in the most general sense.

[2] Only those relationships which are occupationally significant in terms of the requirements of the job are reflected in the code numbers. The incidental relationships which every worker has to Data, People, and Things, but which do not seriously affect successful performance of the essential duties of the job, are not reflected.

DATA: Information, knowledge, and conceptions, related to data, people, or things, obtained by observation, investigation, interpretation, visualization, mental creation; incapable of being touched; written data take the form of numbers, words, symbols; other data are ideas, concepts, oral verbalization.

0 Synthesizing: Integrating analyses of data to discover facts and/or develop knowledge concepts or interpretations.

1 Coordinating: Determining time, place, and sequence of operations or action to be taken on the basis of analysis of data; executing determinations and/or reporting on events.

2 Analyzing: Examining and evaluating data. Presenting alternative actions in relation to the evaluation is frequently involved.

3 Compiling: Gathering, collating, or classifying information about data, people, or things. Reporting and/or carrying out a prescribed action in relation to the information is frequently involved.

4 Computing: Performing arithmetic operations and reporting on and/or carrying out a prescribed action in relation to them. Does not include counting.

5 Copying: Transcribing, entering, or posting data.

6 Comparing: Judging the readily observable functional, structural, or compositional characteristics (whether similar to or divergent from obvious standards) of data, people, or things.

PEOPLE: Human beings; also animals dealt with on an individual basis as if they were human.

0 Mentoring: Dealing with individuals in terms of their total personality in order to advise, counsel, and/or guide them with regard to problems that may be resolved by legal, scientific, clinical, spiritual, and/or other professional principles.

1 Negotiating: Exchanging ideas, information, and opinions with others to formulate policies and programs and/or arrive jointly at decisions, conclusions, or solutions.

2 Instructing: Teaching subject matter to others, or training others (including animals) through explanation, demonstration, and supervised practice; or making recommendations on the basis of technical disciplines.

3 Supervising: Determining or interpreting work procedures for a group of workers, assigning specific duties to them, maintaining harmonious relations among them, and promoting efficiency.

4 Diverting: Amusing others.

5 Persuading: Influencing others in favor of a product, service, or point of view.

6 Speaking-Signaling: Talking with and/or signaling people to convey or exchange information. Includes giving assignments and/or directions to helpers or assistants.

7 Serving: Attending to the needs or requests of people or animals or the expressed or implicit wishes of people. Immediate response is involved.

THINGS: Inanimate objects as distinguished from human beings; substances or materials; machines, tools, equipment; products. A thing is tangible and has shape, form, and other physical characteristics.

0 Setting Up: Adjusting machines or equipment by replacing or altering tools, jigs, fixtures, and attachments to prepare them to perform their functions, change their performance, or restore their proper functioning if they break down. Workers who set up one or a number of machines for other workers or who set up and personally operate a variety of machines are included here.

1 Precision Working: Using body members and/or tools or work aids to work, move, guide, or place objects or materials in situations where ultimate responsibility for the attainment of standards occurs and selection of appropriate tools, objects, or materials, and the adjustment of the tool to the task require exercise of considerable judgment.

2 Operating-Controlling: Starting, stopping, controlling, and adjusting the progress of machines or equipment designed to fabricate and/or process objects or materials. Operating machines involves setting up the machine and adjusting the machine or material as the work progresses. Controlling equipment involves observing gages, dials, etc., and turning valves and other devices to control factors as temperature, pressure, flow of liquids, speed of pumps, and reactions of materials. Setup involves several variables and adjustment is more frequent than in tending.

3 Driving-Operating: Starting, stopping, and controlling the actions of machines or equipment for which a course must be steered, or which must be guided, in order to fabricate, process, and/or move things or people. Involves such activities as observing gages and dials; estimating distances and determining speed and direction of other objects; turning cranks and wheels; pushing clutches or brakes; and pushing or pulling gear lifts or levers. Includes such machines as cranes, conveyor systems, tractors, furnace charging machines, paving machines, and hoisting machines. Excludes manually powered machines, such as handtrucks and dollies, and power assisted machines, such as electric wheelbarrows and handtrucks.

4 Manipulating: Using body members, tools, or special devices to work, move, guide, or place objects or materials. Involves some latitude for judgment with regard to precision attained and selecting appropriate tool, object, or material, although this is readily manifest.

5 Tending: Starting, stopping, and observing the functioning of machines and equipment. Involves adjusting materials or controls of the machine, such as changing guides, adjusting timers and temperature gages, turning valves to allow flow of materials, and flipping switches in response to lights. Little judgment is involved in making these adjustments.

6 Feeding-Offbearing: Inserting, throwing, dumping, or placing materials in or removing them from machines or equipment which are automatic or tended or operated by other workers.

7 Handling: Using body members, handtools, and/or special devices to work, move, or carry objects or materials. Involves little or no latitude for judgment with regard to attainment of standards or in selecting appropriate tool, object, or material.

NOTE: Included in the concept of Feeding-Offbearing, Tending, Operating-Controlling, and Setting Up, is the situation in which the worker is actually part of the setup of the machine, either as the holder and guider of the material or holder and guider of the tool.

EXPLANATION
OF
DATE, EDUCATION, EXPERIENCE AND PROMOTION CLASSIFICATIONS

Date

Current - The "current" job openings are those open at the time of the census, February, 1966.
One Month or More - The "one month or more" job openings are included in the "current" job openings. They are itemized separately because job openings of one month or more are defined as "hard to fill".
Later in 1966 - The "later in 1966" job openings are those openings anticipated later in 1966 and do not include "current" job openings.
In 1968 - The "in 1968" job openings are those anticipated in 1968. These include both new and replacement openings.
In 1971 - The "in 1971" job openings are those anticipated in 1971. These include both new and replacement openings.

Education

For this analysis, categories of educational training were established so that uniformity of response could be maintained. These minimum requirements are shown in the following table:

1. No Preference
2. Less than High School Graduate
3. High School Graduate
4. One Year Post-High Vocational Graduate
5. Two Year Post-High Vocational, Technical Graduate
6. Some College
7. College Graduate
8. On-the-Job Training
9. Other (Specify in Comments Section)

NR No Response

Experience and Promotion

In addition to educational requirements, employers were asked to indicate whether prior experience was desired and whether employees in these positions would normally be promoted to higher level jobs. A column (NR) was added for those firms which did not respond to these questions.

These brief statements, with accompanying charts, provide a framework from which to view the individual narrative reports.

Openings

The greatest number of openings, current and anticipated, was found among "Things" jobs.

The greatest number of current openings was found among "Data-Things" jobs.

The greatest number of anticipated openings--later in 1966, in 1968, and in 1971--was found among "Things" jobs.

Education

The minimum educational requirement most often specified by employers was for high school graduation. High school graduation or less was sufficient for a majority of openings in all work areas except "Data-People", and actually was sufficient for 90% of all "Things" job openings.

Overall, the highest educational requirements fell in the "Data-People" work area, reflecting openings for teachers and nurses, in particular.

Among job openings requiring on-the-job training, one-half were in the "Things" work area and more than one-third were in the "Data-Things" work area.

Experience

Experience was required in only 20% of total job openings. Job openings found in the "Things" work area were least likely to require experience.

Promotional Possibilities

Promotional possibilities existed in two-thirds of total job openings, with the highest percentages found in work areas which include a significant "Data" requirement among the worker functions. Promotional possibilities were high in work areas with high educational demands but, interestingly, were highest for "Data" jobs where large numbers of office clerk, typist and steno openings were found. Promotional possibilities existed for only half the "Things" jobs.

POINTS TO REMEMBER.....

The Fond du Lac County Occupational Needs Census was taken in February, 1966, at a time of high employment. Hence, the education and experience requirements sometimes appear to be more "minimum" than would normally be expected. It may be assumed that when labor demand drops, employers become more selective and the requirements rise accordingly.

The census represents 1340 of the employers in Fond du Lac County. They employ approximately 19,700 (an estimated 85%) of the total Fond du Lac County non-agricultural wage and salary employment.

Employers had the option to express "No Preference" regarding education and training, and some did not respond to these questions at all. This occurred in significant proportions in a few instances, particularly in lower skill areas, and implies that only the minimal educational level was required for these openings.

In evaluating anticipated openings, it should be remembered that these do not necessarily represent an enlargement of the employers' labor forces, since the numbers of openings include replacements as well as new job openings.

While part-time openings were reported in the occupational census, only full-time openings were included in this analysis.

Occupations with codes ending in digits .780, .781, and .782 were included with those having digits .380, .381, and .482, respectively. It was decided that the job openings which have a relatively complex relationship to "things", as indicated by 0, 1, or 2 in the last digit position, must necessarily have a significant relationship to "data". This relationship was indicated by including these job openings with those having a 3 or 4 in the 4th digit position of the occupational code.

The figures in the narratives are rounded. Exact numbers and percentages are found in the accompanying tables.

WORK AREA DISTRIBUTION

TOTAL JOB OPENINGS

NOTE:

The large percentage of "Things" job openings.

The large percentages of job openings which involve "Data" alone or in combination with other significant worker functions.

The small percentages of job openings which involve "People" alone or in combination with other significant worker functions.

MINIMUM EDUCATIONAL REQUIREMENTS

TOTAL JOB OPENINGS

NOTE:

40.9% of all job openings required a high school degree.

64.9% of all job openings required a high school degree or beyond.

Only 5.8% of all job openings required a college degree.

EXPERIENCE REQUIRED

TOTAL OPENINGS

NOTE:

Only 20.3% of all job openings required experience.

PROMOTIONAL POSSIBILITIES

TOTAL OPENINGS

NOTE:

65.6% of all job openings offered promotional possibilities.

DISTRIBUTION OF TOTAL JOB OPENINGS AND EXPERIENCE REQUIRED
BY
WORK AREA

NOTE: The high percentage of "Data-People-Things" job openings which required experience.
The low percentage of "Things" and "People-Things" job openings which required experience.

DISTRIBUTION OF TOTAL JOB OPENINGS AND PROMOTIONAL POSSIBILITIES
BY
WORK AREA

NOTE: The high percentage of "Data" job openings which offered promotional possibilities.
The low percentage of "People" job openings which offered promotional possibilities.

DISTRIBUTION OF CURRENT JOB OPENINGS WITH PERCENTAGE HARD TO FILL*
BY
WORK AREA

*Current job openings are defined as "hard to fill" when open 1 month or more. By this definition, 63% of <u>total</u> current job openings were hard to fill.

DISTRIBUTION OF FUTURE JOB OPENINGS
BY
WORK AREA

NOTE: The majority of future job openings involved "Data" alone or in combination with another significant worker function.

The largest percentage of future job openings in a single work area involved "Things".

*ANNOTATED BIBLIOGRAPHIES; *MANAGEMENT DEVELOPMENT; *REFERENCE MATERIALS; *GOVERNMENT PUBLICATIONS; *SMALL BUSINESS

The purpose of this bibliography is to provide information about publications of the various departments, bureaus, offices, commissions, and other administrative arms of the Federal Government that would be of interest to small business owners. All are available to the small business owner-manager. Some of the material listed outlines the help available from Federal agencies. Other publications explain the laws which agencies enforce, present statistical data useful in marketing or specialized information pertinent to particular industries or trades. Prospective businessmen, educators, or students will find helpful references on many subjects relating to small business management and operation. An annotated bibliography is supplied under an alphabetical listing by subject and titles are given in an alphabetical listing by issuing agency. (MM)

OFFICE OF BUSINESS ASSISTANCE

For sale by the Superintendent of Documents, U.S. Government Printing Office
Washington, D.C., 20402 - Price 45 cents

Foreword

Every year many publications are issued by the various departments, bureaus, offices, commissions and other administrative arms of the Federal Government. This published material covers a wide range of subjects and is of interest to many different groups or individuals.

The purpose of this "Survey" is to provide, in a single volume, information about publications of interest to small business owners. From the vast output of booklets, pamphlets, and leaflets published by the various government agencies, those most likely to be of assistance to the small business sector are listed in this volume. Some of these publications are for sale, at nominal prices, by the Superintendent of Documents and many others may be obtained at no cost from the issuing agencies. All are readily available to the small business owner-manager.

Some of the material listed in this book outlines the help available from Federal agencies. Other publications explain, in nontechnical language, the laws which the agencies enforce. Still others present statistical data useful in marketing or specialized information pertinent to particular industries or trades. Small business operators interested, for example, in obtaining a government contract, improving their management, or extending marketing operations abroad, will find publications listed in this book which will provide them with useful information. Prospective businessmen or students will also find helpful references on many subjects relating to small business management and operation.

The first edition was compiled by Elizabeth M. Heidbreder, formerly librarian of the Small Business Administration, with technical assistance by Miss Florence M. May, Research Studies Division. The booklet has been revised by Miss Elizabeth G. Janezeck, Librarian, Small Business Administration. Assistance in the preparation of the manuscript was provided by Thomas O. Barnes, Rose S. Messinger, and Dorothy Ritter.

Hints to Users

How To Find References in This Book

For the convenience of the user, publications are listed under two separate classifications: Section I is an alphabetical listing by subject; section II is an alphabetical listing by issuing agency. If, for instance, you want references to publications on export-import trade, look in the alphabetical subject listing. If you want to find a list of recent publications issued by the Atomic Energy Commission, look for that name in the alphabetical agency listing.

Scope of Material Included

Certain limitations have been placed on the type of material included. Reprints, speeches, technical publications, and periodicals have, for the most part, been excluded. The scope of technical literature published by the Government is so large that it could not be listed in its entirety in this "Survey." However, some specialized bibliographies are listed which will aid persons desiring technical information.

Most Government periodicals have not been included in this volume. Exceptions are periodically published lists of agency publications. For information on Government periodicals, consult the annual March issue of the Marketing Information Guide published by the U.S. Department of Commerce, or the February issue of the Monthly Catalog or Price List 36, Government Periodicals, both published by the Superintendent of Documents.

How To Obtain Publications Listed in This "Survey"

The abbreviation GPO used with priced publications indicates that the items may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C., 20402. Checks or money orders should be made payable to the Superintendent of Documents. Priced publications may also be ordered from the field offices of the U.S. Department of Commerce.

Free publications are available from the issuing agency, Washington, D.C., unless a different address is indicated. Free publications issued by the Small Business Administration are available at any of the field offices listed on the inside back cover.

Many of the Government publications listed may be consulted at large public or university libraries. The field offices of the Small Business Administration and the U.S. Department of Commerce also have some of these publications available for reference.

SECTION I—ALPHABETICAL LISTING BY SUBJECT

Accounting

ACCOUNTING AND FINANCIAL DATA FOR SMALL RETAILERS. (Management Research Summary 211) Small Business Administration. 1964, 2 pp. Free. Highlights from a field study of 171 small retail stores in 58 Oklahoma communities. Discusses the purposes of an accounting system, financial statements, turnover of merchandise inventory, and special statements and schedules.

ACCOUNTING IN SMALL BUSINESS DECISIONS. (Management Research Summary 66) Small Business Administration. 1962, 4 pp. Free. Findings from analysis of actual situations in a variety of small enterprises regarding accounting methods, developing accounting data for use in decision-making, basic principles underlying decisions, with illustrative case studies.

ACCOUNTING PRACTICES IN SMALL FIRMS. (Management Research Summary 76) Small Business Administration. 1962, 4 pp. Free. A summary of findings from an analysis of questionnaire returns from 177 manufacturing firms and 341 nonmanufacturing firms in Massachusetts regarding statement analysis, budgeting and forecasting, cost control, inventory control, break-even analysis, business decisions, attitudes toward accountants, data processing.

GUIDE TO UNIFORM ACCOUNTING FOR LOCKER AND FREEZER PROVISIONERS. (Agriculture Handbook 163) Farmer Cooperative Service, U.S. Department of Agriculture. 1959, 53 pp. Single copies available from Information Division, Farmer Cooperative Service. For sale by GPO, $1. Explains an accounting system designed to help locker and freezer provisioners operate more efficiently.

A GUIDE TO UNIFORM COST AND FINANCIAL ACCOUNTING FOR POULTRY PROCESSORS. (Agriculture Handbook 213) Economic Research Service, U.S. Department of Agriculture. 1961, 13 pp. GPO, 70¢. In three parts: Cost Reporting on a Plant-Wide Basis, Cost Reporting on a Department Basis, and Cost Reporting on a Budgetary Basis.

GUIDES FOR PROFIT PLANNING. (Small Business Management Series 25) Small Business Administration. 1960, 52 pp. GPO, 25¢.

Three basic guides: the break-even point, the level of gross profit, and the rate of return on investment.

IMPROVED ACCOUNTING METHODS FOR WHOLESALE FOOD DISTRIBUTORS. (Marketing Research Report 454) Agricultural Marketing Service, U.S. Department of Agriculture. 1961, 142 pp. Free. Recommended accounting methods are based on studies of the wholesale food distribution business.

IMPROVING FOOD BROKERS' ACCOUNTING PROCEDURES. (Management Research Summary 203) Small Business Administration. 1964, 2 pp. Free. Key points from a survey of 592 food brokers regarding accounting procedures. Discusses financial statements, internal control, account classification, manufacturers' inventory, automatic data processing, and cost control procedures.

MANAGEMENT ACCOUNTING FOR FROZEN FOOD LOCKER AND RELATED PLANTS. (Agricultural Handbook 220) Farmer Cooperative Service, U.S. Department of Agriculture. 1961, 117 pp. GPO, 65¢. Accounting procedures and techniques that provide departmental cost information needed to properly manage small and medium-sized businesses.

OPERATING CONTROLS IN SMALL MANUFACTURING FIRMS. (Management Research Summary 134) Small Business Administration. 1963, 2 pp. Free. Examines the degree to which certain basic control techniques were employed in small firms in Nebraska.

A SUGGESTED SYSTEM OF UNIFORM EXPENSE ACCOUNTING FOR NURSING HOMES AND RELATED FACILITIES. (Public Health Service Publication 835) Public Health Service, U.S. Department of Health, Education, and Welfare. 1961, 125 pp. GPO, $1. A system designed primarily to help administrators maintain adequate expense records and record expenses uniformly.

Advertising

ADVERTISING IN INTERNATIONAL MARKETS. (Management Aids for Small Manufacturers 160) Small Business Administration. 1964, 4 pp. Free. Advertising can be a valuable tool for selling overseas, but it should be considered only after a plan for export selling has been worked out.

ADVERTISING IN SMALL RETAIL STORES. (Management Research Summary 70) Small Business Administration. 1962, 4 pp. Free. Pertinent findings from a study of 357 Nevada retail stores, covering the responsibility for the advertising function; media used; advertising expenditures. Offers recommendations for small retailers in building an advertising program.

ADVERTISING—RETAIL STORE. (Small Business Bibliography 20) Small Business Administration. Revised 1963, 8 pp. Free. A listing of sources which will assist the small retailer in planning and implementing his advertising programs.

DIRECT MAIL ADVERTISING FOR SMALL RETAILERS. (Small Marketers Aids 72) Small Business Administration. 1961, 4 pp. Free. Discusses direct mail advertising for retail stores and gives how-to-do-it suggestions on types of ads, planning mailings, and writing the ad.

GUIDES AGAINST DECEPTIVE PRICING. Federal Trade Commission. Revised January 1964, 6 pp. Free. How the FTC evaluates pricing representations in advertising.

NATIONAL MAILING-LIST HOUSES. (Small Business Bibliography 29) Small Business Administration. Revised 1963, 11 pp. Free. A directory of compilers and brokers of mailing lists of national scope.

Aeronautics

STARTING AND MANAGING AN AVIATION FIXED BASE OPERATION. (The Starting and Managing Series Vol. 6) Small Business Administration. 1963, 52 pp. GPO, 25¢. Describes the advantages and disadvantages of going into this type of business, including the risks involved, desirable personal characteristics, and some helpful management practices.

Air Pollution

A DIGEST OF STATE AIR POLLUTION LAWS. (Public Health Service Publication 711) Public Health Service, U.S. Department of Health, Education, and Welfare. 1963, 196 pp. GPO, $1. Laws designed to curb smoke and noxious fumes.

Atomic Energy

MATERIALS/SERVICES AND FACILITIES AVAILABLE FROM THE UNITED STATES ATOMIC ENERGY COMMISSION. (TID–4559). U.S. Atomic Energy Commission, Technical Information Service Extension, P.O. Box 62, Oak Ridge, Tenn. Second revision. January 1958, 8 pp. Free. Brief discussion of availability for commercial use.

QUESTIONS AND ANSWERS ON U.S. ATOMIC ENERGY COMMISSION ACCESS PERMITS. (TID–4558). U.S. Atomic Energy Commission,

Technical Information Service Extension, P.O. Box 62, Oak Ridge, Tenn. Fourth revision. December 1962, 15 pp. Free. Describes the Access Permit program under which appropriately cleared firms, organizations, and individuals engaged in nuclear science or industrial work may obtain classified information developed in AEC projects.

RADIOISOTOPES IN SCIENCE AND INDUSTRY; A SPECIAL REPORT OF THE UNITED STATES ATOMIC ENERGY COMMISSION. U.S. Atomic Energy Commission. 1960, 176 pp. GPO, $1.25. Extensive discussion of the use of radioisotopes.

SELLING TO AEC. U.S. ATOMIC ENERGY COMMISSION. 1963, 39 pp. GPO, 25¢. Information on who does the buying, what is bought, how much is bought, and where procurement offices are located.

SPECIAL SOURCES OF INFORMATION ON ISOTOPES. (TID–4563). U.S. Atomic Energy Commission, Technical Information Service Extension, P.O. Box 62, Oak Ridge, Tenn. Third revision. January 1962, 83 pp. Free. An annotated bibliography listing government and nongovernment publications.

USAEC PATENTS AVAILABLE FOR LICENSING. (TID–4557). U.S. Atomic Energy Commission, Technical Information Service Extension, P.O. Box 62, Oak Ridge, Tenn. First Revision. December 1959, 3 pp. Free. Scope and availability of patents.

WHAT'S AVAILABLE IN THE ATOMIC ENERGY LITERATURE. (TID–4550). U.S. Atomic Energy Commission, Technical Information Service Extension, P.O. Box 62, Oak Ridge, Tenn. Ninth revision. March 1963, 31 pp. Free. Explains what unclassified atomic energy research information is available; how to locate and use this information.

Automatic Merchandising

AUTOMATIC MERCHANDISING. (Small Business Bibliography 70) Small Business Administration. 1964, 8 pp. Free. Requirements for products most easily sold through vending machines and a list of references available to those in the field of automatic merchandising.

Automobile Dealerships

PROFIT CONTROL IN AUTOMOBILE RETAILING. (Management Research Summary 2) Small Business Administration. 1960, 4 pp. Free. The elements of control as utilized by progressive and profitable dealers.

Bibliographies

ADVERTISING—RETAIL STORE. (See listing under Advertising.)

AVAILABLE LEAFLETS ON FISHERIES. (Fishery Leaflet 9) Fish and Wildlife Service, U.S. Department of the Interior. 1962, 7 pp. Free. Subject listing.

BAKERY PRODUCTS. (See listing under Food Industry.)

BASIC LIBRARY REFERENCE SOURCES FOR BUSINESS USE. (Small Business Bulletin 18) Small Business Administration. Revised 1963, 8 pp. Free. Annotated list of business information sources.

BDSA PUBLICATIONS. Business and Defense Services Administration, U.S. Department of Commerce. 1964, Leaflet. Free. Listing of current publications.

BIBLIOGRAPHY OF INVESTMENT AND OPERATING COSTS FOR CHEMICAL AND PETROLEUM PLANTS, JANUARY–DECEMBER 1962. (Information circular 8180) Bureau of Mines, U.S. Department of the Interior. 1963, 93 pp. GPO, 35¢. Annual abstract bibliography on all facets of cost engineering in petroleum and chemical plants and related facilities.

BOOKSTORE OPERATION. (See listing under Retail Trade.)

BUREAU OF THE CENSUS CATALOG. Bureau of the Census, U.S. Department of Commerce. Quarterly, with annual cumulation. GPO, $1.25 for 4 consecutive issues plus 12 monthly supplements. Detailed listing of all Census reports as they are published.

BUSINESS SERVICE CHECKLIST. U.S. Department of Commerce. Weekly. GPO, Annual subscription $1.50. A guide to Department of Commerce publications of the week.

CATERING. (See listing under Food Industry.)

CHECKLIST OF BIC PUBLICATIONS FOR USE IN FOREIGN MARKET RESEARCH AND TRADE. Bureau of International Commerce, U.S. Department of Commerce. December 1963, 20 pp. Free. In addition to the books and pamphlets listed, a large section of this publication is devoted to the reports of the world trade information service arranged by country. These reports consist of specific economic and foreign trade data for certain countries.

CHECKLIST OF REPORTS ISSUED BY THE AGRICULTURAL MARKETING SERVICE. Marketing Information Division, Agricultural Marketing Service, U.S. Department of Agriculture. Free. Monthly announcements of new publications.

COMMERCIAL STANDARDS; CLASSIFIED LIST REVISED TO MARCH 1964. National Bureau of Standards, U.S. Department of Commerce. 21

pp. Free. List of voluntary standards which give technical requirements for materials, construction, dimensions, tolerances, testing, grading, marking, labeling, etc. They are listed under headings such as apparel, building materials, plastics, and rubber products.

CONSUMER CREDIT. (See listing under Credit.)

CURRENT PUBLICATIONS OF THE WOMEN'S BUREAU. (Leaflet 10) Women's Bureau, U.S. Department of Labor. Revised December 1963, 8 pp. Free.

A DIRECTORY OF COMMUNITY WAGE SURVEYS, 1948–JUNE 1959. Bureau of Labor Statistics, U.S. Department of Labor. 1959, 16 pp. Free. Listing of surveys by city or by date of the more comprehensive reports. Revised periodically.

DISCOUNT RETAILING. (See listing under Retail Trade.)

DRUG STORES. (See listing under Retail Trade.)

FEDERAL TRADE COMMISSION LIST OF PUBLICATIONS. Federal Trade Commission. 1964, 10 pp. Free. A list of FTC publications available either from GPO or the Commission.

FOOD STORE. (See listing under Food Industry.)

FOOTWEAR. (See listing under Shoe Industry.)

FOREST PRODUCTS LABORATORY SUBJECT LISTS. The Laboratory disseminates the results of its research through subject bibliographies. Titles of some of these lists are:

1. HOUSEHOLD FURNITURE INDUSTRY. December 18, 1963. Free.
2. WIRE ROPE INDUSTRY. January 18, 1963. Free.
3. METALLIC WATCH BAND INDUSTRY. June 30, 1962. Free.
4. STATIONERS INDUSTRY. June 15, 1962. Free.
5. LUGGAGE AND RELATED PRODUCTS INDUSTRY. June 30, 1962. Free.

A complete list of Trade Practice Rules may be found in the Federal Trade Commission List of Publications.

FURNITURE RETAILING. (See listing under Retail Trade.)

GIFT AND ART SHOPS. (See listing under Retail Trade.)

HARDWARE RETAILING. (See listing under Retail Trade.)

HOBBY SHOP. (See listing under Retail Trade.)

IMPLICATIONS OF AUTOMATION AND OTHER TECHNOLOGICAL DEVELOPMENTS. A Selected Bibliography (Bulletin 1319) 1962, 136 pp. GPO, 65¢. Supplement (Bulletin 1319–1) 1963, 90 pp. GPO, 50¢. Lists books, articles, reports, pamphlets, speeches, conference proceedings and other readily available materials. Most of the

references are briefly annotated to indicate the subjects covered and the general content of the publication.

INTERIOR DECORATING. (See listing under Interior Decoration.)

LIST OF AVAILABLE PUBLICATIONS OF THE UNITED STATES DEPARTMENT OF AGRICULTURE. Office of Information, U.S. Department of Agriculture. Revised August 1963, 109 pp. GPO, 35¢.

LIST OF BUREAU OF MINES PUBLICATIONS AND ARTICLES, JANUARY 1, TO DECEMBER 31, 1962. (Special Publication 1) 1963, 87 pp. GPO, 60¢. Annual list of all publications issued and articles published by Bureau scientists in technical press.

LIST OF CATALOGS AND SELECTED BIBLIOGRAPHIES. Clearinghouse for Federal Scientific and Technical Information, Office of Technical Services, U.S. Department of Commerce. 1964, 2 pp. Free. List of bibliographies of technical reports on such subjects as batteries, glass, human engineering, transistors.

LIST OF PUBLICATIONS ISSUED BY THE BUREAU OF MINES FROM JULY 1, 1910, TO JANUARY 1, 1960. 1960, 826 pp. GPO, $4.25. Contains 7,500 listings of virtually all scientific and technical publications issued.

LIST OF PUBLICATIONS JULY 1 TO DECEMBER 31, 1963. Forest Products Laboratory, Madison, Wisconsin 53705. 1964, 15 pp. Semiannual. Free. A list intended to supplement their subject lists.

LIST OF UNITED STATES FOREIGN TRADE STATISTICAL PUBLICATIONS. Bureau of the Census, U.S. Department of Commerce. 1964, 3 pp. Free. Lists the detailed and summary reports containing import, export, and shipping statistics, and other pertinent reference material.

MOBILE HOMES. (See listing under Mobile Homes.)

NURSING HOMES. (See listing under Nursing Homes.)

OPERATING COSTS AND RATIOS—RETAIL * * * WHOLESALE. (See listing under Financial Statements.)

PAINTING AND DECORATING. (See listing under Interior Decoration.)

PARTIAL LIST OF GOVERNMENT PUBLICATIONS OF INTEREST TO ARCHITECTS, BUILDERS, ENGINEERS AND RETAIL LUMBERMEN. Forest Service, U.S. Department of Agriculture. 1962, 25 pp. Free. A bibliography on wood, its use, treatment, and preservation.

PUBLICATIONS OF THE COPYRIGHT OFFICE. Library of Congress, Copyright Office. 1963, 1 p. Free.

PUBLICATIONS FOR USE IN MARKETING AND DISTRIBUTION. (See listing under Marketing.)

PUBLICATIONS OF THE FEDERAL HOUSING ADMINISTRATION. (FHA 235) 1963. Federal Housing Administration. Leaflet. Free.

PUBLICATIONS OF THE NATIONAL SCIENCE FOUNDATION. National Science Foundation. Semi-annual. Free. Lists free and for sale publications.

PUBLICATIONS OF THE U.S. DEPARTMENT OF LABOR; SUBJECT LISTING 1958 TO JUNE 1963. U.S. Department of Labor. 1963, 24 pp. Free.

REAL ESTATE AND INSURANCE. (See listing under Insurance.)

REPORTS AND PUBLICATIONS OF USDA'S AGRICULTURAL MARKETING SERVICE. (AMS–523) Agricultural Marketing Service, U.S. Department of Agriculture. January 1964, 45 pp. Free. Lists publications numerically by series.

RESTAURANTS AND OTHER EATING PLACES. (See listing under Food Industry.)

RETAIL CREDIT AND COLLECTIONS. (See listing under Credit.)

RETAIL STORE HOURS. (See listing under Hours of Labor.)

RETAILING. (See listing under Retail Trade.)

SALES MANAGEMENT FOR MANUFACTURERS. (See listing under Personnel Management.)

SCIENTIFIC INFORMATION ACTIVITIES OF FEDERAL AGENCIES. National Science Foundation. (A series of pamphlets describing the policies and procedures of Federal Agencies relative to their scientific information activities.)

1. U.S. DEPARTMENT OF AGRICULTURE. 1958, 8 pp. GPO, 5¢.
2. U.S. DEPARTMENT OF COMMERCE, PART I. 1959, 23 pp. GPO, 15¢. Department-level activities and other information on the Office of Technical Services, Bureau of the Census, Bureau of Public Roads, and the Patent Office.
3. U.S. GOVERNMENT PRINTING OFFICE. 1960, 8 pp. GPO, 5¢.
4. TENNESSEE VALLEY AUTHORITY. 1960, 7 pp. GPO, 5¢.
5. NATIONAL SCIENCE FOUNDATION. 1960, 12 pp. GPO, 10¢.
6. U.S. DEPARTMENT OF COMMERCE, PART II. 1960, 31 pp. GPO, 20¢. Covers the Weather Bureau, Coast and Geodetic Survey, Maritime Administration, Business and Defense Services Administration, Office of Business Economics, and Bureau of Foreign Commerce.
7. U.S. DEPARTMENT OF COMMERCE, PART III. 1960, 12 pp. GPO, 10¢. Activities of the National Bureau of Standards.

8. Federal Communication Commission. 1961, 4 pp. GPO, 5¢.
9. Veterans Administration. 1961, 9 pp. GPO, 10¢.
10. Treasury Department. 1961, 23 pp. GPO, 15¢.
11. U.S. Department of the Interior, Part I. 1961, 34 pp. GPO, 25¢. Covers department-level activities, also Bureau of Reclamation, Office of Saline Water, Fish and Wildlife Service, National Park Service, Bonneville Power Administration, Bureau of Indian Affairs, and Bureau of Land Management.
12. Smithsonian Institution. 1962, 17 pp. GPO, 15¢.
13. Federal Aviation Agency. 1962, 10 pp. GPO, 10¢.
14. U.S. Air Force, Part II. Office of Aerospace Research. 1962, 21 pp. GPO, 20¢.
15. U.S. Department of the Interior, Part II. 1962, 30 pp. GPO, 20¢. Covers United States Geological Survey, Bureau of Mines, Office of Oil and Gas, Office of Mineral Mobilization, Office of Geography, and Office of Coal Research.
16. U.S. Air Force, Part IV. Air Force Systems Command. 1963, 58 pp. GPO, 20¢.
17. U.S. Atomic Energy Commission. 1963, 21 pp. GPO, 15¢.
18. U.S. Navy, Part I. 1963, 40 pp. GPO, 25¢. Includes department-level activities, also U.S. Naval Oceanographic Office, U.S. Naval Observatory, Bureau of Medicine and Surgery, Bureau of Yards and Docks, Bureau of Naval Personnel, and Bureau of Supplies and Accounts.
19. U.S. Navy, Part II. Bureau of Naval Research (Revision of Bulletin No. 2) 1963, 16 pp. GPO, 15¢.
20. U.S. Department of Health, Education, and Welfare, Part I. 1963, 41 pp. GPO, 25¢. Covers department-level activities, also Food and Drug Administration, Saint Elizabeths Hospital, Office of Education, Gallaudet College, Welfare Administration, Social Security Administration, and Vocational Rehabilitation Administration.
21. U.S. Air Force, Part I. 1964, 39 pp. GPO, 25¢. Includes department-level activities, also Aeronautical Chart and Information Center, Project RAND, Operations Analysis Office, Surgeon General USAF, Air Weather Service, Air Photographic and Charting Service, and Air University.
22. U.S. Department of Health, Education, and Welfare, Part II. Public Health Service. 1964, 13 pp. GPO, 10¢.

773-215 O—65——2

23. U.S. Department of Health, Education, and Welfare, Part III. National Institute of Health. 1964, 18 pp. GPO, 15¢.
24. U.S. Navy, Part III. 1964, 19 pp. GPO, 15¢. Includes Bureau of Ships and Bureau of Naval Weapons.
25. Library of Congress. 1964, 17 pp. GPO, 15¢.

Selected List of Publications on Social Security. (Leaflet) Social Security Administration, U.S. Department of Health, Education, and Welfare. 1962. Free.

Selected Publications of the Bureau of Labor Standards 1962. Bureau of Labor Standards, U.S. Department of Labor. 1962, 23 pp. Free.

Selling by Mail Order. (See listing under Retail Trade.)

Simplified Practice Recommendations: Classified List Revised to October 1, 1964. Community Standards Division, U.S. Department of Commerce. 7 pp. Free. These voluntary recommendations give the sizes, kinds, and types of specific manufactured articles called for by the trade.

Small Business Administration Publications: Free Publications Currently Available (115A); For-Sale Booklets (115B); Classification of Management Publications (115E). Small Business Administration. Free. The three separate lists are revised frequently.

Small Office Automation. (Small Business Bibliography 58) Small Business Administration. 1964, 8 pp. Free. A comprehensive list of references on the general subject of office automation.

Special Sources of Information on Isotopes. (TID–4563) U.S. Atomic Energy Commission, Technical Information Service Extension, P.O. Box 62, Oak Ridge, Tenn. Second revision. January 1, 1960, 54 pp. Free. An annotated bibliography listing government and nongovernment publications.

Sporting Goods. (See listing under Recreation Industry.)

Statistics and Maps for National Market Analysis. (See listing under Statistics.)

Store Arrangement and Display. (See listing under Retail Trade.)

Subject Index of Bulletins Published by the Bureau of Labor Statistics, 1915–59, With Annotated Listing of Bulletins, 1895–1959. (Bulletin 1281) Bureau of Labor Statistics, U.S. Department of Labor. 1960, 102 pp. GPO, 55¢.

Technical Studies by the Federal Housing Administration. (FHA 470) Federal Housing Administration. 1964, 49 pp. Re-

vised frequently. Free. Technical building studies under way, completed, or under consideration.

TRAINING COMMERCIAL SALESMEN. (See listing under Personnel Management.)

TRAINING RETAIL SALESPEOPLE. (See listing under Retail Trade.)

TRUCKING AND CARTAGE. (Small Business Bibliography 51) Small Business Administration. Revised 1964, 8 pp. Free. Sources of information for the small operator.

U.S. DEPARTMENT OF COMMERCE PUBLICATIONS 1963 SUPPLEMENT. U.S. Department of Commerce. 1963. GPO, 25¢. A catalog and index of publications issued from January 1962 through December 1963. Cumulates the weekly list Business Service Checklist. A supplement has been issued every year since 1950 when a basic volume was issued.

UNITED STATES SECURITIES AND EXCHANGE COMMISSION: ITS FUNCTIONS AND ACTIVITIES. U.S. Securities and Exchange Commission. 1964, 30 pp. Free. A description of the various laws administered by the Commission. Also contains an annotated list of its publications.

VARIETY STORES. (See listing under Retail Trade.)

VOLUNTARY AND COOPERATIVE CHAINS. (See listing under Food Industry.)

WAREHOUSING. (See listing under Warehouses.)

WHAT'S AVAILABLE IN THE ATOMIC ENERGY LITERATURE. (TID–4550) U.S. Atomic Energy Commission, Technical Service Extension, P.O. Box 62, Oak Ridge, Tenn. Ninth Revision. March 1963, 31 pp. Free. Explains what unclassified atomic energy research information is available, how to locate and use this information.

WHOLESALING. (See listing under Wholesale Trade.)

WOODWORKING SHOPS. (See listing under Wood-using Industries.)

Bookkeeping

STARTING AND MANAGING A SMALL BOOKKEEPING SERVICE. (The Starting and Managing Series Vol. 4) Small Business Administration. 1962, 64 pp. GPO, 30¢. Discusses what it takes to start, experience required, managerial skill, services provided, a look at the future.

Building Industry

CONTROL METHODS FOR HOME BUILDERS. (Management Research Summary 20) Small Business Administration. 1961, 4 pp. Free. Discusses the profit planning concept, sales, production, cost, and investment control.

DEALERS' AND CONTRACTORS' GUIDE: PROPERTY IMPROVEMENT LOANS. (FHA 30A) Federal Housing Administration. Revised 1962, 10 pp. GPO, 10¢. Responsibility of dealers and contractors who participate in FHA's property improvement program.

HOW FHA HELPS IMPROVE HOMEBUILDING TECHNIQUES. (FHA 191) Federal Housing Administration. Revised 1959, leaflet. GPO, 10¢. Describes FHA technical studies program.

MINIMUM PROPERTY STANDARDS FOR LOW COST HOUSING. (FHA 18) Federal Housing Administration. Revised to June 1963, 31 pp. GPO, 25¢. Defines the technical minimum acceptable in all FHA insuring offices. Factors relating to marketability are also considered in FHA underwriting and may affect the maximum insurable mortgage.

MINIMUM PROPERTY STANDARDS FOR MOBILE HOME COURTS. (FHA 2424) Federal Housing Administration. 1962. GPO, 30¢. Minimum planning and construction requirements which apply to mobile home courts offered to FHA as security for an insured mortgage loan.

MINIMUM PROPERTY STANDARDS FOR MULTIFAMILY HOUSING. (FHA 2600) Federal Housing Administration. 1963, 511 pp. GPO, $2.50. Sets forth the over-all minimum standards acceptable to FHA, designed to foster ideas and techniques which will result in better and more economical housing.

MINIMUM PROPERTY STANDARDS FOR NURSING HOMES. (FHA 334) Federal Housing Administration. Revised 1963, 33 pp. GPO, 30¢. These standards set forth the minimum qualities considered necessary in the planning, construction, and development of a property which is to serve as security for an insured mortgage on a nursing home.

MINIMUM PROPERTY STANDARDS FOR ONE AND TWO LIVING UNITS. (FHA 300) Federal Housing Administration. 1963, 315 pp. GPO, $2. Standards for design, materials, equipment, and construction methods.

MINIMUM PROPERTY STANDARDS FOR URBAN RENEWAL REHABILITATION. (FHA 950) Federal Housing Administration. 1963, 55 pp. GPO, 40¢. Sets forth on a national basis the minimum de-

sign and construction standards of the FHA for the rehabilitation of houses located in urban renewal areas.

STARTING AND MANAGING A SMALL BUILDING BUSINESS. (The Starting and Managing Series Vol. 5) Small Business Administration. 1962, 102 pp. GPO, 35¢. Gives helpful information on the building industry. Includes actual case histories.

TECHNICAL STUDIES BY THE FEDERAL HOUSING ADMINISTRATION. (See listing under Bibliographies.)

Business Education

EDUCATION FOR LEADERSHIP IN SMALL BUSINESS. (Management Research Summary 36) Small Business Administration. 1961, 4 pp. Free. Findings from a survey of 161 Louisiana small business executives regarding the variety of their functions and their opinions as to the contribution of business and liberal arts courses to careers in small business management.

A MANAGEMENT TRAINING PROGRAM FOR SMALL BUSINESSMEN: A NONCOMPUTERIZED GAME. (Management Research Summary 128) Small Business Administration. 1963, 4 pp. Free. Describes the workings and results of the "MANTRAP" game designed to help in the solving of day-to-day business problems, the nature of problem-solving, and the use of related information.

SIMULATION TRAINING FOR SMALL BUSINESS EXECUTIVES: A COMPUTERIZED MODEL. (Management Research Summary 126) Small Business Administration. 1963, 4 pp. Free. Describes the method of playing the "simulation game" with the help of a computer.

Business Enterprises

BUYING AND SELLING A SMALL BUSINESS. (Management Research Summary 120) Small Business Administration. 1963, 2 pp. Free. Gives direction and guidance through the maze of complex matters inherent in buying or selling a small business.

CHOOSING A FORM OF BUSINESS ORGANIZATION. (Management Research Summary 98) Small Business Administration. 1963, 4 pp. Free. Describes the various forms of business organization and discusses related legal, financial, and tax considerations, as well as the advantages and disadvantages of the principal forms and their effect on various aspects of doing business.

CONTINUITY PLANNING FOR SMALL ALABAMA FIRMS. (Management Research Summary 135) Small Business Administration. 1963, 2

pp. Free. Outlines some of the basic factors that should be considered by owners of small business in Alabama or by anyone considering starting a business in the State. Primarily concerned with recent statutory and judicial developments.

METHODS OF COUNTING BUSINESS ESTABLISHMENTS. (Management Research Summary 127) Small Business Administration. 1963, 2 pp. Free. Summarizes an economical but accurate method of counting business establishments in a state, by location and type of business.

PUERTO RICAN MANUFACTURING—LOCAL AND NONLOCAL OWNERSHIP. (Management Research Summary 144.) Small Business Administration. 1963, 2 pp. Free. Findings on establishment and testing of statistical techniques and understanding of trends relating to local and outside ownership of enterprises.

THE SQUEEZE-OUT IN SMALL BUSINESS OWNERSHIP. (Management Research Summary 7) Small Business Administration. 1961, 4 pp. Free. Methods used to eliminate associates, devices used as protection against such squeeze-outs, and suggested changes in legal controls for better protection of holders of minority interests.

UNUSUAL SMALL BUSINESSES IN LOUISIANA. (Management Research Summary 92) Small Business Administration. 1962, 4 pp. Free. Briefly discusses factors for consideration by the prospective owner of an unusual small business: adaptation to local materials, adaptation to local markets, marketing methods.

Business Success and Failure

ENVIRONMENT VS. MANAGEMENT IN SMALL BUSINESS FAILURE. (Management Research summary 168) Small Business Administration. 1963, 2 pp. Free. Compares 53 active and 37 discontinued Iowa firms with regard to environmental and managerial factors contributing to growth and decline of small manufacturing firms.

FACTORS IN SMALL BUSINESS SUCCESS OR FAILURE. (Management Research Summary 145) Small Business Administration. 1963, 4 pp. Free. Examines the hypothesis that successful and unsuccessful businessmen differ in their personal attitudes as well as in their applications of business principles.

THE FIRST TWO YEARS: PROBLEMS OF SMALL FIRM GROWTH AND SURVIVAL. (Small Business Research Series 2) Small Business Administration. 1961, 233 pp. GPO, $1. A study of 81 firms in Rhode Island develops information concerning who opens a small business, why individuals go into business, causes of failure, and reasons for survival.

FOUNDERS OF SMALL BUSINESS IN TEXAS AND GEORGIA. (Management Research Summary 157) 1963, 4 pp. Free. Pertinent findings from interviews with 1059 successful Texas and 521 Georgia business founders regarding their business, personal, and social characteristics.

PERSONALITY AND SUCCESS. (Small Business Research Series 4) Small Business Administration. 1964, 84 pp. GPO, 35¢. A study of those personality traits of a successful business manager which have contributed measurably to the success of an enterprise. Helpful in formulating further studies to determine the factors of success in small business management.

SMALL BUSINESS INSTABILITY AND FAILURE. (Management Research Summary 105) Small Business Administration. 1963, 4 pp. Free. Summarizes a statistical study concerning various aspects of business instability and failure in Alabama from 1939 to 1960 and reports on investigation of individual failures through interviews with the principals and their suppliers, competitors, bankers, landlords, and friends. Discusses patterns of instability and presents case studies of failures in a variety of businesses.

SMALL BUSINESS SUCCESS AND FAILURE CASES. (Management Research Summary 58) Small Business Administration. 1962, 4 pp. Free. Undertakes to establish markers to success or failure for construction contractors and home furniture and appliance dealers.

SMALL PLANT TURNOVER AND FAILURE. (Management Research Summary 4) Small Business Administration. 1961, 4 pp. Free. Study of manufacturing turnover and mortality in the Hartford, Conn., area which showed that small firms are not necessarily more liable to turnover and failure than large firms.

A STUDY OF BUSINESS TERMINATIONS. (Management Research Summary 102) Small Business Administration. 1963, 2 pp. Free. Pertinent data from a report based on a study of 2,369 Washington State firms that terminated in 1957. Includes description of the firms (structure, sales volume, age), discusses reasons for terminations, and points out need for further study.

A STUDY OF RETAILER SURVIVAL. (Management Research Summary 151) Small Business Administration. 1963, 2 pp. Free. Highlights from a survey of more than 400 Illinois retailers to determine success characteristics.

SUCCESS PATTERN IN THE REAL ESTATE BUSINESS. (Management Research Summary 122) Small Business Administration. 1963, 2 pp. Free. Outlines the most effective and successful business principles and practices.

SUCCESS OR FAILURE OF NEW SMALL MANUFACTURERS. (Management Research Summary 197) Small Business Administration. 1963, 2 pp. Free. Summarizes a 3-year study of 95 small manufacturers in Michigan to determine trouble areas, causes of failure, characteristics associated with success, and sources of strength.

Chemical Plants

(SEE BIBLIOGRAPHY OF INVESTMENT and OPERATING COSTS FOR CHEMICAL AND PETROLEUM PLANTS listed under *Bibliographies.*)

Child Labor

A GUIDE TO CHILD-LABOR PROVISIONS OF THE FAIR LABOR STANDARDS ACT. Wage and Hour and Public Contracts Divisions, U.S. Department of Labor. Revised December 1963, 30 pp. Free.

HAZARDOUS EMPLOYMENT PROHIBITED FOR MINORS UNDER STATE CHILD-LABOR LAWS. (Bulletin 205) Bureau of Labor Standards, U.S. Department of Labor. 1959, 105 pp. Free. State-by-State summary of laws and rulings. Presented as a supplement to Bulletin 158, State Child-Labor Standards, which is now being revised.

Clothing Trade

APPAREL AND ACCESSORIES FOR WOMEN, MISSES AND CHILDREN. (Small Business Bulletin 50) Small Business Administration. 1961, 16 pp. Free. A brief description of the industry and an extensive bibliography.

CONTROL METHODS FOR MEN'S CLOTHING STORES. (Management Research Summary 27) Small Business Administration. 1961, 4 pp. Free. Summarizes techniques of planning merchandise; controlling merchandise, money, and men.

LEISURE AND WORK CLOTHING: TRENDS AND OUTLOOK. Business and Defense Services Administration, U.S. Department of Commerce. 1961, 29 pp. GPO, 25¢. Production trends, geographical distribution of the industry, marketing factors, consumer demand, etc.

MEN'S AND BOYS' CLOTHING. (Small Business Bibliography 45) Small Business Administration. 1965. Free. Introduction to the industry and a bibliography.

MOTHERS' OPINIONS OF FIBERS IN CHILDREN'S CLOTHES. (Marketing Research Report 429) Agricultural Marketing Service, U.S.

Department of Agriculture. 1960, 37 pp. Free. A summary of interviews on such topics as experience with various materials, predominant material currently in use, preference and reasons for preference.

WOMEN'S ATTITUDES TOWARD COTTON AND OTHER FIBERS IN CLOTHING. (Marketing Research Report 493) Statistical Reporting Service, U.S. Department of Agriculture. 1961, 111 pp. GPO, 40¢. Report of a survey of 2,310 women concerning preferences for material in various types of clothing.

Copyright

GENERAL INFORMATION ON COPYRIGHT. Copyright Office, the Library of Congress. 1963, 9 pp. Free. Explains what may be copyrighted and how to obtain a copyright.

Counseling

BUSINESS ADVISORY SERVICE. FEDERAL TRADE COMMISSION. 1963, 11 pp. Free. Outlines business advisory services available from FTC.

HOW SMALL FIRMS HANDLE THEIR LEGAL PROBLEMS. (Management Research Summary 149) Small Business Administration. 1963, 2 pp. Free. Summarizes the findings from 676 questionnaires and 23 personal interviews of small firms in the State of Washington to determine their principal legal problems, their source of advisors, and the frequency and circumstances involved in consulting lawyers.

MANAGEMENT COUNSELING OF SMALL BUSINESS. (Management Research Summary 123) Small Business Administration. 1963, 2 pp. Free. Brief summary of a study concerned with the external management counseling services available to improve the effectiveness of small business.

MANAGEMENT COUNSELING OF SMALL MANUFACTURING FIRMS. (Management Research Summary 138) Small Business Administration. 1963, 2 pp. Free. Significant findings regarding the need and value of small business counseling, barriers to its use, and the best procedures for its conduct based on actual business counseling to 17 small manufacturers in Mississippi.

OUTSIDE MANAGEMENT COUNSEL FOR SMALL BUSINESS. (Management Research Summary 95) Small Business Administration. 1962, 4 pp. Free. Briefly reports findings from interviews with

425 proprietors of small business and 280 management service agencies, together with analysis of court records of 60 cases of small business bankruptcy. Discusses the need for management assistance, availability of management assistance, personal factors influencing the success of small business operation. Presents conclusions based on findings.

TECHNIQUES OF SMALL-BUSINESS COUNSELING. (Management Research Summary 200) Small Business Administration. 1964, 4 pp. Free. Highlights from report on experiments with group counseling and individual counseling of small businessmen in Utah.

Counterfeits

KNOW YOUR MONEY. U.S. Secret Service, U.S. Department of the Treasury. Revised 1964, 16 pp. GPO, 25¢. How to detect counterfeit money; how to guard against forged Government checks.

Credit

CAN YOU AFFORD INSTALLMENT SELLING? (Small Marketers Aids 76) Small Business Administration. 1962, 4 pp. Free. Discusses questions a retailer should answer before offering installment credit such as "What are my financial resources? What kinds of goods am I offering? What State laws regulate installment selling?"

CONSUMER CREDIT. (Small Business Bulletin 59) Small Business Administration. 1962, 8 pp. Free. List of references pertaining to the economic, statistical, and legal aspects of consumer credit.

CREDIT PRACTICES IN FURNITURE AND HOME APPLIANCES RETAILING. (Management Research Summary 150) Small Business Administration. 1963, 4 pp. Free. Findings from interviews to determine a possible relationship between credit operations and success or failure in the retail business.

THE CREDIT PRACTICES OF OKLAHOMA RETAILERS. (Management Research Summary 177) Small Business Administration. 1963, 4 pp. Free. Pertinent findings from a survey and analysis of the credit practices of Oklahoma retailers representing 12 lines of business: grocery and food stores, restaurants, department stores, variety stores, men's clothing stores, furniture stores, automobile and accessory stores, hardware stores, drug stores, jewelry stores, and gasoline service stations.

RETAIL CREDIT AND COLLECTIONS. (Small Business Bibliography 31) Small Business Administration. Revised 1963, 12 pp. Free.

Compilation of sources of information for managers of retail and service businesses.

SMALL BUSINESS EXPERIENCES IN SEEKING CREDIT. (Management Research Summary 96) Small Business Administration. 1962, 4 pp. Free. Summarizes information in the report obtained from questionnaires answered by 955 small Wisconsin firms and an analysis of published financial ratios of both large and small firms. Discusses the need for outside funds by small businesses, types and purposes of loans, sources of fund, results of loan requests.

STARTING AND MANAGING A SMALL CREDIT BUREAU AND COLLECTION SERVICE. (The Starting and Managing Series, Vol. 2) Small Business Administration. 1959, 187 pp. GPO, 60¢. Capital requirements, organization, recordkeeping, rates, etc.

Directories

DATA SOURCES FOR PLANT LOCATION ANALYSIS. Business and Defense Services Administration, U.S. Department of Commerce. 1959, 41 pp. GPO, 20¢. An annotated bibliography of publications on markets, resources, labor, transportation and other subjects of relevance when picking a site. Also includes addresses of State economic development, water, employment security and tax departments, and private railroad industrial departments.

DIRECTORY OF COMBINATION EXPORT MANAGERS. U.S. Agency for International Development, U.S. Department of State. 1962. In 5 classified sections: Sec. 1.—FOOD, FEED AND FERTILIZER, GPO, 40¢; Sec. 2.—FUEL, GPO, 25¢; Sec. 3.—RAW MATERIALS AND SEMI-FINISHED PRODUCTS, GPO, 75¢; Sec. 4.—MACHINERY AND VEHICLES, GPO, $1; Sec. 5.—MISCELLANEOUS AND UNCLASSIFIED, GPO, $1. Each section includes a commodity listing and an alphabetical listing of Combination Export Managers.

A DIRECTORY OF COMMUNITY WAGE SURVEYS. (See listing under Wages.)

A DIRECTORY OF INDUSTRY WAGE STUDIES AND UNION SCALE STUDIES. Bureau of Labor Statistics, U.S. Department of Labor. 1950–June 1963 (Revised 1963), 29 pp. Free. List of surveys by industry and type of study.

DIRECTORY OF LOCAL HEALTH UNITS. ANNUAL. (Public Health Service Publication 118) Public Health Service, U.S. Department of Health, Education, and Welfare. 1963, 76 pp. GPO 30¢. Listing by State of local units, giving name of health officer or administrative head.

DIRECTORY OF NATIONAL AND INTERNATIONAL UNIONS IN THE UNITED STATES, 1961. (Bulletin 1320) Bureau of Labor Statistics, U.S. Department of Labor. 1962, 82 pp. GPO 50¢. Developments since 1957, structure and membership, listing of national, and international unions, State labor organizations.

DIRECTORY OF NATIONAL ASSOCIATIONS OF BUSINESSMEN 1961. Trade Association Division, BDSA, U.S. Department of Commerce. 1961, 81 pp. GPO 50¢. Includes data on some 2,000 national organizations. Supplements 1949 basic directory National Associations of the United States (out of print) and replaces 1960 Directory.

DIRECTORY OF STATE AND TERRITORIAL HEALTH AUTHORITIES. ANNUAL. (Public Health Service Publication 75) Public Health Service, U.S. Department of Health, Education, and Welfare. 1963, 101 pp. GPO, 35¢. Detailed directory of services, including sanitation inspection and water pollution control.

DIRECTORY OF STATE DEPARTMENTS OF AGRICULTURE 1964. Agricultural Marketing Service, U.S. Department of Agriculture. 1964, 56 pp. Free. Arranged by State, with name and titles of chief officials.

LABOR OFFICES IN THE UNITED STATES AND CANADA. (Bulletin 177) Bureau of Labor Standards, U.S. Department of Labor. Revised February 1964, 63 pp. Free. List of offices by State.

NATIONAL MAILING-LIST HOUSES. (See listing under Advertising.)

PATENT ATTORNEYS AND AGENTS AVAILABLE TO REPRESENT INVENTORS BEFORE THE U.S. PATENT OFFICE. Patent Office, U.S. Department of Commerce. 1961, 116 pp. GPO. 55¢. Listing arranged alphabetically by States, and cities within States, where the registrants have offices.

RESEARCH AND DEVELOPMENT; A LIST OF SMALL BUSINESS CONCERNS INTERESTED IN PERFORMING RESEARCH AND DEVELOPMENT. Small Business Administration. 1963, 678 pp. Free. Limited distribution through SBA field offices. Concerns are listed by classified field of interest. Includes an alphabetical index by firm name and a subject index to the classification system.

SEED AND PLANTING STOCK DEALERS; A DIRECTORY OF COMMERCIAL DEALERS IN SEEDS AND PLANTING SHRUBS. Forest Service, U.S. Department of Agriculture. 1959 (includes 1960 supplemental sheet) 22 pp. Free.

STANDARDIZATION ACTIVITIES IN THE UNITED STATES; A DESCRIPTIVE DIRECTORY. (Miscellaneous Publication 230) National Bureau of Standards, U.S. Department of Commerce. 1960, 210 pp. GPO, $1.75. An alphabetical list of about 350 American organizations,

describing their standardization activities. Both nongovernmental and government agencies are included, but the major part of the directory is devoted to the former.

UNITED STATES ARMY INSTALLATIONS AND MAJOR ACTIVITIES IN THE CONTINENTAL UNITED STATES. (Pamphlet 210–1) Headquarters, Department of the Army. 1961, 18 pp. GPO, 20¢. Section I of the pamphlet is an alphabetical listing showing the post office address of each installation or activity; section II is an alphabetical listing within each U.S. Army Area and the Military District of Washington, U.S. Army, showing the location of each installation or activity.

U.S. GOVERNMENT ORGANIZATION MANUAL, 1964–65. National Archives and Records Service, General Services Administration. Office of the Federal Register. 1964, 783 pp. GPO, $1.75. Official handbook of the Federal Government. Describes the organization and functions of agencies in the legislative, judicial, and executive branches. Revised annually.

Efficiency—Industrial

DESIGNING FOR HIGHER PROFITS. (Technical Aids for Small Manufacturers 75) Small Business Administration. 1961, 4 pp. Free. How the design of a piece of equipment, or a procedure, or a workplace layout can promote efficiency.

PROFITABLE SMALL PLANT LAYOUT. (Small Business Management Series 21) Small Business Administration. 2d ed. 1964, 48 pp. GPO, 25¢. Practical approach on how to improve plant layout when space is sufficient or how to plan an entirely new operation for operating efficiency.

Electric Motors

ELECTRIC MOTOR MAINTENANCE FOR SMALL PLANTS. (Technical Aids for Small Manufacturers 80) Small Business Administration. 1962, 4 pp. Free. Identifies common causes of motor trouble and discusses ways to keep them running.

Electric Power

JUDGING YOUR ELECTRIC POWER NEEDS. (Technical Aids for Small Manufacturers 83) Small Business Administration. 1962, 4 pp. Free. The most common needs for electric power in a small manufacturing plant are discussed.

Employee Benefits

BUYING PRACTICES AND FOOD USE OF EMPLOYEE FOOD SERVICES IN MANUFACTURING PLANTS. (Marketing Research Report 326) Economic Research Service, U.S. Department of Agriculture. 1959, 135 pp. GPO, 75¢. A sample survey of manufacturing plants having 250 or more employees each.

CHARACTERISTICS OF 127,657 WELFARE AND PENSION BENEFIT PLANS. Labor-Management Services Administration, U.S. Department of Labor. 1960, 16 pp. Free. Statistical analysis.

EMPLOYEE FOOD SERVICES IN MANUFACTURING PLANTS; MANAGEMENT APPRAISALS, NATURE AND EXTENT, VENDING MACHINES. (Marketing Research Report 325) Economic Research Service, U.S. Department of Agriculture. 1959, 100 pp. GPO, 50¢. A sample survey of manufacturing plants having 250 or more employees each.

HIGHLIGHTS OF WELFARE AND PENSION PLANS DISCLOSURE ACT, 1962. Labor-Management Services Administration, Office of Labor Management and Welfare-Pension Funds, U.S. Department of Labor. 1963, 6 pp. Free. A comparison of the original law and the law as amended in 1962.

WAGES AND RELATED BENEFITS, 82 LABOR MARKETS (Bulletins 1303–83). Bureau of Labor Statistics, U.S. Department of Labor. 1959, 93 pp. GPO 50¢. Information on plant and office workers. Revised periodically.

Export-Import Trade

CHECKLIST OF BIC PUBLICATIONS FOR USE IN FOREIGN MARKET RESEARCH AND TRADE. (See listing under Bibliographies.)

DIGEST OF EXPORT REGULATIONS. Bureau of Foreign Commerce, U.S. Department of Commerce. May 1961, 6 pp. Free. Regulations concerning commodities that must have licenses to be exported.

EXPORT PROFITS. Bureau of International Commerce, U.S. Department of Commerce. 1962, 8 pp. Free. A brochure containing low-cost marketing aids for higher export profits.

EXPORT TRADE AND THE SMALL MANUFACTURER. (Management Research Summary 71) Small Business Administration. 1962, 4 pp. Free. Present status and problems of the small exporter, the would-be exporter, and the nonexporter. Suggests aids for the small exporter.

EXPORTING TO THE UNITED STATES. Bureau of Customs, U.S. Department of the Treasury. 1963, 86 pp. GPO, 50¢. General infor-

mation on customs laws and regulations covering goods imported into the United States.

FINANCING EXPORT SALES. (Management Aids for Small Manufacturers 149) Small Business Administration. 1963, 4 pp. Free. Discusses five specific types of information a seller should know about when financing export sales.

FOREIGN CURRENCY LENDING BY THE EXPORT-IMPORT BANK OF WASHINGTON. Export-Import Bank of Washington. 1960, Leaflet. Free. Brief discussion of foreign currency loans.

GENERAL POLICIES; EXPORT-IMPORT BANK OF WASHINGTON. Export-Import Bank of Washington. 1960, 23 pp. Free. Explains the type of credit assistance the bank extends to the export and import trade.

HOW THE COMMERCE DEPARTMENT HELPS SMALL MANUFACTURERS IN FOREIGN TRADE. (Management Aids for Small Manufacturers 114) Small Business Administration. Revised 1962, 4 pp. Free. Describes the help which is available to small manufacturers through the various international trade areas of Commerce.

INDIRECT METHODS OF SELLING IN FOREIGN MARKETS. (Revision 3 to Small Business Memo 56–1) Office of Small Business, Agency for International Development, U.S. Department of State. 1961, 4 pp. Free. Also discusses "Exporting Under AID Financing."

LAWS, REGULATIONS, AND OTHER INFORMATION RELATING TO FOREIGN-TRADE ZONES IN THE UNITED STATES. Foreign Trade Zones Board. 1962, 79 pp. GPO, 30¢. How the foreign trade zones in operation in New York, New Orleans, San Francisco, Seattle, Toledo, and Mayaguez, Puerto Rico, may be of use to importers and exporters.

LIST OF UNITED STATES FOREIGN TRADE STATISTICAL PUBLICATIONS. (See listing under Bibliographies.)

PROFITABLE SALES IN U.S. TRADE CENTERS OVERSEAS. Bureau of International Commerce, U.S. Department of Commerce. 1963, 20 pp. GPO, 15¢. Describes how U.S. Trade Centers overseas may be utilized by American businessmen to increase sales in foreign markets.

REQUIREMENTS OF THE UNITED STATES FOOD, DRUG, AND COSMETIC ACT. Food and Drug Administration, U.S. Department of Health, Education, and Welfare. 1964. In press. Information regarding health safeguards, label statements, prohibited descriptions, etc., as specified in the Act applicable to interstate and foreign shipments of various types of foods and drugs.

SELL YOUR PRODUCTS THROUGH U.S. TRADE MISSIONS. Bureau of International Commerce, U.S. Department of Commerce. 1963, 16 pp. GPO, 15¢. Describes how U.S. Trade Missions help sell U.S. products in overseas markets.

SELLING AROUND THE WORLD: HOW COMMERCE HELPS. U. S. Department of Commerce. 1964, 23 pp. GPO, 15¢. Describes the many ways in which Commerce can help the businessman with initiative sell his products overseas.

SERVICES AVAILABLE TO U.S. EXPORTERS. U.S. Department of Commerce. 1962, Leaflet. Free. Describes Department of Commerce services useful to established and prospective foreign traders in increasing their sales and profits.

SOURCES OF INFORMATION ON AMERICAN FIRMS FOR INTERNATIONAL BUYERS. Bureau of International Commerce, U.S. Department of Commerce. 1963, 28 pp. GPO, 15¢. A guide to the principal sources of commercial information on U.S. firms.

A SUMMARY OF U.S. EXPORT CONTROL REGULATIONS. Bureau of Foreign Commerce, U.S. Department of Commerce. Revised June 1962, 22 pp. GPO, 20¢. When an export license is needed and how to apply for it.

TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED (1963) AND SUPPLEMENTS. U.S. Tariff Commission. Subscription, GPO, $5.

U.S. SMALL BUSINESS AND THE LATIN AMERICAN MARKET. (Management Research Summary 142) Small Business Administration. 1963, 2 pp. Free. Summarizes an analysis of the problems and opportunities and suggestions to stimulate exporting. Examines the possibilities for small business to export to Latin America.

WHAT YOU SHOULD KNOW ABOUT EXPORTING; A HOW-TO-GET-STARTED HANDBOOK. U.S. Department of Commerce. 1962, 38 pp. GPO, 25¢. Basic information for businessmen interested in breaking into profitable international markets.

Feed Industry

COSTS OF PROCURING, MANUFACTURING, AND DISTRIBUTING MIXED FEEDS IN THE MIDWEST; CASE STUDY OF FOUR TYPES OF ORGANIZATION. (Marketing Research Report 388) Economic Research Service, U.S. Department of Agriculture. 1960, 76 pp. GPO, 45¢.

PROBLEMS OF LOUISIANA'S SMALL FEED MILLS. (Management Research Summary 176) Small Business Administration. 1963, 2 pp. Free. Pertinent findings from questionnaires, personal inter-

views, and records of 19 Louisiana feed mills describing their characteristics, pointing out some of their problems, and suggesting some solutions.

Finance

ATTITUDES OF BANKERS TOWARD SMALL BUSINESS FINANCING. (Management Research Summary 94) Small Business Administration. 1962, 4 pp. Free. Information from questionnaire returns from 364 commercial banks in Wisconsin regarding attitudes toward growth financing of small firms, term lending, loan criteria, tight money and loan ratios, Government lending agencies. Discusses characteristics of banks included in study as related to attitudes and practices reported in connection with loans to small firms.

CASH PLANNING IN SMALL MANUFACTURING COMPANIES. (Small Business Research Series 1) Small Business Administration. 1960, 276 pp. GPO, $1.25. Case studies of planning cash requirements.

DEALERS' AND CONTRACTORS' GUIDE: PROPERTY IMPROVEMENT LOANS. Federal Housing Administration. Revised 1962, 10 pp. GPO, 10¢. Responsibility of dealers and contractors who participate in FHA's property improvement program.

THE EFFECT OF TIGHT MONEY ON SMALL BUSINESS FINANCING. (Management Research Summary 152) Small Business Administration. 1963, 2 pp. Free. Pertinent findings from a study based on 1946, 1955, and 1957 loan surveys made by the Federal Reserve Bank of Boston and on questionnaires answered by 557 New England manufacturers indicating possible discrimination against small firms during the 1955–1957 tight-money period

EQUITY FINANCING OF SMALL MANUFACTURING FIRMS. (Management Research Sumary 67) Small Business Administration. 1962, 4 pp. Free. Findings of interviews with 124 small New Jersey manufacturing firms, 109 of which went public for the first time during the period 1958–1961. Covers financing before going public, preparation for going public, and costs of floating an issue.

THE FACTOR MARKETS FOR SMALL FIRMS. (Management Research Sumary 171) Small Business Administration. 1963, 4 pp. Free. Summarizes studies of small business problems relating to capital, labor, and management. Discusses bank lending and small business, capital budgeting practices, small business as a career, management resources, fringe benefits, personnel policies, and labor contracts.

FACTS ABOUT SMALL BUSINESS FINANCING. (Management Research Summary 10) Small Business Administration. 1961, 4 pp. Free.

Study of nearly 700 small businesses in South Carolina. One conclusion was that small business relies heavily upon retained earnings or personal investment for equity capital.

FEDERAL FISHING VESSEL MORTGAGE AND LOAN INSURANCE. (Fishery Leaflet 499) Fish and Wildlife Service, U.S. Department of the Interior. 1960, 12 pp. Free. When and how a mortgage or loan may be insured.

FINANCIAL ANALYSIS AND SMALL BUSINESS. (Management Research Summary 33) Small Business Administration. 1961, 4 pp. Free. Summarizes a survey of 299 small businesses in Pennsylvania to determine how records were kept, outside sources of help, use of financial ratios, need for education and training, and recommendations regarding courses and publications.

FINANCIAL PLANNING IN CLOSELY HELD BUSINESSES. (Management Aid for Small Manufacturers 156) Small Business Administration. 1963, 4 pp. Free. Describes pitfalls to be avoided and outlines what should be included.

FINANCING PROBLEMS OF SMALL MANUFACTURERS. (Management Research Summary 187) Small Business Administration. 1963, 2 pp. Free. Significant findings from an analysis of the special financing problems of small New Jersey manufacturers, together with recommendations for helping solve them.

FINANCING SMALL BUSINESS IN SOUTH DAKOTA. (Management Research Summary 28) Small Business Administration. 1961, 4 pp. Free. Findings from a survey of over 600 small business firms in South Dakota to determine sources of borrowed capital; to seek out financial problems; and, on the basis of findings to make recommendations to aid the firms in financial management.

FINANCING SMALL MANUFACTURING FIRMS IN MAINE. (Management Research Summary 79) Small Business Administration. 1962, 4 pp. Free. Information from 73 small manufacturing firms in Maine regarding sources of initial capital, sources of borrowed funds, interbusiness credit, difficulties in obtaining loans, effect of taxation. Outlines attitudes of bankers toward lending to small manufacturing firms and discusses governmental and quasi-governmental agencies providing funds for small business loans.

THE FLOW OF FUNDS IN MANUFACTURING FIRMS. (Management Research Summary 167) Small Business Administration. 1963, 2 pp. Free. Brief summarization of a report presenting flow-of-funds data for 151 firms over a 7-year period, discussion of tables, and illustrations of uses of data, especially in small-business counseling.

FOREIGN CURRENCY LENDING BY THE EXPORT-IMPORT BANK OF WASHINGTON. Export-Import Bank of Washington. 1960, Leaflet. Free. Brief discussion of foreign currency loans.

GENERAL POLICIES; EXPORT-IMPORT BANK OF WASHINGTON. Export-Import Bank of Washington. 1960, 23 pp. Free. Explains the type of credit assistance the Bank extends to the export and import trade.

A HANDBOOK OF SMALL BUSINESS FINANCE. (Small Business Management Series 15) Seventh edition, 1965, 80 pp. Small Business Administration. GPO, 35¢. It points out the major areas of financial management and describes a few of the many techniques that can help the small businessman to understand the results of his past decisions and apply this understanding in making decisions for the future.

INTERBUSINESS FINANCING. (Small Business Research Series 3) Small Business Administration. 1962, 157 pp. GPO, 65¢. A study which brings into focus all the methods of interbusiness financing. It differs from most other works in the field that usually concentrate on one or, at most, only a few of its aspects.

INVESTMENT DECISION MAKING IN SMALL BUSINESS. (Management Research Summary 54) Small Business Administration. 1962, 4 pp. Free. Deals with the search for and choice of investment decisions, methods of evaluating and ranking opportunities.

MEASUREMENT OF THE RISK ATTITUDES OF BANKS. (Management Research Summary 111) Small Business Administration. 1963, 2 pp. Free. Attitudes of Wisconsin banks toward various aspects of long-term needs of small businessmen.

SBA LOANS; LOAN POLICIES, WHO CAN BORROW, HOW TO APPLY, CREDIT REQUIREMENT, LOAN POLICIES. Small Business Administration. 1964, 12 pp. Free. An explanation of the Agency's business loan program.

SBA DISASTER LOANS FOR BUSINESSES, FOR HOMES. Small Business Administration. 1964, 9 pp. Free. Explanation of general disaster loans, and drought and excessive rainfall disaster loans.

SBIC FINANCING FOR SMALL BUSINESS. Small Business Administration. 1965, 10 pp. Free. Explains how small business investment companies assist small businesses with their long-term financing needs and their management problems.

SMALL MANUFACTURERS AND THE FINANCIAL GAP. (Management Research Summary 106) Small Business Administration. 1963, 2

pp. Free. Key findings regarding sources of funds from a report based on questionnaire returns from 151 small manufacturers in Colorado, as well as interviews with 25 of these firms and with all types of financial institutions serving small manufacturers. Describes the "financial gap" as the unavailability of long-term financing to small firms when the need is greatest. Includes a discussion of the sources of funds and conclusions drawn from the study.

SOURCES OF EQUITY AND LONG-TERM FINANCING FOR SMALL MANUFACTURING FIRMS. (Management Research Summary 68) Small Business Administration. 1962, 4 pp. Free. Résumé of survey investigating sources of equity and long-term financing for Minnesota manufacturing firms.

SOURCES OF FUNDS FOR SMALL FIRMS IN WASHINGTON STATE. (Management Research Summary 91) Small Business Administration. 1962, 4 pp. Free. Discusses 11 types of financial institutions as sources of funds.

A STUDY OF SBA FINANCIAL ASSISTANCE IN UTAH. (Management Research Summary 57) Small Business Administration. 1962, 4 pp. Free. Discusses the lenders' and borrowers' viewpoints and lists recommended changes.

WHAT KIND OF MONEY DO YOU NEED? (Management Aids for Small Manufacturers 150) Small Business Administration. 1963, 4 pp. Free. A discussion on the uses of four kinds of money small businessmen need from time: normal trade credit, short-term bank loans, term borrowing, and equity capital.

Financial Statements

COST CONTROL PROBLEMS OF SMALL MANUFACTURERS. (Management Research Summary 3) Small Business Administration. 1960, 4 pp. Free. Four simple approaches to statement analysis.

GUIDES FOR BUSINESS ANALYSIS AND PROFIT EVALUATION. Business and Defense Services Administration, U.S. Department of Commerce. 1959, 76 pp. GPO, 30¢. Shows how use of operating and financial ratios and Government statistics can provide insights into business operations.

OPERATING COSTS AND RATIOS—RETAIL. (Small Business Bibliography 8) Small Business Administration. Revised 1963, 12 pp.

Free. How to analyze operations through operating ratios. Sources of comparative standard ratio data in the retail trades.

OPERATING COSTS AND RATIOS—WHOLESALE. (Small Business Bibliography 11) Small Business Administration. 1963, 8 pp. Free. How to analyze operations through operating ratios. Sources of comparative standard ratio data in the wholesale trade.

RATIO ANALYSIS FOR SMALL BUSINESS. (Small Business Management Series 20) Small Business Administration. Second edition. 1960, 55 pp. GPO, 25¢. How to compare certain common business statistics so as to provide a basis for management control.

A STUDY OF INDUSTRY FINANCIAL AND OPERATING RATIOS. (Management Research Summary 61) Small Business Administration. 1962, 4 pp. Free. Summarizes a report discussing various types of ratios, sources of ratio data, and problems in ratio surveys.

Fishery Industry

AVAILABLE LEAFLETS ON FISHERIES. (See listing under Bibliographies.)

THE BAIT SHRIMP INDUSTRY ON THE GULF OF MEXICO. (Fishery Leaflet 480) Bureau of Commercial Fisheries. Fish and Wildlife Service, U.S. Department of the Interior. 1959, 14 pp. Free. Describes fishing gear and methods of operation, transporting and holding methods, trade practices.

DEALERS IN TROUT AND POND FISHES. (Fishery Leaflet 46) Bureau of Commercial Fisheries, Fish and Wildlife Service, U.S. Department of the Interior. March 1960, 33 pp. Free. List of dealers by State.

FISH BAITS: THEIR COLLECTION, CARE, PREPARATION AND PROPAGATION. (Fishery Leaflet 28) Fish and Wildlife Service, U.S. Department of the Interior. Revised August 1962, 25 pp. Free. Describes the various types of bait, both live and preserved, and their uses.

FISH MARKETING AND CONSUMPTION IN THE PACIFIC COAST STATES. (Special Scientific Report—Fisheries 335) Fish and Wildlife Service, U.S. Department of the Interior. 1959, 183 pp. Free. Survey of the marketing and consumption of fresh, frozen packaged, and smoked fish and shellfish in California, Oregon, and Washington. Makes recommendations concerning consumer and retailer, wholesaler education, and improvement in both service and product.

LIST OF FISHERY ASSOCIATIONS IN THE UNITED STATES. (Fishery Leaflet 254) Bureau of Commercial Fisheries, Fish and Wildlife Service, U.S. Department of the Interior. August 1960, 13 pp.

Free. Associations of fishermen and vessel owners, wholesale and retail dealers, processors, distributors, etc.

A Market Development Plan for the New England Groundfish Industry. (Circular 53) Bureau of Commercial Fisheries, Fish and Wildlife Service, U.S. Department of the Interior. 1958, 22 pp. Free. Findings of the report focus on three general areas: (1) adequate control to maintain high standards of quality of the finished product, (2) satisfactory handling, display and promotion of frozen fish in retail stores, (3) increase of appeal of frozen fish (in comparison with meat and fowl) to consumers' taste, and an increase in consumers' appreciation of its health values.

Partial List of Fishing Boat Builders. (Fishery Leaflet 178) Bureau of Commercial Fisheries, Fish and Wildlife Service, U.S. Department of the Interior. October 1959, 7 pp. Free. List of Atlantic Coast, Gulf Coast, Pacific Coast, and Great Lakes builders.

Partial List of Manufacturers of Fishing Gear and Accessories and Vessel Equipment. (Fishery Leaflet 195) Bureau of Commercial Fisheries, Fish and Wildlife Service, U.S. Department of the Interior. October 1959, 27 pp. Free. Contains two lists—one of products, the other of manufacturers.

Potential Use of Trash Fish Caught by Shrimp Boats. (Management Research Summary 148) Small Business Administration. 1963, 2 pp. Free. Suggestions for increasing the profits of shrimp boats. Potential market analysis on basis of communication with fertilizer, pet food, and chemical manufacturers.

Spiny Lobster Gear and Fishing Methods. (Fishery Leaflet 487) Bureau of Commercial Fisheries, Fish and Wildlife Service, U.S. Department of the Interior. 1959, 17 pp. Free. Contains description and illustrations of the boat and various fishing devices. Estimates equipment costs.

Survey of the United States Shrimp Industry. Two volumes. (Special Scientific Report Fisheries 277 and 308) Fish and Wildlife Service, U.S. Department of the Interior. Volume I, 1958, 311 pp. Volume II, 1959, 167 pp. Free. Comprehensive examination of the shrimping grounds, vessel construction, fishing operations, fishing costs, trends in distribution, packaging, storing, shipping, per capita consumption, prices, wholesaling, retailing, merchandising and consumer preferences. Specific suggestions to improve current practices are made throughout.

The United States Fish and Wildlife Service; Its Responsibilities and Functions. (Circular 97) 1961, 44 pp. Free. Includes discussion of its services to the fishing industry.

WHOLESALE DEALERS AND PRODUCERS OF BAIT FISH. (Fishery Leaflet 191) Bureau of Sport Fisheries and Wildlife, Fish and Wildlife Service, U.S. Department of the Interior. March 1960, 27 pp. Free. List of dealers by State.

Food Industry

ANALYZING FOOD BROKERS' COSTS AND MARGINS. (Management Research Summary 159) Small Business Administration. 1963, 2 pp. Free. Analyzes the commissions, payrolls, employment and organization of food brokerage firms.

BAKERY PRODUCTS. (Small Business Bibliography 19) Small Business Administration. Revised 1964, 8 pp. Free. A descriptive listing of published material concerning technological and managerial advances in the baking industry.

BUYING PRACTICES AND FOOD USE OF EMPLOYEE FOOD SERVICES IN MANUFACTURING PLANTS. (Marketing Research Report 326) Economic Research Service, U.S. Department of Agriculture. 1959, 135 pp. GPO, 75¢. A sample survey of manufacturing plants having 250 or more employees each.

COOPERATIVE ARRANGEMENTS AMONG SMALL FOOD PROCESSORS. (Management Research Summary 146) 1963, 2 pp. Free. Summarizes case studies of 17 cooperative arrangements among small processors of bakery items, dairy products, and fruits and vegetables to determine ways by which small independent Wisconsin food-processing firms could achieve greater economies through cooperative arrangements and thus meet competition more effectively.

COUNSELING AFFILIATED FOOD RETAILERS. (Management Research Summary 113) Small Business Administration. 1963, 2 pp. Free. The role of counseling in an affiliated food wholesaler-retailer relationship.

DISPLAY LOCATION AND CUSTOMER SERVICE IN RETAIL PRODUCE DEPARTMENTS. (Marketing Research Report 501) Agricultural Marketing Service, U.S. Department of Agriculture. 1961, 50 pp. Free. Measures the effectiveness of different produce department layouts, and evaluates methods of weighing produce.

ECONOMIC INQUIRY INTO FOOD MARKETING; PART I: Concentration and Integration in Retailing. Staff Report. Federal Trade Commission. 1960, 338 pp. GPO, $1.25. A study of the integration and concentration of economic power at retail level of distribution in the food industry.

ECONOMIC INQUIRY INTO FOOD MARKETING; PART II: The Frozen Fruit, Juice and Vegetable Industry. Staff Report. Federal

Trade Commission. 1962, 145 pp. GPO, $1.25. A study of integration, concentration and marketing patterns of producers of frozen fruit, juice and vegetable industry.

EFFECTIVENESS OF SELECTED CANNED FOOD DISPLAYS IN SUPERMARKETS. (Marketing Research Report 371) Economic Research Service, U.S. Department of Agriculture. 1959, 30 pp. GPO, 20¢.

EGG GRADING MANUAL. (Agriculture Handbook No. 75) Agricultural Marketing Service, U.S. Department of Agriculture. 1961, 52 pp. Free. An aid in teaching beginners as well as experienced graders the correct interpretation and application of U.S. standards, grades, and weight classes.

EMPLOYEE FOOD SERVICES IN MANUFACTURING PLANTS; MANAGEMENT APPRAISALS, NATURE AND EXTENT, VENDING MACHINES. (Marketing Research Report 325) Economic Research Service, U.S. Department of Agriculture. 1959, 100 pp. GPO, 30¢. A sample survey of manufacturing plants having 250 or more employees each.

FLUID MILK PLANTS IN THE SOUTHEAST; METHODS, EQUIPMENT AND LAYOUT. (Marketing Research Report 232) Agricultural Marketing Service, U.S. Department of Agriculture. 1958, 77 pp. GPO, 30¢. Provides dairy plant operators with data and guidelines which can be used in establishing and operating milk plants more efficiently.

FOOD BROKERS' SALES AND MERCHANDISING PROGRAM. (Management Research Summary 183) Small Business Administration. 1963, 2 pp. Free. Pertinent information from survey regarding agreements between brokers and the manufacturers they represent, basic operating relations, sales management problems, and brokers' retail merchandising activities.

FOOD SERVICE INDUSTRY. TRAINING PROGRAM AND FACILITIES. Office of Education, U.S. Department of Health, Education, and Welfare. 1961, 183 pp. GPO, 65¢. The National Restaurant Association and the American Hotel Association assisted in the preparation of this publication. Discusses the industry, career opportunities, and outlines various food service operations.

FOOD STORES. (Small Business Bulletin No. 24) Small Business Administration. 1962, 8 pp. Free. A bibliography dealing with the many phases of food store operation.

HANDLING GROCERIES FROM WAREHOUSE TO RETAIL STORE SHELVES. (Marketing Research Report 473) Agricultural Marketing Service, U.S. Department of Agriculture. 1961, 47 pp. Free. A cost study of eight systems of handling groceries.

IMPROVED DESIGNS FOR COMMERCIAL EGG GRADING AND PACKING PLANTS. (Marketing Research Report 422) Agricultural Marketing Service, U.S. Department of Agriculture. 1961, 45 pp. Free. Designs developed to provide for efficient and expanding production.

IMPROVED METHODS AMONG WHOLESALE FOOD DISTRIBUTORS FOR INVENTORY CONTROL, SALES ACCOUNTING, AND SHIPMENT OF MERCHANDISE. (Marketing Research Report 271) Agricultural Marketing Service, U.S. Department of Agriculture. 1958, 71 pp. GPO, 40¢. Supplement 1960. 8 pp. GPO, 5¢. A study of 20 firms which recommends specific work methods and equipment.

IMPROVED METHODS OF DISPLAYING AND HANDLING PRODUCE IN RETAIL FOOD STORES. (Marketing Research Report No. 551) Agricultural Marketing Service, Transportation and Facilities Research Division, U.S. Department of Agriculture. 1962, 55 pp. Free. Evaluates and develops improved produce display procedure.

IMPROVING OFFICE PROCEDURES IN FOOD BROKERS' FIRMS. (Management Research Summary 162) Small Business Administration. 1963, 2 pp. Free. Findings from a survey of nearly 600 firms, revealing opportunities for greater efficiency in the management techniques, office practices, and record procedures of food brokers.

THE MARKET FOR FOOD IN PUBLIC SCHOOLS. (Marketing Research Report 377) Economic Research Service, U.S. Department of Agriculture. 1960, 58 pp. GPO, 40¢. An attempt to chart for food manufacturers and distributors the current and potential size of the market for food in public elementary and high schools.

MARKETING MILK IN ALASKA. (Marketing Research Report 385) Economic Research Service, U.S. Department of Agriculture. 1960, 29 pp. GPO, 20¢. Study made in fall of 1957 of market for milk in six largest of Alaska's cities and in the military establishments. Also indicates consumer acceptance of alternative products to fresh bottled milk.

MARKETING THROUGH FOOD BROKERS. (Management Research Summary 158) Small Business Administration. 1963, 2 pp. Free. Brief summary of a survey to determine the role and selection of brokers and the help and functions of food brokers to their principals.

MERCHANDISING PRACTICES FOR FREEZER PROVISIONERS. (Marketing Research Report 453) Farmer Cooperative Service, U.S. Department of Agriculture. 1961, 33 pp. GPO, 20¢. Report of a study of 21 firms merchandising methods in the areas of credit, delivery, membership plans, and advertising.

OUTLOOK FOR ARKANSAS'S INDEPENDENT BROILER PROCESSORS. (Management Research Summary 164) Small Business Administration. 1963, 2 pp. Free. Summarizes study of the commercial broiler industry in Arkansas based on survey of literature, consultation with industry leaders, and examination of operations of poultry processors.

THE OUTLOOK FOR SMALL MEATPACKERS IN MONTANA. (Management Research Summary 147) Small Business Administration. 1963, 2 pp. Free. Significant findings from interviews with 60 Montana meatpacking firms about their organization, purchasing and selling livestock, processing and distribution of meats, and by-products. Discusses expansion possibilities.

THE POTENTIAL FOR VEGETABLE CANNING IN NEBRASKA. (Management Research Summary 189) Small Business Administration. 1963, 2 pp. Free. Summarizes a study of the raw product potential in Nebraska and of canners and firms serving the industry in other midwestern states to determine Nebraska's potential for a vegetable canning industry.

POLICIES AND PRACTICES OF SOME LEADING INSTITUTIONAL WHOLESALE GROCERS. (Marketing Research Report 335) Agricultural Marketing Service, U.S. Department of Agriculture. 1959, 44 pp. GPO, 25¢. Case studies of operating procedures.

POULTRY GRADING AND INSPECTION. (Agriculture Information Bulletin 173) Agricultural Marketing Service, U.S. Department of Agriculture. 1961, 25 pp. GPO, 15¢. Description of the poultry inspection service.

POULTRY GRADING MANUAL. (Agriculture Handbook 31) Agricultural Marketing Service, U.S. Department of Agriculture. 1961, 37 pp. GPO, 30¢. This will aid in obtaining uniform application of the U.S. classes, standards, and grades of poultry. Includes short bibliography.

PROBLEMS AND PROSPECTS OF SOUTH CAROLINA FOOD PROCESSORS. (Management Research Summary 64) Small Business Administration. 1962, 4 pp. Free. Digest of a report of findings from 307 interviews with firms in eight major categories of the food and kindred product industries in South Carolina with respect to the managing, marketing, and operating problems, how they are being resolved, and what the future prospects are for these industries.

PROBLEMS OF LOUISIANA'S FRUIT AND VEGETABLE PROCESSORS. (Management Research Summary 170) Small Business Administration. 1963, 2 pp. Free. Summarizes findings from questionnaires and interviews of 18 fruit and vegetable processors known to have operated in Louisiana during the 1960 season—to provide

a better understanding of the problems faced by this segment of the State's economy.

PROBLEMS OF TENNESSEE'S SMALL MEATPACKERS. (Management Research Summary 73) Small Business Administration. 1962, 4 pp. Free. Summarizes a survey of 58 meat packers regarding management and marketing problems.

PROFITS AND COMPETITION IN RETAIL FOOD PRICING. (Management Research Summary 140) Small Business Administration. 1963, 2 pp. Free. Summarizes the analysis of prices and shelf-movement data in one store and advertised prices of 14 supermarkets over a 24-week period to ascertain the extent retailers should develop their own pricing guides.

PROSPECTS IN NEW MEXICO FOR SMALL FOOD PROCESSORS. (Management Research Summary 136) Small Business Administration. 1963, 2 pp. Free. Evaluates the possibilities for expanding food processing.

REQUIREMENTS OF THE UNITED STATES FOOD, DRUG, AND COSMETIC ACT. Food and Drug Administration, U.S. Department of Health, Education, and Welfare. 1964. In press. Information regarding health safeguards, label statements, prohibited descriptions, etc., as specified in the Act applicable to interstate and foreign shipments of various types of foods and drugs.

RESTAURANTS AND CATERING. (Small Business Bibliography 17) Small Business Administration. Revised 1965, 20 pp. Free. Sources of information on cooking, business operation, etc.

RETAIL PRODUCE MANUAL. Agricultural Marketing Service, U.S. Department of Agriculture. 1960. Five bulletins have been issued which make up five chapters of the Manual:

1. Organization of the Work Area for Handling Produce in Retail Stores. (Marketing Bulletin 2) GPO, 15¢.
2. Ordering, Receiving, and Storage of Produce in Retail Stores. (Marketing Bulletin 3) GPO, 5¢.
3. Trimming Produce in Retail Stores. (Marketing Bulletin 4) GPO, 25¢.
4. Managing and Scheduling of a Retail Produce Department. (Marketing Bulletin 11) GPO, 20¢.
5. Packaging and Price-Marking Produce in Retail Stores. (Marketing Bulletin 14) GPO, 25¢.

STARTING AND MANAGING A SMALL RESTAURANT. (Starting and Managing Series Vol. 9) Small Business Administration. 1964, 116 pp. GPO, 45¢. Describes advantages and disadvantages, risks involved, personal characteristics that will contribute to success, and management practices necessary for success.

TRENDS IN AFFILIATED WHOLESALE-RETAIL FOOD OPERATIONS. (Management Research Summary 121) Small Business Administration. 1963, 2 pp. Free. Discusses market potential, competitive strategy, and training to improve management practices of affiliated retailers and their allied wholesale suppliers.

VERTICAL INTEGRATION IN THE BROILER-GROWING INDUSTRY. (Management Research Summary 25) Small Business Administration. 1961, 4 pp. Free. Summary of a study of the broiler industry in the Delmarva Peninsula, an area which formerly played a leading role in the broiler industry and which is now under competitive pressure.

VOLUNTARY AND COOPERATIVE CHAINS. (Small Business Bulletin 30) Small Business Administration. 1960, 8 pp. Free. References on the function, methods, and operation of voluntary and cooperative chains in the field of grocery distribution.

Foreign Investment

INVESTMENT GUARANTY HANDBOOK . . . U.S. GOVERNMENT GUARANTIES AVAILABLE FOR NEW AMERICAN INVESTMENT ABROAD UNDER THE INVESTMENT GUARANTY PROGRAM. Investment Guaranties Division, Agency for International Development, U.S. Department of State. 1960, 33 pp. Free. Of interest to firms establishing a foreign subsidiary, branch, or affiliate; licensing a foreign company to use its patents or processes; or increasing its investment in an existing foreign venture.

Forests and Forestry

MANAGING THE FAMILY FOREST. (Farmers' Bulletin No. 2187) Forest Service, U.S. Department of Agriculture. 1962, 61 pp. GPO, 20¢. Outlines how to grow more and better species of trees, greater volume of wood in a shorter time, and how to market forest products more profitably.

Franchises

THE FRANCHISE SYSTEM OF DISTRIBUTION. (Management Research Summary 172) Small Business Administration. 1963, 4 pp. Free. Discusses franchisor policies, problems of franchisors and franchisees, and factors to consider in choosing a franchise.

Gasoline Service Stations

STARTING AND MANAGING A SERVICE STATION. (Starting and Managing Series Vol. 3) Small Business Administration. 1961, 80 pp. GPO, 35¢. Basic information on risks, opportunities, and up-to-date management methods.

Government Contracts

CONTRACTORS GUIDE; RESEARCH AND DEVELOPMENT IN THE U.S. ARMY. Office of Chief Research and Development, Department of the Army, U.S. Department of Defense. 1961, 49 pp. Free. Describes Army research and development programs and tells how the small businessman may participate in research and development contracts.

CONTROLLING QUALITY IN DEFENSE PRODUCTION. (Technical Aids for Small Manufacturers 78) Small Business Administration. 1962, 4 pp. Free. Supplies responsibility for quality control systems in Department of Defense contracts.

DOING BUSINESS WITH THE FEDERAL GOVERNMENT; A GUIDE FOR THE BUSINESSMAN. Federal Supply Service, General Services Administration. 1963, 61 pp. and appendix. Free. Explains Government purchasing programs and procedures. Also points out common pitfalls involved in the submission of bids and in contract administration.

A GUIDE TO SPECIFICATIONS AND STANDARDS OF THE FEDERAL GOVERNMENT. Federal Supply Service, General Services Administration. 1963, 39 pp. Free. A booklet aimed particularly at the small businessman, explaining specifications and standards and how they are used in Government purchasing.

INSPECTION ON DEFENSE CONTRACTS IN SMALL FIRMS. (Technical Aids for Small Manufacturers 82) Small Business Administration. 1962, 4 pp. Free. A guide to meeting Government inspection requirements.

AN INTRODUCTION TO THE DEFENSE SUPPLY AGENCY. Department of Defense. 1962, 18 pp. GPO, 15¢. Describes the objectives of this Agency, which was authorized September 12, 1961, by the Secretary of Defense.

THE OFFICE OF NAVAL RESEARCH CONTRACT RESEARCH PROGRAM (ONR–1). Office of Naval Research, Department of the Navy. June 1962, 20 pp. Free. Description of research activities, listing of branch offices, guide for preparation of research proposals.

PRODUCT QUALIFICATIONS AND QUALIFIED PRODUCTS LISTS. Standardization Division, Defense Supply Agency. 1962, 6 pp. Free. Shows when and how the qualification procedure is used in Government procurement.

SELLING TO AEC. (See listing under Atomic Energy.)

SELLING TO NASA. National Aeronautics and Space Administration. 1964, 42 pp. Free. Information on how a small business can sell to NASA.

SELLING TO NAVY PRIME CONTRACTORS. Department of the Navy. 1963, 93 pp. GPO, 50¢. How small firms may obtain a subcontract. Listing of prime contractors by name and State.

SELLING TO THE MILITARY. U.S. Department of Defense. 1961, 27 pp. GPO, 25¢. Basic information on selling products and services to the Department of Defense. Includes list of major purchasing offices.

SELLING TO THE U.S. GOVERNMENT. U.S. Small Business Administration. 1964, 17 pp. Free. Basic information on the Government's buying methods, and on how to compete for Government contracts and orders.

SMALL BUSINESS AND THE AIR FORCE. (Air Force Pamphlet 70–1–4) Office of Small Business, Directorate of Materiel, Headquarters U.S. Air Force. August 1963, 40 pp. Free. The activities currently being conducted by the Air Force. The market for small business in Air Force procurement.

SMALL BUSINESS SPECIALISTS DESIGNATED TO ASSIST THE BUSINESSMAN. Installations and Logistics, U.S. Department of the Army, U.S. Department of Defense. 1963, 52 pp. Free. Specialists are listed by State, alphabetically.

U.S. GOVERNMENT PURCHASING, SPECIFICATIONS AND SALES DIRECTORY; WHO BUYS WHAT AND WHERE, SOURCES OF GOVERNMENT SPECIFICATIONS, WHO SELLS WHAT AND WHERE. Small Business Administration. 1965, 138 pp. GPO, 70¢. Facts for the small businessman on how to sell to or buy from the Federal Government.

Government Property Sales

HOW TO BUY SURPLUS PERSONAL PROPERTY FROM THE U.S. ARMY, U.S. NAVY, U.S. AIR FORCE, U.S. MARINE CORPS. Office of the Secretary of Defense. Being revised. 23 pp. GPO, 15¢. Types of material available; how to get on bidders' lists; list of disposal offices.

Government Purchasing

(See listing under Government Contracts.)

Guided Missiles

(See General Procurement Information on Guided Missile Programs listed under Government Contracts, and Technical Resources Directory listed under Directories.)

Hours of Labor

EMPLOYMENT AND EARNINGS—ANNUAL SUPPLEMENT ISSUE. (May) Bureau of Labor Statistics, U.S. Department of Labor. GPO, $1. Average annual hourly and weekly earnings for production workers by industry, also by State or area. Other tables on labor turnover rates and number of employees.

HANDY REFERENCE GUIDE TO THE FAIR LABOR STANDARDS ACT (The Federal Wage-Hour Law). Wage and Hour and Public Contracts Divisions, U.S. Department of Labor. Reprinted 1963, 17 pp. Free.

HOURS OF OPERATION IN RETAIL STORES. (Management Research Summary 11) Small Business Administration. 1961, 4 pp. Free. Survey of retail stores in Nebraska to determine store-hour policies.

Industrial Development

THE COMMUNITY AND ECONOMIC DEVELOPMENT. Area Redevelopment Administration, U.S. Department of Commerce. 1964, 40 pp. GPO, 30¢. Designed to give local redevelopment groups a general background for understanding and dealing with the tasks they face, and to provide guidance on effective methods of increasing employment.

COMMUNITY-SPONSORED EFFORTS TO DEVELOP INDUSTRY. (Management Research Summary 205) Small Business Administration. 1964, 2 pp. Free. Key points from a report of the experiences of 18 small Oklahoma communities, each of which had been active in developing existing industry or in attracting new industry. Discusses the costs and benefits of community-sponsored efforts in industry development; lists conclusions.

DEVELOPING "HOME-GROWN" INDUSTRY. Area Redevelopment Administration, U.S. Department of Commerce. 1963, 32 pp.

GPO, 15¢. Describes development of local industries as a means of strengthening the local economy.

A Guide to Community Resource Development. (Management Research Summary 198) Small Business Administration. 1964, 2 pp. Free. Summary of a detailed outline of planning and inaugurating a community resource development program. Discusses resource requirements for agricultural processing industries.

How To Make an Industrial Site Survey. Area Redevelopment Administration, U.S. Department of Commerce. 1963, 20 pp. GPO, 15¢. Explains how to identify sites suitable for industry, and how to assemble this information.

Loans to State and Local Development Companies. Small Business Administration. 1961, 13 pp. Free. SBA help in financing plant construction, conversion or expansion, financing of shopping centers.

Planning for Balanced Small Business Development in the U.S. Virgin Islands. (Management Research Summary 166) Small Business Administration. 1963, 2 pp. Free. Summary of a study of the Puerto Rican economy and a suggested economic development program to reduce dependence of the islands on tourism and sugar and rum industries.

Planning for New Growth—New Jobs. (ARA Pub. 62–A) Area Redevelopment Administration, U.S. Department of Commerce. 1962, 28 pp. GPO, 15¢. Designed to assist designated redevelopment areas in their long range planning to restore economic vigor and provide permanent employment opportunities.

Potential Resources for Small Business in Kentucky. (Management Research Summary 169) Small Business Administration. 1963, 2 pp. Free. Discusses potential for development through water resources, agriculture, wood products, and minerals.

Small Business Development in New Hampshire. (Management Research Summary 55) Small Business Administration. 1962, 4 pp. Free. Deals with mineral potentials, manufacturing, forestry, and air transportation.

Small Business in an Expanding Economy. (Management Research Summary 133) Small Business Administration. 1963, 2 pp. Free. Suggests that communities seeking economic expansion should survey local business that could be helped before importing new firms.

Small Business Opportunities in a Redevelopment Area. (Management Research Summary 85) Small Business Administration. 1962, 4 pp. Free. Pertinent findings from a study of three West

Virginia counties (Boone, Logan, and Raleigh) faced with unemployment and emigration because of mechanization in coal mining and the shift to use of fuel other than coal. Discusses opportunities for new businesses in woodworking, handicrafts, tourist services, electronics, plastics, apparel, and textiles.

Industrial Health

CONTROL OF THE PHYSICAL ENVIRONMENT. (Bulletin 211) Bureau of Labor Standards, U.S. Department of Labor. 1960, 13 pp. GPO, 15¢. How to provide a safe and healthy place to work.

CONTROLLING NOISE HAZARDS. (Bulletin 207) Bureau of Labor Standards, U.S. Department of Labor. 1959, 6 pp. GPO, 10¢. Particularly applies to the industrial plant.

DIRECTORY OF STATE AND TERRITORIAL HEALTH AUTHORITIES. Public Health Service, U.S. Department of Health, Education, and Welfare. 1959, 102 pp. GPO, 35¢. Detailed directory of services, including sanitation inspection and water pollution control.

HEALTH MAINTENANCE FOR GREATER EFFICIENCY. (Small Business Management Series 16) Small Business Administration. 2d ed. 1964, 64 pp. GPO, 30¢. Give latest practices and standards in industrial health services as they apply to small business.

OCCUPATIONAL HEALTH HAZARDS; THEIR EVALUATION AND CONTROL. (Bulletin 198) Bureau of Labor Standards, U.S. Department of Labor. 1958, 36 pp. GPO, 25¢. A practical guide for the prevention of occupational diseases.

Information In Industry

BETTER COMMUNICATIONS IN SMALL BUSINESS. (Small Business Management Series 7) Small Business Administration. 2d ed. 1962, 37 pp. GPO, 25¢. Outlines a basis for developing the needed awareness and practical skill to help build better management by effective communications.

BRINGING MANAGEMENT INFORMATION TO SMALL BUSINESS. (Management Research Summary 161) Small Business Administration. 1963, 4 pp. Free. Sources of information and problems of communicating it to small businessmen who need and want it.

COMMUNICATING INFORMATION TO SMALL BUSINESSMEN. (Management Research Summary 155) Small Business Administration. 1963, 2 pp. Free. Examines the methods used by trade associations, the trade press, professional consultants, public libraries,

business schools and universities, and governmental agencies to disseminate their informational aids to small businessmen.

SMALL BUSINESS ADMINISTRATION. WHAT IT IS, WHAT IT DOES. 1964, 17 pp. Free. General information on types of financial and management assistance offered to small business enterprises.

STATE SOURCES OF BUSINESS INFORMATION IN COLORADO. (Management Research Summary 132) Small Business Administration. 1963, 2 pp. Free. Summary of the need and structure of a guide to reports, publications, and services of all State government units of Colorado.

USE OF OUTSIDE INFORMATION IN SMALL FIRMS. (Management Research Summary 56) Small Business Administration. 1962, 4 pp. Free. Summary of report based on questionnaire returns from 472 trade associations and interviews with 162 Colorado businessmen regarding availability and use of business information and subjects in which further education would be desirable.

USE OF PUBLICATIONS AS AIDS IN MANAGING SMALL FIRMS. (Management Research Summary 115) Small Business Administration. 1963, 4 pp. Free. Brief review of a survey of 400 Utah restaurant owners and 56 steel fabricators to ascertain the service and worth of trade journals and other pertinent publications in their businesses. Discusses the reasons for non-use and gives suggestions for the improvement of these printed management aids.

Insurance

INSURANCE MANAGEMENT IN SMALL RETAIL FIRMS. (Management Research Summary 72) Small Business Administration. 1962, 4 pp. Free. Summarizes information from insurance agents, 385 Oregon retailers, and government and private statistical services. Discusses experiences with various types of insurance, agent-dealer relations, and recommends better risk managements.

INSURANCE AND RISK MANAGEMENT FOR SMALL BUSINESS. (Small Business Management Series 30) Small Business Administration. 1963, 74 pp. GPO, 30¢. Discusses the various kinds of insurance that is of the most practical use to the small businessman.

REAL ESTATE AND INSURANCE. (Small Business Bibliography No. 65) Small Business Administration. 1964, 16 pp. Free. A coverage of items written from the operating viewpoint.

RISK MANAGEMENT IN A CATASTROPHE. (Management Research Summary 101) Small Business Administration. 1963, 2 pp.

Free. Summarization of a report based on an examination of court records and claim files and interviews with operators of 76 Roseburg, Oreg., firms most severely affected by a fire and blast in 1959.

Interior Decoration

INTERIOR DECORATING. (Small Business Bulletin 54) Small Business Administration. 1961, 8 pp. Free. A bibliography of publications concerning design, color, furniture, fabrics, lighting, and wood.

PAINTING AND DECORATING. (Small Business Bulletin 60) Small Business Administration. 1962, 12 pp. Free. Sources of information on the technical and economic aspects of the industry.

Inventory Control

INVENTORY CONTROL FOR SMALL WHOLESALERS. (Management Research Summary 100) Small Business Administration. 1963, 2 pp. Free. Brief summary of report based on personal interviews with 62 Alabama wholesalers representing four commodity lines—grocery, drug, hardware, and drygoods—regarding inventory-control systems in use. Discusses stock-card method, strip method, and machine-card method.

POINTERS ON RAW MATERIALS INVENTORY CONTROL. (Management Aid for Small Manufacturers 155) Small Business Administration. 1963, 4 pp. Free. Since raw materials represent a major investment in small plants, proper inventory control can help to increase the return on that investment.

Labor Laws and Legislation

EMPLOYER AND CONSULTANT REPORTING. Labor-Management Services Administration, U.S. Department of Labor. 1963, 16 pp. Free. Instructions in using the form prescribed by the Secretary of Labor for employers and consultants required to report under section 203(a) of the Labor-Management Reporting and Disclosure Act of 1959. Under the act employers must disclose certain financial transactions and arrangements made with labor organizations, union officials, employees, labor relations consultants, or other persons.

EQUAL PAY FACTS. (Leaflet 2) Women's Bureau, U.S. Department of Labor. Revised July 1961, GPO, 5¢. Describes equal pay and shows States in which equal pay laws have been enacted.

FEDERAL LABOR LAWS AND PROGRAMS. (Bulletin 262) Bureau of Labor Standards, U.S. Department of Labor. 1964, 180 pp. In press. Summarizes briefly in the form of a layman's guide the main provisions of important Federal labor laws and programs applicable to employees in private employment.

GROWTH OF LABOR LAW IN THE UNITED STATES. Bureau of Labor Standards, U.S. Department of Labor. 1962, 316 pp. GPO, $1. Describes the beginnings and development of labor laws in this country; shows how these laws began with the regulation of child labor; and discusses the beginnings and expansion of laws on hours, minimum wage, workmen's compensation, unemployment insurance, fair employment practices, and industrial relations.

RECORDS TO BE KEPT BY EMPLOYERS. (29 Code of Federal Regulations Part 516) Wage and Hour and Public Contracts Divisions, U.S. Department of Labor. Reprinted from the Federal Register of March 15, 1962, 6 pp. GPO, 5¢. Describes those records, which by regulation, must be kept by employers under the Fair Labor Standards Act.

SERVICES TO THE PUBLIC UNDER THE FAIR LABOR STANDARDS ACT. Wage and Hour and Public Contracts Divisions, U.S. Department of Labor. 1963, 8 pp. Free. Includes a list of the Divisions' field offices.

STATE LABOR RELATIONS ACTS. (Bulletin 224) Bureau of Labor Standards, U.S. Department of Labor. 1961, 39 pp. GPO, 20¢. An analysis of the provisions of labor relations acts in the 13 States which have them.

STATE MINIMUM-WAGE LAWS AND ORDERS. (Women's Bureau Bulletin 267) Women's Bureau, U.S. Department of Labor. Issued in two parts: PART I: HISTORICAL DEVELOPMENT AND STATUTORY PROVISIONS. 31 pp. GPO, 75¢; PART II: ANALYSIS OF RATES AND COVERAGE. 142 pp. GPO, 60¢. Supplementary pages for Part II available on request to GPO. Part I contains a descriptive summary of the history of minimum-wage laws and a list of industries and occupations covered; Part II analyzes the wage-rate provisions of orders and statutes effective after July 1, 1942.

STATE "RIGHT-TO-WORK" LAWS. (Bulletin 204) Bureau of Labor Standards, U.S. Department of Labor. May 1959, 9 pp. Free. A brief résumé as of May 1959 of right-to-work legislation.

SUMMARY OF THE LABOR-MANAGEMENT RELATIONS ACT AS AMENDED THROUGH 1959 (TAFT-HARTLEY ACT). National Labor Relations Board. 1964, 26 pp. GPO, 15¢. Explanation of the Act's provisions and administration.

THE WAGE-HOUR LAW IN SMALL FIRMS. (Small Marketers Aids 88) Small Business Administration. 1963, 4 pp. Free. A discussion of the changes made in 1961 when Federal wage-hour law was amended to increase the minimum wage and broaden the coverage.

WHAT IS REQUIRED UNDER THE LAW. Bureau of Labor-Management Reports, U.S. Department of Labor. 1959, 14 pp. Free. Description of the provisions of the Labor-Management Reporting and Disclosure Act of 1959.

Labor Productivity

BOOSTING PRODUCTIVITY IN SMALL SHOPS. (Technical Aids for Small Manufacturers 74) Small Business Administration. 1960, 4 pp. Free. Factors affecting labor productivity.

Labor Unions

SMALL BUSINESS AND PATTERN BARGAINING. (Management Research Summary 38) Small Business Administration. 1961, 4 pp. Free. Pertinent information from a survey of companies in the rubber tire and meat-packing industries with regard to the impact of pattern bargaining and employer and union reaction to it.

SMALL BUSINESS AND UNION-WIDE BARGAINING. (Management Research Summary 60) Small Business Administration. 1962, 4 pp. Free. Summarizes findings of a study of collective-bargaining negotiations in District 33 of the United Steelworkers of America (Minnesota and adjoining areas of northern Michigan and western Wisconsin). The study represents an analysis of some 145 nonsteel collective bargaining agreements entered into during the 1950's to determine their conformance with or departure from the successive key bargains of the basic steel industry.

Laboratories

DIRECTORY OF INDEPENDENT COMMERCIAL LABORATORIES. (See listing under Directories.)

SETTING UP A QUALITY CONTROL AND TECHNICAL DEVELOPMENT LABORATORY. (Technical Aids for Small Manufacturers 65) Small Business Administration. 1959, 4 pp. Free. Guidelines for the small manufacturer in equipping, staffing, and using a small laboratory; with a brief discussion of research and laboratory quality control.

Laundries

LAUNDRY AND DRYCLEANING. (Small Business Bibliography 22) Small Business Administration. Revised 1965, 8 pp. Free. References on technical information as well as general management.

Leasing Equipment

RENTED TOOLS CAN IMPROVE EFFICIENCY. (Technical Aids for Small Manufacturers 79) Small Business Administration. 1962, 4 pp. Free. Describes nature and function of leasing, advantages and disadvantages, and various rental plans.

Letter Services

STARTING AND MANAGING A SMALL DUPLICATING AND MAILING SERVICE. (The Starting and Managing Series Vol. 8) Small Business Administration. 1963, 55 pp. GPO, 25¢. This booklet supplies some of the "know-how" necessary to help those persons in this type of business avoid the pitfalls and attain success.

Lumber Industry

DEVELOPING MISSISSIPPI'S HARDWOOD RESOURCES. (Management Research Summary 88) Small Business Administration. 1962, 4 pp. Free. Summarizes information from 109 sawmills, 63 processors of hardwood standard lumber, 15 veneer mills, and 4 pulpmills regarding hardwood resources, raising value of hardwood roundwood, and the use of hardwood sawmill residues.

ECONOMIC PROBLEMS OF ARKANSAS SAWMILLS. (Management Research Summary 193) Small Business Administration. 1963, 2 pp. Free. Trends and problems of the lumber industry from the standpoint of small sawmill operators in Arkansas. Discusses national demand, regional competition, supply conditions, improving operations, and improving industry conditions.

MARKETING MAINE LUMBER FOR BUILDING CONSTRUCTION. (Management Research Summary 143) Small Business Administration. 1963, 2 pp. Free. An investigation into the reasons why Northeastern softwood lumber is not being used to a greater extent in the building-construction industry.

MISSISSIPPI'S FOREST RESOURCES. (Management Research Summary 65) Small Business Administration. 1962, 4 pp. Free. In-

cludes information regarding standing timber supply, species distribution, wood products opportunities, and forest management.

THE PINE LUMBER INDUSTRY IN MISSISSIPPI. (Management Research Summary 59) Small Business Administration. 1962, 4 pp. Free. Pertinent facts from a report of interviews with owners or managers of 83 Mississippi lumber-producing firms, regarding their economic position and industry problems, together with recommended steps to be taken in order to meet competition successfully.

PROBLEMS OF WESTERN OREGON'S SMALL LUMBER FIRMS. (Management Research Summary 137) Small Business Administration. 1963, 2 pp. Free. Discussion of marketing, procurement of raw materials, financing, and management, based on interviews with 137 lumber firms in western Oregon.

Management

ARE YOU USING YOUR SPACE EFFECTIVELY? (Technical Aids for Small Manufacturers 77) Small Business Administration. 1961, 4 pp. Free. Space utilization tips for plant and office.

BUILDING SUCCESS IN SMALL MANUFACTURING INDUSTRIES. (Management Research Summary 51) Small Business Administration. 1962, 4 pp. Free. Discusses 24 business practices found to have contributed to the success of 1 or more of the 7 small manufacturing firms surveyed in the study, including 10 practices which were found in all 7 firms: location, purchasing policies, adequate stocks of raw materials, practical use of funds, maintenance of adequate working capital, addition of manufacturing facilities for purpose of lowering costs, adequate provision for distribution, expansion to meet increased demand, and establishment of a reputation for high-quality products.

BUSINESS ENTERPRISES OF NEGROES IN TENNESSEE. (Management Research Summary 53) Small Business Administration. 1961, 4 pp. Free. A study of over 600 Negro firms in Memphis, Nashville, Knoxville, and Chattanooga, Tenn., covering the enterprise, the owner-manager, the Negro market, problem areas, and management policies.

CHARACTERISTICS IN SMALL BUSINESS SUCCESS. (Management Research Summary 119) Small Business Administration. 1963, 4 pp. Free. A summary of the techniques and distinctive features based on almost 400 interviews with management personnel and 110 small metal working plants in Ohio—to establish criteria for success potential, stability, and growth.

CHECKING YOUR MANAGEMENT METHODS. (Management Aids for Manufacturers 153) Small Business Administration. 1961, 4 pp. Free. Discusses 10 management methods applying to the business itself and six methods pertaining to the owner's work as manager.

CHECKLIST FOR GOING INTO BUSINESS. (Small Marketers Aids 71) Small Business Administration. 1961, 4 pp. Free. Questions to consider before going into business. References for further study.

CONTROL METHODS FOR OIL JOBBERS. (Management Research Summary 21) Small Business Administration. 1961, 4 pp. Free. Discusses profit planning (profit objective, sales planning, expense planning, monthly figures, comparison and control), controlling investment (accounts receivable, inventory, fixed assets), marketing controls (station image, personnel control, fuel-oil marketing).

FACTORS IN THE GROWTH OF MANUFACTURING FIRMS. (Management Research Summary 107) Small Business Administration. 1963, 2 pp. Free. Examination of internal and external factors on the rate of growth of manufacturing firms.

MANAGEMENT AUDIT FOR SMALL MANUFACTURERS. (Small Business Management Series 29) Small Business Administration. 1963, 58 pp. GPO, 25¢. Applies the financial audit approach to management functions in a do-it-yourself appraisal.

MANAGEMENT AUDIT FOR SMALL RETAILERS. (Small Business Management Series 31) Small Business Administration. 1964, 51 pp. GPO, 25¢. Designed as a guide for self-appraisal by the owner-manager of the small retail establishment to determine the strong points and shortcomings of his management practices.

MANAGEMENT PLANNING IN SMALL FIRMS (Management Research Summary 108) Small Business Administration. 1963, 4 pp. Free. Summarizes an investigation of teaching, consultation, and research in managerial planning, covering sources of ideas, making decisions, operations research, break-even analysis, market research, motivation research, forecasting, and budgeting.

MANAGEMENT PROBLEMS IN THE ELECTRONICS INDUSTRY. (Management Research Summary 86) Small Business Administration. 1962, 4 pp. Free. Summary of information from approximately 300 small electronics firms in Southern California. Discusses problems in accounting, finance, industrial relations, marketing, personnel, and administration; presents conclusions and recommendations regarding each of the problem areas.

ORGANIZATION PATTERNS IN SMALL BUSINESS. (Management Research Summary 12) Small Business Administration. 1961, 4 pp. Free. Study of manufacturing companies which found a direct

relationship between the size of a firm and the number of formal units in its organization.

PROBLEMS AND NEEDS OF SMALL MANUFACTURERS. (Management Research Summary 18) Small Business Administration. 1961, 4 pp. Free. The attraction and use of manpower resources was found to be one of the most serious problems in this Georgia study.

PROBLEMS OF SMALL BUSINESS. (Management Research Summary 42) Small Business Administration. 1961, 4 pp. Free. Summarizes a survey based on discussions with 243 New Jersey small businessmen in three types of firms—wholesaling, retailing, and manufacturing—about problems faced by their firms and possible ways of getting help to solve these problems.

PROFITABILITY AND SIZE OF FIRMS. (Management Research Summary 131) Small Business Administration. 1963, 2 pp. Free. Summarizes the results of research into the relation between profitability, as measured by profit ratios, and the size of manufacturing firms. The study covers the relative ability to expand, the effect of taxes on ability to expand, relative profitability of firms showing a profit, and variability of profit ratios.

SBA Management and Research Assistance, Counseling, Courses, Conferences, Research, Publications. Small Business Administration. 1962, 18 pp. Free. How SBA programs strive to strengthen small business management.

SMALL BUSINESS PROBLEM STUDIES. (Management Research Summary 63) Small Business Administration. 1962, 4 pp. Free. A résumé of case studies developed from interviews with top managers of manufacturing, retailing, wholesaling, and service establishments in the Rocky Mountain area.

SOUND OBJECTIVES HELP BUILD PROFITS. (Management Aids for Small Manufacturers 142) Small Business Administration. 1962, 4 pp. Free. Setting up specific objectives can provide organizations with efficient blueprints to guide company progress in an orderly manner.

STARTING AND MANAGING A SMALL BUSINESS OF YOUR OWN. (Starting and Managing Series, Vol. 1) Small Business Administration. 1962, 49 pp. GPO, 25¢. Choosing a business, starting or buying a business, management problems.

THE USE OF CONSULTANTS BY MANUFACTURERS. (Management Research Summary 190) Small Business Administration. 1963, 2 pp. Free. Evaluates the role of the consulting profession in the growth of manufacturing firms.

USE OF EXTERNAL ASSISTANCE BY SMALL MANUFACTURERS. (Management Research Summary 30) Small Business Administration. 1961, 4 pp. Free. Significant findings from a survey of 73 small manufacturing firms in the Hartford, Conn., area regarding the major problems of the firms and the extent to which they used outside services to help solve the problems.

Marketing

ARE YOU SELLING TO TODAY'S CUSTOMERS? (Small Marketers Aids 78) Small Business Administration. 1962, 4 pp. Free. Various characteristics of today's customers and ways to attract them are discussed.

BUILDING SALES TO ESTABLISHED ACCOUNTS. (Small Marketers Aids 79) Small Business Administration. 1962, 4 pp. Free. A discussion of ways by which small marketers can build sales to established accounts through their salesmen.

BUILDING SALES TO YOUNGER CUSTOMERS. (Small Marketers Aids 80) Small Business Administration. 1962, 4 pp. Free. Suggests ways to cultivate the growing teenage market.

CORRECTING THE CAUSES OF MARKETING WASTE. (Small Marketers Aids 90) Small Business Administration. 1963, 4 pp. Free. Outlines causes and presents a roundup of things to look for when trying to correct them.

DISTRIBUTION COST ANALYSIS. (Small Business Bulletin 34) Small Business Administration. 1960, 8 pp. Free. How this cost analysis can affect marketing policy. Sources of further information.

FEEDER CATTLE POOLING; IMPROVED MARKETING THROUGH GRADING AND COMMINGLING. (Marketing Research Report 565) Farmer Cooperative Service, U.S. Department of Agriculture. 1962, 39 pp. GPO, 30¢. Pooling increases prices, reduces marketing costs, and improves net return to producers.

FEEDER PIG POOLING; IMPROVED MARKETING THROUGH GRADING AND COMMINGLING. (Marketing Research Report 566) Farmer Cooperative Service, U.S. Department of Agriculture. 1962, 59 pp. GPO, 40¢. Pooled lots improve bargaining position and encourage production of higher quality pigs.

FORECASTING IN SMALL BUSINESS PLANNING. (Management Research Summary 23) Small Business Administration. 1961, 4 pp. Free. A discussion of short-term and long-term forecasting and forecasting methods, based on interviews with 106 small manufacturers in Minnesota.

House-to-House Selling. (Small Business Bibliography 39) Small Business Administration. Revised 1964, 8 pp. Free. References on selling by salesmen who make personal calls.

Industrial Supply and Distribution in Puerto Rico. (Management Research Summary 160) Small Business Administration. 1963, 2 pp. Free. Examines the adequacy of distribution of raw materials, operating supplies, and containers in Puerto Rico to industry, agriculture, and Government.

Making Your Sales Figures Talk. (Small Business Management Series 8). Small Business Administration. 3d ed. 1963, 36 pp. GPO, 25¢. Takes market analysis out of the realm of guesswork and puts it in the realm of informed judgment. It explains how to analyze sales volume, distribution expense, customer complaints, salesmen's reports, and other phases of marketing.

Market Research and Planning for Small Manufacturers. (Management Research Summary 19) Small Business Administration. 1961, 4 pp. Free. Reviews the information developed through a survey of 106 small manufacturing firms in Minnesota. Includes brief discussion of company experience regarding types of market research in use, marketing-research techniques, marketing-research benefits, market planning.

Marketing Research Procedures. (Small Business Bibliography 9) Small Business Administration. Revised 1963, 12 pp. Free. References on questionnaires, sales forecasting, motivation research, etc.

National Directories for Use in Marketing. (Small Business Bulletin 13) Small Business Administration. Revised 1963, 12 pp. Free. Selected listing of directories with emphasis on directories of business establishments that purchase goods for resale.

Personal Income; A Key to Small-Area Market Analysis. Business and Defense Services Administration, U.S. Department of Commerce. 1961, 60 pp. GPO, 25¢. Sources of personal income data for counties and other small areas with suggested marketing uses of such data.

Publications for Use in Marketing and Distribution. Business and Defense Services Administration, U.S. Department of Commerce. 1961, 31 pp. GPO, 20¢. An annotated listing of publications under three major headings: Census and General Business Statistics, Domestic Trade, and Foreign Trade.

Small Suppliers and Large Buyers in American Industry. (Management Research Summary 48) Small Business Administra-

tion. 1961, 4 pp. Free. Discusses five factors in the relations between small suppliers and big buyers.

STABILITY AND CHANGE IN MARKET SHARES. (Management Research Summary 125) Small Business Administration. 1963, 2 pp. Free. Pertinent findings from data of 205 manufacturing industries regarding the stability in market shares—referring to the degree to which the distribution of sales among the firms in an industry remains the same.

U.S. DEPARTMENT OF COMMERCE PUBLICATIONS FOR USE IN MARKETING AND DISTRIBUTION. U.S. Department of Commerce. 1961, 31 pp. GPO, 20¢. An annotated listing of publications under three major headings: General Business Statistics, Domestic Trade, and Foreign Trade.

Materials Handling

POINTERS ON IN-PLANT TRUCKING. (Technical Aids for Small Manufacturers 73) Small Business Administration. 1960, 4 pp. Free. Factors to be considered before deciding on mechanized equipment.

Mineral Industries

MINERAL FACTS AND PROBLEMS. (Bulletin 585) Bureau of Mines, U.S. Department of the Interior. Second edition. 1960, 1015 pp. GPO, $6. Contains chapters on 87 different metals, minerals, and mineral fuels. Surveys for the production, composition of the industry, technology, use, outlook, etc.

SMALL ZINC-LEAD MINING IN MONTANA. (Management Research Summary 77) Small Business Administration. 1962, 4 pp. Free. Summarizes a report on ores in 72 Montana mines and a marketing analysis for each district in which they are located.

Mobile Homes

MINIMUM PROPERTY STANDARDS FOR MOBILE HOME COURTS. (See listing under Building Industry.)

MOBILE HOMES. (Small Business Bibliography 41) Small Business Administration. Revised 1963, 8 pp. Free. Bibliography on mobile homes and mobile home parks.

Motels

STARTING AND MANAGING A SMALL MOTEL. (The Starting and Managing Series Vol. 7). Small Business Administration. 1963, 70 pp. GPO, 30¢. This booklet covers the opportunities and risks in going into the motel business.

New Products

FINDING NEW PRODUCTS FOR SMALL MANUFACTURERS. (Management Research Summary 52) Small Business Administration. 1962, 4 pp. Free. Discusses stages in the growth of a firm, reasons for seeking new products, conditions for success, and approaches to new-product development.

HELPING SMALL FIRMS DEVELOP AND EXPLOIT NEW PRODUCTS. (Management Research Summary 181) Small Business Administration. 1963, 4 pp. Free. Summarizes results of a project which combined research with education of and assistance to small business firms in developing and marketing new products. Reports 18-month experience of "participating group" with "control group."

NEW PRODUCT DEVELOPMENT AND SALE. (Small Business Bibliography 4) Small Business Administration. Revised 1963, 11 pp. Free. Sources of information on developing and marketing new products.

NEW PRODUCT INTRODUCTION FOR SMALL BUSINESS OWNERS. (Small Business Management Series 17) Small Business Administration. Second edition. 1961, 69 pp. GPO, 30¢. Basic information concerning placing a new or improved product on the market.

PRODUCTS LIST CIRCULAR. Small Business Administration. Monthly, 40-page. GPO, $1.50 a year, 50¢ additional for foreign mailing; 20¢ single copy. Designed to serve as a clearinghouse for new product ideas and processes by describing the type of patents which small companies are specifically seeking.

Noise

CONTROLLING NOISE HAZARDS. (Bulletin 207) Bureau of Labor Standards, U.S. Department of Labor. 1959, 8 pp. GPO, 10¢. Particularly applies to the industrial plant.

KEEPING SHOP NOISE FROM NEARBY RESIDENCES. (Technical Aids for Small Manufacturers 67) Small Business Administration. 1959, 4 pp. Free. Control of industrial noise for good public relations.

NOISE REDUCTION IN THE SMALL SHOP. (Technical Aids for Small Manufacturers 61) Small Business Administration. 1958, 8 pp. Free. Why reduce noise, how to measure it, methods of reduction.

Nurseries (Horticulture)

THE NURSERY BUSINESS. (Small Business Bibliography 14) Small Business Administration. Revised 1964, 8 pp. Free. A 4-page summary of the business with an 8-page bibliography.

PROBLEMS AND PRACTICES OF TENNESSEE NURSERYMEN. (Management Research Summary 8) Small Business Administration. 1961, 4 pp. Free. Report of interviews with 103 nurserymen.

SEED AND PLANTING STOCK DEALERS. (See listing under Directories.)

Nursery Schools

DAY CARE SERVICES. (Children's Bureau Folder 51) Social Security Administration, U.S. Department of Health, Education, and Welfare. 1960, 62 pp. GPO, 25¢. Explains why day-care services are needed, what they should be, how they should be developed and supplementary and supportive services associated with them.

FOOD FOR GROUPS OF YOUNG CHILDREN CARED FOR DURING THE DAY. (Children's Bureau Publication 386–1960) Children's Bureau, Social Security Administration, U.S. Department of Health, Education, and Welfare. 1960, 58 pp. GPO, 25¢. Considers the selection and serving of food and stresses the importance of helping children develop good eating habits and to have pleasant associations with food and eating.

LICENSED DAY CARE FACILITIES FOR CHILDREN. Children's Bureau, Social Security Administration, U.S. Department of Health, Education, and Welfare. 1962, 29 pp. GPO, 25¢. Report of a national survey of departments of State Governments responsible for licensing day care facilities.

Nursing Homes

MINIMUM PROPERTY STANDARDS FOR NURSING HOMES. (See listing under Building Industry.)

NURSING-HOME MORTGAGE INSURANCE. (FHA 696) Federal Housing Administration. Revised June 1963, 12 pp. GPO, 15¢. Discusses Section 232 of the Housing Act of 1959 (Public Law 86–372)

which authorizes the Federal Housing Administration to insure mortgages on qualified proprietary nursing homes.

NURSING HOME STANDARDS GUIDE. (Public Health Service Publication 827) Public Health Service, U.S. Department of Health, Education, and Welfare. 1961, 63 pp. GPO, 45¢. Recommendations relating to standards for establishing, maintaining, and operating nursing homes.

NURSING HOMES; AN ANNOTATED READING LIST. (Public Health Service Publication 907) Public Health Service, U.S. Department of Health, Education, and Welfare. 1962, 46 pp. GPO, 15¢. List of articles and reports published in the period 1956–60.

Office Management

CUTTING OFFICE COSTS. (Small Business Management Series 6) Small Business Administration. 2d ed. 1964, 54 pp. GPO, 25¢. Provides the small manufacturer with useful guides in reviewing office costs and recommends techniques in making some moneysaving procedures.

Operations Research

OPERATIONS ANALYSIS IN SMALL MANUFACTURING FIRMS. (Management Research Summary 97) Small Business Administration. 1963, 4 pp. Free. Briefly discusses results of study aimed at designing some techniques of operations research and analysis suited to small manufacturing operations and applying these techniques to the operations of a few selected firms. Covers financial projection and cash flow, inventory control, job-cost estimating, production planning, and information retrieval.

OPERATIONS RESEARCH IN SMALL BUSINESS. (Management Research Summary 141) Small Business Administration. 1963, 2 pp. Free. Summarizes a study of a small Iowa firm to determine if small firms can use the "systems" approach in decision-making, what the limitations of operations research are, and how services can be provided at affordable prices.

Patents

GENERAL INFORMATION CONCERNING PATENTS. Patent Office, U.S. Department of Commerce. 1960, 35 pp. GPO, 15¢. What can be patented, who may apply, design patents, foreign patents, etc.

GUIDE FOR PATENT DRAFTSMEN. Patent Office, U.S. Department of Commerce. 1961, 16 pp. GPO, 15¢. Contains many illustrations of the type of drawings required.

HOW TO OBTAIN INFORMATION FROM UNITED STATES PATENTS. Patent Office, U.S. Department of Commerce. 1962, 21 pp. GPO, 20¢. A discussion of how to use patents and how to find patents of interest. Gives sources of further information.

OBTAINING INFORMATION FROM PATENTS; PATENT OFFICE CLASSIFICATION AND SEARCH SERVICES. Patent Office, U.S. Department of Commerce. 1964, 3 pp. Free. A short description of these services.

PATENT ATTORNEYS AND AGENTS . . . (see listing under Directories.)

PATENT LAWS. Patent Office, U.S. Department of Commerce. 1961, 97 pp. GPO, 30¢. Excerpts from the U.S. Code.

PATENTS AND INVENTIONS; AN INFORMATION AID FOR INVENTORS. Patent Office, U.S. Department of Commerce. 1959, 25 pp. GPO, 15¢. Basic steps and other information on having an invention patented.

RULES OF PRACTICE OF THE UNITED STATES PATENT OFFICE IN PATENT CASES. Patent Office, U.S. Department of Commerce. 1960, 150 pp. GPO, 50¢. Detailed information on applications, amendments, appeals, determining the priority of inventions, etc.

USAEC PATENTS AVAILABLE FOR LICENSING. (See listing under Atomic Energy.)

Personnel Management

ADJUSTMENTS TO THE INTRODUCTION OF OFFICE AUTOMATION. (Bulletin 1276) Bureau of Labor Statistics, U.S. Department of Labor. 1960, 86 pp. GPO, 50¢. A study of the experiences of large offices in changing to electronic data processing. How it affected employees and particularly older employees.

AN EMPLOYEE SUGGESTION SYSTEM FOR THE SMALL PLANT. (Small Business Management Series 1) Small Business Administration. 3d ed. 1964, 18 pp. GPO, 15¢. Provides basic principles for starting and operating a suggestion system which benefits both employee and management.

EMPLOYEE TRAINING NEEDS OF SMALL MONTANA FIRMS. (Management Research Summary 74) Small Business Administration. 1962, 4 pp. Free. Summarizes report based on returns from over 2,700 Montana employers. Covers present employment, fu-

ture employment needs, employee training, supply of trained labor, barriers to hiring better-trained workers, and recruitment sources.

HANDLING THE PROBLEM EMPLOYEE. (Small Marketers Aids 77) Small Business Administration. 1962, 4 pp. Free. Defines and discusses problem employees and suggests ways to handle them.

HOW SMALL UTAH FIRMS GET AND KEEP THEIR EMPLOYEES. (Management Research Summary 174) Small Business Administration. 1963, 2 pp. Free. Analyzes problems in the recruitment, selection, and retention of employees.

IS WORKER FATIGUE COSTING YOU DOLLARS? (Technical Aids for Small Manufacturers 70) Small Business Administration. 1960, 4 pp. Free. Planning work and rest periods to eliminate costly worker fatigue.

MANAGEMENT STAFFING NEEDS IN ARKANSAS SAWMILLS. (Management Research Summary 46) Small Business Administration. 1961, 4 pp. Free. A survey of managers with regard to organization, delegation of authority and responsibility, and qualifications and training for management positions.

PERSONNEL MANAGEMENT GUIDES FOR SMALL BUSINESS. (Small Business Management Series 26) Small Business Administration. 1961, 52 pp. GPO, 25¢. Covers topics such as hiring, training, wage and salary systems, and management-union relations.

PROVIDING MANAGEMENT TALENT FOR SMALL BUSINESS. (Management Research Summary 47) Small Business Administration. 1961, 44 pp. Free. Discusses levels of management, personal qualities, the need for managers, selection, developing and motivating management personnel.

SALES MANAGEMENT FOR MANUFACTURERS. (Small Business Bibliography 71) Small Business Administration. 1964, 8 pp. Free. A selection of basic sources of information on sales management.

THE FOREMAN IN SMALL INDUSTRY. (Small Business Management Series 14) Small Business Administration. 2d ed., 1962, 28 pp. GPO, 20¢. Outlines the basic principles for developing well qualified foreman to promote plant efficiency.

TRAINING COMMERCIAL SALESMEN. (Small Business Bibliography 56) Small Business Administration. 1965, 8 pp. Free. A bibliography of training aids including sales training films.

WHAT HAPPENS WHEN YOU HIRE PEOPLE. (Small Markers Aids 98) Small Business Administration. 1964, 4 pp. Free. Discusses various aspects of hiring, such as determining the need for an employee, starting the new person, and employee laws.

Petroleum Plants

(See Bibliography of Investment and Operating Costs for Chemical and Petroleum Plants listed under Bibliographies.)

Plant Location

HIGHWAYS AND SMALL MANUFACTURING PLANT LOCATIONS. (Management Research Summary 87) Small Business Administration. 1962, 4 pp. Free. Brief report of a survey of 200 firms in Hartford, Conn., regarding the role of highways and highway proximity in location decisions.

INDUSTRIAL PARKS AND SMALL BUSINESS. (Management Research Summary 182) Small Business Administration. 1963, 2 pp. Free. Summarizes survey of 271 industrial districts in the New England and Middle Atlantic Regions. Includes a summary of a case study of a successful industrial park consisting entirely of small, independent firms.

LOCATION OF MANUFACTURING PLANTS BY COUNTY, INDUSTRY, AND EMPLOYMENT SIZE: 1958. (Based on the 1958 Census of Manufactures; similar series to be published in the 1963 Census of Manufactures.) Bureau of the Census, U.S. Department of Commerce. In 9 parts; paging and prices vary. GPO, price for complete set, $4.50. Information on the number of manufacturing plants presented in State, county, and industry sequence, by employment size.

LOCATION OF MANUFACTURING PLANTS BY INDUSTRY, COUNTY, AND EMPLOYMENT SIZE: 1958. Bureau of the Census, U.S. Department of Commerce. (Based on the 1958 Census of Manufactures; similar series to be published in the 1963 Census of Manufactures.) In 9 parts; paging and prices vary. GPO, price for complete set, $6.25. Information on the number of manufacturing plants presented in industry, State, and county sequence, by employment size.

PERSONAL FACTORS IN CHOOSING A SITE FOR THE SMALL MANUFACTURING PLANT. (Management Research Summary 50) Small Business Administration. 1961, 4 pp. Free. Findings based on interviews with 83 firms in Hartford, Conn., regarding the personal factors involved and the extent to which such factors determine site selection.

SELECTING A SITE FOR THE SMALL MANUFACTURING PLANT. (Management Research Summary 43) Small Business Administration. 1961, 4 pp. Free. Summarizes a study based on interviews with manufacturing firm executives and representatives of organizations assisting in plant location, as well as on a review of published material, to determine steps involved in successful site selection.

Population

MANPOWER—CHALLENGE OF THE 1960's U.S. Department of Labor. 1960, 24 pp. Free. Predictions of the changes in the population and labor force which are expected to take place between 1960 and 1970. Supplementary Statistics. 1960, 36 pp. Free.

POPULATION AND LABOR FORCE PROJECTIONS FOR THE UNITED STATES, 1960 to 1975. (Bulletin 1242) Bureau of Labor Statistics, U.S. Department of Labor. 1959, 56 pp. GPO, 40¢. Projects labor force trends, both in total number and age-sex composition. Predicts a continuing trend toward more part-time workers.

SELECTED MANPOWER INDICATORS FOR STATES. (Manpower Research Bulletin 4) Office of Manpower, Automation, and Training, Manpower Administration, U.S. Department of Labor. 1963, 52 pp. Free. Shows variations as well as relationships among the States on several basic manpower subjects.

Postal Guides

DIRECTORY OF INTERNATIONAL MAIL. U.S. Post Office Department. Issued in looseleaf form. GPO, $2.50 without binder, $5 with binder for an indefinite period. Detailed information, by country.

DIRECTORY OF POST OFFICES. Annual. (July) U.S. Post Office Department. GPO, $2.50. List of post offices by State, with zip code numbers, alphabetical list, and post office addresses for Army and Air Force installations.

INTERNATIONAL MAIL. U.S. Post Office Department. 1963, 12 pp. Free. Short summary of rates, weight and dimensional limits, preparing articles for mailing.

POSTAL MANUAL: Chapters 1 and 2. U.S. Post Office Department. (Chapter 1, DOMESTIC, Chapter 2, INTERNATIONAL). Issued in looseleaf form. GPO, $4 for an indefinite period. Postal information required in running a mail room.

Prices

GUIDES AGAINST DECEPTIVE PRICING. Adopted October 2, 1958. Federal Trade Commission. 5 pp. Free. How the FTC evaluates pricing representations in advertising.

PRICING DECISIONS IN SMALL BUSINESS. (Management Research Summary 44) Small Business Administration. 1961, 4 pp. Free. Summarizes findings from interviews with managers of 88 Ken-

tucky firms (retailers, wholesalers, manufacturers, and landscape nurseries) regarding pricing methods. Discusses full-cost pricing, flexible mark-ups, gross-margin pricing, suggested and "going-rate" pricing.

Profit Sharing

WILL PROFIT SHARING HELP YOUR FIRM? (Management Aids for Small Manufacturers 157) Small Business Administration. 1963, 4 pp. Free. Success of a profit sharing program depends on many factors, including the company's profit potential, a plan tailored to its needs, and employees' continuing interest.

Public Relations

BUILDING THE RIGHT REPUTATION. (Small Marketers Aids 69) Small Business Administration. 1961, 4 pp. Free. Guidelines for determining and developing the right image for a store.

PROFITABLE COMMUNITY RELATIONS FOR SMALL BUSINESS. (Small Business Management Series 27) Small Business Administration. 1961, 36 pp. GPO, 25¢. Discusses relations with the various "communities"—the economic community, the political community, the educational community, etc.

Purchasing

PURCHASING IN THE SMALL MANUFACTURING PLANT. (Management Research Summary 14) Small Business Administration. 1961, 4 pp. Free. A study which suggests several steps that can be taken toward solving problems which hinder the purchaser in the small manufacturing plant.

Records

ELECTRONIC RECORDKEEPING FOR SMALL MARKETERS. (Small Marketers Aids 84) Small Business Administration. 1962, 4 pp. Free. The development of information capturing devices such as punched tape attachments for adding machines and the growth of information centers is bringing automatic data processing within the reach of increasing numbers of small marketers.

GUIDE TO RECORD RETENTION REQUIREMENTS. National Archives and Records Service, General Services Administration. Revised 1964. Office of the Federal Register. GPO, 40¢. Lists published re-

quirements (in laws and regulations) on the keeping of records by the public, including what records must be kept, who must keep them, and how long they must be kept. Revised annually.

KEEPING SCORE WITH EFFECTIVE RECORDS. (Small Marketers Aids 94) Small Business Administration. 1963, 4 pp. Free. A narrative checklist which can help to insure that proper records are kept on: inventory and purchasing, sales, cash, credit, employees, and fixtures and property.

RECORDKEEPING SYSTEMS—SMALL STORE AND SERVICE TRADE. (Small Business Bulletin 15) Small Business Administration. Revised 1962, 11 pp. Free. List and brief description of recordkeeping systems which can be used by operators of small retail and service trade establishments.

Recreation Industry

THE PLEASURE BOATING INDUSTRY IN TENNESSEE. (Management Research Summary 35) Small Business Administration. 1961, 4 pp. Free. Natural and manmade resources, industry development, favorable growth factors, and estimated growth.

SPORTING GOODS. (Small Business Bibliography 62) Small Business Administration. Revised 1964. Free. A bibliography covering the potential, the structure and the operating practices of firms engaged in the distribution of sporting goods.

Regional Area Studies

AIR TRANSPORTATION IN NEW HAMPSHIRE. (Management Research Summary 41) Small Business Administration. 1961, 4 pp. Free. Presents findings from a survey of the status of air service in New Hampshire.

ALASKA; ITS ECONOMY AND MARKET POTENTIAL. Business and Defense Services Administration, U.S. Department of Commerce. 1959, 61 pp. GPO, 70¢. Background information and market characteristics. A map is included.

CONSTRUCTION INDUSTRIES IN SOUTHERN FLORIDA. (Management Research Summary 39) Small Business Administration. 1961, 4 pp. Free. Pertinent findings from a survey of 16 Florida construction firms, regarding size of firm, elements of success, character, and background of owners, capital and credit, management and supervision, bidding and selling, purchasing, subcontracting, labor relations, risks, cost control and accounting, and labor relations.

ECONOMIC OPPORTUNITIES FOR THE STATE OF MAINE. (Management Research Summary 24) Small Business Administration. 1961, 4 pp. Free. Suggestions for strengthening present industries and developing new areas of economic activity.

EXPANDING DISTRIBUTION AND WAREHOUSING IN ALASKA. (Management Research Summary 5) Small Business Administration. 1961, 4 pp. Free. Discussion of pertinent findings on Alaska's economic background as related to the potential for expanding distribution and warehousing in Anchorage and Fairbanks.

FORESTRY AND FOREST PRODUCTS IN NEW HAMPSHIRE. (Management Research Summary 37) Small Business Administration. 1961, 4 pp. Free. Current status of New Hampshire's forest economy and recommendations regarding its improvement.

FOUNDERS OF SMALL BUSINESS IN TEXAS AND GEORGIA. (Management Research Summary 157) Small Business Administration. 1963, 4 pp. Free. Pertinent findings from interviews with 1059 successful Texas and 521 Georgia business founders regarding their business, personal, and social characteristics.

KENTUCKY SMALL BUSINESS—MANAGEMENT, TAXES, AND OUTLOOK. (Management Research Summary 180) Small Business Administration. 1963, 2 pp. Free. Discusses special problems of small-business management, the impact of taxation and tax administration on small business, and the State's potential for 15 types of small business.

KENTUCKY'S SMALL BUSINESS POTENTIAL. (Management Research Summary 163) Small Business Administration. 1963, 2 pp. Free. Report on conditions faced by small businesses in predominantly rural areas and available resources for exploitation by existing or prospective businesses.

A LOCAL ECONOMY IN TRANSITION. (Management Research Summary 118) Small Business Administration. 1963, 2 pp. Free. An outline of a report which describes basic activities in the economy of southwestern Wyoming over two periods of time. The first concerned the loss of the old economy and the latter, the adjustment to a new one based on different industries and employing different types of people.

THE LOCAL GRAIN ELEVATOR BUSINESS IN LOUISIANA. (Management Research Summary 188) Small Business Administration. 1963, 2 pp. Free. Summarizes survey of 15 Louisiana grain elevators regarding ownership and management, capital requirements, volume and kinds of grain handled, pricing, procurement and storage.

LOCAL INVESTMENT IN PUERTO RICAN MANUFACTURING. (Management Research Summary 31) Small Business Administration.

1961, 4 pp. Free. Summary of information from a study of Puerto Rico's current industrial economy, with recommendations for improving the investment environment, strengthening the local development program, identifying and screening manufacturing opportunities, and expanding the market.

LOUISIANA'S RETAIL FARM SUPPLY BUSINESS. (Management Research Summary 173) Small Business Administration. 1963, 2 pp. Free. Summarizes survey of 55 farm supply stores regarding advertising, customer credit, operating ratios, trade group relations, government farm policies, and store size.

MAINE'S POTENTIAL FOR WOOD PARTICLE BOARD MANUFACTURE. (Management Research Summary 62) Small Business Administration. 1962, 4 pp. Free. Summarizes a study based on a survey of major particle-board plants, processes, products, and markets, together with an intensive investigation into Maine's economic qualifications both as a producer and consumer of wood particle board. Includes detailed information about wood particle types, building and equipment requirements, investment, and operating.

MONEY AND MANPOWER FOR KENTUCKY'S SMALL BUSINESS. (Management Research Summary 178) Small Business Administration. 1963, 2 pp. Free. Findings on the State's resources of money and manpower from the standpoint of starting small businesses.

MOTOR FREIGHT MOVEMENTS IN OKLAHOMA. (Management Research Summary 82) Small Business Administration. 1962, 4 pp. Free. Data developed in a study of general commodity carriers regarding the characteristics of motor freight movements as a basis for determining the kind of industry information necessary for making decisions.

NEW HAMPSHIRE MINERAL POTENTIAL. (Management Research Summary 32) Small Business Administration. 1961, 4 pp. Free. Brief discussion of mineral potential and possible industrial uses of pegmatite ores, with recommendations for attracting exploration efforts.

SMALL BUSINESS IN THE HAWAIIAN ECONOMY. (Management Research Summary 117) Small Business Administration. 1963, 2 pp. Free. Evaluates problems and identifies causes of failure and success. Based on a questionnaire survey of 3,702 small firms and case studies of 55 firms which failed and 10 successful firms.

SMALL BUSINESS PATTERNS IN ARIZONA. (Management Research Summary 75) Small Business Administration. 1962, 4 pp. Free. Summarizes information in report obtained through interviews with 435 owner-managers of small business, 64 bank officers, and 57 suppliers regarding the management and operation of the business. Makes recommendations regarding management training, using the

experience of others, undercapitalization, competition, accounting records.

SMALL BUSINESS PROBLEMS IN VERMONT. (Management Research Summary 156) Small Business Administration. 1963, 2 pp. Free. Describes problems and discusses influence of State's location and physical characteristics on such problems.

SMALL MANUFACTURERS IN SOUTH FLORIDA. (Management Research Summary 154) Small Business Administration. 1963, 2 pp. Free. Summarizes results of case studies of 11 firms ranging from failures to highly successful operations.

SMALL MANUFACTURING FIRMS IN NEW HAMPSHIRE. (Management Research Summary 34) Small Business Administration. 1961, 4 pp. Free. Briefly reports findings from a survey of 274 small firms, covering personnel availability, marketing capability, transportation facilities, tax environment, continuity of management, research and development undertaking, and availability of financial resources.

THE STRUCTURE OF SMALL BUSINESS IN ALABAMA. (Management Research Summary 49) Small Business Administration. 1961, 4 pp. Free. Significant points from a study which defines the extent, significance, and contribution of small business to the Alabama economy.

VACATION BUSINESS IN MAINE. (Management Research Summary 13) Small Business Administration. 1961, 4 pp. Free. The importance of the tourist trade to Maine and suggested areas for improvement.

Research

AIR FORCE RESEARCH RESUMES. Office of Aerospace Research, U.S. Department of the Air Force. 1963, 578 pp. $5.25. Gives a résumé of many research projects conducted by the Air Force.

CURRENT PROJECTS ON ECONOMIC AND SOCIAL IMPLICATIONS OF SCIENCE AND TECHNOLOGY. National Science Foundation. 1963. Annual 1964. 158 pp. GPO, 50¢. A survey of current research projects of interest to the businessman.

FEDERAL FUNDS FOR RESEARCH, DEVELOPMENT AND OTHER SCIENTIFIC ACTIVITIES. (Formerly Federal Funds for Science). National Science Foundation. Fiscal Years 1962, 1963, and 1964. Annual. 1964, 180 pp. GPO, $1. Information on expenditures, programs, and organizations doing the work.

FEDERAL ORGANIZATION FOR SCIENTIFIC ACTIVITIES, 1962. National Science Foundation. 1962, 572 pp. GPO, $3.50. Gives infor-

mation on the Government's scientific activities and how they are organized.

NSF PROGRAMS FOR EDUCATION IN THE SCIENCES. National Science Foundation. 1963, 40 pp. Free. Describes principal programs through which the Foundation seeks to strengthen education in the sciences.

PRODUCT TECHNOLOGY AND RESEARCH IN SMALL FIRMS. (Management Research Summary 116) Small Business Administration. 1963, 2 pp. Free. Information about technological research, product diversification and product differentiation in Nebraska firms.

RESEARCH AND DEVELOPMENT: A LIST OF SMALL BUSINESS CONCERNS. (See listing under Directories.)

RESEARCH AND DEVELOPMENT IN INDUSTRY. National Science Foundation. 1961, 123 pp. GPO, 65¢. Provides economic data on financing research and development in industrial firms.

REVIEW OF DATA ON RESEARCH AND DEVELOPMENT. (A series of leaflets devoted to specific aspects of research and development economics.) National Science Foundation. (Price range from 5¢ to 15¢.) Most recent bulletins:

No. 44. DECISION-MAKING ON RESEARCH AND DEVELOPMENT IN THE BUSINESS FIRM. 8 pp. GPO, 10¢.

No. 45. SCIENTISTS AND ENGINEERS IN ENGINEERING SCHOOLS. 8 pp. GPO, 10¢.

SCIENTIFIC INFORMATION ACTIVITIES OF FEDERAL AGENCIES. (See listing under Bibliographies.)

SMALL BUSINESS AND GOVERNMENT RESEARCH AND DEVELOPMENT. (Small Business Management Series 28) Small Business Administration. 1962, 42 pp. GPO, 25¢. Describes the advantages and disadvantages of Government research and the procedures for contracting such research.

SMALL FIRMS IN RESEARCH AND DEVELOPMENT INDUSTRIES. (Management Research Summary 130) Small Business Administration. 1963, 4 pp. Free. Summarizes a survey of 73 firms engaged in research and development in Maryland and the Washington, D.C. metropolitan area pertaining to their operations, growth, success or failure, experiences, and characteristics.

TECHNICAL STUDIES BY THE FEDERAL HOUSING ADMINISTRATION. (See listing under Bibliographies.)

THE U.S. FOREST PRODUCTS LABORATORY. (Report 1698 Revised) Forest Products Laboratory, Madison 5, Wis. 1960, 19 pp. Free.

How the Laboratory's research is designed to help 50,000 small lumber producers.

Retail Trade

ASSESSING THE PROSPECTS FOR NEW RETAIL BUSINESSES. (Management Research Summary 89) Small Business Administration. 1962, 4 pp. Free. Describes three initial steps in assessing retail opportunities, which involve an analysis of interarea competitive potentials, future sales potentials, and the changing structure of the retail trade industry.

BOOKSTORE OPERATION. (Small Business Bibliography 42) Small Business Administration. Revised 1963, 8 pp. Free. References for effective organization and operation of a retail bookstore.

BOOST PROFITS BY CUTTING MARKDOWNS. (Small Marketers Aids 57) Small Business Administration. 1960. 8 pp. Free. Cutting markdowns through better stock control.

BUDGETING FOR SMALL DEPARTMENT STORES. (Management Research Summary 153) Small Business Administration. 1963, 2 pp. Free. Budgeting methods based on studies of almost 100 stores. Discusses the merchandise plan, the expense budget, and the financial budget.

CAREERS FOR WOMEN IN RETAILING. (Bulletin 271) Women's Bureau, U.S. Department of Labor. Reprinted 1963, 52 pp. GPO, 25¢. "Women as Owners of Small Stores," pp. 38–41.

CASE STUDIES OF SMALL RETAIL STORES. (Management Research Summary 45) Small Business Administration. 1961, 4 pp. Free. Synopses of cases regarding the background of the management, setting of the business, and some of the problems facing small retailers: financial, personnel, community, management counsel, price cutting, competition, credit.

COLOR CAN STIMULATE SALES. (Small Marketers Aids 85) Small Business Administration. 1962, 4 pp. Free. Discusses color and cites examples of the use of color such as in sales tickets, wrappings, in the store itself and in direct mail advertising.

CONTROL METHODS FOR HARDWARE DEALERS. (Management Research Summary 29) Small Business Administration. 1961, 4 pp. Free. Discusses factors to consider in setting goals, control procedures relating to capital, cash and accounts receivable, inventory investment, purchasing and stock turnover, advertising, selection and training of personnel.

CONTROL METHODS FOR HOUSEHOLD APPLIANCE DEALERS. (Management Research Summary 40) Small Business Administration. 1961, 4 pp. Free. Condensation of main sections of a manual: determining the profit goal, forecasting expenses, controlling expenses, controlling capital investment, controlling merchandising operations, controlling income, and controlling service operations.

DISCOUNT RETAILING. (Small Business Bulletin 68) Small Business Administration. Revised 1964, 16 pp. Free. Discusses the growth of discount retailing and contains references to assist active and prospective discounters.

DRUG STORES. (Small Business Bulletin 33) Small Business Administration. 1960, 8 pp. Free. Bibliography on drug retailing operations.

FARM EQUIPMENT RETAILING IN LOUISIANA. (Management Research Summary 90) Small Business Administration. 1962, 4 pp. Free. Summarizes information from questionnaires and personal interviews with retail farm equipment firms regarding land and buildings, type of ownership, finances, sales, advertising, credit, customer financing, guarantees, employment, and recordkeeping.

FURNITURE RETAILING. (Small Business Bulletin 48) Small Business Administration. 1961, 16 pp. Free. A basic bibliography which includes references on antiques and a list of furniture marketing events.

[illegible] Administration. 1965, 8 pp. Free. Sources of information for persons now operating or considering the establishment of businesses in this field.

A GUIDE TO ITEM PROFITABILITY FOR RETAIL STORES. (Management Research Summary 191) Small Business Administration. 1963, 2 pp. Free. Describes the uses of merchandise management accounting and its advantages for small retail firms (furniture, appliance, and apparel stores).

HARDWARE RETAILING. (Small Business Bulletin 35) Small Business Administration. 1960, 8 pp. Free. Basic sources of information.

HOBBY SHOP. (Small Business Bulletin 53) Small Business Administration. 1961, 8 pp. Free. A bibliography of material on general retail management and specialized hobby merchandising.

MAIL ORDER PURCHASING AND THE SMALL RETAILER. (Management Research Summary 103) Small Business Administration. 1963, 4 pp. Free. Discussion of a survey made in Missoula, Montana, regarding the amount of mail order buying, types of goods bought, and reasons for such buying. Compares mail-order houses and

local retailers with respect to prices, merchandise selection, service, and convenience.

MAIL-ORDER RETAILING BY SMALL ENTERPRISES. (Management Research Summary 194) Small Business Administration. 1963, 2 pp. Free. Briefly discusses factors essential to the success of mail-order selling: capital, products, markets, prices, product supply, advertising, postal rates, and retail outlets.

PROBLEMS OF SMALL RETAILERS. (Management Research Summary 9) Small Business Administration. 1961, 4 pp. Free. Administrative and managerial problems of Wyoming independent retailers.

REGULATION OF RETAIL COMPETITION IN WASHINGTON STATE. (Management Research Summary 93) Small Business Administration. 1962, 4 pp. Free. Summarizes the report which examines legislative enactments and judicial decisions that govern retail competition in Washington State.

REMODELING FOR BETTER RETAILING. (Small Marketers Aids 99) Small Business Administration. 1964, 4 pp. Free. Some of the things small marketers need to think of when remodeling.

RETAILING. (Small Business Bibliography 10) Small Business Administration. Revised 1963, 8 pp. Free. Sources of information for those with a general interest in the retail field.

STARTING AND MANAGING A SMALL RETAIL HARDWARE STORE. (The Starting and Managing Series Vol. 10). Small Business Administration. 1965, 73 pp. GPO, 30¢. This booklet covers the opportunities and risks in going into the retail hardware business.

SELLING BY MAIL-ORDER. (Small Business Bibliography 3) Small Business Administration. Revised 1964, 15 pp. Free. Though selling by mail is usually thought of as an easy way to make money in spare time, much organization is required. Sets forth the major principles needed by a beginner. Includes bibliography of related materials.

SOLVING SMALL RETAILERS' PROBLEMS. (Management Research Summary 114) Small Business Administration. 1963, 2 pp. Free. Methods and techniques to assist retailers in Wyoming to better understand their administrative and management problems.

STORE ARRANGEMENT AND DISPLAY. (Small Business Bibliography 52) Small Business Administration. Revised 1964, 8 pp. Free. A bibliography concerning general and specialized store arrangement, and display principles and techniques.

TEN SMALL RETAILERS AND THEIR PROBLEMS. (Management Research Summary 109) Small Business Administration. 1963, 2 pp. Free. Alabama case histories of ten small retail stores which are

presented to indicate the sequential nature of their problems and relationships.

TRAINING RETAIL SALESPEOPLE. (Small Business Bibliography 23) Small Business Administration. Revised 1963, 8 pp. Free. References on training for salesmanship and other aspects of retail operation.

VARIETY STORES. (Small Business Bulletin 21) Small Business Administration. 1959, 8 pp. Free. References on topics such as lines of merchandise carried, services rendered, and facilities for customer convenience.

Retirement Plans

RETIREMENT PLANS FOR SELF-EMPLOYED BUSINESSMEN. (Small Marketers Aids 93) Small Business Administration. 1964, 4 pp. Free. Discusses the kinds of plans allowed by the Self-Employed Tax Retirement Act of 1962.

Road Construction

(See Standard Specifications for Construction of Roads * * * listed under Standards.)

Safety

CHEMISTRY FOR THE SAFETY MAN. (Bulletin 222) Bureau of Labor Standards, U.S. Department of Labor. 1960, 25 pp. GPO, 15¢. Brief discussion of the fundamentals of chemistry to help provide understanding of chemical hazards.

COLOR-CODING IN SMALL PLANTS. (Technical Aids for Small Manufacturers 69) Small Business Administration. 1959, 4 pp. Free. How color can reduce accidents, prevent mistakes, and make for better maintenance operations.

CONTROL OF THE PHYSICAL ENVIRONMENT. (Bulletin 211) Bureau of Labor Standards, U.S. Department of Labor. 1960, 13 pp. GPO, 15¢. Providing a safe and healthy place to work.

MECHANICAL HANDLING OF MATERIALS. (Bulletin 219) Bureau of Labor Standards, U.S. Department of Labor. 1960, 29 pp. GPO, 15¢. Various types of equipment are described; safety controls are suggested.

RESPIRATORY PROTECTIVE EQUIPMENT. (SAFETY IN INDUSTRY; ENVIRONMENTAL AND CHEMICAL HAZARDS No. 3) (Bulletin 226)

Bureau of Labor Standards, U.S. Department of Labor. 1961, 34 pp. GPO, 20¢. Provides information on selecting and using the right protective equipment for particular respiratory hazards. Also gives the limitations of such equipment.

Service Industries

BUSINESS METHODS IN SMALL PERSONAL SERVICE FIRMS. (Management Research Summary 81) Small Business Administration. 1962, 4 pp. Free. Discusses objectives and planning, legal practices, insurance, accounting and financial practices, and policies based on interviews with owner-managers of 174 personal-service firms in the Memphis, Tenn., trading area.

PRICING YOUR SERVICES FOR PROFIT. (Small Marketers Aids 89) Small Business Administration. 1963, 4 pp. Free. Outlines steps in analyzing direct and indirect costs and presents a formula for computing prices.

Shipment of Goods

HELP PREVENT LOSS AND DAMAGE. Transportation and Public Utilities Service, General Services Administration. 1960, 44 pp. Free. Hints on packaging, marking, inspection of carriers equipment, etc.

REVENUE QUALITY CONTROL FOR SMALL MOTOR CARRIERS. (Management Research Summary 83) Small Business Administration. 1962, 4 pp. Free. Discussion of pilot revenue quality control tables based on ICC cost studies.

THE TRANSPORTATION FUNCTION IN SMALL BUSINESS. (Management Research Summary 16) Small Business Administration. 1961, 4 pp. Free. Recommendations concerning the handling of shipments as a result of a study of small Minnesota manufacturing firms.

Shoe Industry

FOOTWEAR. (Small Business Bulletin 63) Small Business Administration. 1962, 12 pp. Free. A bibliography dealing with manufacturing, distribution and repairing of shoes. Includes short introduction on production, distribution, shoe repair.

MANUFACTURERS' OPINIONS OF COTTON AND LEATHER USED IN SHOES. (Marketing Research Report 392) Economic Research Service, U.S. Department of Agriculture. 1960, 69 pp. GPO, 40¢. Study which presents shoe manufacturers with an overall view of trends and expected changes in shoe construction and materials.

Social Security

SELECTED LIST OF PUBLICATIONS ON SOCIAL SECURITY. Social Security Administration, U.S. Department of Health, Education, and Welfare. Leaflet. Free.

SOCIAL SECURITY HANDBOOK ON OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE. (OASI–135) Social Security Administration, U.S. Department of Health, Education, and Welfare. 1963, 314 pp. GPO, $1.25. A detailed explanation of the provisions of the Federal old-age, survivors, and disability insurance program: how the program operates, who is entitled to benefits, and how to get them.

SOCIAL SECURITY INFORMATION FOR SELF-EMPLOYED PEOPLE. (OASI-22) Social Security Administration, U.S. Department of Health, Education, and Welfare. 1964, Leaflet. GPO, 5¢.

Standards

COMMERCIAL STANDARDS; CLASSIFIED LIST REVISED TO MARCH 1964. National Bureau of Standards, U.S. Department of Commerce. 21 pp. Free. List of voluntary standards which give technical requirements for materials, construction, dimensions, tolerances, testing, grading, marking, labeling, etc. They are listed under headings such as apparel, building materials, plastics, rubber products.

COMMODITY STANDARDS; WHAT THEY ARE, HOW THEY ARE DONE, WHY THEY ARE USED. National Bureau of Standards, U.S. Department of Commerce. Leaflet. Free. How interested trade groups may have standards developed in cooperation with the Department of Commerce.

A GUIDE TO SPECIFICATIONS AND STANDARDS OF THE FEDERAL GOVERNMENT. Federal Supply Service, Supply Planning Division, General Services Administration. 1963, 39 pp. Free. A booklet, aimed particularly at the small businessman, explaining specifications and standards and how they are used in Government purchasing.

POINTERS ON DIMENSIONS AND TOLERANCES. (Technical Aids for Small Manufacturers 72) Small Business Administration. 1960, 4 pp. Free. How to achieve standards of accuracy.

SIMPLIFIED PRACTICE RECOMMENDATIONS; CLASSIFIED LIST REVISED TO OCTOBER 1, 1964. Commodity Standards Division, U.S. Department of Commerce. 7 pp. Free. These voluntary recommendations give the sizes, kinds, and types of specific manufactured articles called for by the trade.

STANDARD SPECIFICATIONS FOR CONSTRUCTION OF ROADS AND BRIDGES ON FEDERAL HIGHWAY PROJECTS. Bureau of Public Roads, U.S. Department of Commerce. 1961, 383 pp. GPO, $2.25. Divided into two parts, "General Requirements" and "Construction Details."

STANDARDIZATION ACTIVITIES IN THE UNITED STATES. (See listing under Directories.)

U.S. GOVERNMENT PURCHASING, SPECIFICATIONS AND SALES DIRECTORY; WHO BUYS WHAT AND WHERE, SOURCES OF GOVERNMENT SPECIFICATIONS; WHO SELLS WHAT AND WHERE. Small Business Administration. 1965, 138 pp. GPO, 70¢. Facts for the small businessman on how to sell to or buy from the Federal Government.

WEIGHTS AND MEASURES STANDARDS OF THE UNITED STATES: A Brief History. National Bureau of Standards, U.S. Department of Commerce. 1963, 30 pp. GPO, 35¢. Prepared in response to the demand for information about the origins of the metrological standards of the U.S. both from businessmen and the general public.

Statistics

BUSINESS STATISTICS 1963 EDITION. (Biennial) Office of Business Economics, U.S. Department of Commerce. 1963, 353 pp. GPO, $2. General business indicators: (including gross national product, national income, personal income, and plant and equipment expenditures) prices, employment, finance, etc.; statistics extend back to 1939.

CATALOG OF UNITED STATES CENSUS PUBLICATIONS. (See listing under Bibliographies.)

COUNTY AND CITY DATA BOOK: 1962 (A STATISTICAL ABSTRACT SUPPLEMENT). Bureau of the Census, U.S. Department of Commerce. (Issued every several years, usually after the results of a cycle of major censuses have been published.) 669 pp. GPO, $5.25. Information on business, manufacturers, governments, agriculture, population, housing, vital statistics, bank deposits and savings and loan associations, and other subjects.

COUNTY BUSINESS PATTERNS: FIRST QUARTER 1962. Bureau of the Census, U.S. Department of Commerce. (Issued for each year, 1946–51, and for 1953, 1956, and 1959; to be issued annually beginning with issue for 1964.) In 10 parts (15 books); paging and prices vary. GPO, price for complete set, $23.75. Price list for individual books available from Bureau of the Census. Information on number of business and industrial reporting units, num-

ber of employees, taxable payroll, and number of reporting units by employment size-class in each county during the first quarter of the year.

HISTORICAL STATISTICS OF THE UNITED STATES; COLONIAL TIMES TO 1957. Bureau of the Census, U.S. Department of Commerce. 1960, 78 pp. GPO, $6. Basic reference book for earlier statistics.

INDUSTRIAL STATISTICS GUIDE AND FINDER CATALOG; A BIRD'S-EYE VIEW OF THE CENSUS INDUSTRIAL STATISTICS PROGRAM. Bureau of the Census, U.S. Department of Commerce. 1960, 57 pp. 50¢. For sale by the Bureau of Census, or any of the field offices of the Department of Commerce. Summarizes the type of data available in Census publications, such as the Census of Manufacturers, and gives additional sources of information.

NEW CENSUS INFORMATION FOR YOUR BUSINESS. (Small Marketers Aids 70) Small Business Administration. 1961, 4 pp. Free. Examples of how census statistical reports may be used in making informed business decisions.

PRACTICAL BUSINESS USE OF GOVERNMENT STATISTICS. (Small Business Management Series 22) Small Business Administration. 1959, 31 pp. GPO, 20¢. An introduction to utilizing government statistics for marketing and other business purposes.

STATISTICAL ABSTRACT OF THE UNITED STATES 1963. (Annual) Bureau of the Census, U.S. Department of Commerce. 1036 pp. GPO, $3.75. The standard summary of national statistics. Information on the labor force, population, business enterprise, national income, etc.

STATISTICAL SERVICES OF THE UNITED STATES GOVERNMENT. Bureau of the Budget, Executive Office of the President. Revised edition 1963, 136 pp. GPO, $1. A guide to economic and social statistics, with emphasis on the statistical information made available to the public.

STATISTICS AND MAPS FOR NATIONAL MARKET ANALYSIS. (Small Business Bulletin 12) Small Business Administration. 1959, 12 pp. Free. Sources of information useful in national market analysis and measurement.

Store Location

REDISTRIBUTION OF TRADE IN POPULATION SHIFTS. (Management Research Summary 139) Small Business Administration. 1963, 4 pp. Free. Pertinent findings from a study of the effects of mobility from large cities to suburban areas of retail, wholesale, and services trades in metropolitan areas of Rhode Island.

SUBURBAN SHOPPING CENTERS. (Small Business Bibliography 27) Small Business Administration. Revised 1963, 8 pp. Free. Selective list of references.

SITE EVALUATION FOR SMALL RETAILERS. (Management Research Summary 78) Small Business Administration. 1962, 4 pp. Free. Key points from survey of trade associations, trade publications, professional consultant firms, and retailers in seven Oklahoma communities regarding factors that affect the suitability of a retail site. Discusses the drive-in, shopping centers, and downtown location.

SMALL BUSINESS AND THE SUPERHIGHWAY ERA. (Management Research Summary 6) Small Business Administration. 1961, 4 pp. Free. A survey of service and retail businesses in South Dakota to determine how they will be affected by two new interstate highways.

SMALL STORE OPPORTUNITIES IN PLANNED SHOPPING CENTERS. (Management Research Summary 17) Small Business Administration. 1961, 4 pp. Free. Study of 81 shopping centers in the eastern part of the United States which suggests solutions to the problem of creating more opportunities for small retailers in shopping centers.

STORE LOCATION. (Small Business Bibliography 16) Small Business Administration. Revised 1964, 8 pp. Free. Sources of information on selecting a location.

Taxation

DISASTERS, CASUALTIES AND THEFTS; HOW THE FEDERAL INCOME TAX APPLIES. (Document 5174) Internal Revenue Service, U.S. Department of the Treasury. March 1964, 16 pp. Free from local District Director of Internal Revenue. Specifies what property losses are deductible.

EMPLOYER'S TAX GUIDE FOR THE WITHHOLDING, DEPOSIT, PAYMENT, AND REPORTING OF * * * FEDERAL INCOME TAX WITHHELD, SOCIAL SECURITY TAXES AND FEDERAL UNEMPLOYMENT TAX. (Circular E, IRS Publication 15) Internal Revenue Service, U.S. Department of the Treasury. Revised. February 1964, 32 pp. Free, from local District Director of Internal Revenue.

THE ESTATE-TAX VALUATION PROBLEM IN FAMILY-OWNED FIRMS. (Management Research Summary 124) Small Business Administration. 1963, 2 pp. Free. Key points of a survey of 401 officers of manufacturing, mining, trade, and service firms to determine major reasons for decisions to sell or merge; and an examination of 150 court cases on substantial tax valuation issues.

FEDERAL TAXES AND LEGAL FORM OF SMALL FIRMS. (Management Research Summary 129) Small Business Administration. 1963, 2 pp. Free. Special tax problems faced by businesses starting as sole proprietorships and changing to another form.

OVERLAPPING SALES TAXES AND SMALL BUSINESS. (Management Research Summary 15) Small Business Administration. 1961, 4 pp. Free. Alabama study which concluded that some form of integration of State and local taxes should be adopted to reduce uncertainty, promote simplicity, contain overhead expenses, and minimize competitive disadvantages.

TAX COMPLIANCE COSTS IN SMALL FIRMS. (Management Research Summary 186) Small Business Administration. 1963, 4 pp. Free. Pertinent findings from a study regarding nature of taxes small firms are required to collect; activities of the firm directly related to the collection, accounting, reporting, and payment of these taxes; costs of compliance with tax requirements; and ways of controlling the costs.

TAX GUIDE FOR SMALL BUSINESS; INDIVIDUALS, CORPORATION, PARTNERSHIPS, INCOME, EXCISE AND EMPLOYMENT TAXES. (IRS Publication 334) Internal Revenue Service, U.S. Department of the Treasury. Annual, GPO or local District Director of Internal Revenue. 1964 edition 40¢. Discusses many of the Federal tax problems incident to conducting a trade, business, or profession; acquiring a going business; and selling a business.

Textile Industry

ARE YOUR TEXTILE LABELS LEGAL? (Small Marketers Aids 58) Small Business Administration. 1959, 4 pp. Free. An explanation of the Textile Fiber Products Identification Act.

INVENTORIES IN THE TEXTILE CYCLE. Business and Defense Services Administration, U.S. Department of Commerce. 1961, 67 pp. GPO, 45¢. A study of the causes of fluctuations in the textile business cycle.

SMALL SUPPLIERS IN A CHANGING MARKET. (Management Research Summary 69) Small Business Administration. 1962, 4 pp. Free. Pertinent findings from a study of small firms in Utica, N.Y., area which adjusted to electronics and metal trades after the decline of the textile industry.

TEXTILE OUTLOOK FOR THE SIXTIES. Business and Defense Services Administration, U.S. Department of Commerce. 1960, 54 pp. GPO, 35¢. An analysis of projected trends for the economy as a whole and the textile industry.

Tourist Trade

ALASKA'S TOURIST BUSINESS. (Management Research Summary 110) Small Business Administration. 1963, 4 pp. Free. Highlights tourist resources and gives visitor survey statistics.

NORTH DAKOTA'S VACATION AND RECREATION INDUSTRY. (Management Research Summary 99) Small Business Administration. 1963, 4 pp. Free. Discusses adequacy of existing facilities, opportunities for new ones, and methods a small businessman could use to study a given area's potential as a location for tourist-oriented business.

SMALL BUSINESS IN THE EASTERN OKLAHOMA LAKE REGION. (Management Research Summary 22) Small Business Administration. 1961, 4 pp. Free. Summarizes results of survey covering five artificial lake regions in eastern Oklahoma to obtain information about opportunities and problems related to the recreational aspects of inland water development.

TOURISM'S EFFECT ON HAWAIIAN SMALL BUSINESS. (Management Research Summary 165) Small Business Administration. 1963, 2 pp. Free. Evaluates its growth, contribution to income and employment and the outlook for small business in the overall economy.

THE TOURIST AND RECREATION INDUSTRY IN VERMONT. (Management Research Summary 179) Small Business Administration. 1963, 2 pp. Free. The impact of the tourist industry on the State's general economy, on selected retail and service receipts, and on other businesses and government.

THE TOURIST INDUSTRY IN THE U.S. VIRGIN ISLANDS. (Management Research Summary 175) Small Business Administration. 1963, 2 pp. Free. Examines vacation-related businesses, the principle industry of the Virgin Islands, in order to consider ways of further developing tourist trade.

VACATION-TRAVEL BUSINESSES IN NEW HAMPSHIRE. (Management Research Summary 84) Small Business Administration. 1962. 4 pp. Free. Summarizes a report dealing with an inventory of lodging places, the labor force, vacation expenditures, and origin of guests.

Trade Associations

DIRECTORY OF NATIONAL ASSOCIATIONS OF BUSINESSMEN 1961 listed under Directories.

SMALL BUSINESS USE OF TRADE ASSOCIATION PROGRAMS. (Management Research Summary 80) Small Business Administration.

1962, 4 pp. Free. Raises pertinent basic questions which must be dealt with by trade groups seeking to increase the economic well-being of small-firm members. Points out problem areas in trade association services, use of services by small firms, and organization of trade associations.

Trade Regulation

DOING BUSINESS THE PACA WAY * * * POINTERS ON TRADING PRACTICES PRESCRIBED BY THE PERISHABLE AGRICULTURE COMMODITIES ACT. Agricultural Marketing Service, U.S. Department of Agriculture. 1960, 62 pp. Free. A collection of articles on sound trading practices.

EXPORTING TO THE UNITED STATES. Bureau of Customs, U.S. Department of the Treasury. 1963, 86 pp. GPO, 50¢. General information on customs laws and regulations covering goods imported into the United States.

FEDERAL FOOD, DRUG, AND COSMETIC ACT, AS AMENDED, AND GENERAL REGULATIONS FOR ITS ENFORCEMENT, TITLE 21, PART I. Food and Drug Administration, U.S. Department of Health, Education, and Welfare. 1963, Looseleaf. GPO, 50¢. Includes color additive amendments of 1960.

LAWS, REGULATIONS AND OTHER INFORMATION RELATING TO FOREIGN-TRADE ZONES IN THE UNITED STATES. Foreign Trade Zones Board. 1959, 77 pp. GPO, 30¢. How the foreign trade zones in operation in New York, New Orleans, San Francisco, and Seattle may be of use to importers and exporters.

ORGANIZATION, PROCEDURE, AND RULES OF PRACTICE. Federal Trade Commission. August 1963, 70 pp. Free. A description of the functions and operations of the FTC.

THE PACKERS AND STOCKYARDS ACT; WHAT IT IS, HOW IT OPERATES. Agricultural Marketing Service, U.S. Department of Agriculture. (Program Aid 399.) 1963. 9 pp. Free. How the Packers and Stockyards Act regulates business practices of those engaged in interstate and foreign commerce in livestock, live poultry marketing, and meat and poultry packing.

A SUMMARY OF U.S. EXPORT CONTROL REGULATIONS. Bureau of Foreign Commerce, U.S. Department of Commerce. 1962, 22 pp. GPO, 20¢. When an export license is needed and how to apply for it.

TRADE PRACTICE RULES. Federal Trade Commission. These rules are in the nature of advisory opinions for the guidance of businessmen

and are designed to eliminate and prevent, on a voluntary and industry-wide basis, trade practices and methods of competition and business behavior in an industry which constitute violations of laws administered by the Commission. Some of the more recent trade practice rules are as follows:

1. HOUSEHOLD FURNITURE INDUSTRY, December 18, 1963. Free.
2. WIRE ROPE INDUSTRY, January 18, 1963. Free.
3. METALLIC WATCH BAND INDUSTRY, June 30, 1962. Free.
4. STATIONERS INDUSTRY, June 15, 1962. Free.
5. LUGGAGE AND RELATED PRODUCTS INDUSTRY, June 30, 1962. Free.

A complete list of TRADE PRACTICE RULES may be found in the FEDERAL TRADE COMMISSION LIST OF PUBLICATIONS.

WHAT RETAILERS SHOULD KNOW ABOUT BEING LICENSED UNDER THE PERISHABLE AGRICULTURE COMMODITIES ACT. (AMS–357) Agricultural Marketing Service, U.S. Department of Agriculture. 1960. Free.

Trademarks

GENERAL INFORMATION CONCERNING TRADEMARKS. Patent Office, U.S. Department of Commerce. 1960, 27 pp. GPO, 15¢. Definition and functions of trademarks, registration of trademarks, etc.

Urban Renewal

FINANCING AREA DEVELOPMENT. Area Redevelopment Administration, U.S. Department of Commerce. 1962, 11 pp. GPO, 15¢. Deals with the first two provisions of the Area Redevelopment Act—Loans to private industry and loans and grants to communities for needed public facilities.

HANDBOOK OF FEDERAL AIDS TO COMMUNITIES. Area Redevelopment Administration, U.S. Department of Commerce. 1963, 63 pp. GPO, 40¢. Covers nature of programs, eligibility, and available publications.

HOW URBAN RENEWAL PROJECTS AFFECT SMALL BUSINESS. (Management Research Summary 1) Small Business Administration. 1960, 4 pp. Free. A study of dislocated firms in Hartford and New Haven, Conn.

MINIMUM PROPERTY STANDARDS FOR URBAN RENEWAL REHABILITATION. (See listing under Building Industry.)

Virgin Islands

THE VIRGIN ISLANDS OF THE UNITED STATES. Office of the Territories, U.S. Department of the Interior. 1963, 8 pp. Free. General information.

Vocational Rehabilitation

SMALL BUSINESS ENTERPRISES IN VOCATIONAL REHABILITATION. (Rehabilitation Service Series 63–27) Vocational Rehabilitation Administration, U.S. Department of Health, Education, and Welfare. 1963, 42 pp. GPO, 20¢. Discusses opportunities for the physically handicapped in small business.

Wages

DIGEST OF STATE EQUAL-PAY LAWS. Revised as of August 1, 1963. Women's Bureau, U.S. Department of Labor. 23 pp. Free. Summary of laws in those States which have enacted such legislation.

A DIRECTORY OF COMMUNITY WAGE SURVEYS 1948–June 1963. Bureau of Labor Statistics, U.S. Department of Labor. 27 pp. Free. Listing of surveys by city, or by date of the more comprehensive reports. Revised periodically.

EMPLOYMENT AND EARNINGS—ANNUAL SUPPLEMENT ISSUE. (Various months) Bureau of Labor Statistics, U.S. Department of Labor. GPO, $1. Average annual hourly and weekly earnings for production workers by industry, also by State or area. Other tables on labor turnover rates and number of employees.

HANDY REFERENCE GUIDE TO THE FAIR LABOR STANDARDS ACT. Wage and Hour and Public Contracts Divisions, U.S. Department of Labor. Reprinted April 1963, 17 pp. Free.

INDUSTRY WAGE STUDIES. Bureau of Labor Statistics, U.S. Department of Labor. The Bureau issues from time to time detailed reports on the wage structure of specific industries. Some industries studied recently are motor vehicles and parts, women's and misses' dresses, communications, machinery, iron and steel foundries. A more complete list may be found in Publications of the U.S. Department of Labor or one of the industry studies. The studies mentioned are available from the Bureau as long as the supply lasts.

MINIMUM WAGE AND THE WOMAN WORKER. (Pamphlet 8) Women's Bureau, U.S. Department of Labor. 1960, 16 pp. GPO, 15¢.

How and why State minimum-wage laws came about, how they operate, and their impact on the worker, the employer, and the community.

WAGES AND RELATED BENEFITS. PART I: 82 LABOR MARKETS, 1962–63. (Bulletin 1345–83) Bureau of Labor Statistics, U.S. Department of Labor. 1964, 116 pp. GPO, 60¢. Information on plant and office workers. Revised annually. PART II: METROPOLITAN AREAS, UNITED STATES AND REGIONAL SUMMARIES, 1961–62. (Bulletin 1303–83) 1963, 82 pp. GPO, 50¢. Revised annually.

Warehouses

GROCERY WAREHOUSE LAYOUT AND EQUIPMENT FOR MAXIMUM PRODUCTIVITY. (Marketing Research Report 348) Agricultural Marketing Service, U.S. Department of Agriculture. 1959, 58 pp. GPO, 40¢.

LOADING OUT FRUITS AND VEGETABLES IN WHOLESALE WAREHOUSES. (Marketing Research Report 282) Agricultural Marketing Service, U.S. Department of Agriculture. 1959, 53 pp. GPO, 35¢. How to improve warehousing operations.

MEASURES OF OPERATING EFFICIENCY IN WHOLESALE FOOD WAREHOUSES. (Market Research Report 399) Agricultural Marketing Service, U.S. Department of Agriculture. 1960, 32 pp. Free. Measures of warehouse labor productivity, work quality, effective plant and equipment use.

WAREHOUSING. (Small Business Bulletin 49) Small Business Administration. 1961, 8 pp. Free. A guide to the literature on warehouses.

Wholesale Trade

IMPROVED ACCOUNTING METHODS FOR WHOLESALE FOOD DISTRIBUTORS. (See listing under Accounting.)

OPERATING COSTS AND RATIOS—WHOLESALE. (See listing under Financial Statements.)

SMALL WHOLESALE BUSINESS IN NEW JERSEY. (Management Research Summary 26) Small Business Administration. 1963, 2 pp. Free. Condensation of a study made to identify the small independent New Jersey "merchant wholesaler," to examine relationships existing in specific costs of doing business and in specific credit financing operations pertinent to a small wholesaling business, and

to analyze information for steps which might be taken to ease problems confronting small-business wholesalers.

THE STRUCTURE OF WHOLESALE PRODUCE MARKETS. (Agricultural Economics Report 45) Economic Research Service, U.S. Department of Agriculture. 1964, 128 pp. $1. A study of the organization and operation of the wholesale fruit and vegetable markets throughout the country, designed to broaden understanding of the food marketing system, and thereby make it more efficient.

WHOLESALERS' SERVICES TO FOOD RETAILERS. (Management Research Summary 104) Small Business Administration. 1963, 2 pp. Free. Summarizes information obtained through interviews with 4 wholesaler groups and 94 retailers affiliated with the wholesale organizations. Discusses services of the wholesalers, wholesaler-to-retailer communications, retailers' use of wholesalers services, and retailers' suggestions regarding improved wholesaler services.

WHOLESALING. (Small Business Bibliography 55) Small Business Administration. 1965, 20 pp. Free. An extensive bibliography.

Women Workers

1962 HANDBOOK ON WOMEN WORKERS. (Bulletin 285) Women's Bureau, U.S. Department of Labor. Biennial. 1962, 160 pp. GPO, 45¢. Part I—Women in the Labor Force; Part II—Laws Governing Women's Employment and Status; Part III—President's Commission on the Status of Women, Part IV—Organization of Interest to Women, Part V—Bibliography on American Women Workers.

Wood-using Industries

FEDERAL INCOME TAX TIPS FOR THE SMALL TIMBER OWNER. Forest Service, U.S. Department of Agriculture. 1960, 8 pp. Free. Deals primarily with treatment of receipts from sales of timber and other forest products.

FOREST INDUSTRY OPPORTUNITIES IN RURAL DEVELOPMENT. (Agriculture Information Bulletin 222) Forest Service, U.S. Department of Agriculture. 1960, 27 pp. Free. Suggestions for starting small wood-using enterprises.

FOREST PRODUCTS LABORATORY SUBJECT LISTS. (See listing under Bibliographies.)

LOCAL BENEFITS FROM TIMBER INDUSTRY EXPANSION. (Technical Paper 172) Central States Forest Experiment Station, U.S. Depart-

ment of Agriculture, Forest Service, 111 Old Federal Building, Columbus, Ohio, 43215. 1960, 17 pp. Free. An analysis of the operating records of 50 successful forest product manufacturers in eastern Kentucky which gives cost-and-return comparisons for the various production stages and processes in the industry.

New Developments in Wood Technology. (Technical Aids for Small Manufacturers 84) Small Business Administration. 1963, 4 pp. Free. Four newly developed wood products and one new treatment process are described.

The U.S. Forest Products Laboratory. (Report 1698 Revised) Forest Products Laboratory, Madison, Wis., 53705. 1960, 19 pp. Free. How the Laboratory's research is designed to help 50,000 small lumber producers.

Woodworking Shops. (Small Business Bulletin 46) Small Business Administration. 1961, 12 pp. Free. A bibliography.

SECTION II—ALPHABETICAL LISTING BY ISSUING U.S. GOVERNMENT AGENCIES

This section lists alphabetically by title under the issuing Government agencies the same publications that appear in Section I—The alphabetical listing by subject—to which they are cross-referenced. Information regarding availability and price, where applicable, is provided in Section I.

*AREA VOCATIONAL SCHOOLS; *VOCATIONAL EDUCATION; *EDUCATIONAL FACILITIES; *EDUCATIONAL FINANCE; CONSTRUCTION COSTS; ENROLLMENT TRENDS; POPULATION TRENDS; PROGRAM PLANNING; *EDUCATIONAL NEEDS; FACILITY REQUIREMENTS PENNSYLVANIA

Planning is presented for an area vocational-technical school to serve three school systems with a total 1960 population of 119,027. Topics discussed include: (1) enrollment projections, (2) present and proposed program offerings, (3) existing and additional facilities needed, (4) financing and cost to each district, (5) possible solutions--additions at present schools or construction of a new building, and (6) recommendations. It was recommended that a new building be constructed to serve 1,480 pupils at a total cost of $4,000,000. (PS)

INTRODUCTION

The approved plan of the State Board of Vocational Education provides for an area technical school which will serve three school systems: the Bethlehem Area Schools, Hellertown-Lower Saucon Schools, and the Northampton Area Schools. There are four aspects to the problem concerning planning for the area school which must be determined. First, how many pupils will need to be served by the area technical school? Secondly, what programs should be offered? Thirdly, what spaces are available and what spaces will be needed to meet these educational needs? And finally, what are the financial implications of such a program?

Each of these topics will be discussed in the chapters which follow.

ENROLLMENT PROJECTIONS

Changes in public school enrollments are related to three basic factors. These factors are the number of births, the net size of in- or out-migration, and enrollments in nonpublic schools.

Births

Complete birth data for each of the individual areas which make up the school systems involved in the area technical school study are not available. However, some idea of the relative numbers involved and of trends may be obtained from birth data for Bethlehem City and for Northampton County as a whole.

Table 1
NUMBERS OF RESIDENT BIRTHS
Bethlehem City and Northampton County
1960 through 1965

Year	Bethlehem City	Northampton County
1960	1,461	3,712
1961	1,453	3,698
1962	1,397	3,594
1963	1,264	3,345
1964	1,191	3,512
1965	1,139	3,159

Both Bethlehem and Northampton County show a definite trend downward in the number of births. The number of women in the most prolific child-bearing age-groups is also small at this time. However, girls born in the years following World War II have just begun to reach the most prolific child-bearing ages. It is possible, therefore, that the downward trend in numbers of births will be halted or reversed.

Net Migration

It is assumed that trends in net migration of public school pupils will parallel closely trends in net migration of the total population. One way in which an approximate measure of net migration may be made is to compare population sizes for two different years, compare the net gain of births over deaths for the intervening years, and attribute the difference to net migration. Table 2 shows birth-death figures for Northampton County and Bethlehem City for the years 1960 through 1965; these data also are shown in Charts I and II.

Table 2
COMPARISON OF BIRTHS-DEATHS DATA
Northampton County and City of Behtlehem, Pa.
1960 through 1965

	Northampton County			City of Bethlehem		
Year	Number of Births	Number of Deaths	Births Less Deaths	Number of Births	Number of Deaths	Births Less Deaths
1960	3,712	2,125	1,587	1,461	756	705
1961	3,698	2,082	1,616	1,453	707	746
1962	3,594	2,064	1,530	1,397	735	662
1963	3,345	2,125	1,220	1,264	793	471
1964	3,512	2,149	1,363	1,191	732	459
1965	3,159	2,199	960	1,139	765	374
Total: 1960-1964 ONLY	17,861	10,545	7,316	6,766	3,723	3,043

NOTE: Data extracted from annual State statistical reports on population.

CHART I

COMPARISON OF BIRTHS AND DEATHS
NORTHAMPTON COUNTY, PENNSYLVANIA

COMPARISON OF BIRTHS AND DEATHS
CITY OF BETHLEHEM, PENNSYLVANIA

Population studies of the Joint Planning Commission for Lehigh and Northampton Counties in November 1964 showed the population for each area in 1960 and the allocation to each area for 1965 projected by IDE Associates, Inc. These figures are reproduced in the following table.

Table 3
COMPARISON OF POPULATION DATA
City of Bethlehem and Northampton County, Pa.
1960 and 1965

Area	1960*	1965**	Estimated Net Growth 1960-65
Bethlehem (Lehigh County)	20,083	19,989	- 94
Bethlehem (Northampton County)	55,325	54,635	- 690
Total Bethlehem	75,408	74,624	- 784
Northampton County	201,412	206,918	5,506

* Actual
** Estimated

A comparison of this information with Table 2 reveals that, while Northampton County could have grown by 7,316 individuals due to an excess of births over deaths, it was estimated that only 5,506 people would be added to the 1960 population. These data imply a net out-migration of 1,810 people from the County.

A review of birth records for the area served by the technical school reveals a slight decrease in total numbers of births. This is shown in Table 4 and Chart III.

Table 4
LIVE BIRTHS TO RESIDENTS
Bethlehem-Hellertown/Lower Saucon-Northampton Area
1959 through 1965

Moore Township	51	62	79	79	81	82	90
Northampton Borough	168	171	188	141	149	142	116
	375	414	446	411	425	404	402
TOTALS	2,339	2,376	2,398	2,211	2,156	2,090	1,972

These figures for the City of Bethlehem do not agree in certain details with the projections of the Bethlehem City Planning Commission. The Bethlehem City Planning Commission indicates that, from 1960 through 1964, 363 more dwelling units were created than were destroyed. Since each dwelling unit typically accounts for 3.22 people, this would represent a gain of approximately 1,169 people rather than the loss of 784 estimated by the County planning group.

Actually, since there were 22,652 households in the City of Bethlehem in 1960, a change of less than a tenth of a person per household in the average number of

CHART III

BIRTHS IN AREA SERVED BY TECHNICAL SCHOOL

1959-1965

people per household could reconcile these data; this is possible in view of the decreasing number of births, which acts in the direction of reducing the population per household.

In view of the recent construction activity east of Route 512 and north of Easton Avenue, it seems likely that the population of the City of Bethlehem will continue to grow, although perhaps more slowly than it has in the past.

Similarly, the City of Bethlehem should have grown by 3,043 due to an excess of births over deaths. Instead, a loss of 784 was projected. This implies a net out-migration of 3,827 people.

Finally, comparing the City with the County shows that, since the County's loss due to migration is less than the City's loss, the portion of the County outside of the City had a net in-migration of 2,017 individuals.

General Population Change

A review of population changes since 1930 by school district areas is shown in Table 5 and Chart IV. Growth in the population of the City of Bethlehem far outweighed changes in other communities in its effect upon growth of the population of the area. It has been seen that growth in the City of Bethlehem has leveled off between 1960 and 1965, but growth in the other districts making up the area school district has proceeded rapidly.

Table 5
POPULATION GROWTH BY SCHOOL DISTRICT AREA
1930 - 1960

Area	1930	1940	1950	1960	Per Cent Change 1950 - 1960

* Parts of Lower Saucon Township annexed to Bethlehem City in 1942 and to Hellertown Borough in 1941

CHART IV

POPULATION GROWTH BY SCHOOL DISTRICT AREA
1930-1960

In addition, the population is continuing to grow in other parts of the technical school area. A rough idea of the potential for growth may be obtained by examining the population density.

Table 6
POPULATION DENSITY BY SCHOOL DISTRICT AREA
1960

	Area in Square Miles	Population in 1960	Population Density per Square Mile
Bethlehem City	19.7	75,408	3,828
Bethlehem Township	14.8	6,439	435
Freemansburg Borough	0.8	1,652	2,065
Hanover Township	6.9	1,932	280
Fountain Hill Borough	0.8	5,428	6,785
Hellertown Borough	1.4	6,716	4,797
Lower Saucon Township	25.0	5,536	221
Allen Township	11.5	1,183	103
Bath Borough	0.9	1,736	1,929
Chapmans Quarry	0.5	237	474
East Allen Township	14.9	1,538	103
Lehigh Township	30.9	4,411	143
Moore Township	38.3	3,373	88
Northampton Borough	2.6	8,866	3,410

In the Bethlehem Area schools, the greatest potential for growth is in Bethlehem Township and Hanover Township. The new high school should tend to accelerate growth in Bethlehem Township. Lower Saucon has a greater potential population than has Hellertown. Allen, East Allen, Lehigh, and Moore Townships have the greatest potential impact on populations in the Northampton Area schools. Chapmans Quarry's population can grow, but, because of the borough's small size, this would not have the same eventual impact on the total as the other sections with their larger areas.

The Joint Planning Commission for Lehigh and Northampton Counties is optimistic about job opportunities in the area by 1975. They must judge, therefore, that in-migration will take place at a faster rate than would be revealed through vital statistics. Their latest (June 1966) population estimate for the two Counties for 1975 is 520,000, rather than the 491,275 which had been forecast in November, 1964.

Building permit records also may be indicative of the area's growth. For Northampton County, building permits in 1964 were double the number issued in 1960. Of course, not every building permit is used. The building permit record of several communities involved in this study is presented in Table 7.

Table 7

Northampton	19	0	6	0	13	0	17	0	10	0

* During this same period, 666 dwelling units were razed in the City of Bethlehem

** Recent figures for 1965 list 160 one-family and 370 apartment units for City of Bethlehem, a continuation of the recent trend

In Lower Saucon Township, there were 41 permits for homes in 1959, 38 permits in 1962, and 101 permits between January 1 and August 30, 1965. This is a sharp increase and is indicative of growth potential for the area.

In summary, one sees continuous growth for the area. To some extent, this growth has been slowed by the fact that birth rates have been low. Had birth rates remained at 1959 levels, the population of the area would have grown rapidly. Continued job opportunities, particularly in the service trades; an improved network of highways as shown in the JPC Planner, Volume III, Number 1 (March 1966), issued by the Joint Planning Commission, Lehigh-Northampton Counties; and the availability of suitable land will continue to attract people to the area.

Of course, after July 1967, a new State law requires approval of the State Department of Health for individual sewage disposal systems on less than one acre of land. This will tend to increase plot sizes for new houses except in those areas which now have, or are installing, sewers.

School districts in the area will reflect these changes. Future enrollments are estimated later in this report.

Nonpublic Schools

Enrollments in local parochial schools are given in Table 8. In addition, a new 10-room parochial elementary school is being constructed in Colesville which will affect Lower Saucon, and a parochial elementary school in West Bethlehem at Saints Simon and Jude is being replaced by construction which will provide four additional classrooms.

These factors have been reflected in the projected elementary enrollments for the Bethlehem Area schools and for the Hellertown-Lower Saucon schools. However, it is likely that new parochial elementary facilities and possibly high school facilities will

continue to be built as the area grows in population. While new parochial schools could affect public school enrollments, they would have relatively little effect on population projections for the area technical school. This is so because both public and parochial

pupils are eligible to obtain dual enrollment in the technical school. Therefore, the pupil who needs vocational or technical education will enroll in the area technical school whether or not he is presently enrolled in a public or a parochial school.

In projecting enrollments, it has generally been assumed that approximately the same percentage of pupils would enroll in parochial schools as at present. However, in Bethlehem, the public enrollments in the first eight grades have been reduced by 20 each to reflect the parochial elementary enlargement in West Bethlehem. In the Hellertown-Lower Saucon public schools, the elementary enrollments have been lowered by 40 in each grade to reflect construction of the new elementary school there.

Bethlehem Area School District Enrollments

The following table shows the grade-by-grade enrollments in the Bethlehem Public Schools. There has been a steady growth in total numbers. However, this growth appears to be due to a progression of larger classes through the grades. First grade enrollments for the past several years appear to have stabilized.

It is not anticipated that there will be substantial changes from grade-level survival experiences of the recent past. The enlargement of the new elementary parochial school is reflected in the projection for the first eight grades. These data have been projected as far as the 1975-76 school year for grades ten through twelve, with minor adjustments which reflect better holding power for the schools in grades eleven and twelve. Chart V shows in graphic form the enrollment pattern for grades ten through twelve in the Bethlehem Area School District.

CHART V

PUBLIC SCHOOL ENROLLMENTS
GRADES 10-12 TOTAL
BETHLEHEM AREA SCHOOL DISTRICT, PENNSYLVANIA

Hellertown-Lower Saucon School District Enrollments

The grade-by-grade enrollments for the past six years were studied. In contrast to the data for the Bethlehem Area Schools, the kindergarten enrollments were smaller than enrollments in first grade the following year. This appears to be caused by the fact that no transportation had been provided for kindergarten children by the school district. However, this policy was altered in the spring of 1966 and, as a result, kindergarten enrollments will probably rise by about 20 per cent. This change will not be accompanied by higher-than-normal first grade enrollments.

It is considered likely that the established pattern of grade-level survival will remain much the same as it has in the past up until 1970. Due to expected growth of the population of the area, it is anticipated that the rate of survival from 1970 through 1974 will be slightly higher than it has been. This will reflect growth in Lower Saucon due to its proximity to Bethlehem, the connecting Bethlehem speed route, and the availability of sewers. The construction of the new parochial elementary school is reflected in the figures for the first eight grades.

Detailed enrollment projections are shown in Table 10 and Chart VI.

PAST ENROLLMENTS AND ENROLLMENT PROJECTIONS
GRADES 10-12

HELLERTOWN-LOWER SAUCON SCHOOL DISTRICT

Northampton Area School District Enrollments

Enrollments in the Northampton Area schools have been rising substantially. At the present time, the district is sparsely settled. Although the one-acre requirement for sanitary disposal will cause some rise in land costs with respect to new homes, tremendous amounts of easily developable land are located in the district. With a favorable location and the possibility of improved transportation links to Allentown and Bethlehem, there is every reason to expect continued growth.

Detailed enrollment projections are contained in Table 11 and Chart VII. The projections indicate a 50-per-cent increase in the population of grades ten through twelve between 1965-66 and 1975-76.

CHART VII

PAST ENROLLMENTS AND ENROLLMENT PROJECTIONS
GRADES 10-12
NORTHAMPTON AREA SCHOOLS

Technical and Vocational Enrollments

The area technical school grew out of the existence of the Bethlehem Area Vocational and Technical School. Before the formation of the area school, pupils from Hellertown-Lower Saucon and the Northampton Area schools were sent to the vocational school on a tuition basis. This meant that they were enrolled full-time at the Liberty High School and ceased to be part of their local high school. This program had only limited appeal for these young people.

As a result of the formation of the area technical school in 1965, attendance at the technical school involved only half a day, with the other half spent at the local high school. This arrangement seems to appeal to the pupils. As a result, enrollments have risen sharply.

The principal's report to the superintendent dated October 18, 1965, showed the following enrollments:

Trade and industrial	532 pupils
Technical	156 "
Distributive education	27 "
Total of	715 pupils

The total included 56 pupils from the Northampton Area plus four full-time tuition pupils. There were 25 pupils from the Hellertown-Lower Saucon schools, plus six full-time tuition pupils.

The enrollment data for 1966-67 shows a total of 877 enrolled, of whom 131 are from Northampton and 60 from Hellertown-Lower Saucon. These data are set forth in Table 12 which follows.

Table 12
AREA TECHNICAL SCHOOL ENROLLMENTS
1965-66 and 1966-67

Projecting Enrollments for the Area Technical School

The results of a study being made of post-high-school occupational experiences of 10,000 vocational and 3,000 academic graduates from 1,000 high schools in 38 states* indicates the following:

1. Vocational graduates obtain their first job after graduation much more quickly than do academic graduates; the average time to get a first full-time job for vocational graduates is less than six weeks

2. Vocational graduates enjoy substantially greater employment security than do academic graduates without college education

3. There is very little mobility among vocational graduates; less than 3 per cent obtained a first full-time job by moving to another city; and 11 years after graduation, 87 per cent still reside and work in the city in which they went to school

* "The Process and Product of High School Level Trade and Industrial Vocational Education in the United States," American Institute for Research, Pittsburgh, Pa. 1966.

4. A comparison of vocational and academic graduates without a college education reveals no difference in conversational interests, leisure-time activities, or affiliation with community organizations

It also is important not to overlook the growing role of women in the labor force. One third of the total labor force is made up of women. Half of the women between the ages of 35 and 45 work part- or full-time.

As these facts become more widely appreciated, it seems likely that vocational enrollments will continue to grow. It is not uncommon for 15 per cent of the pupils in grades ten through twelve to be enrolled in trade and industrial education programs. As the area technical school is near the center of the Allentown-Bethlehem-Easton industrial complex, it seems reasonable to assume heavier enrollments in trade and industrial programs than might be typical of schools where fewer potential job opportunities present themselves.

An examination of the Bethlehem Area public school enrollments reveals growth to a point exceeding 21 per cent of the senior high school enrollment. Growth has been slow because of two factors: the lack of space for new programs or the expansion of existing programs, and the comparatively small enrollment of girls in the vocational and technical programs. Only 4 per cent of the technical students and only about one in eight of the trade and industrial (including distributive education) pupils are girls. If facilities and programs were to be provided, it is very likely that the number of girls enrolled in technical and vocational courses would rise considerably. Therefore, it does not seem unreasonable to assume that about 25 per cent of the Bethlehem Area public senior high school pupils might be enrolled in the area technical school. This is but a modest advance from existing percentages.

The Hellertown-Lower Saucon enrollments in the area technical school have doubled in one year, moving from 5 per cent of the public senior high school pupils to 10 per cent for 1966-67. The 1966-67 figure is about three times as large as it was in 1964-65, before the formation of the area technical school. It also is likely that more seniors will be involved as the area technical school enters its third year of operation. A conservative estimate of area technical school enrollments for Hellertown-Lower Saucon places them at 15 per cent of the public senior high school population.

Enrollments in the area technical school from the Northampton Area schools have risen sharply - from 60 in 1965-66 to 131 in 1966-67. In 1965-66, 6 per cent of the high school pupils enrolled in the area technical school; in 1966-67, this figure had risen to 13 per cent. Table 13 shows the comparatively small number of girls involved in 1966-67. This table also shows the considerable interest of tenth grade boys. If additional offerings for girls were developed to stimulate their enrollment along with the very large enrollment of tenth grade boys, it is again conservative to estimate future Northampton enrollments in the area technical school at about 20 per cent of the senior high school enrollments.

It is more difficult to estimate future area technical school enrollments from parochial schools. The area has had very few such enrollments in the past. However, it seems quite clear that parochial pupils are entitled to dual enrollment in the area technical school, just as are public school pupils, based on their residence in the sending area. It is anticipated that area technical school enrollments from parochial high schools will range between 5 and 10 per cent of the enrollment in grades ten through twelve in the Bethlehem Area. Enrollments will probably start slowly at first and eventually reach about 125 in number as space and programs are expanded.

Table 13
AREA TECHNICAL SCHOOL ENROLLMENTS BY GRADE AND SEX
FOR PUBLIC SCHOOL SENDING DISTRICTS
1966-67

Area	Grade	Boys	Girls	Total
Bethlehem	10	210	11	221
	11	222	8	230
	12	188	47	235
		620	66	686
Hellertown-Lower Saucon	10	17	1	18
	11	17	6	23
	12	12	7	19
		46	14	60
Northampton	10	68	1	69
	11	29	1	30
	12	18	14	32
		115	16	131

Enrollment projections for the public schools anticipate that parochial enrollments would continue to take the same percentage of the total number of pupils as at present. In the face of enrollment growth, this assumes continued growth of parochial school enrollments also. Parochial enrollments in the area technical school are included in the table which follows. This table, showing anticipated area technical school enrollments, is based on the assumption that space will be made available to expand the offerings. Obviously, if no space is available, pupils will have to be turned away and the school enrollment will be limited. It is anticipated that growth will proceed gradually for two years until expanded facilities may be provided.

	Hellertown-Lower Saucon	625	94	15
	Northampton Area	1,447	290	20
	Parochial Schools	--	125	-
			1,482	

Based on these calculations, the area technical school should be able to educate 1,480 pupils. In order to do this, it is recommended that the school be designed to hold a maximum of 1,480 students if each and every course offering were to be fully subscribed.

Evening Shop Program

A shop program is offered at the technical school during the evening hours. The most recent enrollment total was 976. Of course, not all of these people appear at school in the same evening; however, the substantial size of this program indicates the substantial day and evening use of the technical school by residents of the area.

PROGRAM OFFERINGS

During the 1965-66 school year, there were 16 program offerings. These offerings and the enrollment in each are listed in Table 15.

Table 15

		89	
	TOTAL ENROLLMENTS:	887	

In order to meet the vocational and technical needs of young people in a period of expanding enrollments, it is proposed that some changes and additions to the offerings be made.

Planning forecasts for the area indicate greater diversification of occupations and a greater emphasis upon the service occupations. This is reflected in the recommendations given here. In addition, the building trades construction offering could be expanded to include full programs in the trowel trades and carpentry.

Food service eventually should be developed as a three-year program. Distributive education is sufficiently complex to warrant a two-year program starting in the eleventh grade. Additions to the present program for girls are imperative. Programs which have wide appeal to girls, are socially useful, and customarily afford ready employment include:

Cosmetology	Grades 11 and 12
Practical Nursing	Grade 12

Other suggested additions include the following:

Automotive Technician	Grades 10-12
Building Maintenance	Grades 11 & 12, or Grade 12
Heating, Ventilating, and Air-conditioning	Grades 11 and 12
Instrumentation	Grades 11 and 12

In order to accommodate up to 1,480 pupils in the day-time program at the area technical school, the following spaces are needed for the program.

Table 17

TOTALS:	875	605	43,650	42,750

SUMMARY, PRESENT SHOP AREAS AT LIBERTY SCHOOL

Present pupil capacity	875	
Pupils needing additional space	605	
Total Desirable Number of Students:		1,480
	Square Feet	
Total present shop areas	43,650	
Additional space needed in shops only to meet State standards for 1,480 pupils	42,750	
Total space required to accommodate 1,480 pupils:		86,400

Thus it is clear that the present shop area is roughly half of that which is necessary to accommodate 1,480 pupils.

A review of the present spaces indicates a capacity to offer programs to approximately 875 pupils. However, there are a number of shortcomings in the building at this capacity.

There are really no separate spaces for the technical program. Courses in this program are "borrowing" space in the other shops. Technical programs should have spaces of their own with equipment geared to their advanced character.

The automotive facilities are very limited in size: The auto mechanics shop is wholly inadequate and the body shop is too small. The carpentry shop also is small, which tends to cause some crowding of machines and provides insufficient clear space to develop large projects. The electrical shops and machine shops are ample in size.

The school lacks a good library. The various trade, industrial, and technical books and magazines should be collected in one spot for use by day pupils as well as by evening students, from all over the area served. To duplicate these materials in three or four regular school libraries would be wasteful. It also would be especially difficult for parochial pupils, for whom there would be a problem of availability of these resources.

Most of the shops recommended to handle the growing technical and vocational school population would not fit into existing classroom spaces with their limited corridor-wall to exterior-wall width. Obviously, long narrow shops are inefficient and difficult to supervise. In fact, no shop contemplated for this school should be over twice as long as it is wide if it is to function at all well.

IV

POSSIBLE SOLUTIONS AND RECOMMENDATIONS

Since the present building can accommodate 875 pupils only with some forcing, roughly double the present amount of space must be developed for the additional 605 pupils. There are four possible ways to provide sufficient space for the programs needed:

1. To enlarge the present facility through additional structure or structures at the Liberty School site

2. To construct an addition near another school site, such as the Freedom School

3. To construct an entirely new technical and vocational school at the Freedom School site

4. To construct a new technical and vocational school at a site outside of Bethlehem and away from the existing high school

Each of these possibilities has certain advantages and disadvantages.

Additions at Liberty School

Conversions of the present structure at Liberty School would not be feasible because of the limited corridor-window width mentioned earlier. Obviously, the only way to develop more space would be to expand outward, or upward, or both. Expansion upward is not recommended because many of the proposed shops need convenient access from street level. This is particularly important when moving bulky supplies or equipment in or out. Also, extending an existing structure upward has often proved to be quite expensive. About

the only area that might be considered for this procedure is the space over the welding shop. In addition, there is the State's recommendation for single-story shop buildings. Expansion outward presents real problems. There is no one area sufficiently large for new construction which could accept the proposed spaces as a unified whole. It would mean adding to the front and the rear of the building or else eliminating the football field.

Since Liberty High School is on a small site to begin with, taking further space on the site for buildings is unwise. Parking already is a problem, particularly during evening hours. It should also be recognized that, while the enrollment projections have been carried through 1975-76, this is only a 10-year period. As the area continues to grow, it is likely that the technical and vocational school will need to grow with it. This will not be possible at the Liberty School site. For the good of both the educational program at Liberty High School and those at the area technical school, this probably is the least desirable solution to the problems of overcrowding.

Addition Elsewhere

A second possibility is to construct an addition elsewhere, possibly at the new Freedom School, and to retain the present facilities at Liberty High School. This, however, will lead to a number of problems with regard to bus transportation of pupils. Many extra trips between the buildings will be needed. In addition, the administration of two building complexes adds to staffing problems. Secretarial services, guidance counselors, and administrators will be needed at both locations. There would be greater difficulty in sharing the use of supplies and equipment. Perhaps most important, the school would come

to lack an identity of its own. If anything, this might tend to discourage enrollments from the Hellertown-Lower Saucon and Northampton Areas.

Constructing a New Building Near the Freedom School Site

From the instructional point of view, the construction of a new building near the Freedom School is the best solution to the problem of increasing enrollments. This plan would permit the development of a unified structure having all spaces of the right size and shape for the technical and vocational programs and permitting the location of shops with inter-related programs adjacent to one another. It also would permit organization of the school under a unified administration. Thus the school would have an identity of its own, free from any association with either the Liberty or Freedom Schools.

The building could be located close enough to Freedom School so that pupils from that school could walk to the vocational-technical school, which would help to reduce transportation costs. A further advantage of locating the school on a new and more adequate site is the assurance of the potential for future expansion. The area served by the technical school seems destined to grow steadily. With an increasing population will come increasing space demands upon vocational and technical education.

Constructing a New Building at a Site Outside of Bethlehem

While the proposition of a school located away from Bethlehem enjoys some of the advantages of the preceding one, it presents a transportation problem. Obviously, transportation is simplified if the vocational and technical school is located adjacent to one

of the major senior high schools in the area. This is difficult to do at either Northampton or Hellertown-Lower Saucon and is now a serious problem at Liberty High School. The technical school should be located relatively close to the center of its student population. If a sizable number of its students can walk to vocational school from their regular high school, transportation problems and costs can be reduced.

Recommendation

Since the present technical and vocational school is too small for the expanding pupil population which it must serve and because of limitations at the Liberty School site, the best solution for the educational welfare of students in this program is to construct a new facility at the Freedom School site. Enough land should be provided to permit parking, bus loading, and room for future expansion. Since physical education programs will be handled at the sending schools, 30 acres should be sufficient.

This recommendation provides for a technical and vocational school which will offer improved technical facilities, accommodations for more pupils, a greater variety of programs, and more opportunities in vocational education for girls. It will meet the enrollment needs of the next ten years and can be constructed and located so as to provide for future expansion and development.

V

FINANCING

The inevitable question whenever any additions to buildings or new construction are contemplated is "What will it cost?" The answer to this question is never determined in complete detail until the building or addition is actually constructed and the last bill is paid. However, out of past experience with school buildings and assuming typical costs for usual materials and fixed equipment, cost approximations may be made.

Cost Analysis

Using the format of State Form VE-3A and conditions prescribed by the Pennsylvania Department of Public Instruction, a cost analysis was developed as follows.

AREA VOCATIONAL-TECHNICAL SCHOOL BUILDING
REIMBURSABLE PERCENTAGE & ANNUAL AMORTIZATION RENTAL

A General Information

Estimated area of building - square feet	138,000
Number of shop-laboratories	37
Pupil capacity	1,480
Pupil rated capacity	1,237
Amortization - number of years	20
Interest rate	3%

B Building Construction and Other Costs

1.	Structure costs @ $20 per square foot		$2,760,000
2.	Costs other than structure		1,240,000
	a. Site acquisition (25 acres)	$ 50,000	
	b. Site development	60,000	
	c. Machinery, apparatus, equipment and furniture	860,000	
	d. Architects' fees	170,000	
	e. Contingencies and other expenses	100,000	

C	Total Construction Cost and Bond Issue to Finance	$4,000,000.00
D	Structure Construction Cost and Interest	
	1. Structure construction cost	2,760,000.00
	2. Annual payment to amortize $1,000 over 20 years	67.22
	3. Annual amortization rental	185,527.20
	4. Total structure amortization cost for 20 years	3,710,544.00
E	Maximum Reimbursable Amortization Cost Based on Pupil Rated Capacity	
	1,237 pupil rated capacity x $3,000	3,711,000.00
F	Structure Cost Reimbursable Potential or Percentage	
	Item "E" divided by Item D4	100%
G	Costs Other Than Structure and Interest (fully reimbursable)	
	1. Reimbursable costs other than structure	1,240,000.00
	2. Annual payment to amortize over 20 years	67.22
	3. Annual amortization rental	83,352.80
	4. Total amortization cost for 20 years	1,667,056.00
H	Total Project Annual Amortization Rental for 20 Years	
	Items D3 plus G3	268,880.00

TOTAL PROJECT REIMBURSEMENT PERCENTAGE

I	Total Project Amortization Cost Over 20 Years	
	Items D4 plus G4	5,377,600.00
J	Maximum Approved Reimbursable Amortization Cost	
	Items E plus G4	5,378,056.00
K	Total Project Reimbursement Percentage	
	Item J divided by Item I	100%

Moore Township	11,602,600	2.23	89,200	80,280	.6839	54,903	19,216	74,539	50,977	23,562
Northampton Boro	27,781,300	5.33	213,200	191,880	.5000	95,940	33,579	178,159	89,080	89,079
										186,930
	521,086,100	100.00	4,000,000	3,600,000		1,878,380	657,433	3,342,570	1,744,062	1,598,508

(1) CARF = Capital Account Reimbursement Fraction. New fractions for Bethlehem Area, Hellertown-Lower Saucon, and Northampton Area will be available in spring of 1967.
(2) G = Column E x Column F.
(3) H = 35 per cent of Column G.
(4) School District Share = CARF x $3,342,567.
(5) State Reimbursement = CARF x Column I.
* Total cost ($4,000,000) less Federal allocation ($657,433) = $3,342,567.

Cost to Each District

Based on the approved State system of calculating cost of the project to each local district, Table 19 indicates that the local share of the $4,000,000 building project would be $1,598,508, apportioned as follows:

Bethlehem Area	$1,268,504
Hellertown-Lower Saucon	143,074
Northampton Area	186,930

The exact rate of interest for financing will be determined by bond market values at the time of sale. The term is also a matter of judgment. For purposes of estimation, it is assumed that the bonds will be placed for 20 years at 3-3/4 per cent. The annual payment to amortize over 20 years is $71.96 per $1,000. Therefore the annual costs would be as follows:

Bethlehem Area	$ 91,282
Hellertown-Lower Saucon	10,296
Northampton Area	13,451
Total per Year	$ 115,029
Total for 20 Years	$2,300,580

Under State Public School Building Authority rules, an additional 20 per cent must be placed in a reserve fund each year. In effect, the bonds are paid off in a 15-year period rather than over 20 years.

The annual costs for PSBA financing are as follows:

Bethlehem Area	$ 109,538
Hellertown-Lower Saucon	12,355
Northampton Area	16,141
	$ 138,034

Total costs over approximate 15-year period would be $2,070,510.

In the Bethlehem Area the assessed valuation is $237,319,200. Therefore a one-mill tax rate yields $237,319 in taxes. In Hellertown-Lower Saucon the assessed valuation is $31,696,740. Therefore a one-mill tax rate yields $31,697. In Northampton Area the assessed valuation is $43,635,720. Therefore a one-mill tax rate yields $43,636.

The net increase in the tax rates for PSBA financing in the three areas would be as follows:

Bethlehem Area	0.4616 mills
Hellertown-Lower Saucon	0.3898 mills
Northampton Area	0.3699 mills

Therefore, a house assessed at $8,000 in Bethlehem would have an actual tax increase of $3.69 due to the new technical school. Houses assessed at $8,000 in Hellertown-Lower Saucon and Northampton would have tax increases of $3.12 and $2.96 respectively in their yearly tax bills.

If local financing is used, the millage figures would be:

Bethlehem Area	0.3846 mills
Hellertown-Lower Saucon	0.3248 mills
Northampton Area	0.3083 mills

In the same order, these changes would raise annual taxes on a house assessed at $8,000 by $3.08, $2.60, and $2.47 in the respective districts.

Cost of Separate Addition

A separate addition of 42,750 square feet of shop space is the only alternative to this. The space required for such an addition is set forth below.

A SEPARATE ADDITION TO THE AREA VOCATIONAL-TECHNICAL SCHOOL

	Square Feet
Additional shop areas	42,750
5 Theory rooms at 800 square feet	4,000
Library	5,400
Administration	1,450
Total Net Area:	53,600
*Estimated Gross Area:	72,400

*See description in Chapter III

The estimated costs for such a building, using the same basis as for a completely new technical school, is estimated as follows.

ESTIMATED COSTS OF SEPARATE ADDITION TO THE AREA VOCATIONAL-TECHNICAL SCHOOL

A	Building Construction and Other Costs		
	1. Structure costs @ $20 per square foot		$1,448,000.00
	2. Costs other than structure		1,100,000.00
	a. Site acquisition (20 acres)	$ 40,000	
	b. Site development	50,000	
	c. Machinery, apparatus, equipment, and furniture	860,000	
	d. Architects' fees	90,000	
	e. Contingencies and other expenses	60,000	
B	Total Construction Cost and Bond Issue to Finance		2,548,000.00
C	Structure Construction Cost and Interest		
	1. Structure construction cost		1,448,000.00
	2. Annual payment to amortize $1,000 over 20 years @ 3%		67.22
	3. Annual amortization rental		97,334.56
	4. Total structure amortization cost for 20 years		1,946,691.20

D	Costs Other Than Structure and Interest		
	1.	Reimbursable costs other than structure	$1,100,000.00
	2.	Annual payment to amortize over 20 years @ 3%	67.22
	3.	Annual amortization rental	73,942.00
	4.	Total amortization costs for 20 years	1,478,840.00
E	Total Project Annual Amortization Rental for 20 Years @ 3%		171,276.56
F	Total Project 20-Year Amortization Cost at 3%		3,425,531.20

Table 20

CALCULATION OF STATE, FEDERAL, AND DISTRICT SHARES (ADDITION)

School District	Sch. Distr. Share of $2,548,000	Prelim. Est. State Reimbursemt.	Federal Allocation	Sch. Distr. Share of $2,129,155*	State Reimbursement	Cost to Local District
Bethlehem Area	$1,933,932	$ 870,269	$304,594	$1,616,029	$ 808,015	$ 808,014
Hellerton-Lower Saucon	258,367	134,351	47,023	215,896	124,788	91,108
Northampton Area	355,701	192,079	67,228	297,230	178,041	119,189
	$2,548,000	$1,196,699	$418,845	$2,129,155	$1,110,844	$1,018,311

* Total cost ($2,548,000) less Federal allocation ($418,845) = $2,129,155.

Cost to Each District

Based on the State's system of calculating costs, Table 20 shows that the local share of the $2,548,000 addition would be apportioned as follows:

Bethlehem Area	$ 808,014
Hellertown-Lower Saucon	91,108
Northampton Area	119,189
	$1,018,311

Assuming that the annual payment to amortize $1,000 over 20 years will be $71.96, the annual costs would be apportioned as follows:

Bethlehem Area	$ 58,145
Hellertown-Lower Saucon	6,556
Northampton Area	8,577
Total per Year	$ 73,278
Total for 20 Years	$1,465,560

Under PSBA financing, the shares would be as follows:

Bethlehem Area	$ 69,774
Hellertown-Lower Saucon	7,867
Northampton Area	10,292
	$ 87,933

Total costs for an approximate 15-year period would be $1,318,995.

The net increase in the rates for PSBA financing in the three areas would be:

Bethlehem Area	0.2940 mills
Hellertown-Lower Saucon	0.2482 mills
Northampton Area	0.2359 mills

Therefore a house assessed at $8,000 in Bethlehem would have a tax increase of $2.35 for the technical school addition. Houses assessed at $8,000 in Hellertown-Lower Saucon and Northampton would have tax increases of $1.99 and $1.89 respectively.

In other words, in Bethlehem for an extra $1.34 a year in taxes on a house assessed at $8,000, the complete technical school building may be constructed on a single site rather than be split between two locations. The additional tax dollar amounts for Hellertown-Lower Saucon and Northampton Area are $1.13 and $1.07 respectively.

Since a single school building to house the technical-vocational school is infinitely more desirable educationally than housing the program in two buildings and since the cost to the average taxpayer is quite small, there is little to recommend the alternative of building a separate addition to the present vocational-technical school building at Liberty High School. Therefore it is strongly recommended that a single new school building be constructed to house 1,480 pupils on its own separate site.

Summary

In brief, the results of the study indicate a need for an area vocational-technical school designed to serve 1,480 pupils. In addition to the courses being offered at present, the larger school would offer programs in the following areas: trowel trades, cosmetology, practical nursing, automotive technician, building maintenance; heating, ventilating, and air-conditioning; instrumentation; and some expanded offerings for boys and girls in the present subjects.

The new school would require roughly twice as much shop space as the present building provides under the most recent expansion this summer, using shop sizes as recommended by the State. Since a considerable portion of the cost of a vocational-technical school is absorbed by State and Federal aid, the new building can be constructed at very modest local expense. The tax increase, in dollar value, for the owner of a home assessed at $8,000 in each of the three areas is listed below for both local and public school building authority financing.

	Local	PSBA
Bethlehem Area	$3.08	$3.69
Hellertown-Lower Saucon	2.60	3.12
Northampton Area	2.47	2.96

These are small tax increases, yet they will yield a high educational value when spent for the enlarged area technical school to serve both the youth and the adults of the total area.

Callahan, Lois
In-School Work Experience Education for Office Occupations. An Operational Handbook.

California Univ., Los Angeles. Div. of Vocational Education
California State Dept. of Education, Sacramento. Bureau of Business Education
MF AVAILABLE IN VT-ERIC SET.
Pub Date - 65 117p.

*WORK EXPERIENCE PROGRAMS; *OFFICE OCCUPATIONS EDUCATION; *PROGRAM GUIDES; GRADE 12; MANUALS; *ACTIVITY LEARNING; CLERICAL OCCUPATIONS

This handbook suggests ways of planning and operating a program which includes in-service training in general secretarial and clerical work through the various offices of the school, supplemented with classroom instruction and textbook assignments. It was developed by a business education teacher and tested on a small group. The content objectives are: (1) to provide practical experience with duties and standards of office occupations within the school, (2) to integrate previously learned skills and understandings with newly acquired ones, and (3) to develop character traits important to job success. Each week a student usually spends four class periods at a work station under the supervision of an employed clerical person or a teacher and one period in the classroom. In-school training stations are listed with job descriptions, duties, equipment used, and number of students to be assigned to each station. A student manual of operational rules contains suggestions to help the student succeed personnaly, instructions regarding the duties and problems encountered at the training stations, and a spelling list. The appendix contains a collection of sample forms to facilitate the organization and operation of the program. (MM)

INTRODUCTION

In-school work experience education programs are expanding rapidly in the schools of California, especially in the office practice area. The reason for this expansion by and large is the increasing number of job opportunities in school connected activities in the clerical and office field.

This is a very important development, for it provides a fine opportunity for young persons while enrolled in an educational program to apply learned skills and understanding to actual job performance.

Mrs. Lois Callahan, Chairman of the Business Education Department, Hillsdale High School, developed this operational handbook. The procedures discussed herein are the result of operational practices used in the In-School Work Experience Education Program in office occupations conducted by Hillsdale High School, San Mateo, California, under the able direction of Mrs. Grace Cavitt.

Miss M. Claire O'Brien, Consultant in Business Education, was the representative of the Bureau of Business Education who worked with Mrs. Callahan on the development of the handbook and in the preparation of materials for publication.

The purpose of this handbook is to suggest ways of planning and operating an In-School Work Experience Education Program. It is hoped that the information contained in this publication will be helpful in assisting administrators and teachers in planning and operating this kind of program in their schools.

R. C. Van Wagenen, Chief
Bureau of Business Education
California State Department of Education

I. RATIONALE FOR IN-SCHOOL WORK EXPERIENCE EDUCATION

Philosophy and Purpose

In-school work experience education taps the potential of using school offices as laboratory facilities for office education. Inherent motivation exists in such utilization because the student knows his work is useful, not only to him but to the organization as well. The student works under the supervision of a currently employed clerical person or teacher who is responsible for regular office procedures which facilitate the operation of a school. Although the student has opportunity to develop versatility, resourcefulness, and adaptability at the work station, a business teacher is available for immediate assistance, guidance, and instruction when needed. The in-school work experience education program for students in office education has the following objectives:

1. To provide practical experience with duties and standards of office occupations within the school

2. To master office skills and understandings not taught or learned in other business courses

3. To integrate previously learned skills and understandings with newly acquired ones

4. To develop character traits important to job success; i.e., trustworthiness, courtesy, integrity, industry, cheerfulness, willingness and ability to follow directions accurately and completely

Surveys show many office employees lose their jobs because of undesirable personality traits as well as inadequate, unsatisfactory skills. Through in-school work experience education student abilities can be developed toward the optimum by matching training station specifications with student needs and interests. Individual disabilities may be eliminated or lessened through assessment and concerted effort by the student, training station supervisor, and teacher.

The in-school work experience education program also serves a guidance function. Students enrolled in the program are assigned as office assistants and perform office duties in a variety of surroundings. Facilities may range from small to spacious. A student may be assigned to a one-or two-person office or to an office comprised of a group. He may take directions from and perform duties for only one person or several. At times he completes tasks independently and sometimes uses initiative in determining jobs. The duties may be routine or varied. The office assistant will interact with many different personalties. Reactions to and reflections on the various work station assignments can influence him to choose a rewarding office position or may divert him to another field that will be more satisfying.

Relating classroom instruction and homework assignments to the experience of working in school offices allows the student to pursue an

individualized study of office procedures from the vantage point of both theory and practice. Classwork and homework afford the student a chance to remedy any gaps in his training which may become evident during performance in an authentic "world of work" situation. The in-school work experience education program provides opportunity to integrate and expand the student's business training through practical experience, thereby easing the transition from classroom to the business world.

Placement in the Curriculum

In-school work experience education may be offered as a separate program, as part of an office or clerical practice course, or as pre-training for Work-Study or Work Experience Education. Generally, the in-school program is considered a finishing or "polishing" course in vocational office training. Typing ability is the prime requisite for entry. Ability to use other common office machines is desirable, but this training can be acquired concurrently. Ideally the student has a background from as many other business subjects as his personal interests or schedule permitted.

Taking the in-school work experience education course near the time of entering an office occupation is often worthwhile. Realizing, however, that significant discoveries are being made about learning which emphasize the vast range of differences among and within people, a student might (1) profit by taking the course early in his business training for motivational purposes; (2) continue in the program for a longer than normal time period in order to gain a wider range of office experience, particularly if this method of learning proves especially beneficial to him; or (3) use the experience for an overview of office procedures when his schedule does not permit following a recommended sequence of business courses. The forte of the in-school work experience education program is that it permits individualization of instruction methods and subject matter. The learning process takes place at many points along the continuum from tutorship to independent study.

Usually a student enrolls for one class period per day per week, spending four periods at the work station and one in the classroom. However, in schools operating on a flexible schedule consideration could be given to having students allocate one day per week to in-school work experience education, thus creating a "9 to 5" atmosphere.

The consensus of local business education specialists helps resolve the quandary of whether to incorporate in-school work experience education into an existing course or introduce a new subject into the curriculum. Goals of the program prescribe necessary prerequisites, but the teacher may forego them in some instances. The school's daily schedule defines time allotment for the program.

II. DEVELOPMENT OF AN IN-SCHOOL WORK EXPERIENCE EDUCATION PROGRAM

Determination of Need

The first step toward developing a successful in-school work experience education program is to establish a need. This may be accomplished by following up graduates, discovering local employers' assessment of on-the-job performance by beginning office workers, projecting local employment opportunities in entry office occupations, and analyzing the business education curriculum. If the data indicates a need for practical experience in office procedures, the individual principal, as leader of instruction, must be convinced that an in-school work experience education program will be of service to the school and help meet its objectives. With the principal's appointment and approval, the prospective business teacher-coordinator can begin the program by following the local district's prescribed method for changing the course of study.

Designation of Teacher-coordinator

Fulfilling the responsibilities of the teacher-coordinator requires a person who has self-control, enjoys a give-and-take situation, and likes to work with both students and adults. The teacher-coordinator is "on call" and often makes decisions and judgments without benefit of time for planning. Consequently, empathy and versatility are decided assets. The teacher-coordinator also needs a background of diversified office experience in order to supervise production with reference to time and motion efficiency and usability standards. Current business experience implies that instruction will pertain to activities that are prevalent in today's offices and that anticipate tomorrow's changes.

The teacher-coordinator is responsible for executing the following:

1. planning classroom instruction related to the training station duties and experiences

2. directing homework study so that it reinforces the training station experience

3. operating an office services pool in the classroom (See Appendix D)

4. selecting appropriate training stations in school offices

5. placing students in training stations that will enlarge the scope of their business training and that are connected to their individual vocational goals and abilities

6. assisting the training station supervisors in assigning duties which will be profitable office experiences for the student assistants

7. conferring with each training station supervisor to determine how individual office assistants can better perform the duties assigned

8. visiting the student at the training station periodically to provide help on the job

9. conferring with students regarding improvement of training station performance

10. making final appraisal of the student's work, including classwork, homework, and performance at the training station, for grading purposes

11. helping students find office employment during vacations, after-school hours, and upon graduation

Inauguration of Program

Success of the in-school work experience education program depends to a great extent upon the acceptance, cooperation and support of the administrative team, the faculty and clerical personnel of the school. To build interest in and support for a program, the business teacher-coordinator should thoroughly explain the program to all school personnel. The first step is presentation of the program at a general faculty meeting. This description includes purposes and benefits, duties and responsibilities of students and training station supervisors, realistic appraisal of expectations for student production, and authority position of the teacher-coordinator.

Second, a meeting should be arranged with department or division chairmen and appropriate teachers and clerical personnel who are prospective training station supervisors. The purpose of this meeting is to discuss the organizational setup of the program in detail with opportunity for questions and answers. The teacher-coordinator mentions benefits to the training station supervisor from having a student office assistant and emphasizes their joint responsibility to (1) train the student in office procedures relevant to the station and business offices; (2) provide the optimum number of experiences that the station allows; (3) assist the student develop his potential in skills, abilities, and personality traits conducive to success on the job; and (4) evaluate the student's progress. At this meeting the teacher-coordinator may wish to solicit requests for student office assistants. Attaching a brief memorandum summarizing the aims and benefits of the program will help the prospective supervisor complete the Request for Student Office Assistant Form (Illustration I).

REQUEST FOR STUDENT OFFICE ASSISTANT

_____Class Period Desired Office No._____

_____Anticipated Duration of Assignment

Job Description:

Signed_____

Date _____

(Note: Preparing this form on a 4 x 6 inch card makes filing and referral easy.)

ILLUSTRATION I

Third, a conference with counselors to discuss the program in relation to vocational goals and aspirations of students is desirable. This conference assists the counselor in matching student needs with intended course outcomes.

Fourth, informing prospective students about the opportunities of the in-school work experience education program may take a multipronged approach. Program information should be injected into the regular channels used by the guidance department to communicate course information to the entire student body. Because the most likely candidates are probably already enrolled in other business courses, business teachers are in a strategic position to advise students about the program and predict its value to them. An attractive publicity folder can also be prepared for student and parent consumption. However, the teacher-coordinator must consider carefully the feasability of starting the program with less than the maximum students to ensure time to build a solid foundation.

Selection of Training Stations

After completing preliminary steps for incorporating an in-school work experience education program into the course of study, selection of student training stations becomes a significant responsibility of the teacher-coordinator. The program can be only as effective as the training stations permit. In an effective in-school work experience education program, school offices are ideal laboratories for business students. They provide opportunity for the student to perform duties of entry office occupations, including typing, using the telephone, using office machines, handling mail, handling supplies, looking up information, assisting in the preparation of reports, preparing data for computer operations, maintaining records, taking dictation and transcribing, serving as receptionist, computing, billing, checking and proofreading. In addition to demonstrating their office skills, students can discover abilities required for satisfactory performance include spelling correctly, using good English, following directions, concentrating amid distractions, performing work accurately and rapidly. They can test the effect of possessing or lacking personal qualities such as friendliness, courteousness, responsibility, flexibility, and dependability.[1]

In deliberating on the choice of training stations, the criteria for selection will be based on the following factors:

1. Total stations provide for extensive experience in duties performed in entry office occupations.

2. A single station provides for intensive experience in a duty common to entry office occupations.

---

[1] Selected Entry Office Jobs for the High School Student, California State Department of Education, Bureau of Business Education, July 1965. (This report contains detailed analyses and summaries of duties, abilities, and personality traits required in specific entry office occupations.)

3. Clerical personnel and teachers acting as training station supervisors (a) understand goals of the program; (b) are willing to train students in performing duties related to entry office occupations; (c) desire to transmit those qualities which have contributed to their success; and (d) can evaluate the student's performance.

III. ANALYSIS OF TRAINING STATIONS FOR IN-SCHOOL WORK EXPERIENCE EDUCATION STUDENTS

This chapter is designed to assist a teacher-coordinator designate appropriate office training stations for business students within the school. The job descriptions are headed with an entry office occupation title and corresponding school office where a student may gain related practical experience. The descriptions were prepared from actual duties recorded in logs by in-school work experience education students during the fall semester of the 1965-1966 school year. Although the descriptions are rather comprehensive, they are not all inclusive. Each school will have its unique training station and duties.

BOOKKEEPER STUDENT STORE OFFICE

A student office assistant assigned to the Student Store Office handles monies daily; therefore, integrity is a prime requirement for this assignment. Record keeping or bookkeeping training would be very helpful in performing the duties. The office assistant works under supervision of the store manager.

Duties

Preparing daily cash balance slip
Verifying cash register audit slip with daily cash balance slip
Stamping coin wrappers, rolling coins
Preparing deposit slip
Depositing receipts
Preparing cash receipts journal, footing and checking to see debits equal credits
Computing tax on purchases
Checking invoice extensions and totals
Typing request for payment forms, orders
Filing orders, invoices, vouchers
Balancing journal
Preparing work sheet
Taking inventory

Equipment Used

Cash register, adding machine, typewriter, books of account

Assignment Prospects

For purposes of internal control two students should be assigned to this work station during the same class period. The class period selected is based on peak selling hours so the cash register can be cleared soon thereafter and deposit of receipts made.

BOOKKEEPER STUDENT BODY FINANCE OFFICE

A student office assistant in the Finance Office works under direct supervision of the school comptroller and has opportunity to participate in the full cycle of bookkeeping for a variety of accounts; i.e., athletics, student organizations, student body. Previous bookkeeping training is essential for competency in this position.

Duties

Entering amounts in cash receipts and cash payments journals
Posting to the accounts payable ledger
Taking trial balance from the general ledger
Making income and expense summary
Recording budget expenditures
Reconciling bank account
Using checkwriter
Voiding checks
Acting as cashier: writing receipts, depositing monies

Related Duties

Verifying invoices and deposit slips
Sorting mail
Dispatching mail
Typing vouchers, envelopes, file folder labels
Filing (numerically and alphabetically): check requisitions, cancelled checks, invoices, vouchers, letters
Stamping coin wrappers
Numbering tickets

Equipment Used

Checkwriter, adding machine, calculator, bookkeeping machine, typewriter, numbering machine, safe, books of account

Assignment Prospects

Depending upon the number of student organizations and their activities, one or two students may be assigned as office assistants in the Finance Office. If more than one student is assigned, the work load can be divided between primary bookkeeping and related clerical duties. The student assistants can better coordinate their efforts if assigned during the same period.

Student activities, insurance, pictures, fines, etc. involve monetary transactions within the school. The responsibility for collecting, receipting, recording and depositing these monies usually rests with an individual called a cashier. Integrity and accuracy are qualities especially important for an office assistant to the cashier.

Duties

Receiving money
Issuing receipts
Preparing deposit records

Equipment Used

Adding machine

Assignment Prospects

If the school has a cashier position, one office assistant can probably be placed in the station. If the school does not have a cashier, a student can be placed in this function under the supervision of a teacher, clerical person, or school comptroller in charge of these duties.

CLERK, GENERAL OFFICE CLASSROOM OFFICE SERVICES POOL

The term General Office Clerk is used as the title for any person with diversified clerical duties. The duties are similar regardless of type or size of the office in which the clerk is employed. The general office clerk should be able to type, have some command of arithmetic and be knowledgeable in office procedures and filing systems. Part of the work may be in longhand, making legible handwriting important. Most of the work requires concentration and attention to details. General office clerks who are not under close supervision must have initiative and be able to assume many responsibilities.

In the classroom Office Services Pool, the in-school work experience education students perform a variety of tasks quickly and accurately, lending a hand where needed. Directions are often in written form.

Duties

Indexing, coding, and cross-referencing
Alphabetizing and sorting
Filing and maintaining various files
Typing: labels, notes, memoranda, notices, letters, forms
Addressing and stuffing envelopes
Dating
Numbering
Keeping records of work in progress, supplies, and equipment
Operating duplicator
Punching, collating
Proofreading
Serving as messenger
Substituting for switchboard operator and file clerks
Assembling information for booklets
Computing and checking computations

Equipment Used

Typewriter, duplicator, adding machine, dater, numbering machine, PBX, various files

Assignment Prospects

If the classroom office pool serves all school personnel, at least one office assistant can be assigned as a general clerk each period of the day.

The Counseling and Guidance Office is the center for processing data and a multitude of forms for every student in the school. It is here that data is prepared for computer operations in some schools. Because many of the records in the Counseling and Guidance Office contain personal information, the office assistant must be especially cognizant of his responsibility to keep in confidence any information he has observed or overheard. The student assistant works under direct supervision of the secretary and his duties should relate only to routine procedures and information of a general nature.

Duties

Typing: student information cards; file labels; headings on programming forms; envelopes; headings on senior rating forms; announcements; homework assignments for absentees; notices on stencils; etc.
Filing: student medical forms; change of program cards; temporary program cards; permanent program cards; grade sheets; college pamphlets, catalogs, and folders; registration cards
Making notations on student program and registration cards
Proofreading
Operating duplicator
Stuffing envelopes
Collating handbooks, class schedules
Sorting and distributing Request to See Counselor forms
Verifying names and numbers on standardized tests
Alphabetizing test forms
Sorting forms by teachers' names
Separating original and carbon copies
Detaching forms
Answering the telephone, transferring calls, taking messages
Tallying
Dovetailing forms
Numbering tests
Collecting student passes
Dating forms
Checking college bulletins in and out

Equipment Used

Typewriter, duplicator, Savasort, numbering machine, dater, moistener, telephone key equipment

Assignment Prospects

One assistant assigned to this office during each class period ensures variety in duties performed. At the beginning and end of each semester and grading periods an additional student may be assigned as a file clerk.

CLERK, GENERAL OFFICE DEANS' OR VICE PRINCIPALS' OFFICE

The student office assistant assigned to the Vice Principals' or Deans' Office works under direct supervision of the secretary. The assistant must be impressed with the confidential nature of the work and that interaction with students requires a businesslike manner. The student assistant also has personal contact with teachers and parents. If the office assistant knows shorthand, this assignment could provide experience in taking dictation and transcribing.

Duties

Typing: suspension forms; envelopes; form letters; memoranda; student work permits; vehicle registration cards; drop slips and notices; labels for file folders; index cards; campus forms; excuse lists on mastersets; forms on stencils
Operating duplicator
Filing: medical excuses; notices in tickler file; vehicle registration forms; government forms; student program cards
Acting as receptionist
Answering the telephone, transferring calls, and taking messages
Dispatching the mail
Writing notations on calendar; writing notations on student program cards
Clipping newspaper articles for publicity scrapbook
Collating athletic excuse lists
Composing letters
Looking up information
Delivering messages

Equipment Used

Typewriter, duplicator, telephone key equipment, tickler

Assignment Prospects

Depending upon the work load of the office, the secretary can usually apportion experiences and duties for two or three assistants during the day. An exceedingly dependable and competent student may fill in for the secretary while she is at lunch.

The departmental offices of a school can provide experience in many office procedures. Most of the departments require a variety of typing duties. The typing, proofreading, duplicating and collating of tests, syllabi, study guides, and assignment sheets is a continuous activity. These offices also use various filing systems. Each department is responsible for inventory records, ordering and receiving supplies, equipment and books. All receive mail. A departmental office assistant works under the supervision of a department head, individual teachers, and/or teacher aides. (Note: Grading papers is not considered a duty related to entry office occupations.)

Common Duties

Answering the telephone and taking messages; placing telephone calls
Typing: letters, envelopes, interschool memoranda, cards, labels, stencils, mastersets, bibliographies, book lists
Proofreading the above
Filing: teaching aids, advertising material, magazine articles, student records, and copies of typed and duplicated materials
Operating the duplicator
Collating tests, syllabi, study guides, booklets, etc.
Taking inventory of equipment, supplies, books
Preparing inventory records
Ordering and receiving supplies and books
Computing extensions and totals; checking invoices
Sorting and distributing mail; dispatching mail
Composing routine letters
Tallying
Alphabetizing
Stuffing envelopes
Caring for equipment; i.e., changing ribbons, cleaning typewriter and duplicator

Peculiar Duties

Business Education: posting repair notations; keeping perpetual inventory records by serial number of all school office equipment
Drama: typing programs for plays, announcements, scripts, tickets, student information cards, invitations, invitation lists, filing catalogs; tallying and recording student points; numbering tickets
English: taking dictation and transcribing; recording budget expenditures; stamping and numbering books; operating transcribing machine
Foreign Language: preparing laboratory schedule; technical typing
Health: technical typing
Homemaking: typing recipes
Industrial Arts: keeping locker and lock records; typing locker number and combination lists, locker cards
Mathematics: statistical typing

Physical Education: keeping locker and lock records; typing locker number and combination lists, locker cards, sports calendar, after-school sports cards, swimming cards, weight cards, medical cards, team lists, physical fitness cards, tags; labeling and numbering equipment; preparing charts and game schedules; numbering tickets; preparing time schedules

Science: technical typing

Social Science: numbering maps; issuing and receiving supplementary reference books; filing magazines

Safety Education: preparing and keeping first aid and student license records; typing licenses and first aid cards

Equipment Used

Typewriters (some with special keyboard), duplicator, adding machine, numbering machine, electric stylus, Savasort, Rollaline, moistener, files

Assignment Prospects

Each department will probably have sufficient office work to provide excellent and varied experience for one student office assistant for the department head and one for every three to four teachers in the department.

CLERK, GENERAL OFFICE INSTRUCTIONAL MATERIALS CENTER

A student office assistant assigned to the Instructional Materials Center works with the secretary and/or director of the center. The assistant has personal contact with students and teachers.

Duties

Typing: film orders, envelopes, mastersets, post cards, reference cards, memoranda, lists and notices of materials
Filing: advertising materials, catalogs, orders, pamphlets, return addresses
Finding above
Delivering messages
Preparing and dispatching packages
Sorting the mail
Taking inventory
Issuing and receiving equipment and materials
Operating duplicator and copying machine

Equipment Used

Copying machine, postage scale, duplicator, typewriter

Assignment Prospects

In a central instructional materials office within a school, there is opportunity to train one student office assistant one period per day if a full-time secretary is hired. If there is not a secretary for the office, additional students will be able to participate in the clerical work.

CLERK, GENERAL OFFICE REGISTRAR'S OFFICE

Because the registrar is guardian of many student records of import, the student office assistant must be completely trustworthy and impressed with the confidential nature of the work.

Duties

Typing: student records, petty cash report, envelopes, lists of students, letters, lists of colleges, memoranda, forms, mastersets, and stencils
Filing: student report cards, drop slips, transcript records
Photostating transcripts
Affixing official seal on transcripts
Answering the telephone
Delivering messages
Preparing file folders
Copying information onto cards
Counting petty cash; preparing petty cash reconciliation
Writing student summons forms

Equipment Used

Copying machine, seal, moistener, typewriter, duplicator

Assignment Prospects

In a large high school and with many of its graduates going on to college, two student assistants could profit from duties required by this office.

CLERK, GENERAL OFFICE LIBRARY

A student office assistant assigned to the library has personal contact with students, teachers, and the library staff. The assistant works under supervision of the librarian and her clerical staff.

Duties

Typing: slips for overdue books, book cards, envelopes, lists of new books, list of study hall students, lists of teachers, book orders with multiple carbons, mastersets, labels, and memoranda
Filing (alphabetically, numerically, and chronologically) and finding: cards, magazines, orders, pamphlets, books
Record keeping: collecting, counting, and recording fines; taking inventory; recording prices of books; preparing count of total books checked out; preparing daily circulation record
Checking: catalog cards by number, books on shelves by decimals, book numbers, student names
Duplicating and collating book lists
Opening and distributing the mail
Numbering and labeling books
Filling out student summons forms
Stamping books with identification stamp
Dating book cards and jackets, magazines
Shelving, covering, issuing and receiving books
Running errands

Equipment Used

Numbering machine, electric pencil, typewriter, duplicator

Assignment Prospects

The number of student office assistants that can be accommodated by the library depends upon the size of the library staff and volume of traffic. Usually one or two students can be assigned to this station each class period.

DUPLICATING MACHINES OPERATOR CLASSROOM OFFICE SERVICES POOL

A primary service provided in the classroom office pool is the preparation and duplication of materials for teachers. An office assistant assigned to the duplicating machines operator station has opportunity to become expert in using duplicating equipment, caring for it, and making adjustments for exact placement on copies. The operator follows written instructions in relation to number of copies, color, size, paper, and assembled order. Attention to details is essential. The operator will become conscious of time and motion economy.

Duties

Running spirit duplicator, mimeograph, master and stencil copying machines
Stacking paper
Sorting copies
Collating
Punching
Trimming paper
Filing copies of duplicated material and stencils
Cleaning and filling spirit duplicator
Changing ink in mimeograph
Using interleaver
Using card holder
Receiving and storing supplies
Operating folding machine

Equipment Used

Electric stapler, saddle stapler, heavy duty stapler, mimeograph, spirit duplicator, collating racks, paper trimmer, stencil files, folding machine, Gestefax and Thermofax

Assignment Prospects

The quantity of duplicating work in a school will ordinarily be sufficient to provide experience for one or two operators each period the Office Services Pool is open. A student may be assigned after school also.

FILE CLERK ATTENDANCE OFFICE

Attendance accounting is an important facit of a school operation, for ADA is a basis for receiving government funds. Attendance Office clerks are custodians of many records for each student in the school. Accuracy in preparing and keeping these records is necessary. An office assistant in this work station performs duties under the direct supervision of an attendance clerk. There is contact with students, teachers, and parents.

Duties

Filing: excuse, tardy, and absence slips; parent notes; student program and registration cards
Recording student absences
Writing student summons forms
Looking up student telephone numbers, classrooms, and attendance records
Delivering messages
Stamping excuse slips
Typing file folder labels
Using the telephone
Tallying
Collecting absence slips

Equipment Used

Adding machine, time clock, typewriter, telephone key equipment, visible files

Assignment Prospects

Depending upon the size of the student population, one or two students may be assigned as office assistants in this area for each attendance period. Because of the routine nature of the work, assistants should be rotated to a new work training station when the duties have been thoroughly mastered.

ISSUING AND RECEIVING CLERK TEXTBOOK OFFICE

The issuing and receiving of textbooks is a never ending task in a school. The student assistant in this position performs office duties similar to those in a business shipping and receiving department. The assistant works with the textbook office clerk.

Duties

Comparing purchase orders and invoices
Checking new books against invoice
Numbering and stamping books
Crating books
Shelving books
Issuing books according to requisitions
Filing: requisitions, invoices, individual book cards, orders
Keeping perpetual inventory records
Typing orders and memoranda

Equipment Used

Typewriter, electric pencil

Assignment Prospects

Except at the beginning and end of a semester when textbook traffic is at its highest point, one student can be assigned to this work station.

MAIL CLERK BUSINESS OR MAIN OFFICE

In some schools the volume of mail may be sufficient to require a class period to perform concomitant duties. If so, a student could profit from the experience but should not be kept at this station too long.

Duties

Sorting and distributing incoming mail
Distributing interschool communiques
Preparing outgoing mail

Equipment Used

Postage scale, mailbags

Assignment Prospects

This work station would require no more than one student during a single period of the day. In many schools these duties can be performed in conjunction with another assignment.

RECORDS CLERK, MEDICAL

HEALTH CENTER

A student office assistant in the Health Center works under direct supervision of the school nurse, who is guardian of multifarious medical records for each student in the school. In addition to receiving students who incur injuries or become ill during the school day, all students have physical examinations, eye and ear tests, and medical emergency information to be recorded. There are communiques to administrators, parents, counselors, and teachers regarding individual student health problems; and a record is kept of these. To expedite communication to individual students, a record of class schedules is maintained for all students. The task of filing seems endless.

Duties

Filing and finding: student health forms and medical records, student passes, student program cards, notices, transfer forms, athletic forms, medical emergency forms, accident reports
Typing: accident and insurance reports, health form cards, memorandums, purchase requisitions, transfer forms, envelopes, daily list of student dropins, medical adaptive forms, PE medical excuses, and file folder labels (many of these forms are typed in triplicate or quadruplicate).
Writing notations on medical charts, of allergies on folders, of vision and physical ability on examination reports
Filling out student summons forms
Answering the telephone; placing telephone calls
Sorting the mail; dispatching the mail
Preparing student passes in duplicate
Verifying student records
Acting as receptionist, taking temperatures, and making beds

Equipment Used

Typewriter, Savasort, transfer files, medical dictionary, visible files, thermometer

Assignment Prospects

The quantity of records and of student dropins provides office work for one student each class period. When the duties are sufficient to support two office assistants, division can be made between filing and other general clerical tasks. Some Health Centers can use a typist one or more periods of the day.

STENOGRAPHER
TRANSCRIBING MACHINE OPERATOR

CLASSROOM OFFICE SERVICES POOL

While the stenographer employed in business and government also performs routine duties of a typist and general clerk, the student assigned to this work station will serve a variety of people similar to a public stenographer and discharge strictly stenographic functions such as taking dictation and transcribing. Previous shorthand training is necessary for taking dictation without benefit of dictating and transcribing equipment.

A transcribing machine operator performs duties of a stenograhic nature when dictation material has been prerecorded. Good knowledge of spelling and grammar is essential for both the stenographer and transcribing machine operator. The work is often of a confidential nature.

Duties

Taking dictation: letters, memoranda, reports
Transcribing material dictated into useable form
Typing multiple carbon copies
Proofreading
Addressing envelopes
Assembling reports
Filing copies of transcribed material
Keeping a record of work in progress

Equipment Used

Typewriter; transcribing machine; duplicator; dictionary, handbooks; supplies, including letterhead, bond, copy, onionskin, manifold, and carbon paper, mastersets and stencils

Assignment Prospects

The school scholarship chairman and teachers association president have continual correspondence to expedite. Various teachers and administrators have intermittent need of stenographic help. Thus, at times an impetus of dictation may occur. This work station should be manned at least one period a day and conceivably could be in operation several periods if the school personnel make use of the service.

SWITCHBOARD OPERATOR BUSINESS OR MAIN OFFICE

The student switchboard operator often creates the first impression of a school; therefore, the importance of maintaining a good public image must be constantly kept in mind. Intercom calls require pleasant dispatch as well. Effective and uninterrupted communication is essential for the smooth operation of any organization, thus the switchboard operator is in an important position. The operator must know names, titles, and location of school personnel. The operator must be careful in taking messages. Because the volume of traffic varies, the operator is sometimes free to perform additional duties. The office assistant in this work station is supervised by the secretary in charge.

Primary Duties — Equipment Used: PBX and intercom

Receiving and transferring incoming telephone calls
Placing outgoing calls
Taking and delivering messages
Acting as receptionist
Training other students to operate the switchboard

Additional Duties — Equipment Used: Typewriter, postage scale, moistener

Sorting and alphabetizing
Typing: cards, envelopes, labels, tags, letters, purchase orders, lists
Filing: purchase orders, report cards
Proofreading
Counting and detaching forms
Folding letters and stuffing envelopes
Writing student summons forms, notations on calendar
*Distributing interschool communiques
*Sorting and distributing incoming mail
*Preparing outgoing mail

Assignment Prospects

The need for a switchboard is continuous. An office assistant can be assigned to this work station every period of the day, at lunch, and before and after school. During peak traffic periods, two students may be assigned--one to the PBX and one to the intercom equipment.

*In a large school, the daily mail may be sufficient to allocate these duties as a single work station for a mail clerk.

TYPIST, CLERK CLASSROOM OFFICE SERVICES POOL*

The clerk-typist works from handwritten or typed rough drafts or other copy, putting them into presentable form. The typist may take dictation at the typewriter and sometimes makes and checks simple computations. The instructions may be plain or corrected, written or verbal. The typist may need to use initiative.

Duties

Arranging material for typing
Typing
- letters
- memoranda
- booklets
- syllabi
- forms
- envelopes
- lists
- notices
- reports
- orders

Proofreading and correcting
Supervising other students assisting in the work

Equipment Used

Typewriter, electric and manual; Rollaline, duplicator; supplies, including correction preparations and various kinds of paper, offset mats, mastersets, and stencils

Assignment Prospects

One or more office assistants can derive clerk-typist training by working in the classroom Office Services Pool each period of the school day.

*Training stations for clerk-typist training may be found in various offices of the school; i.e., Health Center, English Department, Counseling and Guidance Office, Business Office.

TYPIST, STATISTICAL CLASSROOM OFFICE SERVICES POOL

The student assigned to the statistical typist training work station will type mostly figures, generally in tabular form, and may collect information and classify the facts in numbers. Familiarity with symbols and number keyboards becomes essential. The typist uses stencils, mastersets, and various forms in preparing the material.

Duties

Typing
- balance sheet, income and expense summary for Student Body Finance Office
- inventory lists and serial numbers
- departmental grade distributions
- various reports, including charts and graphs
- tests for mathematics teachers

Proofreading and comparing

Equipment Used

Typewriters, electric and manual, with various keyboard and fingering positions

Assignment Prospects

Unless the quantity of statistical material for typing is excessive, one period per day should cover this work station. At times the station may be inactive.

IV. OPERANT FOR AN IN-SCHOOL WORK EXPERIENCE PROGRAM

This chapter includes materials and forms for distribution to in-school work experience education students and training station supervisors. If the teacher-coordinator duplicates the subsequent pages of this publication that are in color, they will comprise a handbook for student reference regarding operation of the program and performance of duties at the training station. Using a handbook accustoms students to the practice in school and therefore they are more apt to follow a company manual when they become employed in a business office.

Orientation and Assignment of Students

In the first session or two of the in-school work experience education class, the teacher-coordinator explains the purposes, responsibilities, and requirements of the program. Page 1 of the Student Handbook gives an introduction to the course. The oral introduction should include comments of employers regarding knowledge of fundamentals, personality traits, attitudes, work habits, and grooming desired in business.[2] The teacher-coordinator will want to elaborate on and suggest plans for improving in these areas.

Reading and discussing rules of the program should be conducted prior to assignment of training stations. The rules on pages 2 to 4 of the student handbook are outlined so students will become accustomed to following "company policy." Any day could be selected for meeting in the classroom. Tuesday is suggested because rush or urgent assignments may occur at the work station on Monday or Friday, and it also avoids the "TGIF" or "Blue Monday" torpor.

Tests are designed to help students pass employment hurdles and provide basis for grading. They cover arithmetic, spelling, personnel, proofreading, filing and telephone rules as well as homework, classwork, and information notices. As the teacher-coordinator learns about new trends in office procedures and observes student difficulties and mistakes in production, she will communicate ideas to the students via class discussion and written memoranda.

Appendices A and B of the handbook are examples of completed log and homework assignment. The log is useful to students in appraising duties at the training station and to the teacher in determining assistance needed by the office assistant or supervisor and in rotating students from one training station to another.

Requiring students to make up absences by overtime equivalent to time absent is recommended because students need to assume responsibility

---

[2] Op. cit., pp. 13; 23-27.

for duties at the training station. When they become employed in a business office, a substitute will usually not be provided for absence.

Appendix C of the handbook is a sample Work Order. In operating the classroom Office Services Pool, the form provides instructions to student office assistants and a record of jobs in progress. Filing job orders and a sample of work when completed affords a reference source for questions about the work or assistance in completing similar assignments.

Having students hand in a copy of duplicated work and letters furnishes the teacher-coordinator data on which to base classroom and individual instruction in order to improve the quality of work produced by office assistants.

Before assigning students to training stations, the teacher-coordinator will have them fill out Student Information Form (Illustration II) and compare with Request for Office Assistant Forms (Illustration I) submitted by prospective work station supervisors. The job descriptions may be duplicated for student perusal, resulting perhaps in more realistic requests for training station assignments. At first all assignments should be on a temporary basis so necessary changes can be made easily.

In anticipation of going to assigned training stations, the student should read in the handbook and discuss all tips and instructions related to duties they may perform, including typing details, erasing, using the telephone, duplicating, filing, and spelling. Students assigned as switchboard operators are given Appendix K of Student Handbook. The Telephone Company is sometimes willing to send a representative in the beginning of the school year to train operators.

Supervision of Students

The training station supervisor takes roll, except on Tuesday, and keeps the student assistant working at office duties until the dismissal bell rings. The supervisor also gives directions and instructions for all work to be done at the station and decides upon usability of the completed job. However, the teacher-coordinator may be called upon for assistance by either the office assistant or supervisor.

The log, Appendix A of Student Handbook, informs the teacher-coordinator of duties being performed, and she visits the training station periodically to offer help and gain general impressions. The folder kept for each office assistant at the training station contains samples of all his work and can be used for viewing by the teacher. The student is free to come to the classroom any day during the in-school work experience education period to talk with the teacher-coordinator. She will provide time for and initiate private consultation with either the supervisor or student regarding job problems when they arise.

Students learn to supervise themselves and each other too. Advanced and very competent students do some organizing and directing of production

in the classroom Office Services Pool. On pages i and ii of the Student Handbook is a check list for students to use in planning a schedule to become familiar with equipment, supplies, and techniques to be learned in the classroom. All office assistants are expected to start work without being told, so self-supervision occurs.

All supervision--teacher-coordinator, training station supervisor, and student--aims toward the development of a dependable and competent office employee. Such an employee attends work regularly, starts work promptly, and performs work carefully, skillfully, and pleasantly.

The teacher-coordinator will sometimes deem it advisable to brief the student and/or supervisor on the other's idiosyncrasies and special abilities.

Upon going to the assigned training station, the prospective office assistant introduces himself to the supervisor. He may deliver the memorandum regarding student and supervisor responsibilities, Appendix G of Student Handbook, or it can be sent by intraschool mail. The supervisor will interview the prospective assistant so that they can become acquainted.

Evaluation of Students

Various conferences between teacher-coordinator and the training station supervisor and/or student or between the student and supervisor serve as evaluative activities. Also, the student appraises his work by placing a grade on the log. When this grade differs from the teacher's impression of the student's performance, there is need for reassessment.

Final grading is based upon tests, production at the training station, the teacher-coordinator's judgment, and extra credit points. Appropriate tests cover assignments, instruction, notices, Student Handbook, and simulated employment tests (Appendix C). Grades become more useful if one is assigned to each area tested; such as, arithmetic, proofreading, spelling, filing, etc. Then if a student continues to make poor grades on a particular area his weakness is pointed out for remedial attention. The training station supervisor evaluates the student at the end of marking periods by completing a confidential report, Appendix H of Student Handbook, for each office assistant working with him. The rating sheet has a place for checking superior, above average, average, weak, or unsatisfactory on fourteen points related to the office assistant's performance. Office assistant folders kept at the training station contain samples of completed jobs which the teacher can also use for grading. Students earn extra credit points by doing more work than is required or work of exceptionally fine quality. These points offset penalties and poor test grades within a limit. Quality and quantity of work produced receive more weight than number of hours worked.

After figuring the grade on a Self-Evaluation Sheet, Appendix I of Student Handbook, each student discusses it with the teacher-coordinator,

affording an opportunity to mediate any differences in evaluation by teacher, supervisor, and student. Analysis of progress and designation of areas for improvement by the student result from this self-evaluation.

Rotation of Students

Variation in duties of stations or abilities of students require different time allocations for an office assistant to benefit from the assignment, and generally no single training station provides optimum experience in duties related to entry office occupations. Therefore, rotation is determined by training station duties and student abilities. Usually an office assistant needs to become confident and proficient in his performance; ordinarily any training station assignment will last at least six weeks for assurance and competence to develop. If the learning situation in a particular training station is especially profitable to the student, he may prefer to remain at that station a semester or longer. As the teacher-coordinator, supervisor, and student evaluate his performance and progress, a joint decision can be made in determining the best time to move a student in an effort to provide a variety of experiences. Either the teacher, supervisor, or student (Appendix J of Student Handbook) may initiate request for a change of station.

Handbook for Students

The succeeding pages comprise a manual that in-school work experience education students can easily carry to their individual training stations and use for reference. The Student Handbook is divided into sections containing directions and help in duties common to the training station as well as all course procedures. By preparing the handbook in loose-leaf form, addenda such as Illustration III (1) and (2) and memoranda can be prepared by the teacher-coordinator as changes occur and need arises and then inserted easily by students in the appropriate sections. These notices focus attention on improving and updating particular office methods and knowledge. Preceding the Table of Contents in the Handbook is a handy check list for students to record their progress in meeting training objectives. Section I covers the operational rules for the program. In Section II are suggestions to help the student succeed personally. Sections III through VIII contain instructions regarding the most common duties and problems encountered at the training stations. Section IX, the spelling list, needs revision in accordance with words the teacher and students see frequently misspelled by office assistants. A collection of sample forms designed to facilitate the organization and operation of an in-school work experience education program appears in the Handbook Appendix.

CHECK LIST

In addition to specific assignments, all Office Practice students are expected to assume responsibility for observing, becoming acquainted with, and using helpful office techniques, procedures, and equipment. This may be done after school or whenever unassigned a particular job.

The following list indicates some opportunities to be found in the classroom. Discover them all. Use the handy check boxes to keep a record of your progress by date.

	Do Not Know	Need Drill	Know Well
1. Typewriters (typing master--four colors, stencil, letters, envelopes, reports, forms)			
a. IBM electric			
b. Royal electric			
c. Smith electric			
d. Selectric			
e. Small elite			
f. Care and cleaning of above			
g. Ribbon change			
2. Duplicators			
a. Mimeograph			
(1) Slip sheeter			
(2) Color change			
b. Gestefax			
c. Mimeoscope			
d. Spirit duplicator			
3. Ten-key adding machine			
4. Staplers (loading)			
a. Electric			
b. Saddle			
c. Long shank			
5. Numbering machine			
6. Paper			
a. Trimming			
b. Punching			
c. Fanning			
d. Counting			
e. Stacking			
f. Recognizing kinds and uses			
(1) Duplicator			
(2) Mimeograph 20# and 16#			
(3) Card stock			
(4) Manifold			
(5) Corrasible, Excelerase			
(6) Letterhead			
(7) Legal cap			

*SH--Student Handbook

	Do Not Know	Need Drill	Know Well
7. Files			
a. Indexing and Coding			
b. Sorting (Savasort)			
c. Filing			
d. Finding			
e. Recognizing kinds and uses			
(1) Stencil (Gestefile)			
(2) Vertical			
(3) Pigeonhole			
(4) Visible index (Kardex)			
8. Miscellaneous			
a. Copy holders			
b. Collating racks			
c. Moisteners			
d. Switchboard (PBX)			
e. Cleaning supplies			
f. Care of equipment			
g. Sources of information (handbooks and manuals)			
h. Proofreading

INTRODUCTION

In-School Work Experience Education simulates, insofar as possible, actual office procedures followed in Business. It includes in-service training in general secretarial and clerical work through the various offices of the school, supplemented with classroom instruction and textbook assignments. As time and ability permit, students receive instruction and training in the use of electric typewriters, adding machines, spirit duplicators, mimeographs, mimeoscopes, the PBX, various filing methods, and miscellaneous clerical tasks.

Emphasis is placed on the development of character traits important to job success; i.e., trustworthiness, courtesy, integrity, industry, cheerfulness, and willingness and ability to follow instructions accurately and completely.

To do well in the program you should be serious minded, completely trustworthy, willing to take responsibility, and willing to work good-naturedly even when a job is routine.

Business surveys show that many office employees lose their jobs because of undesirable personality traits, and/or inadequate, unsatisfactory skills. Therefore, if you wish to become a successful office worker, it behooves you to build in yourself an employable personality and employable skills. In order to do this, you should analyze yourself to learn your strengths and weaknesses, and then you should do something constructive in regard to those items in which you rate below average.

Your diligent, tenacious, day-by-day adherence to the rules and suggestions in this handbook will result in improved personality traits, increased skills, and broader understanding of business procedures. Whatever your vocation may be, all of these should be of practical value in later life.

RULES

Note: There are exceptions to rules, and if you feel one should be made for a valid reason see your teacher.

TESTS

I. All students report to the classroom each Tuesday for instructions and tests. If a holiday falls on Tuesday, report on the next school day.

II. You are to have your textbook and handbook each time you report for a test.

III. In all true-false questions, the answers should be indicated with a "T" for true, "O" for false, regardless of other instructions on the test.

IV. Unless special arrangements are made with the teacher, tests must be made up after school or during study period within one week of the time originally given.

LOG

V. Every student is required to keep a detailed, concise daily log of what he does during his class period. The log is to run from Tuesday through Monday. If you wish, include one new thing learned related to business. This item may be something learned during the class period, in another class, from your homework, or miscellaneous reading, from discussion, television or radio. The reference in the upper left corner of the log should show dates covered and work station. Below the due date on the daily log give yourself a production grade for the week. Take into consideration both quantity and quality of the work you did. (See Appendix A)

HOME-WORK

VI. All students are expected to spend one-half hour daily on homework. Do it each day, please; don't wait until Monday night and expect to do a week's work in one evening. HOMEWORK IS TO BE TURNED IN EACH TUESDAY, STAPLED UNDER THE LOG.

VII. All homework papers, logs, tests and make-up work should carry DUE DATE. Work must be done on unlined, white paper, 8 1/2 x 11 inches. All papers are to be headed in regular school form, plus the complete assignment notation in the upper left corner. Work involving more than one sheet must be stapled in the upper left corner. Papers should be typed whenever possible; only one side of the paper should be used. Papers done in longhand should be written neatly and legibly in ink. All errors must be corrected; ink is permissible. STRIKEOVERS mean a grade of "F" on the assignment. (See Appendix B)

VIII. Late homework and logs receive a penalty of minus 1 point; missing homework and logs result in a penalty of minus 2 points. To be accepted, all work must be made up within one week of due date or on return from extended absence.

IX. All students are responsible for instructions and information placed on the chalkboard and the bulletin board. Students are also responsible for information given on memoranda from the instructor. Insert these in the handbook for reference and use.

X. ABSENCES Absences must be made up by overtime equivalent to time absent. This may be done during study period or after school. Usually there are no make-up sessions after school on Friday.

XI. HOUSE-KEEPING Unless it is unusually cold in the building, students are not to wear their coats in the classroom or training station. Personal belongings (purse, lunch, books, etc.) should be placed in the compartments provided in the classroom or in a secluded section of the training station.

XII. Fold the cover when you remove it from a typewriter. BE SURE ELECTRIC MACHINES ARE TURNED OFF WHEN YOU HAVE FINISHED. Always leave the work station neater than you found it. When you are preparing a masterset, be sure you clean up the work area when you are finished--including typewriter keyboard.

XIII. PBX All switchboard operators (including before school, lunchtime, after school, and observers as well as regular operators) must sign in and out each time they are on the board. (Appendix K)

XIV. PRO-DUCTION All work should contain a date. Letters, memos, notes, telephone message slips, etc., will have the date at the top. Masters, stencils, etc., should contain the date with the reference initials, usually in lower right corner of the page. Identification by date and typist is extremely important.

XV. (REFERENCE INITIALS) Reference initials should not be conspicuous, but they are essential. Sample forms are:

AC	LC:ac	10/66ac50
For letters		For production (date, typist, copies)

XVI. (SUPPLIES)
A. Students are to get all supplies from the office or department to which they are assigned.
B. Students are not to remove or use <u>anything</u> on the teacher's desk without permission.

XVII. (JOB ORDER) <u>All</u> duplication assignments and any other work requiring more than one typist should be accompanied by a job order with the exact <u>due date</u>. (See Appendix C)

XVIII. (WORK IN PROGRESS) Unless instructed otherwise, DO NOT leave unfinished assignments on the tables and desks. All work is to be placed in the teacher or period folder. NEVER put production materials in your personal folder.

XIX. (PROOF-READING) Duplication work is to be proofread twice. The student who typed the master or stencil should read the original copy. Proofreading slips should be used for stencils. (See Appendix D) Materials that are to be used outside the school or placed for the public to read should receive special care.

XX. (SAMPLES) Save samples of completed work except tests. When preparing test materials, be sure everything you have used is returned to the teacher for whom you are working. Two copies of all other duplicated work (one marked SAMPLE stapled to the job order and one marked FILE) are to be placed in the "Completed Jobs" file tray on the teacher's desk.

XXI. (LETTERS & MEMO-RANDA) Whenever you type a letter at your training station make two carbon copies on manifold--one for the dictator and one for your IWE teacher. Unless otherwise instructed an envelope should be typed for each letter. The envelope address is identical to the inside address. Use No. 6 3/4 for one-page letters without enclosures and No. 10 for two-page letters and letters with enclosures. (See Appendix E)

XXII. CONDUCT The IWE period is for IWE only. Use initiative, go to work promptly. DO NOT ASK the boss or teacher what to do. If you do not have a production job, practice typing or do IWE homework. Do not be a clock watcher. Remain at work UNTIL the dismissal bell rings.

There is to be no visiting while working on any IWE assignment.

TIPS

General:

1. Everything you see, hear, and do in connection with your job is confidential.

2. Listen carefully and get complete instructions the first time they are given. FOLLOW INSTRUCTIONS ACCURATELY. (Get a small loose-leaf notebook and write down instructions--your memory often fails you.)

3. Be ACCURATE FIRST, then work for speed.

4. THINK before you speak or act--use your head.

5. Have all work tools (pencils, notebooks, erasers, etc.) accessible and organized at all times.

6. Keep your training station neat and orderly. Clean it up when you leave.

7. Dress appropriately; be well groomed; be courteous, patient, and pleasant even though it is difficult!

8. Be prompt and don't be reluctant to work overtime.

9. REMEMBER THE GOLDEN RULE: Do unto others as you would have others do unto you.

10. Each student has a folder in the file drawer of the classroom. You will find graded tests, logs, and homework in your folder. Look at the teacher's marks so you will not make the same error again. If there is a note, be sure to let your teacher know you have read it.

11. Proofreading is one of the most difficult and responsible assignments.

12. You are responsible for knowing the correct spelling and position of all school personnel. (Ask teacher for copy of addenda: file at end of this section.)

13. Do not make assumptions; if you are not sure, ask.

14. It is not polite or businesslike to participate in any conversation taking place where you are working unless you are specifically included. Continue with your work as though you do not see or hear.

15. Work to be seen by outsiders should receive special care. Let's maintain a good image of quality work from our school.

Equipment and Supplies:

1. Learn where supplies are kept both in the room and your training station. When you remove supplies, be sure the storage area is left in order (covers on boxes, etc.). If the supply is low, make a note for reordering.

2. Be sure to use expendable supplies (paper, masters, stencils, etc.) from the training station--not IWE room--for production jobs.

3. There are two types of duplicators in the classroom (not counting the typewriters used for carbon copies):
   A. Mimeograph (print with ink)
      1. A. B. Dick
      2. Gestetner (silk screen with 4 color changes)
   B. Spirit (fluid process with carbon)
      1. Standard Rocket
      2. Ditto

4. Most of the typewriters in the classroom are IBM and Royal electrics with elite type.

	Strokes to horizontal inch	Lines to vertical inch
Elite	12	6
Pica	10	6
Small Elite	14	8

5. Clean machines produce clean copy.
   A. It is your responsibility to see that typewriters are cleaned periodically. Do not be satisfied with work that shows "muddy" e's, o's, etc. Brush eraser crumbs out of the typewriter daily. (Of course, you ALWAYS move the carriage to one side as far as possible when you erase.) When a typewriter needs repair, be sure to fill out a repair slip and place it in the repair book on the teacher's desk.
   B. The drum and impression roller on the spirit duplicator must be clean in order to produce usable copies.

Production:

LETTER 1. When typing a letter, be sure that it is placed attractively on the page just as you would frame a picture. Place the date flush with the right margin. Most letters look well with right and left margins approximately 1 1/2 inches wide. You can adjust this normal margin to the length of the letter. Letters are generally single spaced. The closing section begins to the left of center, but it should be adjusted to length of the typed name and title. UNTIL YOU ARE SURE OF YOURSELF make a rough draft of your letter. (See Appendix E)

The address on the envelope is identical to the inside

Production: (Continued)

LETTER address of the letter with the exception that a three-line address is double spaced on the envelope. Include the Zip Code number.

MASTER 2. A. In typing a masterset, do not use just a "teenie, eenie polka dot" piece of carbon for making corrections. Take the carbon from the full width of the master you are typing. Then you can hold the noncarbon edge and avoid smudges.

Don't forget to remove the extra carbon after you have made your correction. Don't forget to remove test letters.

B. When running your master on the spirit duplicator, don't be satisfied with poor copies. Ask your teacher for assistance. Professional looking work is our aim. FAINT COPIES ARE UNACCEPTABLE EVEN IF THEY CAN BE DECIPHERED.

STENCIL 3. A ROUGH DRAFT WITH CARBON COPY is the first step in preparing a stencil. When typing a stencil, please write your name and the typewriter number at the top of the heavy backing sheet (not on the stencil itself) before you type the stencil.

Rough drafts should be approved by the supervisor directing the assignment so any changes can be made before the final copy is typed. This is especially important if you are not quite sure of instructions. You may need the instructor's approval after you have begun a complicated assignment. Call the IWE teacher if you need special help.

When correcting a stencil, use a light coat of thin correction fluid. A thick coat of fluid makes your correction obvious. Be certain, however, that no light or white shows through. The top of the correction fluid must be screwed on tightly after EVERY use; otherwise, the fluid becomes thick and may get spilled.

It is a good idea to do the first proofreading of a stencil while it is still in the machine to eliminate difficulties in realignment.

When you realign a stencil, make test letters near the place of your intended correction. Then block out the test letters when the proper alignment has been made. Ask your teacher to help you if you have trouble.

PROOF-READING 4. All production typing and duplicating should be proofread with great care twice. Make neat, well-concealed corrections. Someone other than the typist should read the copy stencil and master to be used.

Production: (Continued)

5. Get training station supervisor to proofread long-job stencils and masters (3 or more pages) before running.

Study, Extra Credit and Make-up:

1. In preparing for a test, review sections at the end of each unit in your text.

2. Review notes from oral instructions, class discussions, and the chalkboard.

3. Review memoranda and syllabi.

4. Review questions you missed in preceding tests. ALL TESTS ARE CUMULATIVE.

5. Keep up to date on your assignments; cramming is not the best method of learning.

6. Extra credit may be earned (after school, study period, etc.) in several ways. If you are interested, see your teacher. You may earn up to 8 points for extra credit work during any marking period. (See Appendix F)

7. Report to the classroom any night after school except Friday for make-up work. If you have a study period, you may get a pass from your IWE teacher for make-up work at that time.

TYPING DETAILS*

Margins 1. Find the margin before you try to set it.

Abbreviations 2. As a general rule, don't use abbreviations. Exceptions to this rule are Mr., Mrs., No., and degrees. Always spell out months. Miss is not an abbreviation and therefore should not be followed by a period. Ms. is used when a woman's title is unknown.

The abbreviations i.e. and e.g. should be preceded by a semicolon and followed by a comma; i.e., as shown here.

In general, abbreviations made up of lower-case letters and periods have no space between them; e.g., a.m. and p.m. Abbreviations using upper-case letters and periods have a space between them (exception - academic degrees); those using upper-case letters and no periods are typed together. The trend is toward lower-case letters.

A. M. or a.m.
M. for meridies (noon) must be capitalized because it is one initial.

O. K. may be typed either as O. K. or OK (preferred); okay and okeh are acceptable--never use okey. O. K.'d is past tense.

Spacing 3. Always single space a memorandum; usually single space a letter. When single spacing, double space between paragraphs; when double spacing, still double space between paragraphs. Leave two spaces after a colon. This rule is followed whether the colon precedes a horizontal or vertical listing.

Capitalization 4. Capitalize only subjects whose titles are derived from proper nouns: I am studying history and Latin. Course titles are capitalized: I am taking World History. Business Department is capitalized when referring to a specific department. Capitalize Room 228.

Telephone Numbers 5. The new telephone numbers are to be typed as follows: 591-1333. When combined with old-style numbers:
LY 3-1257
591-1333

Addresses 6. 101-A West Hillsdale Blvd. (Apartments designated by letters)
101 West 39 Avenue, Apt. 29 (Apartments designated by numbers)
609 - 19th Avenue or 609 - 19 Avenue (Successive numbers)

*Use a secretarial handbook when you have questions about acceptable ways of presenting typed material.

Salutation and Closing	7.	Gentlemen is the appropriate salutation to use when addressing a company. Dear Sir is out of date. Very truly yours or Yours very truly is always safe to use as a complimentary close.
Zip Code	8.	The zip code number for Sunnyside is 94403. Use it in the return address. The zip code number comes one or two spaces after the state with no punctuation.

ERASING

You will need a typewriter (ink) eraser for original copy, a soft eraser for carbon copies, and a small, stiff card or metal erasing guard for use when erasing on carbons.

Procedure: Move the carriage to the extreme right or left, depending on which side of the page you are going to erase, so that the eraser waste will fall on the table and not into the machine. Your margin-release key must be used to accomplish this.

Hold the paper firmly by pressing it against the roller with your fingers on a blank part of the sheet.

Use a clean eraser, or the paper will be smudged.

Do not dig in or press on the paper when erasing, but use a gentle circular motion or an up-and-down movement. Be sure to make a clean erasure. Never dampen the eraser. Before typing a correction, blow or brush the eraser particles off the paper.

If you are erasing carbon copies, place a card or metal guard between the carbon sheet and the particular copy you are erasing. Use a soft eraser for your carbon copy. Never use a typewriter eraser on the carbon copy, for then the eraser will be too dirty to use on your original with satisfactory results.

In typing corrections, use a light stroke (retype with a still lighter stroke if necessary) so as to blend the erased word into the rest of the copy. On an electric machine, reduce the pressure dial to zero before typing the correction; be sure to return the dial to its normal position before resuming the regular typing. You must strive to conceal the erasure.

Always proofread the copy before removing it from the machine.

If an erasure is necessary very near the bottom of the page, roll the paper back and erase from the bottom end. This will prevent the paper from slipping. If in erasing carbon copies the copies have slipped a little out of alignment, wait until you have completed the page to make the correction. Then reinsert each page separately and make the correction. Engaging the line reset (line finder) avoids slippage of a carbon pack.

If it is found that material having carbon copies must be corrected after it has been removed from the machine, place each copy in the machine separately for correction. You can make a carbon correction on the sheet (rather than a ribbon correction) by holding a small piece of carbon paper over the spot where the correction is to be typed.

USE OF THE TELEPHONE

When you use the telephone, you create an impression--favorable or unfavorable--on the person at the other end of the line. All of us wish to be thought of as considerate and courteous people. Your handling of telephone messages is a mark of your efficiency also.

TO IMPROVE YOUR VOICE QUALITIES display alertness, be expressive, talk naturally, reflect pleasantness, and speak distinctly. If you speak a little slower than you normally do, you will be more easily understood. Don't use slang or unbusinesslike expressions such as "O.K.," "yeh," and "un huh."

REMEMBER COURTESY COUNTS; therefore, greet callers pleasantly, offer to be of service, listen attentively, use caller's name, acknowledge comments appropriately.

TO PLACE A CALL:

1. Plan the call.
2. Look up the number in the directory; only call information when you can't find it in the directory.
3. Give the person you are calling ample time to answer before hanging up.
4. Identify yourself immediately when the person answers.
5. If the person who answers is not the person you want or does not identify himself, ask pleasantly for that person and announce your name.
6. When you do not wish to speak to a particular person, state your wishes in a nice way, preferably in the form of a request.
7. Close the call pleasantly; hang up <u>gently</u>.

TO PLACE A CALL FOR SOMEONE ELSE:

1. Be sure your boss is available when you are placing a call for him.
2. Ask when you may call back if in placing a call you find the person called is not available. In this way you keep control rather than depending on someone else to remember to call you back.

Nobody enjoys answering or calling WRONG NUMBERS and there's an easy way to avoid them:

1. Dial carefully, or give the number you want distinctly.
2. If you receive a wrong-number call, give the other fellow a break.
3. If you're the caller and the voice at the other end sounds strange, ask pleasantly, "Is this Orchard 6-9000?" If it is not, apologize briefly and consult the directory again.

WHEN RECEIVING CALLS <u>ALWAYS</u>

1. Answer promptly.
2. Identify yourself or company.
   At home: "Smith residence, Nancy speaking"

On PBX: "Sunnyside High School, student speaking"
On Intercom: 1. "Main Office, student speaking"
2. "Mr. Oakley's Office, student speaking"
3. "Business Department Office, student speaking"
4. "Room 228, student speaking"

3. Respond to inquiries graciously.

WHEN ANSWERING FOR SOMEONE ELSE:

1. If the person called is available, say "one moment please" to the caller and announce the call to your employer.
2. If the person called is talking over another line or busy at the moment, ask the caller if he prefers to hold the line, to call back, or to leave a message. If the delay is longer than anticipated, go back on the line to give the caller a chance to leave a message.
3. Advise if person is unavailable and offer to take a message.
4. If the caller leaves a message, WRITE IT DOWN. Make a record of the caller's name, his affiliation, his telephone number, date and time that he called as well as the message. WRITE THE MESSAGE LEGIBLY and place your signature on it.
5. If the caller does not identify himself, try to find out tactfully who he is. ("May I tell him who's calling?" or "If you'll give me your name and number, I'll ask Mr. Jones to call you when he returns.")
6. Verify the message with the caller.
7. Place the message on your employer's desk where he will see it as soon as he returns to the office. Have the school secretary OK the message if you are working at the switchboard.
8. Do not let the phone hang by the cord. Place the receiver horizontally on the cradle.
9. Always hang up gently.

WHEN ANSWERING THE SWITCHBOARD remember it is worthwhile to treat all calls as though they were important. Most of them are!

ON PBX CALLS:

1. Answer by identifying the school and yourself: "Sunnyside High School, student speaking."
2. When asked for a particular person say, "Thank you, I'll ring Miss Jones."
3. Transfer the call to the right party immediately; nothing is more irritating than being passed from one extension to another. If there is a delay, say, "One moment please."
4. If the desired extension is busy, explain and ask the caller if he would like to hold the line, speak to someone else (i.e. secretary), call back, or leave a message. If the caller holds the line, go back on the line at near intervals and say, "That line is still busy," and give the caller an opportunity to leave a message.
5. If you are unable to reach the person, ask to take a message. NEVER TAKE MESSAGES FOR STUDENTS.
6. Keep pencil and paper handy. WRITE DOWN MESSAGES IMMEDIATELY. Include date, name of person calling, his affiliation, his telephone number, the time that he called and message. Place

your signature on the message. VERIFY the message with the caller and give to the school secretary for an O.K. before relaying to teacher. Be sure that the person called will receive the message.

7. Never answer questions. Refer to the school secretary.

ON INTERCOM CALLS:

1. Answer promptly by saying "Main Office, student speaking."
2. Ring the appropriate room immediately. Do not make rings too long. Ring again if the party does not answer, ask if you may ring another room; don't leave caller "stranded."
3. When the lines are inadvertently disconnected, go on the line and say, "I'm sorry you were disconnected; I'll reconnect you" or "to which room were you connected?"

NEVER USE SCHOOL PHONES FOR PERSONAL USE.

THE SPIRIT DUPLICATOR*

I. An Introduction

If you expect to work in an office, you must know how to make many copies of notices and announcements, of reports and news releases, of schedules and price changes, and of hundreds of other business papers. Knowing how to make copies is just as important as knowing how to typewrite or answer a telephone.

If you need just 5 or 6 copies, you can write or type them all at once by using carbon paper. But what if you need 25 or 300 copies? It would take too long to write or to type them, even with carbon paper. Besides, the copies might not be exactly alike. So, you would use a machine that makes exact copies of the one copy that you prepare. This machine is called a "duplicator."

THE DIRECT PROCESS works like this:

1. You make one original copy, using a special carbon paper. It is special because it contains aniline dye. The original copy is called the "master."

2. You fasten the master onto the drum (the revolving part) of the duplicating machine.

3. As you turn the handle of the drum, many things happen automatically:

   a. The paper is drawn into the machine.
   b. The paper is dampened with a chemical.
   c. The paper is pressed against the master.
   d. Some of the dye is dissolved from the master making an exact copy.
   e. The paper comes out into a tray.

This process has some other names by which it is called in some offices. Because the paper touches the master directly, it is referred to as the "Direct Process." Because a watery liquid is used, the process is also called a "liquid process."

*Abridged from "How to Make Ditto Direct Process Masters," Ditto, Inc.

TO BE A GOOD DITTO operator, you should:

1. Know what supplies to use.
2. Know how to prepare a good master.
3. Know how to run copies on the machine.
4. Develop these three traits: neatness, carefulness, and personal efficiency.

II. Typing a Master

SUPPLIES Needed:

Masterset (Sheet of master paper, sheet of Ditto carbon)
Type cleaner or brush to clean type
Pencil (hard lead) or ball-pointed pen
Typewriter
Backing sheet

TRAITS to be stressed:

Neatness	Ability to type accurately
Carefulness	Ability to type very evenly
Efficiency	Alertness to the directions

BASIC INFORMATION: The six steps in preparing a typewritten master sheet are:

1. Prepare the typewriter. Clean the type well, giving extra attention to broad letters (like W) and closed letters (like e/o/g).

2. Prepare the masterset. A masterset consists of one sheet of Ditto carbon and one sheet of master paper fastened together at the bottom with a thin sheet of tissue paper separating the two. The tissue must be taken out before you type on a masterset.

3. Type the material. Leave at least one-half inch at the top or bottom of the page. Type with a sharp, even stroke, a few words a minute slower than your normal pace. Type punctuation marks a little more lightly; type capital letters a little more sharply.

4. Proofread the work. (You will learn how to make corrections later.)

5. Remove the pack from the machine. Carefully separate the master from the carbon and cover the carbon side of the master with the protection sheet until you run it.

SPECIAL NOTES

1. If you wish to draw or write on a master, lay it on a sheet of Ditto carbon and write or draw with a ball-pointed pen or pencil with very hard lead. Press evenly, firmly.

2. Master or Ditto carbon paper can be used only once.

III. Running Copies

SUPPLIES Needed:

Master
Scotch tape
Scissors or sharp knife
DITTO Duplicator

TRAITS to be stressed:

Neatness when handling and cutting the master
Extreme carefulness in observing directions
Alertness

BASIC INFORMATION: It is recommended that you get some other experienced operator to show you how to perform these steps for running copies:

1. Get the duplicator ready. Be sure there is fluid in the fluid tank. Place paper on the feed tray. Adjust the rubber grippers and paper guides for the width of paper. See that the paper tray (which catches the copies) is in position. Check the grippers very carefully; if they are too loose, the paper may feed more than one sheet at each turn of the handle. Run some blank paper through the machine to check the positioning of the grippers.

2. "Prime" the machine. Set pressure lever at medium. Each Ditto Direct-Process duplicator has a strip of felt (called the "wick") placed where it moistens a rubber roller which in turn moistens the paper that comes into the machine. The wick must be moist when you are running copies. If the machine has been idle, the wick will need to be "primed" (moistened). If you make the wick very wet, you will get darker copies, but fewer of them. If the wick is too dry you will get light copies, but more of them.

3. Put the master on the machine. Turn the handle clockwise to the six o'clock position (straight down). Open the clamp that will hold the master on the drum, (the cylinder that turns). Insert the top edge of the master into the opening (it goes in about 1/4 inch) so that the side with carbon on it FACES UP when the drum is turned; then return the clamp lever to its normal, locked position.

4. Run the copies. Turn the handle clockwise. Each time you turn it all the way around, you will print one copy of the master.

5. Remove the master. Stop the handle at the six o'clock position. Open the clamp lever, lift out the master (carefully, not touching the carbon), then close the clamp lever unless another master is to be run immediately. If the machine is not to be used at once set the copy control lever and the pressure control lever at zero. Turn the fluid tank OFF on the Standard.

IV. Correcting Masters

SUPPLIES Needed:

Blockout pencil
Razor-Knife or Scalpel
Scotch tape
Pencil eraser

TRAITS to Stress:

Deftness in handling correction material
Ability to do fine, "close" detail work

BASIC INFORMATION: When you type a master, your typing simply puts carbon on the back of the master. When you make an error, you have carbon where you do not want it.

1. If you do not need to type over the mistake, you can (a) CUT IT OUT of the paper with a razor, knife, or scissors. Or, (b) COVER the error with Scotch tape, gummed label, or the "Blockout" wax of a Ditto Blockout Pencil. If the error is cut out or covered over, it cannot reproduce. Either method is good for eliminating an extra letter between words, a word that runs into the margin, an unwanted underscore or punctuation mark, etc.

2. If you must type a correction at the point of the error (as in a misspelled word), you must first eliminate the error. This you do by:

a. lightly scraping off the carbon and coating the error with Blockout wax
b. or erasing the error very thoroughly

After the error has been disposed of, you are ready to type the correction. However, remembering that you "used up" the carbon at that point when you typed the error, you must provide some new carbon there. So, insert a slip of fresh Ditto carbon (torn from the top of the carbon sheet) under the master at the point where you must type. Type the correction; then <u>remove the extra slip</u> before going on.

SPECIAL Correction Short Cuts:

1. You can scrape part of a letter with a blade to change an E to F, an o to c, a B to b, and so on.

2. You can slice up a master and tape it back together in a new arrangement--to move a heading, to delete a paragraph, and so on.

3. You can use a ball pen or hard pencil to "touch up" some errors--to change a comma to a semicolon, to insert a period, to strengthen a letter.

4. You can strike over (lightly) some letters, like an e over c, p over an o, b over h, f over t, etc.

V. Securing Attractive Effects

SUPPLIES Needed:

A Ditto Masterset or sheet of unused Ditto carbon and master
Ditto carbon sheet in red, green, or blue

TRAITS to stress:

Neatness in working with Ditto carbons
Carefulness
Conservative taste in "decorating"

BASIC INFORMATION: There are at least six ways to help secure attractive effects on Ditto copies.

1. Excellence in typewriting is the most important factor. Nothing can make up for errors, uneven stroking, or poor arrangement.

2. Regular typewriting display
   a. Underscoring important words
   b. Centering display headings
   c. Using all capitals for emphasis
   d. Indenting paragraphs extra deep
   e. Putting extra space around headings
   f. Typing key words twice, for boldness
   g. Justifying lines so they end evenly

3. Colored paper gets attention, too. In many offices, all special notices are duplicated on colored paper--green might be for announcements from the President, for example; light blue for notices from the Personnel Director.

4. Illustrations may make a job more attractive. Illustrations include drawings, cartoons, lettering, charts, graphs, and so on. You can include on a master whatever you can trace or draw.

   Step One: Sketch lightly or trace onto a master sheet (without having Ditto carbon under it) the illustration exactly where you want it to be.

   Step Two: Place the master on Ditto carbon and, using a ball pen or pencil with hard lead, go over the drawing, pressing firmly, to get a clear carbon imprint on the back of the master.

5. Color brightens a Ditto master. Ditto carbon is usually purple; but Ditto carbon is also available in red, blue, green and black. You can prepare an entire master in one of these other colors simply by substituting a colored carbon sheet for the purple one. Color is usually reserved, however, for spotlighting important items, like headings, and for indicating loss figures in bookkeeping.

To have part of a master in red, blue, or green, type the master in the regular way; but when you come to a part to be in color, insert a slip of colored Ditto carbon between the regular carbon and the master. Type the material that is to be in color; then remove the color carbon slip and continue.

To use color in an illustration, place the master on a sheet of colored Ditto carbon and trace or draw the part that is to be in color. You can bring different colors close together but must not let them touch or cross.

6. Special effects can be given to a Ditto job by drawing lines or dots around part or all of the material on the master, by inserting series of asterisks (*), and so on.

STENCIL DUPLICATING

DEFINITIONS

1. Film - transparent sheet
2. Stencil - waxed sheet (green, blue and other colors)
3. Cushion Sheet (or typing carbon) - thin coated sheet
4. Typing Plate - stiff plastic sheet
5. Back - heavy white paper attached to back of stencil
6. Interleaving Sheet - thin white sheet (discard)

ASSEMBLING THE STENCIL

For a medium copy, which we usually use in IWE, first remove both interleaving sheets between the stencil and the back. Insert a carbon or cushion sheet (coated side up) directly under the stencil. Place a typing plate between cushion sheet and back. (For a light copy replace the cushion sheet with an interleaving sheet. For a heavy copy omit the typing plate.) The stencil pack does not necessarily demand a film. To help in placement, you may put a sample copy under the stencil in place of the cushion sheet. This sample should not be typed on mimeograph paper. Do not type above line 3.

TYPING THE STENCIL

Before inserting the assembled stencil, clean the typewriter type thoroughly by placing the ribbon indicator on stencil or "white" and typing the alphabet, both upper and lower cases, a few times or until the impression is clear. When typing a stencil on a manual machine, use a heavier stroke for capital letters and a lighter stroke for punctuation marks. The white warning numerals on the stencil are provided to show you how many lines you can type before you reach the bottom of the stencil for your size paper. The lines on the stencil show where the top, bottom, and sides are for the size paper you are going to use.

CORRECTING THE STENCIL

When making corrections, do not remove the stencil from the typewriter. Detach the film from the top of the stencil. Hold the stencil away from the backing sheet. Apply a light coat of thin correction fluid. Be certain, however, that no light or white shows through. Allow it to dry before reattaching the film and typing over the corrected spot. Make sure to screw the top of the correction fluid on tightly after EVERY use, because the fluid will become thick or spilled. It is also a good idea to do the first proofreading (remember all duplicating work must be proofread twice) while the stencil is still in the machine in order to eliminate difficulties in realignment. If a correction must be made after the stencil has been removed, make test letters near the place of your intended correction in order to realign the stencil correctly. Block out these test letters when the correction has been made. To assist in making good corrections, write your name and the typewriter number at the top of the stencil.

STYLUS WORK

To draw, write, trace, or shade on the stencil with styli, remove the top film and use the mimeoscope (illuminated drawing board) and/or drawing plate.

FILING

GENERAL RULES AND SUGGESTIONS

1. Finding not filing is the most important consideration.

2. Always file behind the guides.

3. Letters in individual folders should be arranged in order of date; the most recent at the front of the folder.

4. The miscellaneous folder goes behind its matching primary guide and it is the last folder behind the guide.

5. Filing should be done daily.

6. When removing folders from the file, always hold them by the side or center--never by the tab.

7. When inserting papers in a folder, be sure the paper falls to the bottom of the folder.

8. All headings of papers should be to the left as the file clerk faces the file.

9. Avoid the use of clips and pins; they can cause papers to become "lost."

10. The alphabet is the basis of all filing systems.

11. Don't open more than one file drawer at a time in the same stack. A stack of file drawers may easily tip over if you do.

12. Never place a paper smaller than half of a regular correspondence sheet in the file without first pasting or stapling it onto a full-size sheet of paper.

13. Letters in miscellaneous folders are filed alphabetically.

14. Folder labels may be purchased in continuous rolls or strips.

15. A small filing stool, on rollers, is a handy aid in placing material in the lower file drawers.

16. Nothing precedes something.

FILING GLOSSARY

Alphabetic filing . . . . . filed according to the letters of the alphabet

Alphabetic index order . . the final alphabetic arrangement of the index units

Binder folder . . . . . a folder which contains a metal fastener for holding papers

Business name . . . . . the official name of a company, a corporation, a partnership (firm), an organization, or an association

Coding . . . . . underlining the portion or portions of a name or subject title that are to be used as the first index unit. The initial letter of the coded portion constitutes the letter of the alphabet under consideration

Cross referencing . . . . . the process of filing a letter in one folder and then preparing a cross-reference sheet to be filed in a different folder

Double notation . . . . . A-Az, Ba-Be, Bi-Bri, etc.

Expansion folder . . . . . a folder with additional folds at the bottom

Filing . . . . . the systematic and orderly arrangement and storage of materials (cards, letters, invoices, statements, catalogs, blueprints, newspapers, and other office and personal records) for future reference

Folder . . . . . a container for matter to be filed, made of heavy paper folded at the bottom

Full name . . . . . the surname and at least one given name or initial of a person

Geographic filing . . . . . filed according to the name of the place

Given name . . . . . first name or initial of a person and his middle name or initial, if any

Guides . . . . . pieces of stiff cardboard which divide a file into sections

Indexing . . . . . mentally dividing names into index units for purposes of alphabetizing and then deciding the order in which the units are to be alphabetized

Index unit . . . . . each portion of a name that is used in indexing

Natural order . . . . . the official name of a business or organization and the legal name of a person in the order in which it is written or used

Numeric filing . . . . . filed according to number

One-fifth cut . . . . . a tab which is 1/5 the width of the guide

One-fourth cut . . . . . a tab which is 1/4 the width of the guide

Out folder . . . . . a folder inserted in the files in place of a letter that has been removed

Out guide . . . . . a guide inserted in a folder in place of a letter that has been removed

Personal name . . . . . the legal name of a person, whether that name stands alone or is part of a business name

Single notation . . . . . A, B, Br, C, etc.

Sorting . . . . . arranging the papers in complete sequence by bringing together all papers about one name, one subject, etc. (Sav-a-sort frequently used)

Straight-edge folder . . . a folder having a straight edge at the top

Subject filing . . . . . filed according to the name of the subject that properly identifies the papers

Surname . . . . . family name (last name)

Tab . . . . . an extended portion along the top edge of a folder or guide

Tickler . . . . . a file which serves as a daily reminder of matters that require attention

Written form . . . . . the way in which a name is written for filing purposes. This written form is referred to as a CAPTION when it is used as a heading for a guide or a folder.

STUDENT HANDBOOK APPENDIX

APPENDIX A (1)

Log for week of January 30-February 5
Work station Miss Gordon

Name Jane Doe
IWE 2 Period 3
Due date February 8, 1966

Grade for week B

N. B.: USE REVERSE SIDE OF THIS SHEET IF MORE SPACE IS NEEDED

Tuesday Date February 1, 1966

I was temporarily assigned as Miss Gordon's secretary. I went to her office, but could not find her. I came back to Room 223 and Mrs. Cavitt sent me to the counseling office. There I alphabetically filed temporary program cards. I learned of the complexities of programing students and of keeping a record of each student attending Sunnyside High School.

Today, I learned if, after making an erasure, you find a dark spot on the back of the paper, you can improve the appearance of your work by covering the spot with white chalk.

Wednesday Date February 2, 1966

Miss Gordon showed me where all the supplies were, what I was to do, and also the typewriter with the Spanish and French accents and punctuation marks on the keys. She told me that she would leave a note on what to do when she would not be in the office. She gave me a folder in which she will leave instructions and I will leave questions if I have any.

Today, I learned when forwarding mail over an extended period to the same addressee, number the envelopes so that the addressee will know whether he has received all of them.

Thursday Date February 3, 1966

I started to work for Miss Gordon today. I went to the Language Office and she gave me some books to file. When I finished that, she had me set up her grade book. I misunderstood her directions and put the dates in the wrong places. Miss Gordon straightened me out and I filled in the rest of the book. Then I erased all the mistakes I made. Even though I was not using the typewriter, I was able to use the erasing information since I was working with an ink eraser.

Today, I learned

Friday Date February 4, 1966

I started to clean out the supply cabinet when Miss Gordon came into the Language Office. She had me type up some textbook sign-out sheets and a Spanish study sheet on a master. I ran off 35 copies on the spirit duplicator.

Today, I learned always fill in the subject line on an interoffice memorandum. This makes it easier for the employer to locate a memorandum in a mass of papers. It simplifies filing for the secretary, too.

30 SH

APPENDIX A (1) Continued

Monday Date February 7, 1966

When I got to the Language Office, Miss Gordon sent me to the Main Office with a message of some sort. When I got back she gave me an announcement to type on a master and run off. I ran off the copies and then put one in each teacher's box. When I got back to the office, Miss Gordon was not there so I took up where I left off in cleaning the supply cabinet. I plan to clean a little whenever I have finished my work or have a little spare time.

Today, I learned

APPENDIX A (2)

SAMPLES FROM LOG

Today, I learned:

to replace all equipment used

to approximate time allotted for a task

to center assignment on the master for better appearance

to know the names of the staff at school

to know the location of the important offices at school

when in doubt, check to be certain

how to assemble a stencil properly

how to make corrections on a stencil

what the numbers on the stencil indicate

to strive for accuracy, not for speed

to clean up all materials after using them

to strike the keys evenly for better stencils

to use a light coat of correction fluid for errors

for better masters you should clean the keys occasionally

to ask when not certain of handwriting

to always prime the Ditto duplicator if it hasn't been used that day

to staple diagonally in the left hand corner

to straighten up the paper around the Ditto machine at frequent intervals

to review my tabulation

to save all masters until I have checked with my supervisor

to mark where to stop at the end of the page

to check old tests for previous mistakes made

APPENDIX B (1)

SAMPLE HOMEWORK

Summary of Unit 10
"Writing Business Letters"
Section 1
Pages 196-204

Alice Kintner
In-school Work Experience
Period 5
March 31, 1966

This unit talks about why business letters are important. It gives the tests of a good business letter. When testing the letter, you should look to see if it:

1. is accurate in its statements and is clear to the reader
2. uses language appropriate to the subject and the reader
3. uses simple, clear, and concise wording; "deadwood" eliminated
4. reflects basic good will; sincere, courteous, friendly in tone
5. follows good sales principles--attention, interest, conviction, action
6. is attractive in appearance and arrangement
7. is grammatically correct with no "roadblocks" to hinder the reader
8. achieves its purpose; shows good planning and clear thinking

This unit tells you that you should write from the reader's point of view. This means that instead of using the pronouns I, mine, we, and ours, you use the pronouns you and your.

When writing a letter, you should be concise and eliminate all unnecessary words. You should also be courteous, positive, and pleasant.

You should make your first statement count and close your letter effectively.

APPENDIX B (2)

SAMPLE HOMEWORK

Essay on how to erase
at the typewriter

Jane Doe
In-school Work Experience
Period 3
February 7, 1966

HOW TO ERASE AT THE TYPEWRITER

Knowing how to erase correctly at the typewriter is important to the office worker for two reasons. First, he should want to erase so as to keep his typewriter in good condition. Secondly, he should want to take pride in a neat, typewritten page with concealed corrections.

To accomplish the first of these--keeping the typewriter in good repair--the erasure should be made so that eraser particles don't fall into the machine. To do this, move the carriage to the extreme right or left by using the margin-release key. Thus the waste will fall onto the table and not the machine. Then blow or brush off any waste clinging to the roller before typing the correction.

To obtain a neat, concealed erasure, several rules must be followed. A clean ink eraser is used for the original copy and a clean soft eraser for the carbon copies. If the typewriter eraser were used on the carbon copies it would become too dirty to be used effectively on the original. Hold the paper firmly against the roller while erasing. Use a gentle, circular motion or an up-and-down motion--not a digging one.

To correct a carbon copy, put a card or metal guard between the carbon sheet and the copy being erased. Use a soft eraser. If a correction must be made on a carbon copy that has been removed from the machine, or if the carbon pack slips while erasing, type each correction separately after the pack is removed from the machine. To make a carbon correction rather than a ribbon correction, put a small piece of carbon over the spot to be corrected.

If an erasure must be made at the bottom of the page, roll the pack back and erase from the bottom. When typing over a correction, type over the letter very lightly several times to make it blend with the rest of the typing.

SUNNYSIDE UNION HIGH SCHOOL DISTRICT

Sunnyside, California

March 23, 1966

Association Films, Inc.
25358 Cypress Avenue
Hayward, California

Gentlemen:

Please send me your free-loan film "WHO WROTE THAT?" for use in my Business Communications class during the week of April 11 or 18, 1966. Thirty-five of your corresponding pamphlets that summarize the salient message of the film would be useful, too.

The film will be returned the same week with postage paid.

Yours truly,

Ann Peterson, Head of
Business Education Department

APPENDIX G

MEMORANDUM TO TRAINING STATION PERSONNEL

TO: DATE:

FROM:

SUBJECT:

In-school Work Experience Education is primarily an on-the-job learning experience for students. You should give complete and explicit directions for all work to be done, check on assignments in progress, and verify the accuracy and usability of the completed job. The basis for grading an office practice student is first, quality; second, quantity; and third, improvement and growth throughout the course.

Attendance: The person to whom a student is assigned is responsible for taking attendance every day except Tuesday. On Tuesday, each student must report to the classroom to turn in his weekly homework assignment and take his weekly test.

UNLESS ON AN AUTHORIZED ERRAND, YOUR IWE STUDENT SHOULD REMAIN AT HIS TRAINING STATION FOR THE FULL PERIOD. PLEASE KEEP HIM WORKING IN YOUR ROOM UNTIL THE DISMISSAL BELL RINGS.

Production: Each office assistant should check the typewriter daily to see that it is in good working condition. If the machine needs repair, a repair slip should be filled out completely and given to the office practice teacher.

For difficult ditto masters or mimeograph stencils, a rough draft should be typewritten by the assistant first, so he can check on grammar, placement, spelling, etc.

When filing work is finished, a student should have time to check his work, because finding the material is more important than filing it.

Supplies: All supplies (paper, masters, stencils, correction fluid, etc.) should be furnished by your department for the student assigned to you.

Habits, traits, attitudes: Students are expected to maintain business-like conduct, attitudes and grooming at all times. Students are told to treat all work done in connection with office practice as CONFIDENTIAL. If citizenship or conduct becomes a matter of concern at any time, the teacher-coordinator should be notified immediately.

Grading: A folder is to be kept at the training station for each office assistant with samples of all of his work. This folder is to be available for viewing and grading by the IWE teacher-coordinator at any time.

APPENDIX K

SUNNYSIDE HIGH SCHOOL*

Office of the Principal

To: SUNNYSIDE STUDENT SWITCHBOARD OPERATORS

From: Allen Ray, Principal

CONGRATULATIONS on your selection as a member of the corps of Sunnyside Student Switchboard operators. As the public's first voice contact with our school, yours is a most important student position. A PLEASANT voice answering the switchboard signal is the unseen receptionist for the Principal's Office. We believe we have the best switchboard operators in the whole School District, and we would like our telephone callers to AGREE that Sunnyside has the MOST COURTEOUS - MOST HELPFUL - MOST PLEASANT - MOST RELIABLE - MOST EASILY UNDERSTOOD telephone operators in San Mateo County. Let's keep our images clear and our halos polished by observing the SSO (Sunnyside Switchboard Operators) rules!!!

RULE No. 1 Good service requires good JUDGMENT. Judgment is acquired through experience. As a new switchboard situation arises each day and is solved, you have acquired a new bit of knowledge to aid you in applying judgment to a situation.

RULE No. 2 You are AT WORK. Do not CHAT in the office. While you are busily socializing, several new situations may have developed around you which, had you been listening and observing, would have added to your experience and JUDGMENT.

Ask for an assignment and if none is available, you are to STUDY or practice typing study material. Reading a library book at the switchboard does not give a businesslike impression, even though the book may be assigned reading.

Concentrated application to study, or typing practice, conveys the best office-practice attitude to those who come to our reception desk. Besides, your future employer may happen through our door at any time, and you want to IMPRESS him with your responsible devotion to duty.

RULE No. 3 Never, NEVER repeat anything you hear, or describe anything you see, in the office. This includes the contents of memoranda, letters, telephone messages, and other communications. This rule relates directly to Rule No. 1 - JUDGMENT!

RULE No. 4 NO personal telephone calls. This applies whether or not you are actually on switchboard duty.

*Originated by Bernard Archbold, Crestmoor High School, San Bruno, California.

Instructions to Switchboard Operators

RULE No. 5 The ONLY proper switchboard greeting is "Sunnyside High School--Student Speaking." Pause briefly after the word "school," so that your greeting can be understood clearly. Always use the words "Student Speaking." Frequently it is important for a caller to know that he is speaking to a student, not a member of the faculty. LISTEN attentively. SPEAK distinctly. DO NOT HURRY your words. Be especially careful of your grammar and telephone etiquette (remember you represent Sunnyside High School).

5a When you are asked for a specific person by name, say, "Thank you" to indicate you understood the request, before making the connection. When a caller asks for a person by title (for example, the Dean of Boys), say "Thank you, that's Mr. Armstrong." This provides the caller with the exact name of the person called and is helpful in starting the conversation. Memorize the names and titles of school personnel. Consult the Schedule of Classes at the switchboard if you are in doubt.

5b When asked for information (switchboard operators can give no information, except as specified in Rule No. 14), say "Thank you, I think Mrs. X--- can help you."

5c When a requested extension is busy, say "Mr. X---'s line is busy. Will you wait, or may I take a message?" If a caller elects to wait, BE CERTAIN NOT TO FORGET THE CALL. About every thirty seconds, open the speaking key and say "Mr. X---'s line is still busy. Will you wait?"

5d Keep pencil and paper at hand for MESSAGES.

RULE No. 6 All messages are IMPORTANT! Some messages are URGENT! An urgent message is one which the caller indicates needs to have immediate attention (before the end of the period). Ask the secretary whether to interrupt the teacher's class to relay a message considered to be urgent.

RULE No. 7 Messages must be DELIVERED to be valuable! Messages must be COMPLETE and ACCURATE to be deliverable! An urgent message is always delivered to the teacher by intercom at the time decided by the secretary. All other messages are delivered to the Attendance Office at the end of the period.

Messages for nonteachers (administrative personnel, custodians, gardeners, etc.) are given to the secretary.

Instructions to Switchboard Operators

After delivering the message to the teacher, write on the back of the telephone notice: Date, Mr. X--- contacted in Room ---, Your name, Time. Place message in teacher's mail box.

If you were UNABLE to locate the teacher, supply the same information with the words "was unable to contact Mr. --- in the following places: ---, ---, ---."

Possible locations for contacting teachers are: (1) last teaching room, (2) next teaching room, (3) Rooms 102 or 201.

RULE No. 8 Messages must be ACCURATE! Messages must be COMPLETE! Copy numbers and names correctly. In your most courteous manner ask the caller to repeat the name, number, or spelling if you do not understand. An appropriate phrase might be, "I'm sorry, sir, will you spell the name for me?" In closing a telephone conversation involving a message, it is well to double-check by saying, "That's S-M-Y-T-H-E, DElaware 3-1682. I'll have Mr. X--- call you, Mr. Smythe." This recheck is especially desirable with the all-number telephone system.

RULE No. 9 Calls for TEACHERS. There are no connections between the switchboard and teachers' classrooms. When you have a request to speak to a teacher, explain to caller that there are no direct lines to the classrooms. Say, "I'm sorry, sir, we have no direct lines to the classrooms. May I take a message and have Mrs. --- call you?" Follow Rules 6, 7, and 8 for messages.

Teachers are NEVER to be interrupted during class except for an URGENT message or on principal's instruction. A secretary will decide whether message is sufficiently urgent. NEVER give location of a teacher's classroom.

RULE No. 10 The ONLY proper greeting to answer the intercom is: Office...Student Speaking. Pause briefly after the word "office" to be understood clearly. Be pleasant, courteous, and businesslike as on the outside switchboard. All general switchboard rules apply.

Rules Nos. 7 and 9 for interrupting a teacher during class are to be used in answering the intercom switchboard, with the following amendment. Since all callers using the intercom will be school personnel, when a call comes for a teacher, first consult the Schedule of Classes (on top of the switchboard) to learn whether the teacher has a class. If so, say "Mr. X--- is teaching a class. Shall I interrupt?" When told it is desirable to interrupt the class, you may proceed to do so.

Instructions to Switchboard Operators

When the teacher being called has a preparation period, he can frequently be located in the department office or in one of his classrooms which is not being used.

In making an intercom connection, ring only ONCE. If the call cannot be completed within thirty seconds, open the listening key and tell the caller, "Your party does not answer. Can you suggest another room I might try?"

RULE No. 11 The ONLY proper greeting to answer an extension on the outside switchboard is: Office...Student Speaking. Remember the difference between the TRUNK lines (calls from persons off the Sunnyside campus) and the EXTENSION lines (calls from persons on the Sunnyside campus). You must be alert to use the proper greeting for each.

RULE No. 12 Sunnyside High School receives occasional calls intended for other schools. If a caller asks to speak to someone whose name is not on the Sunnyside High School staff list, inquire courteously whether the person may be connected with another school. When caller insists the person is at Sunnyside High School, transfer the call to the secretary.

RULE No. 13 Do not engage in lengthy CONVERSATIONS with callers. Make transfers as promptly as possible to free yourself for the next call. Unless specifically directed to do otherwise, transfer ALL calls. See Rule No. 14.

RULE No. 14 In general, do not give information (transfer requests for information to the proper office, or to the secretary). This rule is modified to the extent that you may answer a VERY short, routine, specific question, as for example: What time is school out? The key words are short, specific and routine. For purposes of this rule, routine information is that of which you are absolutely certain.

RULE No. 15 Switchboard operators are assigned for the purpose of RECEIVING incoming calls. Student operators are not to place calls for anyone (teachers, custodians, office personnel, or visitors) without the principal's permission. When you are asked to place a call, explain courteously that you are NOT permitted to do so. Provide an outside line so that the person may place the call himself.

RULE No. 16 DO NOT TOUCH any of the switchboard's master controls at any time. Cords, plugs and keys are your concern. Do NOT turn off the buzzer - it is your ALERT signal!

Instructions to Switchboard Operators

RULE No. 17 Do not CHEW GUM while operating a switchboard, or serving as receptionist for any office. This is not a habit which is appropriate in a position where you should set a proper example for other students. In addition, gum chewing may interfere with clear enunciation and make your words difficult to understand. Chewing gum means having gum in your mouth at all.

RULE No. 18 APPROPRIATE OFFICE APPEARANCE IS MOST IMPORTANT. You are expected to use good taste in the selection of your school clothes and to be dressed at all times in a manner appropriate to a business office.

18a All clothes are to be worn in a normal manner; i.e., tuck-in blouses are to be tucked in, skirt bands are not to be rolled or folded over at the waist.

18b Skirts and dresses are to be worn at an appropriate length.

18c Eye shadow, eye liner, expressive make-up of all types, and extreme hair styles are strongly discouraged as being inappropriate.

18d The wearing of head scarves and/or all types of hair clips and curlers is forbidden.

18e The wearing of décolleté and/or spaghetti-strap dresses is forbidden.

18f Thongs and sandals are, also, highly undesirable and inappropriate for any business office.

18g You are expected to be courteous and respectful at all times, and any failure to be so will make you liable for removal from your duties.

RULE No. 19 Occasionally you may be the only person in the principal's office. You are then the receptionist for SUNNYSIDE HIGH SCHOOL, in person as well as in voice. It is a special privilege to be allowed to serve as both switchboard operator and receptionist without school personnel being present. It is an IMPORTANT assignment, and you can demonstrate your appreciation of this confidence in your ability by being especially businesslike, especially responsible, especially courteous. When a visitor approaches the reception desk, complete the telephone call you are making, then STAND, and say, "Good morning (or afternoon). May I help you?" A pleasant welcoming smile should be part of your greeting.

Instructions to Switchboard Operators

Follow Rule 9 implicitly for interrupting a teacher in the classroom, or directing a caller where the teacher may be found. Ask courteously whether the caller would like to wait until the end of the period (when you can call the teacher), or leave a message. Provide a pencil and a pad of paper for the message if needed.

Do not make appointments (or promises) for anyone at Sunnyside. Do not give addresses or telephone numbers of anyone at Sunnyside. Make no commitments of any kind. Give no information, except as allowed by Rule No. 14. Take messages ONLY.

Hold all mail or packages received until they have been checked by the secretary. Do not distribute materials of any kind (checks, keys, letters, packages), even though you may be familiar with the distribution procedure. Ask any one of the secretaries to sign for any packages which may be delivered.

When the secretary, or principal, leaves the office without giving you a return time, it is reasonable to assume the absence will be only a few minutes, and you can ask callers to be seated until someone arrives.

RULE No. 20 Volunteering for switchboard duty is a very commendable means of gaining experience in the general office. Even though you are contributing your time OUTSIDE class, you must obey all the switchboard operators' rules. Volunteers, especially, are reminded that at NO time may you have friends in the office to chat, wait, watch, keep you company, or learn switchboard operation. When you volunteer for an office assignment, you must be as businesslike as though you were receiving a salary or completing class time for your efforts. Volunteer work will add invaluable experience to your list of qualifications for employment in the future. In a sense, EXPERIENCE is your salary when you volunteer for office duty.

RULE No. 21 Read these rules frequently to refresh your memory. We want you to be a Sunnyside Switchboard Operator with a sparkling halo - not a cracked one! I know you will do an exceptional job.

Instructions to Switchboard Operators — Reference Information

BE COURTEOUS BE HELPFUL BE RELIABLE BE ACCURATE

Sunnyside High School..(pause)..	Hello....Sunnyside
Yes, sir. Yes, ma'am. Yes.	Yeah. OK. Uh-huh.
Thank you (to acknowledge a request, or indicate you understand).	OK. (Worse..complete silence!)
Mr. X--- is not in his office.	Mr. X--- is not here. Mr. X--- is at North High School. (always leave it to the judgment of the secretary to reveal whereabouts.)
Mrs. Y--- is away from her desk. May I have her call?	Mrs. Y--- is out. Mrs. Y--- is having coffee. She's not here.
Mr. X--- is not in the office today. Perhaps Mrs. Y--- can help you. I'll connect you.	He's not here. He won't be back. Call tomorrow.
One moment, I'll transfer your call to someone who can help you.	I don't know. Wait a minute.

V. RELATED CLASSWORK AND HOMEWORK

V. RELATED CLASSWORK AND HOMEWORK

The total time for formal class presentations of office procedures to in-school work experience education students is limited because the majority of their time is spent in "learning by doing" at the training station. This is the way it should be, for the program design is to synthesize, review, and reinforce office training through practical experience within the school--not to displace other courses in the curriculum. The teacher-coordinator will plan carefully for the weekly meetings which provide opportunity to personally emphasize topics related to satisfactory performance of common office duties. Much has been written about methods of teaching clerical and office subjects that is useful and pertinent to conducting the class meetings. Purposely such material is not reiterated. The following manuals are recommended for teacher-coordinator reference in preparing units of instruction:

> OFFICE PROCEDURES, A Teacher's Manual, Business Education Series. Sacramento, California: California State Department of Education, Bureau of Business Education, 1965.
>
> OFFICE PRACTICE 1 and 2, An Instructional Guide Los Angeles City Schools, Publication No. SC-590, 1962

The impossibility of implementing the many excellent teaching suggestions made in the literature places significance on coordinating homework assignments with classroom and training station instruction. Because each student enters the program with a background of different training and abilities, the teacher-coordinator needs to develop group and individual schemes of homework study to extend and fill in gaps of previous learning. Illustration IV is of homework assignments for two groups. Placement in a group is based on whether the student is a first-or second-semester enrollee and his competency in subject areas related to common office duties. This grouping cannot meet the needs of all individuals, and student time is too valuable to spend it in needless repetition. Therefore, in addition to or in lieu of the regular homework in textbook and supplementary sources (Appendix A), separate reference book (Appendix B) assignments can be given. Also, resource folders prepared on office procedure topics guide interested students in intensive study. The resource folders contain periodical and pamphlet references plus leading questions and suggestions for research at student level.

By providing practical experience, class instruction, homework assignments, and individual projects, the teacher-coordinator endeavors to help all students in the program benefit by qualifying for an entry office occupation. To meet minimum requirements, students will understand and become proficient in the following duties of a general office clerk:

1. Typing
2. Using Selected Office Machines
3. Filing
4. Handling Mail
5. Handling Supplies
6. Using the Telephone
7. Using Mathematics
8. Using Sources of Information
9. Acting as Receptionist

In conjunction with these techniques, the student should develop a desirable personality and his potential abilities to spell correctly and use good English.

GROUP I

DUE DATE		HOMEWORK ASSIGNMENT
1965-66	(1)	Logs only to hand in today
	(2)	Spelling 101-120
Nov. 2	(3)	FIRST MARKING PERIOD FINAL EXAMINATION TODAY
	(1)	Study "Job Tips," page 400.
Nov. 9	(2)	Start on first page of filing practice set with Rule 1 and go through 4. (Get this set from your teacher.) Type (or print legibly) each name in index form on a 3 x 5 card. Start name in the upper left corner of the card approximately 1/4 inch from top and side. Go down 4 lines from the name and type the rule number. In upper right corner type the date and your initials. Put names in index style; that is, the first filing unit comes first, the second unit comes second, the third unit comes third, and so on. Marshall, Robert C. 10/30/65paw Rule 1 SAMPLE
	(3)	Arrange these cards, 37 in all, in one alphabetic set. Then type an alphabetic list of all these names, in index form; that is, last names first just as they appear on your cards. Double space and number your list, two columns to a page. Before you type your list, be sure to check your cards with the key displayed in Room 226.
	(4)	HAND IN LIST. SAVE YOUR CARDS--they will be needed for a later assignment.
	(5)	Spelling 121-140
	(1)	Same as above for Rules 5, 6, 7, and 8. Your first card should be Madame Sophie Mauree. The first number on your list should be 38. Hand in list only.
Nov. 16	(2)	SAVE THESE CARDS AND ALL THE ONES in the following assignments through Rule 23.
	(3)	Spelling 141-160

ILLUSTRATION IV (1)

GROUP II

NOTE: EACH WEEK YOU ARE RESPONSIBLE FOR THE INFORMATION CONTAINED IN ALL GROUP I ASSIGNMENTS. REMEMBER TO CHECK THESE ASSIGNMENTS AND REVIEW THE MATERIAL COVERED--FREQUENTLY YOUR WEEKLY TESTS WILL BE ON I SUBJECT MATTER. IN ADDITION TO THIS WEEKLY REVIEW, YOU ARE REQUIRED TO HAND IN A WEEKLY LOG, AND TO STUDY AND HAND IN THE HOMEWORK LISTED BELOW.

DUE DATE		HOMEWORK ASSIGNMENT
Sept. 21	(1)	Summarize Unit 6, "Using Sources of Information," pages 94-115. Answer questions 1-10, "For You to Discuss," page 111. ALL ANSWERS SHOULD BE IN COMPLETE SENTENCE FORM SO THAT THE READER WILL UNDERSTAND WHAT THE QUESTION IS. FOLLOW THIS FORM IN ALL SUCCEEDING ASSIGNMENTS.
Sept. 28	(1)	Answer questions 1, 2, 3a, 3b, and 4 page 112. Mount clippings for 3a and 3b on a sheet of paper 8 1/2 x 11 inches. Type the source and date above each clipping.
Oct. 5	(1) (2) (3)	Study Unit 1, pages 4-10, "The Secretary--Assistant to the Executive." Write a short summary--200-300 words. Write answer to question 8, page 113. Write answers to all of "Checkup on Fundamentals," page 115. (This includes "Words that Confuse, Words to Pronounce, and Expressing Yourself.")
Oct. 12	(1)	Study and summarize Unit 11, "Business Reports and Legal Forms," Sections 1, 2, 3, 4, pp. 224-235.
Oct. 19	(1)	Study and summarize Unit 11, Sections 5, 6, 7, pp. pp. 236-251.
Oct. 26	(1) (2) (3)	Study and summarize Unit 11, "Business Reports and Legal Forms," Section 8, p. 252. Write questions 1-20 in "For You to Discuss, pp. 253-254. Study "Job Tips," p. 258, and do all of the "Checkup on Fundamentals," p. 259.
Nov. 2	(1)	FIRST MARKING PERIOD FINAL EXAMINATION TODAY
Nov. 9	(1)	Review Unit 10, "Writing Business Letters," pp. 194-223, and hand in answers to questions in "For You to Discuss," page 219.
Nov. 16	(1)	Summarize Unit 12, "Travel and Transportation," pp. 260-293.
Nov. 23	(1)	Write "For You to Discuss," p. 287, and "Checkup on Fundamentals," pp. 292-293. (Include "Expressing Yourself," p. 293.)
Nov. 30	(1)	Summarize Unit 13, "Handling Money and Maintaining Financial Records," pages 294-323.
Dec. 7	(1)	Write "For You to Discuss," pp. 323-324, and all of "Checkup on Fundamentals," p. 331.
Dec. 14	(1) (2) (3)	Summarize Unit 15, "Office Machines," pp. 352-364. Write answers to "For You to Discuss," p. 365. Memorize "Job Tips," p. 366.
Jan. 4	(1)	Make up and answer 50 questions from "Job Tips," pages 12, 28, 42, 70, 92, 114, 132, 160, 192, 222, 258, 291-292, 330, 350-351, 366, 400, 426, and 463.

ILLUSTRATION IV (1)

GROUP II

DUE DATE	HOMEWORK ASSIGNMENT (Continued)	
Jan. 11	(1)	Review Units 1, 2, and 3.
	(2)	Write a one-page summary of each.
Jan. 18	(1)	Review all of Unit 18, pages 428-464.
	(2)	SEMESTER FINAL EXAMINATION TODAY.

ILLUSTRATION IV (2)

VI. FILING, UNIT OF INSTRUCTION*

OBJECTIVES

To recognize the importance of filing and finding
To master the basic rules of indexing and alphabetizing
To be able to file properly and to find materials efficiently in an alphabetic system
To become acquainted with various other systems of filing
To be familiar with filing procedures; such as, charge, follow-up, and cross reference

EQUIPMENT NEEDED

Correspondence filing cabinet; trays for card files; stencil files; visible files; and transfer files

IN, OUT, and FILE trays

Stapler, date stamp, and "File" and "Sample" rubber stamps used in releasing Office Services Pool copies of production work

Desk-type sorters

Stool and/or filing shelf

SUPPLIES NEEDED

Guides, folders, cards, labels, colored pencils

---

*Because filing activities are common to all offices, particularly in relation to the duties of beginning office employees, this unit of instruction has been included. If students previously have had intensive training in filing procedures, the teacher-coordinator will want to select only those areas which need review and synthesis; i.e., References 10:113-114, 11:139-144.

Reference numbers refer to Selected Text and Supplementary Books, Appendix A, by numbers preceding the colon and respective pages following the colon.

AREAS OF INSTRUCTION	Notes and References
A. Importance of Filing	
1. Definition of filing Webster's New Collegiate Dictionary: setting in order; laying away (papers, etc.), arranged in a methodical manner	1:197, 2:339, 4:374, 388; 5:1; 15:2; 22:2
2. Need for filing	1:198; 2:339; 3:320, 324; 4:374; 5:2; 15:1; 22:2-4 Discuss personal filing activities; i.e., addresses and telephone numbers, class notebooks, phonograph records, recipes, cancelled checks, income tax records, etc. Observe filing processes in school attendance office.
3. Kinds of material filed	1:199; 2:340-41; 4:374; 5:5-6 Illustrate with materials filed for Office Services Pool, instruction, student records, and correspondence in the classroom.
B. Definitions of Some Common Filing Terms (See Filing Glossary, p. 24 of Student Handbook.)	Explain and demonstrate, using samples of business correspondence and student papers.
1. Alphabetizing: arranging in dictionary order from A to Z	5:15; 13:cover
2. Indexing: mentally dividing names into separate units for purposes of alphabetizing and then deciding the order in which the units are to be alphabetized	1:211; 2:353; 373; 3:321; 4:375; 6:89; 15:37; 22:10
3. Unit: each portion of a name	1:211; 2:353, 3:321; 4:376; 5:17; 22:10
4. Coding: underlining first index units or writing caption for alphabetic consideration	1:232; 2:363, 374; 4:387; 5:65; 6:89; 15:38; 22:44
5. Sorting: preliminary arrangement of papers in sequence	1:233; 2:375; 4:387; 5:68; 6:98; 15:38

6. Inspecting: looking for indication materials have been released for filing	1:231; 2:373; 4:387; 5:63; 6:89 15:37; 22:44
7. Guides: file dividers	1:201; 2:344; 4:408-409, 418; 5:7, 10; 6:75; 15:44-45; 22:42, 45
8. Caption: letter, name, or number under which material is filed	4:415, 418; 5:8; 6:76; 15:45
9. Labels: sticker on which caption is typed and which is then placed on guide or folder tab or on file drawer	1:205; 2:347, 348; 3:325; 5:12 6:77; 15:52; 22:84
C. Common Kinds of Files (11:141-142)	Describe and illustrate.
	Show pictures from office equipment catalogs by using opaque projector; arrange bulletin board display with appropriate labels. Have students tour classroom and school offices to see various files in use.
1. Vertical	1:200; 2:342; 3:373; 4:384, 423-424; 6:74; 15:34
2. Card	
a. Vertical	1:207, 272; 2:349-351; 3:374; 4:425; 5:157-160; 15:137-141
b. Visible	1:262; 2:404; 3:375; 4:425; 5:161-164; 6:152-156; 15:141-143; 22:93, 94
c. Rotary	1:263; 2:405; 3:374; 5:167, 175; 15:89, 138; 22:88, 90, 93
3. Open shelf	1:275; 2:417; 3:373-374; 4:424, 426; 5:137, 174; 15:93, 159; 22:85
4. Bellows	Home files; 6:71, 73
5. Electronic data processing	1:276; 2:418; 4:426; 5:185-190; 15:161; 22:99-102
D. Rules for Indexing and Alphabetizing	1:211-220; 2:353-363; 3:321-323, 330-334, 340-347; 4:375-384; 5:15-21, 27-36, 41-47; 11:140-141; 13:2-56; 15:9-25; 19:covers; 22:11-33

	Provide exercises for mastery of rules, requiring students to prepare 3" x 5" cards at the typewriter. (Typing file cards: 15:21-22) Post key for checking index units and sequence.
	Have students arrange class rolls for teachers, names for music and sports programs.
	Apply skill by alphabetizing student information cards, registration cards, and report cards for school files. (Have a second student check alphabetizing for accuracy.)
E. Sorting	Use sorters and/or trays with guides.
1. Coarse	Sort large number of cards into convenient divisions; i.e., A-E, 1-50, etc.
2. Fine	Sort each division into smaller divisions A, B, C, 1-10, 11-20, etc.
3. Sequence	Sort small divisions into correct order.
F. Finding	
1. Material alphabetized	3:325-326; 4:429; 15:168-169; 22:73-74
2. Unusual listings	Use telephone and city directories to illustrate placement of difficult personal names (Mc and Mac), sound-alike names, business names, and Government agencies.
G. Alphabetic Correspondence Filing	Explain, demonstrate, and discuss using a collection of business papers, records, and correspondence.
1. Definition	1:201; 2:343; 4:375
2. Advantages and Disadvantages	4:422; 15:155
a. Speed of filing and finding; expandable	
b. Congestion	

3. Guides (lettered) — 1:201-203; 2:343-345; 3:373; 4:408-409; 5:10-11, 56-59, 150-151, 177; 6:45, 51, 74-76; 15:44-46; 19:3-5; 22:12, 42

   a. Cuts - 1/3, 1/5, etc.

   b. Captions

   c. Alphabetic

   d. Common name

   e. Special

   f. Out guide

4. Folders — 1:204-206; 2:345-346, 376; 3:372; 4:409-411; 5:12-13, 56-59, 150-152; 15:47-49; 19:4-6; 22:42-44, 84

   a. Individual (for active correspondence)

      1) four or more pieces for a caption
      2) arrangement of material in the folder
      3) avoid congestion

   b. Miscellaneous

      1) correspondence not found in individual folder
      2) arrangement of material in the folder — 1:234
      3) arrangement of the folder in the file
      4) how to avoid congestion

   c. Labels — 1:205-206; 2:347-348, 378; 3:325; 5:56-57; 15:49-52

      Have each student prepare captions for a guide and folder; i.e., their own class folder for homework assignments and tests.

5. Procedures

   a. Collect — 1:231; 2:373; 3:368; 4:385-386; 5:62; 15:35

   b. Read, Inspect — 1:231; 2:373; 3:368; 4:387; 5:63; 6:89; 15:37; 22:44

   c. Index — 1:231; 2:373; 3:368; 4:387; 5:64; 6:89; 15:37; 22:44

d. Code	1:232; 2:374; 3:368; 4:387; 5:65; 6:89-95; 15:38; 19:8; 22:44
e. Cross Reference	1:221-224; 2:363-366, 374; 3:369; 4:387; 5:66; 6:95-97; 13:53-56; 15:26-27, 38; 19:11; 22:35-39
f. Sort	1:233; 2:375; 3:369; 4:387; 5:68; 6:98; 15:38; 19:10; 22:44
g. File (Emphasize headings to left)	1:235-236; 2:377-378; 3:324-325, 371; 4:388-391, 427-428; 5:69-70; 6:99; 10:113-114; 15:39-40; 22:73-74
h. Find	3:325-326; 4:429; 15:168-169; 22:73-74
i. Charge Out	1:269-271; 2:411-413; 3:375; 4-391; 5:72-76; 6:101; 15:67-69; 22:70-72
j. Transfer	1:273-276; 2:415-417; 3:376; 4:392-394; 5:135-139; 6:136-140; 15:74-84; 22:76-80
1) reasons	
2) periodic	
3) perpetual	
4) microfilming	
H. Subject Filing	1:252-255; 2:394-397; 3:353-355; 4:416-418; 5:117-131; 6:124-127; 13:57; 15:122-136; 22:60-65
1. Definition	
2. Advantages and Disadvantages	1:254; 2:396; 4:422; 15:155
a. Grouping by topics and unlimited expansion	
b. Difficulty in classification and provision for miscellaneous papers	
3. Organization	
a. Subject classification	
b. Index	
c. Miscellaneous folders	
4. Guides	

5. Folders	
6. Procedures a. Inspecting, Reading b. Indexing c. Coding d. Cross referencing e. Sorting alphabetically f. Filing	Have students file "Sample" copies of production work from Office Services Pool in classroom subject files. Also assign students to various departmental offices to file instructional materials in subject files, using correct procedures.
I. Numeric Filing	1:248-252; 2:390-394; 3:356-359; 4:414-416; 5:104-114; 6:111-113; 13:58; 15:98-108; 22:56-59
1. Definition	
2. Advantages and Disadvantages a. Accuracy, unlimited expansion, cross references b. Indirectness	1:250; 2:392; 4:422; 5:105; 15:155; 22:58
3. Organization a. Numbered individual folders b. Alphabetic card index c. Numeric miscellaneous folders	Have students check numeric records; i.e., serial numbers of office equipment and/or gym or book locker records.
4. Guides (numbered)	
5. Folders (numbered)	
6. Procedures a. Inspecting, Reading b. Alphabetic indexing and coding c. Alphabetic sorting d. Numeric coding e. Keeping register of codes assigned	

f. Numeric sorting	
g. Filing by number	
h. Finding	22:106-109
	Have students visit library and use alphabetic author and subject files to find particular volumes numerically.
J. Geographic Filing	1:255-258; 2:397-400; 3:360-362; 4:412-414; 5:91-100; 6:105-109; 13:58; 15:111-117; 22:66-68
1. Definition	
2. Advantages and Disadvantages	1:255; 2:400; 4:422; 15:155
a. Direct filing and reference, grouping by location, provision for miscellaneous papers	
b. Expensive, sorting, difficulty in finding	
3. Organization (alphabetical)	
a. State	
b. City	
4. Guides	
5. Folders	
6. Procedures	
a. Inspecting, Reading	
b. Indexing	
c. Coding (state, city, and name)	
d. Cross referencing	
e. Sorting (state, city, and name)	
f. Filing	

K. Other Filing Systems

1. Soundex	1:264-267; 2:406-409; 3:362-363; 4:419-420; 5:113; 15:145-149; 22:95-98
2. Visible	1:261-264; 2:403-406; 3:375; 4:425-426; 5:161-167; 6:152; 15:141-143; 22:91-93
3. Follow-up	1:272; 2:413-414; 4:421; 5:80-82; 6:133; 15:166-167, 170-173; 22:70-71, 88-89
4. Commercial	1:240-245; 2:382-387; 4:411; 5:84-89; 15:53-61; 22:49-55
5. Electronic Data Processing	1:276; 2:418; 4:426; 5: 185-190; 15:161; 22:99-102

TEACHING AIDS

Audio-Visual Materials

"Filing," a filmstrip set for use with Skill Builder, 125-exercise course, Educational Developmental Laboratories, ($62.50)

"It Must Be Somewhere," a film, Remington Rand, (free use)

"Progressive Filing," filmstrip series, 4 strips of approximately 14 minutes w/2 records, Gregg Publishing Division, McGraw-Hill Book Company, ($52)

Printed Materials

Do's and Don'ts of Filing and Science of Filing, Smead Manufacturing Company, Hastings, Minnesota

Filing Manual, The Mutual Life Insurance Company of New York

Filing practice sets, programmed materials, and workbooks: See list of Selected Text and Supplementary Books, Appendix A, References 10, 13, 15, 19, and 23 and coordinated with Nos. 5, 14, and 22.

Filing tests: Business Teacher, Gregg Publishing Division, McGraw-Hill Book Company; U.S. Civil Service Commission

Forty-three New Ways to File, Oxford Filing Supply Company, Clinton Road, Garden City, New York

Local Agency Office Handbook for Beginners, insurance oriented, The Rough Notes Company, Inc., Indianapolis, Indiana 46206 ($1.50 per copy)

TEACHING TIPS

Secure resource material from office equipment stores, manufacturers of filing equipment and supplies, publishers, Government agencies, and business firms for illustrative and practice purposes.

Use actual materials in presenting filing procedures to make instruction interesting and realistic.

Prepare transparencies to use with overhead projector for visual presentation and application of each indexing and alphabetic filing rule.

Post a key to filing exercises or practice sets to help students understand rules and thereby learn from their mistakes.

Students need real practice in indexing, filing, and finding under limited supervision. All work should be checked, and students can learn through looking for errors.

Compile exercises for locating names that are difficult to find. Local telephone and city directories are good sources.

Reusable practice materials should be put into original order before storing.

Field trips build enthusiasm and reinforce importance of filing. Large banks, insurance companies, governmental agencies, or libraries provide opportunity to view various filing systems, including microfilming and electronic data processing.

A section of the bulletin board reserved for cartoons and sample materials which demonstrate special filing applications provides opportunity for student participation in instructional planning.

Have students volunteer their filing skills to community service agencies; i.e., County Historical Society.

Let students report on individual visits to offices within the local business community with particular reference to observations of filing systems and procedures.

APPENDIX D

SUGGESTED EQUIPMENT FOR CLASSROOM OFFICE SERVICES POOL*

1. Chairs, 20 stack type (needed for weekly class meetings)
2. L-shaped or secretarial-type desks, 6 each with dictionary, secretarial handbook, stapler, stationery supplies
3. Work tables, 2-3
4. Spirit duplicator, 1
5. Mimeograph, 1-2
   electric w/interleaver, card holder, color changes, and cabinet
6. Mimeoscope, 1
   styli, shading screens, lettering guides, plates
7. Folding machine
8. Collating racks; collating machine optional
9. Paper trimmer or cutter, 1
10. Three-hold punch, 2
11. Staplers: 1 electric, 1 saddle, 1 long shank, 1-2 heavy duty, standard 6-8
12. Sink
13. Supply area w/shelving
14. Storage cabinets w/tote trays or pigeonhole space for work in progress
15. Electric typewriters: 1 pica, 1 executive or proportional spacing, 1 Selectric w/manifold and script elements, 2-3 elite (1 with extra wide carriage)
16. Line at a Time Typing aids, 6
17. Cart, 1
18. Roll around typing tables, 4
19. Manual typewriters, as needed (1 with small elite type)
20. Book case, portable
21. Transcribing and dictating machines, 2
22. Files: in and out trays for each desk; legal-size, four-drawer, as needed; visible index; rotary; box; transfer; expansion and tickler
23. Sorters, desk size, 6
24. Numbering machines, 2
25. Dater, 1
26. Copying machines: stencil, 1; master, 1
27. Stool with casters, 1

*If the Office Services Pool does not operate all periods of the day, this equipment can be shared with other courses; i.e., office machines.

Ex-Farm Operators in a Low-Income Area. Bulletin No. 67-2.

New York Agricultural Experiment Station, Ithaca
Economic Research Service (DOA), Washington, D.C. Economic Development Div.
MF AVAILABLE IN VT-ERIC SET.
Pub Date - Nov65 75p.

*SOCIOECONOMIC INFLUENCES; *FARMERS; *LOW INCOME COUNTIES; *INDIVIDUAL CHARACTERISTICS; JOB SATISFACTION; *JOB TENURE; PART TIME FARMERS; RURAL AREAS; ADJUSTMENT (TO ENVIRONMENT); VOCATIONAL ADJUSTMENT; FAMILY INFLUENCE; DAIRYMEN; EMPLOYMENT OPPORTUNITIES
NEW YORK

Men in a low income northern New York county who left farming during the period 1949 through 1962 were compared with those who remained in farming during this period. Data were obtained from 306 farm operators drawn as part of a 20 percent sample from the 1950 U.S. Census of Agriculture. Some major findings were: (1) 28 percent of the 1949 operators were no longer farming, (2) One-third of those who left were classified as non-commercial operators and one-fourth had been operating relatively large commercial farms, (3) Nearly one-half of the farmers were living in the same residence even though they had left farming, (4) Major reasons for leaving farming were lack of family help, poor health, unable to carry two jobs, couldn't succeed, and no opportunity, (5) Major reasons for being able to leave farming were another source of income, opportunity to sell farm, and others who could take over the farm operation, (6) Those who left farming had smaller farms, were less likely to be dairy farmers, and had a smaller income from agricultural products, (7) Those who left farming were more likely to be under 50 years of age and had averaged more days in off-farm work in 1949, and (8) There were almost no differences in farm and household characteristics between continuing farmers and ex-farmers. In general, there was little selectivity in terms of family physical resource and demographic characteristics. (DM)

EX-FARM OPERATORS IN A LOW-INCOME AREA

by

Nelson L. Le Ray

and

William W. Reeder

ACKNOWLEDGMENTS

The authors gratefully acknowledge the contributions of many individuals to this report--especially the support of and assistance in organizing and conducting the research project that was furnished by Olaf F. Larson of the Department of Rural Sociology, Cornell University Agricultural Experiment Station; and E. L. Baum and Robert B. Glasgow of the Economic Development Division, Economic Research Service. Farm data from the 1950 Census of Agriculture and demographic data from the 1950 Census of Population, made available by the Bureau of the Census, were of considerable value in obtaining a representative sample of farms in the area and in furnishing data for analysis.

The authors wish to express their appreciation to Don Huddleston, County Agricultural Agent and Mark Connor, Farmers Home Administration Supervisor, St. Lawrence County, New York, and to the rural people of the area who furnished the data that made this report possible.

HIGHLIGHTS

This report is the second in a series of a study of adjustments in human and physical resource use in a low-income area of Northern New York State. The series is designed to determine the nature and process of socio-economic adjustment during the period 1950 to 1962 for a population of farm families with different resource characteristics and levels of family income. This report is primarily concerned with a group of farm operators who farmed in the study area during 1949, but who did not operate farms in the area during 1962. Comparisons are made between this group and a group that operated farms in the area during 1949 and 1962.

The sample for the study was drawn from the 20 percent sample for the 1950 United States Census of Agriculture for St. Lawrence County, New York. In general, the findings are based on interviews with a selected sample of male farm operators who were under 55 years of age in 1950 and who were still in the study area in 1963.

The study area is one of the leading dairy counties in New York State ranking first in the number of milk cows and third in the value of dairy products sold in 1959. There are few agricultural alternatives to dairying in the area. Farmers have been faced with increasing standards for dairy products and adjustment to new dairy technology. Part of the adjustment to technological change in agriculture has been the forcing of human and physical resources out of agriculture. Land, buildings, techniques and

farm families that were formerly needed in dairying have become obsolete.

This special report compares two categories of 1949 farm operators from a low income area in Northern New York State: (1) those who were still farm operators in 1962 and (2) those who had left farming and were no longer farm operators in 1962. Highlights of the report follow:

1. Of 306 male farm operators who operated a farm in 1949, 85 or 28 percent were no longer operating a farm in 1962.
2. Of those who left farming only two-thirds operated commercial farms during 1949. One-third were classified as noncommercial farmers. Approximately one-fourth had been operating relatively large commercial farms in 1949.
3. Though they had left farming, almost half (38 individuals) were living in the same residence in 1962 as they were in 1949.
4. The main reasons given for leaving farming in order of frequency of mention were:
   a. Lack of family help or family dislike of farming.
   b. Poor health of farm operator or family members.
   c. Unable to carry two jobs.
   d. Couldn't make a go of farming.
   e. No opportunity in farming without expansion.
   f. Off-farm job had more advantages than farming.
   g. Not making any money in farming.
   h. Farming not worth the effort.
   i. Loss of production resources.
5. The main reasons given for being able to leave farming were:
   a. Had another source of income.
   b. Had an opportunity to sell the farm, the livestock and/or equipment.
   c. Had others who could take over the operation of the farm.

6. As compared with the farm operators who remained in farming, the 1949 farm operators who left farming:
   a. Operated smaller farms with fewer acres of cropland in 1949.
   b. Were less likely to be dairy farmers in 1949.
   c. Had a smaller income from agricultural products in 1949.
   d. Had lower farm expenses and lower net farm incomes in 1949.
7. There was no significant difference between those who remained in farming and those who left farming in regard to:
   a. The year the operator began to operate the 1949 place.
   b. Land tenure.
   c. Agricultural income expectancy from the land.
   d. The value of land and buildings owned.
   e. Mortgages on land or building.
8. As compared with those who remained in farming, those who left:
   a. Were more likely to be under 50 years of age, able to work and not retired.
   b. Had averaged more days in off-farm work in the year 1949.
   c. Were more likely to express a preference for a nonfarm occupation.
9. There were no significant differences between continuing farmers and ex-farmers in regard to:
   a. Years of school completed.
   b. Household size.
   c. Stage of the family life cycle.
   d. Preference for a large dairy herd over a small dairy herd.

In conclusion, except for the size of the farm business and the combined age and physical condition of the family head, there were almost no differences in farm and household characteristics between continuing farmers and ex-farmers. The reasons for leaving suggest that an index of the farm operator's state of health might have provided another significant factor.

Special report number one, which deals with cognitive factors related to the last major occupational change indicates that the farmers who are basically similar in their demographic characteristics may have quite different cognitive interpretations of their situations. It should be noted that while there is considerable overlap, special reports one and two are not comparing the same categories of farmers.

In general, there is a tendency to think that the shift from one occupation to another, in times of economic stress, will be highly selective both in terms of the physical resource characteristics of the family and also in terms of the demographic characteristics of the family. These data reveal far less selectivity than had been anticipated and suggest that in a revolutionary situation such as that faced in agriculture, the degree of selectivity is greatly reduced.

Selectivity invites special programs, whereas, the lack of selectivity indicates less need for special programs for different groups, and greater emphasis on the problems which are characteristic of the entire group.

EX-FARM OPERATORS IN A LOW-INCOME AREA

by

Nelson L. Le Ray [1] and William W. Reeder [2]

INTRODUCTION

"I had a steady nonfarm job. Not enough time to take care of animals."

"Bank took the place over. It's hard to borrow money at my age."

"Someone offered to buy the place."

"Farming was not profitable. My sons didn't want to farm. I couldn't work hard anymore."

"I wasn't making a go of it."

The statements quoted above were made by St. Lawrence County residents who operated a farm in St. Lawrence County, New York in 1949 but who did not operate a farm in St. Lawrence County in 1962. During the period 1950 to 1962, 85 or 27.8 percent of a sample of 306 farmers who operated a farm in 1949 left farming. Twenty-five (25.9 percent) of those who left operated a relatively large commercial farm (Census Class I, II and III) during 1949, 32 (37.6 percent) operated a relatively small commercial farm (Census Class IV, V and VI), and 31 (36.5 percent) operated a noncommercial farm (part-time or residential) during 1949. Forty-five percent were living on the same place in 1963 that they farmed in 1949.

[2] Professor, Department of Rural Sociology, Cornell University.

The number of farms has been declining in the United States, in New York State, and in St. Lawrence County, New York. Farmers have been leaving farming. In 1959 there were 3,942,562 farms in the United States compared with 5,388,437 in 1950; a decrease of 1,445,875 or 26.8 percent. There were 86,042 farms in New York State in 1959 compared with 124,977 in 1950; a decrease of 38,935 or 31.2 percent. In St. Lawrence County, New York, the number of farms dropped from 5,091 in 1950 to 3,544 in 1959; a decrease of 1,547 or 30.4 percent. 1/

This is the second of a series of special reports which deal with adjustments in human and physical resource use in a low-income area of northern New York State during the period 1949 to 1962. The first special report is on factors in occupational change (Reeder, Le Ray, Craig, 1965). In it the hypothesis is tested that behind each occupational change decision there is a relevant cluster of factors and that programs designed to speed up the process of adjustment (programs of planned change) will have greater success if they are designed to take into account the more important factors which enter into occupational adjustment decisions.

The first special report indicates that farmers who are basically similar in their demographic characteristics may have quite different cognitive interpretations of their situation. Occupational decisions are usually based on a small cluster of relevant reasons or components. Each component has direction and loading. After an occupational decision has been made, the decision maker will readjust his relevant cluster of cognitions to bring it more in line with whatever action is taken. 2/

1/ Data are based upon 1950 Census definition applied to 1950 and 1959 U. S. Census data. See: U. S. Bureau of the Census, 1962.

2/ It should be noted that the same categories are not being compared in the special reports 67-1 Factors Influencing Occupational Decisions in a Low-Income Area and 67-2 Ex-Farm Operators in a Low-Income Area. The first special report is concerned with the most recent major occupational decision of individuals who operated farms in 1949 whereas this report is concerned primarily with individuals who farmed during 1949 and who did not farm during 1962. The discontinuation of farming may not have been the most recent major occupational change.

The main objective of the present report is to determine the nature of changes in human and physical resource use for farm operators who remained in the study area but became nonfarm residents during the period 1950 to 1962. Comparison will be made between this group and individuals who were still farming in the area in 1962.

The Study Area

St. Lawrence County borders on the International Line between the United States and Canada. It is the largest county in New York State. Over 41 percent of the land area is used for agricultural purposes. The northeast sector of the county has developed industrially with the building of two aluminum plants, an automobile manufacturing plant (components) and the St. Lawrence Seaway and Power Development Project. However, except for this particular area, the bulk of the remaining area in the county remains primarily agricultural. One observer has noted that the St. Lawrence is:

> Perhaps the most thoroughly underdeveloped area in New York State . . . for it is indeed an area in which the full potential in its natural and human resources had never been approached. In this sense the area is one of the great frontiers of the state and the region. But it is particularly a frontier for American industrialization. (Sufrin and Palmer, 1957, p. 5)

The decline in the number of farms in St. Lawrence County during the period 1950-59 was noted above. During this period, the average size of the farms increased from 174 acres to 210 acres. However, at the same time, some 169,000 acres of farm land were taken out of farming. Despite the fact that one-fourth of those who were farmers in 1950 have left farming, nine out of 10 of these ex-farmers have remained in St. Lawrence County as of 1962. This indicates that these men are working out their adjustments to these changing conditions within the county itself. As a result, this county provides a good test area in which to study the nature and process of human and physical resource use adjustment.

Economic reasons are generally considered to be "the reasons" for many changes--stated simply in terms of monetary loss or gain. This study provides insight into the adjustments that are taking place as related to the movement of human resources out of agriculture.

Reasons for Leaving Farming

The decision of a farm operator to stop farming is a decision which involves his way of life and his way of making a living. There is a cluster of factors related to each occupation change decision. 1/

Table 1 shows the reasons given by farm operators for deciding to leave farming during the period 1950-1962. Frequently reported reasons for leaving farming were: wife or other family member did not like farming or lack of help from family members - 24 times; poor physical health of farm operator or family members - 23 times; couldn't make a go of farming - 14 times; and no opportunity in farming without expansion - 14 times.

"Unable to work both farm and off-farm job" was listed 16 times and "off-farm job had more advantages than farming" was listed 13 times as a reason for leaving farming. When the occupational change was made, farming was the activity that was discontinued. In a large number of cases this was a rational decision based on the respondent's perception that the off-farm job either offered more advantages than farming or the disadvantages of staying in farming were greater than the disadvantages associated with off-farm work.

Factors Making It Possible to Leave Farming

In addition to being asked for reasons for leaving farming, each former farmer was asked, "How were you able to give up farming?" The responses to this question are presented in Table 2. The availability of another source of income was the most frequently mentioned factor making it possible for the farm operator to leave farming (mentioned 34 times) which was followed by "had an opportunity or was forced to

---

1/ See Reeder, Le Ray, Craig, 1965 for an analysis of these factors.

Table 1.--Reasons Given for Leaving Farming During 1950-62 by 84 Ex-Farmers, St. Lawrence County, New York 1/

Reason 2/	Number of Mentions
Financial:	
Couldn't make a go of farming	14
Not making any money farming	10
Couldn't afford hired farm help	4
Couldn't keep up payments on livestock, equipment or farm	3
Other financial 3/	5
Total	36
Other limitations of farming:	
No opportunity in farming without expansion	14
Wanted more leisure time	3
Wife or other family members did not like farming or lack of help from family members	24
Farm work too hard	5
Poor land	3
Farming not worth effort	10
Total	59
Off-farm employment:	
Unable to work both farm and off-farm job	16
Off-farm job had more advantages than farming 4/	13
Had a good off-farm job	3
Total	32
Other:	
Poor physical health of farm operator and/or family	23
Loss of production resource 5/	9
Son wanted to farm	1
Called into Armed Forces	2
Total	35
Total	162

1/ Data not available for one individual.

2/ Number of reasons exceed number of respondents because 57 respondents gave more than one reason for leaving farming.

3/ Includes operation costs too high, debt could not be paid from farm income and "others."

4/ Includes better pay, shorter hours, health benefits, retirement plan.

5/ Includes buildings burned, cows died, farm taken for Seaway Project or road construction.

Table 2.--Reasons Given for Being Able to Leave Farming During 1960-62 by 74 Ex-Farmers, St. Lawrence County, New York 1/

Reason 2/	Number of Mentions
Financial:	
Had other source of income 3/	34
Had opportunity to sell or forced to sell farm 4/	28
Had opportunity to sell livestock and/or equipment	22
Had others to take over land operations or able to rent land	11
Able to invest in small business	3
Let bank take farm	3
Little invested in farm	3
Other:	
Tenant - sold livestock	2
Other 5/	6
Total	112

1/ Eleven ex-farmers did not give reasons.

2/ Number of reasons exceed number of respondents because 37 respondents gave more than one reason for being able to leave farming.

3/ Includes other job, savings, Social Security.

4/ Includes taking of farm for Seaway Project.

5/ Includes putting farm in Soil Bank, still in debt, received fire and other insurance payments that covered loss.

sell farm" (mentioned 28 times) and "had an opportunity to sell livestock and/or equipment" (mentioned 22 times).

There is a close relationship between factors making it possible to leave farming and reasons for leaving. For the 85 farmers who left agriculture, the availability of other sources of income and the opportunity to sell land, livestock and/or equipment were important factors in human and physical resource use adjustment.

Years 1950 to 1962 That Farm Operators Left Farming

The 85 farmers who left farming left at different times during the period 1950-1962. Table 3 shows that 64 former farmers (75 percent) had not farmed for five years or more and 27 individuals (32 percent) had not farmed for 10 years or more. The largest number of individuals left farming after the 1950 and 1956 crop years.

Present Location

Not all of the former farmers left their 1950 residence. Of the individuals who operated a farm in St. Lawrence County based on the 20 percent sample for the 1950 Census of Agriculture - and who did not operate a farm in 1962, 38 individuals or 45 percent did not change their residence (Table 4). Twenty-eight of the individuals that did not change residence moved to their present place during the 1941-1950 period while 10 moved to their present residence before 1941.

Of the 47 former farm operators that were not living on the 1949 farm, 16 moved to the 1963 residence during the 1950-54 period, 16 during the 1955-59 period and 15 during the 1960-63 period.

The next section is devoted to a comparison between the farms of the 85 individuals that left agriculture and those of the 221 that were farming in 1962. The comparison is based on the characteristics of the farms in 1949. A word of caution is necessary before concluding these brief introductory remarks. The fact that an individual is not farming at a given point in time does not mean that he will never operate a farm again. Of the 221 individuals who operated a farm during 1949 and 1962, nine or four percent did not operate a farm for

Table 3.--Years 1950-1962 That 85 Ex-Farmers Operated A Farm, St. Lawrence County, New York

Year	Operating Farms	
	Number	Percent
1950	85	100
1951	68	81
1952	58	68
1953	50	59

one or more years during the 1949-62 period. The number of individuals operating a farm in 1949 and 1962 but not operating a farm for one or more years during the period 1949-1962 was as follows:

Year	Number of Individuals
1951	4
1952	5
1953	4
1954	5
1955	5
1956	7
1957	8
1958	8
1959	6
1960	4
1961	2

The distribution by total number of years that individuals did not operate a farm during the period 1950-1962 was:

Years individual did not operate a farm	Number of Individuals
2	2
5	3
9	2
10	1
11	1
Total	9

Occupational mobility between farm and nonfarm activities may be facilitated by land ownership. Individuals that own land have a ready access to two important factors of agricultural production - labor (their own and perhaps other family members) and land (the land they own). Of the 38 individuals that were not farming in 1962, and who had not changed residence, 31 or 82 percent owned three or more acres of land in St. Lawrence County in 1963 compared with 15 individuals or 32 percent of the 47 individuals who were not farming

and who had changed residence since 1950. The average acreage owned by those who had not changed residence since 1950 and who owned three or more acres was 146 acres compared with an average of 138 acres owned by the 15 individuals who had changed residence and who owned three acres or more. The average acreage owned by individuals who were farming in 1949 but did not farm during 1962 is below the average size of farms reported by the U. S. Census of Agriculture for St. Lawrence County for either 1950 (174 acres) or 1959 (210 acres).

THE PHYSICAL RESOURCE

The physical resources used in farming include the land upon which agricultural enterprises are conducted and capital used in the production of agricultural commodities. This section is concerned with a comparison of the physical resources used for agricultural production in 1949 by individuals who were operating a farm in 1962 and those who were not operating a farm in 1962. Data will be presented on the relation of the individual to the land, the size and type of farming operation, land class, value of land and buildings and cost and returns of agricultural production. [1]

Economic Class of Farm [2]

The economic classification of farms for the 1950 Census of Agriculture was made on the basis of three factors - total value of all farm products sold, number of days the farm operator worked off the farm, and the relationship of the income received from nonfarm sources by the operator and members of his family to the value of all farm products sold (U. S. Bureau of the Census, 1952). Information about the economic class of farm operated by individuals who were operating a farm in 1962 and those who were not operating a farm is shown in Table 5.

---

[1] The chi square value has been computed for all of the tables used in developing the analysis of data for this report. The five percent level (two-tailed test) was accepted as the level of significance. When differences between individuals who were farming in 1962 and those who were not farming in 1962 are significant at the five percent level, the data are presented in tables in the text of the report. When differences are not significant at the five percent level, the data are presented in Appendix Tables.

[2] See Classifications and Terminology section pp. 59-61 for definitions of Economic Class of Farm for the 1950 Census of Agriculture.

Table 5.--Distribution of 306 Sample Farms by Change in Farm-Nonfarm Status 1949 and 1962 by Economic Class of Farm 1949, St. Lawrence County, New York

Economic Class of Farm 1949 1/	Total		Farm-Nonfarm Status, 1949 and 1962			
			Farm 1949 and 1962		Farm 1949 Nonfarm 1962	
	Number	Percent	Number	Percent	Number	Percent
Commercial:						
Class I & II	31	10.1	27	12.2	4	4.7
Class III	102	33.4	84	38.0	18	21.2
Class IV	67	21.9	45	20.4	22	25.8
Class V & VI	42	13.7	32	14.5	10	11.8
Noncommercial:

Residential	37	12.1	16	7.2	21	24.7
Total:						
Number	306	----	221	----	85	----
Percent	---	100.0	---	100.0	--	100.0

$X^2 = 26.451$ d.f. = 5 $p < .001$

1/ See Classifications and Terminology section for definitions of Economic Class of Farm for the 1950 Census of Agriculture.

Of the total group of 306 individuals who operated farms in 1949, 242 or over three-fourths (79.1 percent) operated commercial farms. Commercial farms were operated by 188 individuals or 85 percent of the individuals who stayed in farming, while of the individuals who quit farming, 54 farmers or 64 percent operated commercial farms. Thirty-one farms (10 percent) were Class I or II, but only four of the individuals (four percent) not farming in 1962 operated this class of farm. The proportion of individuals who farmed in 1949 but did not farm in 1962 by economic class of farm in 1949 was:

Economic Class of Farm	Percent Not Farming
Commercial:	
Class I and II	13
Class III	18
Class IV	33
Class V and VI	24
Noncommercial:	
Part-time	37
Residential	57

Year Farmer Began to Operate 1950 Farm

The distribution of farmers enumerated by the 1950 Census of Agriculture by the year the farmer began to operate "this place" is shown in Appendix Table 1. Nine percent of the sample farmers indicated that they began to operate "this place" prior to 1930, 20 percent began operations during the period 1930-1939, 29 percent during the period 1940-1944 and 42 percent during 1945 or later. Thus, at the time of the 1950 Census of Agriculture, almost three-fourths (71.0 percent) had operated the present farm for 10 years or less.

Land Tenure

Full owner was the most frequent type of tenure arrangement (Appendix Table 2). Of the 306 farms, 237 or 77 percent were operated by full owners, 32 or 11 percent by part owners and 37 or 12 percent by tenants. The high rate of land ownership in the area might be a reflection of the low land values in the area or of the value that individuals in the area place upon ownership of land. There were no significant differences between individuals who left agriculture and individuals who were farming in 1962 in terms of relationship of the farm operator to the land.

Type of Farm

Dairy farming was the predominant agricultural activity in the study area (Table 6). Over three-fourths (78.6 percent) of the farms were classified as dairy, 10 were beef cattle, three poultry, nine general and 43 miscellaneous and unclassified. 1/

A comparison of individuals who were and who were not farming in 1962 shows that a higher proportion of the nonfarmers (25.9 percent) than the farmers (9.5 percent) operated miscellaneous and unclassified farms in 1949. Approximately two-thirds (65.8 percent) of the nonfarmers operated dairy farms compared with over four-fifths (83.6 percent) of the farmers. These data are consistent with data on the economic class of farm and are a further indication that individuals who leave farming are recruited from part-time and residential farm types while those with relatively large farms tend to remain in agriculture. This does not, however, minimize the magnitude of the human and physical resource use adjustment by the 56 farm operators who had dairy farms in 1949 but were not farming in 1962.

1/ Includes part-time, residential, and abnormal farms. It also includes miscellaneous types of commercial farms if 50 percent or more of the total value of products was accounted for by sale of horticultural products or sale of horses, or sale of fur animals, or sale of forest products, or sale of bees and honey, (U. S. Bureau of the Census, 1952, p. xx).

Table 6.--Distribution of 306 Sample Farms by Change in Farm-Nonfarm Status 1949 and 1962 by Type of Farm, 1949, St. Lawrence County, New York

Type of Farm 1949	Total		Farm-Nonfarm Status, 1949 and 1962			
			Farm 1949 and 1962		Farm 1949 Nonfarm 1962	
	Number	Percent	Number	Percent	Number	Percent
Dairy	240	78.6	184	83.6	56	65.8
Miscellaneous & unclassified 1/	43	14.1	21	9.5	22	25.9

Total:						
Number 3/	305	----	220	----	85	----
Percent	---	100.0	---	100.0	--	100.0

$X^2 = 14.248$ d.f. = 2 $p < .001$

1/ Includes part-time, residential and abnormal farms. It also includes miscellaneous types of commercial farms if 50 percent or more of the total value of products was accounted for by sale of horticultural products, or sale of horses, or sale of fur animals, or sale of forestry products, or sale of bees and honey, (U. S. Bureau of the Census, 1952, p. xx).

2/ Includes 10 beef, nine general and three poultry farms.

3/ Data not available for one case.

Acreage Operated and Acreage of Cropland

Acreage operated and acres of cropland are indicators of farm size. There was a significant difference between individuals who continued to operate a farm and individuals who did not operate a farm in 1962 in terms of acres of cropland and acreage operated during 1949 (Table 7 and Table 8). Average acreage operated was 209 and 157 acres for farmers and ex-farmers respectively, while farmers reported an average of 92 acres of cropland compared with an average of only 68 acres of cropland for ex-farmers.

In terms of change in resource use, it is significant that there is a tendency for farm operators who leave agriculture to be those who controlled the smaller amount of the land resources in 1949. For example, 44.7 percent of the ex-farmers had less than 50 acres of cropland in 1949 compared with only 23.6 percent of the individuals who remained in farming.

Milk Cows on Place

Of the individuals who continued to operate a farm in 1962, 91.4 percent reported milk cows in 1950 compared with 83.5 percent of the individuals who left farming. The relationship between farm-nonfarm status in 1962 and number of cows in 1950 is consistent with the relationships with respect to economic class of farm and acreage that were noted above. Table 9 shows that of the individuals with milk cows, the farm operators that stayed in farming had an average of 21 milk cows on April 1, 1950, while the individuals that left farming had an average of 16 milk cows.

Perhaps of greater significance is the finding that about one-third (35.2 percent) of the individuals who left farming during the period 1949-1962 had less than 10 milk cows in 1950 compared with only 16.8 percent for those who did not leave. On the other hand, herds of 25 or more milk cows were reported by approximately one-third (34.2 percent) of the individuals who stayed in farming and by only 16.9 percent of the individuals who were not farming in 1962.

Table 7.--Distribution of 306 Sample Farms by Change in Farm-Nonfarm Status 1949 and 1962 by Total Acres Operated, 1949, St. Lawrence County, New York

Land Class

The type of land upon which an agricultural enterprise is conducted has a mjaor role in determining the success or failure of the enterprise. Sample farms were classified according to the Economic Classification of Farm Areas - St. Lawrence County, New York (Nobe and Conklin, 1957). Under this classification, Land Class I is land where chances for success in full-time farming are extremely low. Land Class II comprises land on which chances for successful farming are too small to expect full-time farming to continue for long. Land Class III comprises land where farm income expectancies are generally low, though high enough to meet minimum requirements for continued operation to 1970 or perhaps a little longer. Land Class IV consists of land with medium income expectancies and Land Class V and VI consist of areas in which a major proportion of the farms have high to very high income expectancies. Land in the Adirondack State Park is generally not suited to intensive agricultural use.

Only 13 or 4.5 percent of the farms in the sample were located on Land Class V and VI - land with high to very high income expectancies in agriculture (Appendix Table 3). Approximately two-thirds (65.3 percent) were on land with low net farm income expectancies (Land Class I, II, III and Adirondack State Park). However, in this study there was no significant relationship between the 1949 land classification of the farm and the 1963 farm-nonfarm status of the family.

Land Class	Farmers 1962 Percent	Ex-Farmers 1962 Percent
Adirondack State Park and unclassified	3.3	3.7
I	9.6	11.0
II	15.3	19.5
III	38.3	28.0
IV	28.7	34.1
V and VI	4.8	3.7
Total	100.0	100.0

Value of Land and Buildings and Indebtedness

Another measure of farm size is the value of land and buildings. Differences in value of land and buildings owned were not significant between individuals who left and individuals who stayed in farming (Appendix Table 4). Approximately three-fourths (76.2 percent) of the farm operators reported that their land and buildings would sell for less than $10,000, if sold in 1950, and only one-fourth reported that they would sell for $10,000 or more. Only nine individuals (3.6 percent) felt that their land and buildings would sell for $20,000 or more.

Taxes paid on land and buildings are an indirect measure of farm size. In 1949 taxes of $300 and over were paid by 12.1 percent of the individuals who stayed in farming and by only 6.3 percent of the individuals who left. On the other hand, 51.6 percent of the individuals who left paid taxes of less than $100 compared with only 29.1 percent of the individuals who continued to farm (Table 10).

The presence or absence of a mortgage gives an indication of the extent to which income is committed to paying off existing debts. It might also be an indication of the extent to which farmers have access to credit or the extent to which farmers have a desire to or feel a need to utilize credit. Over one-half of the farm operators who owned land and/or buildings in 1950 reported no mortgage on their land or buildings (Appendix Table 5). Less than one in 10 (7.1 percent) reported a mortgage of $5,000 or more.

Although not conclusive, these data indicate that the small size of farms - measured in terms of value of land and buildings - is an obstacle to agricultural adjustment in the area. Also important is the finding that significant differences did not exist between individuals who left agriculture and individuals who continued to farm in terms of value of land and buildings and mortgage on land and buildings. The relatively low value of land and buildings and the absence of mortgages under today's technology and agricultural conditions combine to place a serious restriction upon any attempts to increase incomes from agricultural enterprises (Dorner and Sandretto, 1963).

Costs and Returns

Tables 11, 12 and 13 present cost and returns information for 1949. Since there were significant differences between individuals who left farming and those who stayed with respect to size of farm, it is to be expected that there would be differences between these two groups in costs of and returns to production. This expectation is substantiated by the study. Forty percent of the farmers who left agriculture reported a value of all farm products sold during 1949 of less than $1,200 compared with only 17.6 percent of the farm operators who were still farming in 1962. Only 4.7 percent of the ex-farmers had a value of farm products sold of $10,000 or over compared with 13.1 percent of those still farming.

Costs of production were higher for farmers who stayed than for farmers who left, but so was net farm income. After farm expenses were deducted from value of farm products sold, over two-thirds (67.3 percent) of the sample of farmers had net farm incomes of less than $3,000 in 1949. A comparison of net farm incomes during 1949 of those who stayed in farming and those who left shows that of the group that left, 79.9 percent had net farm incomes of less than $3,000 while 62.5 percent of the group that stayed was in this category.

Summary

The analysis of data about physical resources used in farming during 1949 shows some significant differences between resources used by farm operators who were still farming in 1962 and individuals who did not farm in 1962, but continued to live in the area. When compared with the individuals who stayed in farming, a higher proportion of the individuals who left agriculture operated miscellaneous and unclassified farms rather than dairy farms in 1949. Individuals who left agriculture operated smaller farms, had fewer acres of cropland, a smaller value of agricultural products sold, lower farm expenses and lower net farm income than the individuals who continued to farm. Of the group with dairy cows, the individuals who left agriculture had fewer milk cows on the place in 1950 than the group that continued to farm.

$X^2 = 17.292$ d.f. = 5 $p < .01$

Differences between individuals who did not leave agriculture and ex-farmers were not significant with respect to the year the operator began to operate the 1950 place, the relationship of the operator to the place (land tenure), the agricultural income expectancy from the land (land class), the value of land and buildings owned, or the mortgage on land and buildings.

This section shows that within the study area there was a tendency during the period 1950-1962 for the smaller farmers to leave farming and for the larger farmers to continue to maintain a commitment to agriculture as a way of making a living. The next section will present findings with respect to the human resource that left agriculture during the period under study.

THE HUMAN RESOURCE

In this section attention will be directed to the human resource. Comparisons will be made between the demographic characteristics and occupational preferences of individuals who left agriculture and individuals who were still farming in 1962. As pointed out above, the nature of the physical resource available for agricultural production is an important factor in determining the success or failure of the human resource in agricultural activities.

The technological revolution in agriculture is increasing the demands made upon the managerial factor in agricultural production. The demographic characteristics of the individual and his attitudes toward agriculture play an important role in determining success or failure in agriculture and his willingness and ability to participate in the agricultural revolution.

Age

The individuals who left agriculture averaged 52 years of age in 1963 - not significantly different from the average age of 53 years reported by the individuals who continued in farming (Appendix Table 6). Although age differences between individuals who left and those who stayed in agriculture were not significant, it is significant that 85 or 27.8 percent of the group was able to make a change out of agriculture. Although age alone is not significant, age combined with general physical condition is significant.

Adjustment Potential - Farm Operator

The ability of a farm operator to leave agriculture is in part determined by his age and physical condition. Table 14 shows the adjustment potential of farm operators in the sample based on a combination of age, ability to work and retirement status in 1962. Of the

Table 14.--Distribution of 306 Sample Farms by Change in Farm-Nonfarm Status 1949 and 1962 by Farm Operator Adjustment Potential, 1962, St. Lawrence County, New York

Adjustment Potential 1962	Total		Farm-Nonfarm Status, 1949 and 1962			
			Farm 1949 and 1962		Farm 1949 Nonfarm 1962	
	Number	Percent	Number	Percent	Number	Percent
Under 50 years of age and able to work and not retired	113	36.9	80	36.2	33	38.8
50 years of age and over, and able to work and not retired	165	53.9	127	57.5	38	44.7
Unable to work or retired	28	9.2	14	6.3	14	16.5
Total:						
Number	306	----	221	----	85	----
Percent	---	100.0	---	100.0	--	100.0

$X^2 = 8.853$ d.f. = 2 $p < .02$

total group, only 28 or 9.2 percent indicated that they were physically unable to work or retired during most of 1962. The farm-nonfarm status in 1962 of the 278 individuals able to work and not retired by adjustment potential was:

Able to Work and not Retired	Farmer-1962 Percent	Ex-Farmer 1962 Percent
Under 50 years of age	38.6	46.5
50 years of age or over	61.4	53.5
Total	100.0	100.0

Educational Attainment

The average educational attainment of the farm operators studied is not high. Individuals who continued to farm reported an average (mean) educational attainment of 9.1 years compared with an average of 9.2 years for individuals who left agriculture (Appendix Table 7). The magnitude of the adjustment problem for the group under study is emphasized by the finding that over one-half (55.3 percent) had not gone beyond the eighth grade and almost four-fifths (79.8 percent) had not graduated from high school. Only 20 individuals or 6.5 percent had received some college training.

One-half (10) of the individuals with some college training did not operate a farm in 1962. This may be an indication that individuals with some college education may have more employment alternatives or that they perceive less opportunity for success in farming than do individuals with less education.

Days of Off-Farm Work by Farm Operator

It was shown in the introduction that inability of the individual to operate a farm and hold a nonfarm job at the same time was an important reason for leaving farming. A nonfarm job restricts the amount of time available for farm management or operation.

Of the farm operators covered by the study, over one-half (51.0 percent) did some off-farm work during 1949 (Table 15). Of the individuals

Table 15.--Distribution of 306 Sample Farms by Change in Farm-Nonfarm Status 1949 and 1962 by Days of Off-Farm Work Done by Farm Operator During 1949, St. Lawrence County, New York

Days of Off-Farm Work	Total		Farm-Nonfarm Status, 1949 and 1962			
			Farm 1949 and 1962		Farm 1949 Nonfarm 1962	
	Number	Percent	Number	Percent	Number	Percent

100-199	19	6.3	15	6.8	4	4.7
200 or more	83	27.3	44	20.1	39	45.9
Total:						
Number 1/	304	----	219	----	85	----
Percent	---	100.0	---	100.0	--	100.0

$X^2 = 20.514$ d.f. = 4 $p < .001$

1/ Data not available for 2 cases.

who continued to farm, only 46.1 percent worked off the farm in 1949 while of the group that quit farming, 63.5 percent worked off the farm.

The relationship between off-farm work and movement out of agriculture is high for the group of 83 individuals that worked 200 or more days off the farm. Of this group, 39 or almost one-half did not farm in 1962.

Household Size

Although the size of households in the study ranged from one to 14 individuals in 1962, large households were not a characteristic of either the group that lived on a farm or of the group of ex-farm residents. Total persons per household averaged 4.5 for the group that resided on a farm in 1962 and 4.2 for the group that had lived on a farm but who were classified as nonfarm residents in 1962 (Appendix Table 8).

Stage of Family Life Cycle

Since the sample for the study was drawn from a 1950 list of farm operators, it is to be expected that the families in the sample would tend to be in the later stages of the family life cycle. This expectation is verified by Appendix Table 9.

Of the 290 families for which stage of family life cycle was determined, only 17 or 5.9 percent were families composed of childless couples of childbearing age (20-44) or couples with the oldest child living at home under 10 years of age. Over one-fourth (27.9 percent) of the families were composed of couples with the wife over child bearing age and with no single children living at home; 27.6 percent of couples with one or more children under 10 years of age and one or more children 10-21 years of age, single and living at home; and 38.6 percent of couples with youngest child 10-21 years of age, single and living at home.

There was no relationship between the stage of the family life cycle and the farm-nonfarm status of the family in 1962.

Occupational Choice [1]

Since the group under study was composed of farmers and ex-farmers, there was considerable interest in the occupational preferences of these groups. In order to obtain a general indication of occupational preference, each 1950 farm operator under 65 years of age in 1963 was asked, "If you could choose any occupation to work in until retirement, what would be your first choice?" Although only one-third (33.6 percent) of the individuals answering this question indicated farming as their first choice of occupation, the difference between individuals who were farming in 1962 and those who had quit was significant. (Table 16) Of the individuals still farming, 37.5 percent gave farming as a first choice of occupation compared with 24.4 percent of the individuals who were not farming. Therefore, it would seem that of the group not now farming, one-fourth would like to change their occupation to farming and of the group still farming almost two-thirds (62.5 percent) would like to change their occupation to some type of nonfarm work.

To obtain additional insight into the occupational preferences of the group under study, each 1950 farm operator was asked to make a first, second, last and next to last choice from a selected list of occupations. Included in this list were dairy farmer with a 25 cow herd and dairy farmer with an 80 cow herd. The 80 cow herd was considered by professional agricultural advisers to be the herd size capable of maintaining a full-time family farm while the 25 cow herd was considered too small to provide an adequate level of living for a farm family. The results of answers to these questions are shown in Appendix Tables 10, 11, 12 and 13. Differences between individuals still farming and individuals who had left farming were not significant. Less than one-fourth (24.7 percent) of the respondents gave dairy farmer with an 80 cow herd as their first occupational choice and one-tenth gave it as their last choice. For occupational choice of dairy farmer with a 25 cow herd, one-third (33.7 percent) gave this as their first choice and less than one in 20 (4.1 percent)

---

[1] This topic is discussed in greater detail in Reeder, Le Ray, and Craig, 1965.

Table 16.--Distribution of 306 Sample Farms by Change in Farm-Nonfarm Status 1949 and 1962 by Choice of Farming As An Occupation Until Retirement by Individuals Under 65 Years of Age, St. Lawrence County, New York, 1963

Farming Was Occupational Choice Until Retirement	Total		Farm-Nonfarm Status, 1949 and 1962			
			Farm 1949 and 1962		Farm 1949 Nonfarm 1962

$X^2 = 4.241$ d.f. = 1 $p < .05$

1/ Data not available or not applicable for 44 cases.

indicated that this was their last choice of occupation. From the above, it would seem that many individuals were making choices of a size of farm enterprise that would enable them to earn only a relatively low-income under present day conditions.

Summary

The analysis of data related to the human resource failed to indicate significant differences between 1949 farm operators who were still farming in 1962 and individuals who quit farming with respect to age and education of the farm operator, household size, stage of family life cycle, or choice of 25 cow herd or 80 cow herd as first and last occupational choice.

Differences between individuals who continued to farm and ex-farmers were significant with respect to adjustment potential of the farm operator, days of off-farm work in 1949 and farming as an occupational choice until retirement. Individuals who left agriculture tended to be in the group under 50 years of age, able to work, and not retired. They average more days of off-farm work during 1949 and tended to choose a nonfarm occupation in preference to farming as an occupation to follow until retirement.

RETURN TO FACTORS OF PRODUCTION [1]

In this section, attention will be directed primarily toward a comparison of household incomes where there was a dependency upon agriculture for some income during 1962 as contrasted with households where there was no longer a dependency upon farming for income. Economic returns to agriculture are returns to land, labor capital and management. In general, earnings from off-farm work are only returns to labor. [2]

The previous sections have been concerned with differences in human and physical resources of two groups - those that left and those who stayed in agriculture. These two groups will also be compared in this section.

Production for Home Consumption

Food and fuel items produced on the home place and used in the home represent important items of daily living. To the extent that the value of these items exceeds the cost of production, these items make a contribution to the level of living of the family. Of the 306 families in the study, 259 or 84.6 percent reported some production for home consumption during 1962. A higher proportion of the families still farming (95.9 percent) than of the families that quit farming (55.3 percent) consumed food and fuel items produced on the home place. The various items of home production and consumption during 1962 by farm-nonfarm status during 1962 was:

---

[1] A detailed discussion of this topic is beyond the scope of this report. Additional data from the study dealing with this topic are available in Bennett, 1964; Le Ray and Reeder, 1965; Reeder, Le Ray and Craig, 1965.

[2] This introductory statement is intended as a "general statement". It is recognized that with respect to self-employment in off-farm work there is a return to capital and management and in land based activities - for example, outdoor recreation enterprises - there is a return to land. In addition, it is possible to consider part of the return to labor as a return to investment in human capital.

Item of Home Production	Families Reporting			
	Farm (N = 221)		Nonfarm (N = 85)	
	Number	Percent	Number	Percent
Milk	183	82.8	1	1.2
Eggs	65	29.4	3	3.5
Poultry	54	24.4	3	3.5
Pork	59	26.7	0	0.0

Frozen	38	17.2	2	2.4
Canned	39	17.6	3	3.5
Fuel Wood	112	50.7	10	11.8
Other 1/	5	2.3	3	3.5

The distribution of sample households by value of food and fuel produced for consumption on the home place is shown in Table 17. Perhaps more important than the finding of significant differences between farmers and ex-farmers in the value of home production is the finding that of the total group of ex-farmers, over one-half (55.3 percent) were still producing food and fuel items for home use. Though they were no longer classified as farm families, they still maintained a contact with the land. It is also significant that almost two-thirds (63.4 percent) of the farm families were able to produce food and fuel with a value of $500 or more in 1962 if these items had been purchased. 2/

1/ Includes butter, honey, maple products and lamb.

2/ See Appendix Table 16 for factors used to compute value of home produced food and fuel.

Table 17.--Distribution of 306 Sample Farms by Change in Farm-Nonfarm Status 1949 and 1962 by Value in Dollars of Items Produced for Consumption and Used in the Home During 1962 if These Items were Purchased, St. Lawrence County, New York

Value of Home Production (Dollars)	Total		Farm-Nonfarm Status, 1949 and 1962			
			Farm 1949 and 1962		Farm 1949 Nonfarm 1962	
	Number	Percent	Number	Percent	Number	Percent

Percent	---	100.0	---	100.0	--	100.0

$X^2 = 175.272$ d.f. = 4 $p < .001$

Nonwork Income

Income from nonwork sources represents income received as a return to capital investments, deferred payments for past services, or transfer of funds from one segment of society to another. (Table 18) One in two (49.8 percent) of the families still farming reported some nonwork income compared with seven in 10 (70.0 percent) of the families that quit farming.

Of the 299 households reporting information about nonwork income, 25.0 percent of the ex-farmer households and 13.3 percent of the farm households received income from nonwork sources of $1,000 or more. Only 5.5 and 10.0 percent of the farm and ex-farm households respectively received $2,000 or more from nonwork sources during 1962.

The sources of nonwork income for these families by farm-nonfarm status during 1962 was:

Nonwork Income Source	Families Reporting			
	Farm (N = 221)		Nonfarm (N = 85)	
	Number	Percent	Number	Percent
Property Income:

Household Income [1]

Data about household income goes to the heart of the human and physical resource use adjustment problem. The amount of income received by a household determines to a large degree the access that the household has to goods and services. If income is inadequate, access to goods and services is restricted. When individual or households have incomes so low that basic needs for goods and services are unmet, a state of poverty exists. Persons are considered to be living in poverty when they are members of families with net cash incomes of less than $3,000 or unrelated individuals with incomes of less than $1,500 (persons living alone or in non-family units) (Bird, 1946, p. 1).

Data about net cash household income and net cash household income plus value of home production, if purchased, are presented in Appendix Tables 14 and 15. Of the 296 families for which total net cash family income information was available for 1962, about one-fourth (24.3 percent) reported incomes of less than $3,000. Incomes of less than $3,000 were reported for 27.6 percent of the farm families and 15.2 percent of the ex-farm families.

The addition of value of home production, if sold, to net cash household income results in a significant reduction in the number of households in the poverty class. When the value of home production is added to net cash household income, the number of households with real incomes of under $3,000 is reduced from 72 to 61. None of this reduction takes place within the ex-farmer group. The decrease from 60 to 49 or 22.4 percent of farm families with incomes of under $3,000 is significant. Also of significance is the finding that the inclusion of value of home production in the net family income picture increased the number of farm families with incomes of $6,000 or over from 82 to 94 - an increase of 14.6 percent.

---

[1] Total household income data are available only for 1962. Therefore, household income comparisons for 1949 or other years are not possible.

Summary

The analysis of selected data relative to the return to the factors of production during 1962 failed to reveal significant differences with respect to household income between households where the 1950 farm operator continued to farm and households that were now nonfarm. Farm households reported a higher value of home production while ex-farm households had a higher incidence of nonwork income.

Within the sample population, change has taken place. Of an original group of 306 farm operators, 85 or 27.8 percent were not farming in 1962. However, a high proportion of both groups - those that stayed in agriculture and those that left are living in poverty. Human and physical resource use adjustment is still necessary if the individuals and families studied are to meet their basic needs for goods and services if they are to achieve their just place in the great society.

APPENDIX A

Tables [1]

---

[1] The chi square value has been computed for all of the tables used in developing the analysis of data for this report. The five percent level (two-tailed test) was accepted as the level of significance. When differences between individuals who were farming 1962 and those who were not farming in 1962 are significant at the five percent level, the data are presented in tables in the text of the report. When differences are not significant at the five percent level, the data are presented in Appendix Tables.

SOURCE: Guide for Home-Produced Food, FHA-NY 431-1, Farmers Home Administration, U. S. Department of Agriculture, Syracuse, New York, October 1962; Home Demonstration Agent, St. Lawrence County, New York; Respondents for St. Lawrence County Study; Department of Household Economics and Management, College of Home Economics, Cornell University; and Department of Welfare, St. Lawrence County, New York.

1/ For farm households, production expenses are included under farm expenses. For nonfarm household expenses for home production were charged at the rate of $20 for $\frac{1}{4}$ acre or less and $20 for each additional $\frac{1}{4}$ acre.

APPENDIX B

THE SAMPLE AND OBJECTIVES OF THE OVER-ALL STUDY

The objectives of the over-all project were to determine for a given population of rural farm families in an area of northern New York State with different resource characteristics and levels of family income the following:

A. The nature and processes of socio-economic adjustment over the past decade in human and physical resource use and their basic causes;

B. The community, area, and economy-wide characteristics and developments which comprise the general socio-economic environment within which adjustments have evolved.

Stated more specifically, the objectives of the over-all study were:

1. To develop the nature, processes, and causes of change in the sizes and types of farm organization and land use.
2. To relate incidence of part-time and full-time commercial farming to patterns of occupational mobility between farm and nonfarm activities and level of agricultural and nonfarm economic activity of the economy.
3. To explore the relationship of different patterns of farm organization and land use to patterns of communication, rate of adoption of selected farm practices, and goals and values.
4. To develop a typology of part-time farmers based upon relative commitment to farm and nonfarm activity.
5. To develop a typology of part-time farm households based upon source of household income.
6. To compare present and base period social and economic characteristics of persons in the basic sample who have: (a) migrated from the area, (b) remained in the area as farmers, and (c) become nonfarm residents within the area.

The sample for the study was drawn from the 20 percent sample for the 1950 U. S. Census of Agriculture for St. Lawrence County, New York. The 20 percent sample yielded the names of 1,017 individuals who were operating farms in St. Lawrence County in 1949. Individuals who were 55 years of age or over in 1950 were excluded from the study. As a result of this selection, this study is not representative of all farms or farm operators in the area. It represents farm operators, their farms, and their families meeting the criteria outlined above.

Of the total 417 farm operators who were in the sample based on the 1950 Census of Agriculture, 32 had died and eight could not be located (Table A). Of the 377 remaining, only 26 or 6.9 percent had left the county. In other words, more than nine out of 10 of the 1950 farm operators are trying to work out their adjustments within the area. Even though this is a county which is classified as an area of substantial and persistent unemployment by the Department of Labor, these farm operators are not moving to areas of greater opportunity. Of 320 farm operators who were engaged in farming in 1950 and who have remained in the area and for whom we have information, 234 or 73 percent were still engaged in farming on a full-time basis in 1962. In other words, of those who remain in the area more than seven out of 10 are still engaged in farming on a full-time or part-time basis.

Data for this special report were obtained from the responses of the male respondents who were living in the St. Lawrence County area during the summer of 1963.

Table A.--Distribution of 417-1950 Farm Operators Who Were Under 55 Years of Age in 1950 by Availability for Interview and Farm-Nonfarm Classification, St. Lawrence County, New York, 1963

Item	Number	Percent
No Interviews:		
Deceased	32	7.7
Moved out of St. Lawrence County area	26	6.2
Unable to locate	8	1.9
Not available for interview during the time that survey team was in the field	7	1.7
Refused to be interviewed	16	3.8
Total	89	21.3
Interviews:		
Not farming in 1950	4	1.0
Incomplete interview	4	1.0
Complete interviews	(320)	
Farming in 1962 1/	234	56.1
Not farming in 1962 2/	86	20.6
Total	328	78.7
Total Sample	417	100.0

1/ Includes three female farm operators.

2/ Includes one female who operated a farm in 1950.

CLASSIFICATIONS AND TERMINOLOGY

Concepts preceded by an asterisk (*) were operationally defined for purposes of analysis. Concepts not preceded by an asterisk (*) were operationally defined for purposes of enumeration. Except when noted, enumeration definitions have not been changed for purposes of analysis.

Dwelling Unit - Dwelling unit is a house, a group of rooms, or a room occupied as separate living quarters. A single room occupied as separate living quarters is a dwelling unit if it has separate cooking equipment or if it is the only living quarters in the structure. The basis of distinction is separateness or self-containment. In the majority of cases, a dwelling unit is a house, an apartment, or a trailer.

Economic Class of Farm -

> For the 1950 Census of Agriculture, places of three or more acres were counted as farms if the value of agricultural products in 1949, exclusive of home gardens, amounted to $150 or more. The agricultural products could have been either for home use or for sale. Places of less than three acres were counted as farms only if the value of sales or agricultural products in 1949 amounted to $150 or more. 1/

The economic classification of farms for the 1950 Census data:

> . . . was made on the basis of three factors; namely, total value of all farm products sold, number of days the farm operator worked off the farm, and the relationship of the income received from nonfarm sources by the operator and members of his family to the value of all farm products sold.
>
> In making the classification of farms by economic class, farms have been grouped into two major groups, namely, commercial farms and other farms. In general, all farms with a value of sales of farm products amounting to $1,200 or more were classified as commercial. Farms with a value of sales of $250 to $1,199 were classified as commercial only if the farm operator worked off the farm less than 100 days and the income of the farm operator and members of his family received from nonfarm sources was less than the total value of all farm products sold.

1/ U. S. Department of Commerce, Bureau of the Census, U. S. Census of Agriculture 1950, Vol. 1, Part 2, Middle Atlantic States. Washington, D. C., 1952, p. XII, XIX.

Commercial farms were divided into six groups on the basis of the total value of farm products sold, as follows:

Class:	Value of Farm Products Sold
I	$25,000 or more
II	$10,000 to $24,999
III	$5,000 to $9,999
IV	$2,500 to $4,999
V	$1,200 to $2,499
VI	*$250 to $1,199

*Provided the farm operator worked off the farm less than 100 days and provided the income the farm operator and members of his family received from nonfarm sources was less than the value of all farm products sold.

Other farms were grouped into three classes as follows:

Part-time farms.--Farms with a value of sales of farm products of $250 to $1,199 were classified as part-time provided the farm operator reported (1) 100 or more days of work off the farm in 1949, or (2) the nonfarm income received by him and members of his family was greater than the value of farm products sold.

Residential farms.--Residential farms include all farms except abnormal farms with a total value of sales of farm products of less than $250. Some of these represent farms on which the operator worked off the farm more than 100 days in 1949. Some represent farms on which the income from nonfarm sources was greater than the value of sales of agricultural products. Others represent subsistence and marginal farms of various kinds. Some farms are included here, which under normal conditions, would have qualified as commercial farms.

Abnormal farms.--Insofar as it was possible to identify them, abnormal farms include public and private institutional farms, community enterprises, experiment station farms, grazing associations, etc. 1/

For the 1959 Census of Agriculture:

Places of less than 10 acres in 1959 were counted as farms if the estimated sales of agricultural products for the year amounted to at least $250. Places of 10 or more acres in 1959 were counted as farms if the estimated sales of agricultural products for the year amounted to at least $50. 2/

1/ Ibid., p. XIX.

2/ 1959 Census of Agriculture (Washington: U. S. Department of Commerce, Bureau of the Census, 1961), Vol. 1, Part 7, Counties (New York), p. XIV.

The economic classification of farms for the 1959 Census of Agriculture was made on the same general basis as that employed for the 1950 Census.

Commercial farms were divided into six economic classes on the basis of the total value of all farm products sold, as follows:

Class of Farm	Value of Farm Products Sold
I	$40,000 and over
II	$20,000 to $39,999
III	$10,000 to $19,999
IV	$5,000 to $9,999
V*	$2,500 to $4,999
VI	$50 to $2,499

*Provided the farm operator was under 65 years of age, and--(1) he did not work off the farm 100 or more days, and (2) the income that he and members of his household received from nonfarm sources was less than the total value of farm products sold.

Farm - For purposes of this study, a farm is all of the land upon which some agricultural enterprises were conducted by an individual either by his own labor alone, or with the assistance of members of his household or hired employees during 1962. For enumeration purposes, it was considered that agricultural enterprises were conducted during 1962 if:

(a) Any livestock--hogs, cattle, sheep, goats, or horses--were kept on the land.

(b) A combined total of 20 or more chickens, turkeys and ducks were raised or kept on the land.

(c) Any grain, hay, or other field crops were grown on the land either for sale or home use.

(d) A combined total of 20 or more bearing or non-bearing fruit trees, grapevines, and nut trees were on the land and not abandoned.

(e) Any vegetables, berries, or nursery or greenhouse products were grown on the land for sale.

(f) A combined total of one-fourth acres of vegetables, berries, grapevines, fruit trees, or nut trees were grown on the land either for home consumption or for sale.

(g) A combined total of 10 or more days were spent in harvesting forest products or in carrying out reforestation or timber stand improvement practices on the land.

The above requirements resulted in the enumeration of farm information for 1962 from some individuals that were classified as nonfarm when the criteria for classifying individuals and farms were applied to the questionnaires during the analysis. However, it was felt desirable to obtain this information to permit more detailed classification and for uses beyond the scope of this thesis.

This enumeration procedure is comparable to the procedure used by the Bureau of the Census. Enumerators are instructed to obtain an agricultural questionnaire for each person who had charge of one or more agricultural operations whether or not the individual considered himself to be a farm operator. During the office processing operations that follow the enumeration, criteria are applied to sort out for tabulation those questionnaires that represent farms according to the Census definition of farm.[1/] As has been noted, the basic sample for the present study is the 20 percent sample of the 1950 Census of Agriculture for St. Lawrence County, New York. Therefore, all the individuals in the sample for the present study were farm operators in 1950 as determined by the office processing operations of the Bureau of the Census that followed the 1950 enumeration.

Farm Operator - 1950 - The individual designated on Form A1 Agricultural Questionnaire 1950 - U. S. Department of Commerce, as the person in charge of agricultural operations on April 1, 1950.

Farm Work - Farm work is work put on crops, work with livestock, maintenance work on farm improvements, farm machinery and equipment, and management of the farm including maintaining records and accounts. It does not include time spent redecorating, remodeling, or repairing the family living quarters or time spent at nonfarm businesses operated from the home place--for example, auto repair business or dressmaking shops.

Included as farm work on the home place are any work, chores, or

---

[1/] U. S. Bureau of the Census, U. S. Census of Agriculture: 1959, Vol. II, General Report Statistics by Subjects, (Washington, D. C. 1962).

planning necessary to the agricultural operations of the place, such as the following:

(1) Working in fields, orchards, or home gardens;

(2) Feeding and caring for livestock and poultry;

(3) Irrigating crops;

(4) Hauling farm or ranch products to market;

(5) Hauling feed, fertilizer, and other supplies to the farm or ranch;

(6) Cleaning and caring for milk pails and separators;

(7) Cleaning and repairing machinery and other farm equipment;

(8) Constructing or repairing buildings and fences with regular farm help;

(9) Contract farm work for which labor is hired, but for which machines and equipment are furnished by the farm operator;

(10) Planning farm work;

(11) Keeping farm records;

(12) Supervising hired employees.

Not included are:

(1) Housework;

(2) Contract construction work;

(3) Custom work for which equipment is hired from a contractor who also supplies the labor for operating the equipment;

(4) Repair, installation, or construction work done by persons employed specifically for such work.

Farmer - Farmer is an individual who conducted an agricultural enterprise upon a farm during 1962 either by his own labor alone or with the assistance of members of his household or hired employees during 1962.

Household - Household, as used in this study, includes all persons who occupy a house, an apartment, a group of rooms, or a room that constitutes a dwelling. A household includes the family and also lodgers, foster children, wards or employees who share the dwelling unit. A person living alone in a dwelling unit or a group of unrelated persons sharing a dwelling unit as partners is also counted as a household.

Persons who came away from the sample unit because they were inmates of the following types of institutions at the time of enumeration were

not considered members of the household unit. As inmates, they were considered usual residents at the institution. These institutions include:

(1) Penal institutions;

(2) Homes for the aged, infirmed, and needy;

(3) Mental institutions (including mental hospitals for veterans);

(4) Nursing, convalescent and rest homes;

(5) Other hospitals and homes providing specialized care.

*Labor Force - Labor force refers to all persons 14 years old or over who are either (1) employed; (2) unemployed; or (3) members of the Armed Forces.

Land:

Land Operated - Land operated represents the total of all land used for agriculture by the person in charge---including land he owns, land he rents or leases from others, land he occupies rent free, and land he works on shares for others. Not included is land he rents to others, land he permits others to use rent free, and land worked on shares for him by others.

Land Rented to Others - Land rented to others is the total acreage of all land which the person in charge rents or leases to others, land he permits others to use rent free, and land worked for him by others on shares. Included is cropland, pasture-land, woodland, wasteland, and other land whether in one tract or several.

Land Rented from Others - Land rented from others is the total acreage of all land which the farm operator rents or leases from others, uses rent free, or works on shares for others.

Land in Crops - Land in crops include all of the following for reporting period:

(1) Land seeded with the expectation of harvesting a crop;

(2) Land from which a crop was harvested;

(3) Land in both bearing and non-bearing fruit trees, nut trees, and grapevines, including those on which the blossoms, but not the trees, were killed by freezing;

(4) Land in nursery and greenhouse products;

(5) Land used for pasture if this could have been used for crops without additional improvement (such as brush clearing, stone removal, tree clearing, etc.);

(6) Land that was idle but that has been cropped in recent years.

Other Pasture - Other pasture includes all land other than woodland and cropland that was used only for pasture and grazing. Include non-crop open or brush pasture and cutover or deforested land improved and used for pasture.

Woodland - Woodland refers to all woodlots or timber tracts, natural or planted and to cutover and deforested land with young growth which has or will have value for wood products. It does not include cutover or deforested land that has been improved for pasture; such land is reported as other pasture.

Woodland not Pastured - Woodland not pastured is all woodland not used for pasture or grazing in 1962.

Major Activity - Major economic activity is the activity at which an individual spent the greatest amount of his time during the period under study.

Income:

Net Cash Farm Income - Net cash farm income includes cash receipts from sales of farm products, custom farm work, and government agricultural payments minus cash farm expenditures.

Net Farm Income - Net farm income is net cash farm income plus perquisites. This definition does not include an allowance for depreciation on farm machinery and equipment or a change in livestock or equipment inventory.

Nonwork Income - Nonwork income is income other than wages or salary, e.g., from rents, royalties, interest, dividends, veterans allotments, social security, unemployment insurance, public assistance.

Nonfarm Work Income - Nonfarm work income is the total wages or salaries earned at nonfarm work.

Off-Farm Work Income - Off-farm work income is the total wages or salaries earned off the farm.

Perquisites - For this study, perquisites are farm products including food produced on the home place and consumed in the home. For purposes of analysis, dollar values were assigned to have production on the basis of cost if purchased locally or return if sold through usual marketing channels in the area.

Unpaid Family Workers - Unpaid family workers are persons who worked without direct compensation on a farm or in a business. They are usually related by blood or marriage to the operator of the farm or business.

*Underemployment - Underemployment refers to under-utilization of a worker's time and ability through (1) employment for less than a full working year or (2) employment at work which does not make full use of his training and ability.

Pub Date - 65 41p.

*VOCATIONAL COUNSELING; *GROUP NORMS; STUDENT TESTING; *VOCATIONAL APTITUDE; *APTITUDE TESTS; GEORGIA; *THE DAILEY VOCATIONAL TESTS

The purpose of this booklet is to provide norms based on Georgia students which will enable the counselor to use Dailey Vocational Test Scores in assisting students to choose courses in Georgia's area vocational-technical schools appropriate to their abilities. The recently developed norms will enable the counselor to interpret scores by direct comparison with scores of students enrolled in various courses in area schools. In each table raw scores have been converted to 15 designated percentile values. Separate norms are not provided for males and females. Norms tables are given for 14 occupational groups or technologies for a combination of categories. Addresses and curriculums for 23 area vocational-technical schools are included. (EM)

PREFACE

Georgia is among those states which have taken the lead in recent years in developing a program of Area Vocational-Technical Schools. Since these institutions are new, the Vocational Education Division of the State Department of Education recognizes the need for providing counselors with information and data that will enable the counselor to assist students in relating their abilities and interests to courses offered in the vocational-technical field. Primarily, this publication is designed to provide the counselor with additional data on Georgia's Area School Program.

The Vocational Education Division is indebted to Houghton Mifflin Company not only for furnishing the test booklets, answer sheets, and scoring service used in collecting and analyzing the data, but also for the personal service of Dr. John Hornaday for his assistance in the final editing of the **Guide.**

The data found in the **Guide** could not have been collected without the assistance of the following area school personnel: George M. Hardy, Director of the Augusta Area School; Maurice D. Boatwright, Director of the Swainsboro Area School; James H. Marlowe, Director of Student Personnel Services at North Georgia Technical and Vocational School; Owen K. Sterner, Director of Student Personnel Services at DeKalb Area School; Milton Earnest, Director of Student Personnel Services at Hoke Smith Technical School; W. T. Bodenhamer, Jr., Director of Marietta-Cobb Area School; C. Maurice Culberson, Director of Coosa Valley Vocational-Technical School; Kenneth W. Simonds, Director of Student Personnel Services at Upson County Area School; Jere M. Richardson, Director of Columbus Area School; John H. Smith, Director of Muscogee Area School; James E. Spradlin, Director of Student Personnel Services at South Georgia Technical and Vocational School; William M. Sellers, Director of Student Personnel Services at Albany Area School; B. B. White, Director of Monroe Area School; W. W. Hobbs, Director of Moultrie Area School; Paul G. Sewell, Director of Thomas Area School; Edward H. Smith, Director of Walton Area School; and Seab H. Miller, Director of Student Personnel Services at Valdosta Area School. For the general assistance rendered by each of these persons, the Vocational Education Division expresses its sincere appreciation.

I. Introduction

Purpose

The purpose of the **Counselor's Guide to Georgia Area Vocational-Technical Schools** is to provide data that will enable the counselor to use **The Dailey Vocational Tests** scores in assisting students to relate their abilities to courses offered in Georgia's Area Vocational-Technical Schools. Because of changes in our economic structure in recent years, Georgia's counselors have seen an increased need for assisting high school students to enter training programs designed to prepare individuals for employment in technical, skilled, business, and health occupations. As counselors examined instruments currently used for vocational appraisal, they found that most were inferior when compared with the quality of appraisal instruments used for college admissions. Counselors have frequently indicated a need for improved instruments to assist students in making a specific choice of school to attend and course to follow. Recently developed norms for **The Dailey Vocational Tests,** based on students in Georgia's Area Schools, will enable the counselor to interpret scores by direct comparison with scores of students enrolled in various courses in area schools. This comparison will provide valuable information not heretofore available to the counselor and student. The tests, used in conjunction with this **Guide,** will provide more accurate knowledge about the student's potential for successful completion of Georgia's vocational and technical programs.

Guide to Area School Programs and Specific Courses

Section IV of this **Guide** provides a listing of the area schools and the course offerings of each. This information should be read carefully by each counselor and should be made available to students. There is also a description of general admission procedures applicable to most area schools. For more specific information on a given school regarding cost, admission procedures and requirements, entrance dates, and course offerings, the counselor or student should write to the Director of Student Personnel Services for that particular school. The address of each school is given in Section IV.

This **Guide** makes it possible for the high school counselor to compare scores made by high school juniors and seniors on **The**

Dailey Vocational Tests with scores made by students enrolled in the courses offered by the area schools. For this purpose, tables of norms have been set up for various course categories. The counselor will note that separate norms tables are not given for all of the courses offered but rather that certain courses are grouped to form course categories. Courses were grouped by similarity of abilities, aptitudes, and achievement needed to be successful in particular courses as indicated by experience with other standardized tests. Use of norms developed for specific course categories enables the high school counselor to assist Georgia boys and girls in understanding their abilities as they relate to courses offered in Area Vocational-Technical Schools. It should be pointed out that **The Dailey Vocational Tests** are not designed to become the admissions instrument used in the area schools. Most of the area schools plan to continue use of the **General Aptitude Test Battery** as their selection criterion, and development of norms for **The Dailey Vocational Tests** on area school students has been done primarily to assist students in selecting the course to be pursued. Examination of the content of **The Dailey Vocational Tests** and the **General Aptitude Test Battery** indicates that the two are related and there should be little conflict between scores made on the two tests.

Description of The Dailey Vocational Tests

The Dailey Vocational Tests are designed to measure the potential of students for a wide range of occupations. The occupational structure of the United States is becoming one of skilled workers, and there is a need for greater emphasis on guidance in high school for postsecondary training other than college. **The Dailey Vocational Tests** meet a part of this need, and in several ways they are unique among vocational tests. They meet the need for guidance material specifically designed for academic and vocational guidance, especially with students who are planning to enter training in commercial, vocational, and technical courses. The **Counselor's Guide** has been prepared primarily to assist counselors in using **The Dailey Vocational Tests** at the junior and senior high school levels with those Georgia boys and girls who are anticipating entrance into one of Georgia's Area Vocational-Technical Schools. Used most effectively, the tests and **Guide** should help counselors in finding occupations the student can successfully pursue rather than merely setting limits and ruling out areas in which he would have great difficulty.

The tests measure a number of the most important skills commonly found to be associated with successful training in technical and vocational programs. Although unique in a number of important respects, they are generally the kinds of tests which have been widely and successfully used with both youths and adults for more than two decades. The tests are unique in that (a) they are specifically designed for use as vocational guidance tests, (b) they are developed for students who are vocationally oriented, and (c) they reflect technical and academic knowledge as well as aptitude required for development of competence in a variety of occupations and educational programs. The design of the test facilitates administration, scoring, and interpretation. Recognizing that time is a critical factor in guidance work, care has been taken to minimize the time required for administration and scoring.

The Dailey Vocational Tests consist of three tests: **Technical and Scholastic Test** (TST), **Spatial Visualization Test** (SVT), and **Business English Test** (BET). They may be administered separately or as a battery. The **Technical and Scholastic Test** contains 150 items which measure knowledge and abilities important for success in technical, trade, business, and health occupations. The questions are designed to test the student in three ways: (a) to assess technical knowledge acquired through practical experience with electrical and mechanical equipment, (b) to measure knowledge acquired through academic study of the physical sciences, and (c) to indicate general scholastic ability. These aims relate directly to three practical questions: (a) How much useful working knowledge of electrical and mechanical equipment does the student possess now? (b) How adequate is the student's background in the physical sciences and mathematics? (c) What is the student's potential for profiting from further training? This **Guide** provides norms on the Electrical, Mechanical, and Scholastic scales as well as the Total scale for the **Technical and Scholastic Test,** and this test will be particularly useful in counseling those students who are vocationally oriented.

The **Spatial Visualization Test** consists of 30 items measuring ability to visualize objects presented in two-dimensional drawings as they would appear in three-dimensional space. Specifically, the items require the subject to match the edges of a folded and unfolded figure. Each figure has from six to twelve edges so that choice is

made among six to twelve answers per item. This minimizes the number of correct answers by chance and makes possible several items per diagram. A single score is obtained from the administration of the twenty-minute test. This **Guide** provides norms for the **Spatial Visualization Test** for the courses offered in area schools. The measure of spatial reasoning ability represented by this score should be important in connection with guidance for such occupations as drafting, electronics technology, machine shop, and mechanical technology.

The **Business English Test** contains 111 items. It comprehensively measures knowledge of spelling, punctuation, capitalization, and correct usage or grammar. The single score on this test has proven to be valuable in predicting school performance, and the test will be useful for counseling high school students who are considering taking business training.

This brief description is intended to acquaint the counselor with some of the more important characteristics of the tests. Information on the interpretation of scores can be found in Section II of this **Guide.** If the counselor needs further information about the background, structure, reliability, and validity of these tests, he should consult the **Examiner's Manual for The Dailey Vocational Tests** (Boston: Houghton Mifflin Company, 1965). Some of the descriptive material in this section has been adapted from the **Examiner's Manual** by permission of Houghton Mifflin Company.

Establishing Norms for The Dailey Vocational Tests on Georgia's Area Schools

The courses offered in Georgia's Area Vocational-Technical Schools were grouped into fourteen specialized course categories on the basis of similarity of aptitudes and educational skills needed to pursue the the course. The following seventeen Area Vocational-Technical Schools were used in developing these norms:

South Georgia Technical-Vocational School (State)
North Georgia Technical-Vocational School (State)
Albany Area Vocational-Technical School
Monroe Area Vocational-Technical School
Atlanta (Hoke Smith) Vocational-Technical School
Augusta Area Vocational-Technical School

Columbus Area Vocational-Technical School
Muscogee Area Vocational-Technical School
DeKalb Area Vocational-Technical School
Marietta-Cobb Area Vocational-Technical School
Moultrie Area Vocational-Technical School
Coosa Valley Area Vocational-Technical School
Swainsboro Area Vocational-Technical School
Upson County Area Vocational-Technical School
Thomas Area Vocational-Technical School
Walton Area Vocational-Technical School
Valdosta Area Vocational-Technical School

Norms for the tests were developed on area school students who are similar to high school seniors in age and educational achievement. For most courses, norms were established on day school students who had been enrolled in the Area Vocational-Technical School for six months or less. Day students were used since most of them were recent high school graduates and were close to high school students in chronological age. Also, the use of day students who had been enrolled for less than six months minimized the influence of achievement or learning resulting from study at the area school. In order to have a sufficient number of students for development of norms in the fields of data processing, chemical technology, mechanical technology, drafting and design, and medical laboratory assistant, it was necessary to include all day and night students enrolled in these courses. Therefore, high school counselors, in comparing students' scores with scores made by students enrolled in these specific courses, should take into consideration the effect of learning by students in the area schools. It will be more difficult for the high school student to reach the median raw score or to obtain a given percentile in those areas where all students were used in preparing the tables of norms.

Students enrolled in programs for office training, medical office assistant, and dental assistant were administered the **Technical and Scholastic Test** and the **Business English Test;** students in all other programs were administered the **Technical and Scholastic Test** and the **Spatial Visualization Test.** Those students who express interest in one of the specific programs of study should be given the appropriate tests as indicated above. If a student does not know the course of

study he wishes to follow, all of the tests in the Dailey series should be administered so that the scores from three tests can be used as an aid in selecting a course of study.

Interpretation of test scores should be given to students individually or in small groups. In some cases, it may be desirable to prepare individual profiles for the students' use. The obtained percentiles will be most meaningful if norms based on students in our Area Vocational-Technical Schools, rather than on national samples, are used to interpret the raw scores. The procedure for making most effective use of the Georgia norms for purposes of interpretation is described in the next section of this **Guide.**

II. Interpretation

Description of the Norms Tables

Section III presents, in fifteen tables of normative data, the distribution of scores made by area school students for various course categories. The norms presented in this **Guide** are expressed in terms of percentile rank equivalents. Tables 1 through 13 present norms on the **Spatial Visualization Test** and **Technical and Scholastic Test** for the course categories listed above each table. Norms are given for the Total score as well as the Electrical, Mechanical, and Scholastic subscales of the **Technical and Scholastic Test.** Students interested in entering courses listed in Tables 1 through 13 should be given both the **Spatial Visualization Test** and the **Technical and Scholastic Test.** Table 14 presents norms on the **Technical and Scholastic Test** and **Business English Test** for courses in office training, medical office assistant, and dental assistant. Students interested in entering courses listed in Table 14 should be given both the **Business English Test** and the **Technical and Scholastic Test.** Table 15 presents combined norms for the course categories included in Tables 1 through 14.

Counselors should note that the caption of each table presents the group of courses making up the course category for that table. Some tables present norms for only one course while other tables combine as many as eight courses. One item of information which appears in the tables under each test is that "N" equals a certain number. "N" is the number of area school students used for determining the percentiles in each course category.

Reading the Norms Tables

The norms tables presented in this **Guide** have been devised to encourage realistic interpretation of the test scores. In each table, raw scores have been converted to seventeen designated percentile values. The use of finer percentile units has been avoided since such units would give an appearance of exaggerated precision to the percentile ranking and to differences between rankings.

In using the tables, the counselor should select the appropriate tables for courses which a given student is considering. Percentile ranks corresponding to the individual's raw scores on each test represent his placement within the group of students enrolled in each

course category. Raw scores on each test or scale should be located within the body of the table, and the corresponding percentile rank should be read from the percentile column located on the sides of the table.

Separate norms are not provided for males and females; therefore, high school students' scores should be compared with scores made by individuals currently enrolled in the area schools regardless of sex.

Several examples may serve to illustrate the use of the tables. Let us assume that John Jones, a twelfth-grade student, has taken the **Technical and Scholastic Test** and the **Spatial Visualization Test** and that the raw scores shown below were obtained.

Test	Raw Scores	Percentiles for Electronics (Table 1)
Technical and Scholastic Test		
Electrical	52	50
Mechanical	40	30
Scholastic	42	30
Total	94	40
Spatial Visualization Test	15	20

John plans to make application to one of Georgia's Area Schools to enroll in the electronics course. In the table above, the applicant's raw scores and corresponding percentile values are listed. The percentiles were obtained by reference to Table 1 of the **Guide** and no attempt is made to interpolate. It should be recognized that the percentiles represent an approximation within five percentile points. The counselor notes that John's scores place him in the lower one-half of those students with less than six months' study in the course. In electronics, then, the counselor can assume that John might be successful in electronics but would probably be an average or below average student.

In helping students look at their abilities in relation to course alternatives, the counselor may wish to analyze a student's raw scores in terms of two or more different course categories. This would be particularly recommended if a student's percentiles fall below 20 when his scores are compared with those made by students

enrolled in a particular course category. For example, let us continue with John Jones and compare his scores with other course categories.

Test	Raw Score	Percentile for Electronics (Table 1)	Percentile for Radio & TV (Table 6)	Percentile for Ind. Elec. (Table 7)	Percentile for Air Cond. (Table 8)
Technical and Scholastic Test					
Electrical	52	50	80	95	95
Mechanical	40	30	60	70	50
Scholastic	42	30	60	80	60
Total	94	40	70	90	75
Spatial Visualization Test	15	20	50	70	40

The table above presents John's raw scores and corresponding percentile values for four course categories all of which deal to some tricity, or air conditioning than in electronics, although we would probably be more successful in radio and television, industrial electricy, or air conditioning than in electronics, although we would expect adequate performance in electronics as well. In general, if a student's raw scores fall below the 20th percentile for the course under consideration, he should explore course alternatives.

Once the counselor has provided the student with this information, the student will need further assistance from the counselor in deciding which course he wishes to study. The student's decision should be based only in part upon results of these tests. His interests, values, motivations, need to achieve, and an awareness of the similarities and differences among course categories should play a part as well. For information about course content and other related information regarding job opportunities, see the recently published **Area School Catalog**.

Often counselors work with students who plan to enroll in an area school but have only a vague idea of the course they wish to study. For example, Bobbie Carr, a twelfth-grade girl, might approach the counselor for aid in deciding which course to study at the DeKalb Area School. Having no clear goals, Bobbie is unable to select a course of study in which she would be interested and capable. She does make vague reference to office work and to work as a medical assistant. When students are unsure of the area they want to pursue,

the counselor should administer the full battery of **The Dailey Vocational Tests.**

Test	Raw Scores	Percentiles	
		Business Education Medical Assistant (Table 14)	Practical Nursing (Table 13)
Technical and Scholastic Test			
Electrical	17	10	30
Mechanical	24	10	50
Scholastic	36	20	60
Total	53	15	50
Business English Test	73	15	—
Spatial Visualization Test	17	—	80

The table above presents raw scores and corresponding percentile values for two course categories. The results suggest that Bobbie should consider practical nursing. Bobbie's low BET score indicates that she would probably have difficulty catching up because of a poor start in English, and her performance compared to students enrolled as medical assistants is below the 20th percentile, thus raising a question about her potential for that field. It should be clear to both the counselor and the student that these tests reflect both what the student **can do now** and what the student is **capable of learning to do.** The tests do not reveal what the student wants to do nor do they indicate personality characteristics that might play a role in determining success. The counselor may wish to use other means, in addition to the Dailey tests, to help Bobbie examine her interests and values regarding the world of work. Since she had expressed some interest in medical work, she might be interested in the practical nursing field. Comparison of her scores with scores made by students enrolled in practical nursing raises her percentiles. There is evidence that she has ample potential in practical nursing. With this information and with further help from the counselor, Bobbie will be in a better position to make a final decision as to the course she plans to study at an area school.

It should be pointed out that any set of raw scores would yield higher percentiles when interpreted through the practical nursing table than when interpreted through the medical assistant table. In the case of Bobbie Carr, however, percentiles were sufficiently low

on the medical assistant profile to justify exploring other possible courses of study. Had she achieved between the 30th to 50th percentile or higher on medical assistant (and still higher in practical nursing), she might go into the medical assistant course with an expectation of being about average as a student. She would then have been in the position of John Jones, the first example cited, and could choose among several courses as determined by her interests or other characteristics.

Additional illustrative cases and further suggestions for interpretation can be found in the **Examiner's Manual,** pages 11 and 22. The major change in procedure offered by this **Guide** is the use of Georgia's normative data tables as a basis for interpretation. In using this **Guide,** counselors should be aware of its limitations. First, it should be noted that some of the norms are based on fewer students than is considered desirable. Second, at this point no data have been collected which demonstrate the validity of **The Dailey Vocational Tests** on Georgia populations. (The **Examiner's Manual for The Dailey Vocational Tests** does present evidence of a significant relationship between test scores and success in training for national samples.) In spite of these limitations, it is evident that these norms will have practical value for Georgia's counselors. Thus, it was decided to publish the norms tables now. A second edition of the **Guide** is planned. It will include a larger number of students in each course category and will present validity data related to students' scores in Georgia's Area Schools. If the counselor will keep these limitations in mind, this **Guide** will become a valuable first step in providing counselors with adequate guidance information that can be used with students considering entrance into technical, skilled, business, and health occupations.

III. Tables of Normative Data for Georgia

When completed tests have been either hand scored or machine scored (see **Examiner's Manual**), raw scores may be converted to percentiles by using tables in the **Examiner's Manual** to reveal the student's standing relative to a national sample. Percentiles derived from the tables in this **Guide**, however, will be of greater practical value for those students who are considering further training in Georgia's Area Vocational-Technical Schools. In many areas, the difference in percentiles derived from the two sources is striking; in some cases the national sample yields higher percentiles and in other cases lower percentiles than those obtained from the Georgia sample. Occasionally, it will be helpful to obtain both the Georgia and the national percentiles for the raw scores. In the **Examiner's Manual**, an individual Profile Sheet is described which can be used for plotting the student's Georgia percentile or national percentile or both.

In the following pages, fifteen tables present percentiles obtained by students in various courses of study. To obtain Georgia percentiles, the counselor should select the table representing the course of study under consideration, look up the raw score in the body of the table, and read the corresponding percentile on the same line in the column to the left or right of the table. If the tests have been machine scored, there is sufficient space on the Student Report Form to write in the Georgia percentile. If hand scored, there is space on the answer sheets to write both national and Georgia percentiles if desired. For most students planning to enter a Georgia Area School, only the Georgia percentiles need be recorded and used in guidance.

Listed below are the courses offered by Area Vocational-Technical Schools in the school year 1965-66 (a table on page 34 lists the schools offering each of these courses). Table numbers and page numbers are given after each course of study listed on page 17 for convenience in referring to the tables of norms.

TECHNICAL OCCUPATIONS	Table	Page

IV. Georgia Area Vocational-Technical Schools: Courses, Admission Procedures, and Addresses

When assisting a student to make a decision as to the area school and course in which he plans to enroll, the counselor will need certain basic information about the area school program. It is the purpose of this section of the **Guide** to provide the counselor with information about the general admission procedures, the courses offered by each area school, and the address of each area school. For more specific information about a particular area school, the counselor should contact the school or refer to the **Area School Catalog.**

General Admission Procedure for Entrance Into Area Schools

1. Contact the area school and request information and application forms.
2. Complete all forms and return to the area school.
3. Request the high school counselor to mail a transcript of credits to the area school. Transcripts of any college or other post-high school education should also be requested.
4. Take the **General Aptitude Test Battery** (GATB) at the area school. Notification of the test dates will be sent applicants along with information on any additional tests which might be required.
5. Report for a personal interview at the appointed time and place.

Some schools also request a recent photograph, a physician's health certificate, and a short autobiography. Health occupation programs and cosmetology require a physical examination, X-ray report, and dental certificate.

Adams, John M., Jr., And Others
A Greenhouse for Vocational Agriculture in Kentucky.

MF AVAILABLE IN VT-ERIC SET.
Pub Date - 67 6p.

*VOCATIONAL AGRICULTURE; *PLANT SCIENCE; *GREENHOUSES; *ORNAMENTAL HORTICULTURE OCCUPATIONS; *FACILITY GUIDELINES; *EDUCATIONAL FACILITIES; CONSTRUCTION COST

Greenhouse plans were developed because of the need for programs of instruction in ornamental horticulture, flower and vegetable production, bedding plant production, and plant science at the secondary level. Greenhouse facilities can also be used to advantage in teaching production agriculture by serving as a laboratory to demonstrate plant responses to light, fertilizer, seed placement, soil preparation, moisture, disease and insect control, and other growth factors. The document includes: Need, Potential, Development, School Facilities, Greenhouse Use, Floor Plan, and Construction. A suggested floor plan, plans for bench construction, and estimated material costs are illustrated. (DM)

GREENHOUSE FOR TEACHING HORTICULTURE & AGRONOMY

NEED

There is a great need to develop programs of instruction in ornamental horticulture and greenhouse operation at the secondary level in Kentucky. Vocational agriculture has been broadened under the Vocational Education Act of 1963 to include vocational horticulture in the high school and post-secondary curriculums. To conduct effectively such programs, a greenhouse is needed. Greenhouse facilities can also be used to advantage in teaching production agriculture or farming by serving as a laboratory to demonstrate plant responses to light, fertilizer, seed placement, soil preparation, moisture, disease and insect control, and other growth factors. This brochure is to assist in planning a greenhouse for use in such programs.

POTENTIAL

Greenhouse production and ornamental horticulture have tremendous potential in Kentucky. More plants are being used inside and outside of homes, around public and private buildings, along streets and highways, in parks and recreational areas. The National Beautification Program has created a critical shortage of plant materials and trained workers for ornamental horticulture. Year-around consumer demand for fresh vegetables makes greenhouse production a very promising business. Kentucky's nearness to masses of population in our country presents a good outlook for the development of the industry and the occupational opportunities related to it.

DEVELOPMENT

Before the horticulture industry can reach its potential in Kentucky, training programs must be expanded at all levels. More people must be made aware of the opportunities. This can best be done at the secondary level. Students receiving such training will be able to enter jobs in horticulture, develop individual businesses, or pursue additional training at the technical and professional levels.

SCHOOL FACILITIES

Good supervised experience must be an integral part of the instructional program in vocational horticulture. This experience must support the course of study by helping students secure learnings and skills important in an occupation or a cluster of occupations. In the past supervised experience in agriculture has been done on home farms. This is not practical to the extent necessary in greenhouse operation. Therefore, school administrators and teachers of agriculture are becoming more aware of the necessity of providing the opportunity for practice. They are requesting help in designing and developing greenhouses and related facilities for teaching horticulture and plant science.

GREENHOUSE USE

The school greenhouse should be used as a student laboratory rather than as a commercial house. It should be used to provide occupational experience through both individual and group projects in general greenhouse operation and in the production of plants considered important in the specific course of study for the area.

The greenhouse should be adapted to the needs in a local program. It will make possible:

- Propagation of plants from seed or preparation of seedflats
- Propagation of plants from softwood cuttings
- Propagation of nursery stock from hardwood cuttings
- Production of the following crops:
  - Bedding plants—petunias, pansies, ageratum, etc.
  - Cut flowers—chrysanthemums, snapdragons, carnations, etc.
  - Potted plants—chrysanthemums, poinsettias, geraniums, etc.
  - Forcing vegetables—tomatoes, lettuce, cucumbers, etc.

In addition to the area for production, which includes both benches and ground beds, limited space is available for storage, demonstration, preparation of plant-growing media, and for potting plants. To the extent these operations can be transferred to adjacent existing or newly constructed areas, the use of the greenhouse can be expanded.

CONSTRUCTION

STRUCTURAL FEATURES

The basic structural requirement of a greenhouse is to provide support for the glazing at a low cost, with the least framing so that shading is minimized. A rigid frame, as in the University of Kentucky designs, meets this requirement. Long maintenance-free life is assured by using pressure-treated lumber. This design is adaptable to commercial or farm fabrication. It can serve the functional needs of a school program and also as a model for potential greenhouse operators in the school-patronage area.

FOUNDATION

The foundation must be capable of withstanding high lateral loads. A solid concrete foundation with minimal steel reinforcement should be used in the school greenhouse. (Piers spaced four feet apart may be used in commercial houses.)

GLAZING

Rigid corrugated greenhouse-grade plastic (fiberglass) is recommended for the covering. It is almost equal to glass in light transmission and is much more resistant to damage. These materials are permanent, but can require resurfacing with a liquid varnish-like material every five years. Light does not pass directly through this material but is diffused. This results in a soft, relatively glare-free light of uniform intensity. The diffusing property keeps one from seeing through the plastic; therefore, students are not distracted by outside activity. Neither can persons outside observe activities in the greenhouse. An inner liner of film plastic is recommended.

ENVIRONMENTAL CONTROL

Fully automatic environment-control equipment such as the modulated damper system developed at the University of Kentucky (AES Bulletin 275A) should be used. The system must not only provide for heating during cold weather, but also for control of excessive temperature rise during the sunny days. This can be most easily accomplished with positive fan ventilation.

ESTIMATED MATERIAL COSTS 28' x 48' GREENHOUSE, EXCLUDING BENCHES AND STORAGE UNITS

Structural Material	
Lumber pressure treated with water-borne preservative at $0.20/bd.-ft.	$ 240.00
Exterior plywood, 3/8"	40.00
Wire bracing, nails, door hardware, glue	10.00
Exterior white paint, 3 gallon	18.00
Rigid corrugated fiberglass	450.00
UV Polyethylene 4 mil film	64.00
Concrete	342.00
Reinforcing steel	20.00
Sub-total	$1184.00
Cost per sq. ft.	$ .88
Ventilation System	
Fan and motor	$ 85.00
Dampers, 3'0" x 4'0" (two required)	120.00
Anti-back draft shutter	24.00
Damper motor, thermostat, damper linkage	100.00
Sub-total	$ 329.00
Cost per sq. ft.	$ .24
Heating System	
LP Gas forced hot air furnace	$ 250.00
24 hour electric time clock	12.00
Thermostat	10.00
Heat duct, gas pressure regulator, gas piping, vent pipe, vent cap	40.00
Sub-total	$ 312.00
Cost per sq. ft.	$ .23
Site improvement, including running of services to site, basic electric wiring	$ 200.00
Total	$2025.00
Contingency (20%)	405.00
	$2430.00
Cost per sq. ft.	$ 1.81

FLOOR PLAN

STORAGE

The suggested floor plan provides space for essential greenhouse operations. Three soil-storage bins are provided. Soil should be sterilized outside the greenhouse, brought in as required, and stored in the bins. Artificial soil media such as peat and soil mixes could be accommodated. These storage units should be limited in height to reduce shading. A partition between soil-storage and plant-preparation areas is not required. If one is used, it should be made of transparent material.

Storage must be provided for chemicals, pots, flats, fertilizer, equipment, and other miscellaneous items. Many of these materials take considerable space and storage for them should be provided, preferably outside the greenhouse.

SOIL PREPARATION

The benches in the plant- and soil-preparation area should be made of solid material which will tolerate alternate wetting and drying. Exterior plywood, asbestos, or heavy galvanized sheet metal is recommended. Well-lighted benches should be sloped slightly to the front so that moisture will not stand on them. Two convenient electric outlets and floor drain should be provided in this area.

GROUND BEDS

To minimize shading problems, the ground beds are on the south side and the benches on the north. A variety of crops such as lettuce, tomatoes, cut flowers, field crops, and ornamentals could be grown in this area. Normally, the rows would run across the house and watering can be achieved by furrow watering between alternate rows of plants. Exterior ground surface should be graded so that surface water is directed away to prevent the contamination of the soil in the greenhouse. To maintain adequate levels of fertility and organic matter, soil in the ground bed should be tested and treated at least annually. Greenhouse soil tests are performed by the University of Kentucky, Department of Regulatory Services. The ground bed should be sterilized annually.

BENCHES

At least one-half of the benches should be the solid type. The remainder could be the open type. The solid benches can be filled with soil and used as bench culture for cut flowers and propagating. Pot production can also be done on these benches. The open benches are only adaptable to pot production. This type of bench, however, permits excellent air circulation among the pots and is relatively inexpensive. Sketches of the two types of benches are shown.

Bench width is approximately 3 feet. End benches are 2 feet. Wider benches could be provided, but the narrower ones are more convenient and the larger number of benches increases the flexibility. Bench height should be 24 inches to 36 inches. The aisle between benches should be a minimum of 18 inches—24 inches being more desirable.

Since plants are injured by most preservatives containing oil, lumber pressure treated with one of the water-borne salt preservatives should be used. Such material must be redried prior to use.

The propagating bench must be equipped with a misting system. This can easily be provided with inexpensive misting nozzles, an electric solenoid water valve, and a time clock. To prevent spray from wetting aisles and other production areas, clear plastic film can be used to erect walls around the propagating bed area and to restrict the mist to that area.

VIRGINIA

Information from 738 employers in agriculture, construction, manufacturing, transportation, communication, wholesale and retail trade, finance, insurance, real estate, and the public utilities was gathered to obtain employment data which had implications for post secondary education. Employment increased 84,207 from 1950 to 1960 in Northern Virginia. Employers' estimates indicated an employment increase of 90 percent in fields requiring post secondary education. Estimated annual needs for 32 occupations range from 1599 automotive technicians to 26 air-conditioning-refrigeration designers. Employers were also asked to furnish information for 32 occupations concerning educational requirements in mathematics, chemistry, physics, biology, drafting, English, accounting, typing, shorthand, data processing, electronics, and instrumentation. These responses are given. (EM)

ACKNOWLEDGEMENTS

Appreciation should be expressed to all those businesses and industries which participated in the survey. Particular attention should be directed to those owners, managers and personnel directors who gave so generously of their time in the interests of improving educational opportunities for the area.

CHAPTER I

THE SURVEY

A study of employment needs in technical occupations in Northern Virginia was authorized by the State Board of Technical Education, at the request of the Northern Virginia Technical College, to begin in February, 1966.

Also to be included in related studies were the development of curricula and course descriptions for those technical fields which were of highest priority to be added to the existing college program. The college began with 7 curricula in September, 1965. Recommended facilities and space requirements for the curricula were also to be set forth where special facilities were necessary.

This report, plus two other reports and a companion exhibit, are the culmination of that study. The recommendations on curricula and facilities are contained in the two companion reports. It is anticipated that adaptations of these curriculum designs can be made for other technical programs in other colleges developed by the State in the future.

A Study of Employer Needs

The detailed study of employers' needs is designed to provide information in the following areas:

1. The relative need by employers for various occupations, to help in establishing priorities for adding future curricula in Northern Virginia.
2. A reliable estimate of the number of students who should be

prepared in each of the technical fields now being offered or being planned currently for offering in the Northern Virginia college. A previous study of anticipated demand of students for enrollment in various curricula, conducted by the consultants, gave evidence of those curricula which could be offered successfully with reasonable expectations of adequate enrollment. This present study has as one purpose, the further verification of curricula which can be offered successfully with adequate employment demand to absorb the graduates.

3. A third purpose of the study was to get additional data on the specific course subjects employers require for various occupations, and what course content they expect employees to have in these occupations. Information on these subjects is contained in this study.

4. A valuable additional result of the study is the acquisition of lists of employers willing to participate in advisory committees on the various technical subject fields, thereby assisting the college in both the development and the updating of their curriculum offerings in these fields, and the development of a list of employers willing to provide work experience for students in these occupations.

Approach to the Survey

Because of the vast numbers of employers in the Northern Virginia region served by the Northern Virginia Technical College, it was impossible to interview or survey every employer. A list of all employers having four or more

employees was used as the basis of the survey, and this list was divided into two parts. The consultants contacted every employer with more than 50 employees. In addition, a sample of all other employers in the basic list was drawn and every employer in this sample was contacted for information. Information derived from contacts with the sample list was statistically expanded to represent the total number of employers involved, and these results were then combined with the results from the survey of larger employers to give estimated totals for the entire region.

The survey covered employers in the widely diverse fields of agriculture, construction, manufacturing, transportation, communication, electric, gas, and sanitary services, wholesale and retail trade, finance, insurance and real estate. The important research and development industry in Northern Virginia was carefully studied. National, State and local government agencies were not included in the survey.

In all, 738 employers were asked to participate in the study of employment needs in Northern Virginia. Within the total number of employers surveyed, virtually all types of technical and other occupations requiring post-high school training are involved.

CHAPTER II

URGENTLY NEEDED OCCUPATIONS

The increase in number of employees between 1950 and 1960 in each of the counties and cities comprising the Northern Virginia college district is shown in Table 1. Estimates derived from the survey show that increases in technically-trained occupations will be much more rapid than the increase rates shown in Table 1.

The employers were asked to estimate the number of employees they would need in technical fields five years from now. They estimated an increase of 90 percent in these fields requiring post-high school education.

Numbers Needed Annually

Based upon the responses of the employing organizations surveyed, the estimated number of persons needed to be employed in such occupations, either as new or replacement workers, during the next 12 months has been derived. These requirements for new or replacement employees during the coming year are shown in Table 2 for occupations requiring 25 or more new employees.

Every contact with automobile dealers has revealed what amounts to a starvation in the supply of qualified people to do sophisticated diagnosis of automobile problems and to handle such repairs. The automotive program now being installed at the Northern Virginia college thus apparently will have no problem in placing its trainees. The problem, more likely, will lie in expanding the program sufficiently to begin to scratch the surface of the need.

Table 1

EMPLOYMENT AND AMOUNT OF INCREASE

BY LOCALITY IN NORTHERN VIRGINIA, 1950-1960*

Locality	Employment 1950	Employment 1960	Increase
Alexandria	26,373	36,776	10,403

Occupation	Estimated Number of Persons Needed
Programmer, Data Processing	87
Merchandising Manager	80
Dental Assistant	48
News Broadcaster	40
Communications Technician	30
Air Conditioning/Refrigerating Designer	26

Other top priorities revealed, in terms of numbers needed, are advanced secretarial trainees, sales managers, electronics technicians, and draftsmen and designers. Curricula in all of these fields are being offered by the Northern Virginia College. Relative needs for expansion into other areas can be estimated with the help of the data in Table 2.

The estimated overall need for new workers in the area by broad occupational categories, is shown in Table 3. These figures, drawn from census data, indicate that the proportion of all new workers which the college could expect to educate still would be small under any existing plans.

Estimated Number of Employers Needing Technical Employees

From the interview data, an estimate has been made of the total number of employers who would be in the market for students trained in the various technical fields. The number of employers involved can give a better idea of the scope of placement opportunities, work experience opportunities, and the complexity of contacts between the employers in these occupational groups and the college.

The estimated number of employers needing new employees in fields requiring training beyond high school is shown in Table 4. The estimated number of employers by occupation is shown where the total number is 20 or more.

In the exhibit document which accompanies the report, samples of responses from interviews showing the technical occupations needed by employers are included. This exhibit serves to illustrate the fact that the typical employer may require various technical occupations in his one business. Of course, as the business grows larger, the range of employees required is likely to increase.

Table 3

OCCUPATIONAL TRENDS AND ESTIMATES OF NEW WORKERS

NEEDED IN SELECTED OCCUPATIONS, NORTHERN VIRGINIA

Occupation	Actual Employment 1960	Estimated Employment 1965	Estimated Annual Growth	Replacements Needed Annually	Total New Workers Needed Annually

CHAPTER III

INSTRUCTIONAL FIELDS REQUIRED BY EMPLOYERS

One important question to be answered by the survey was just how many employers actually require certain subject fields to be taught their employees. What is included, in the employers' minds, in the education of a draftsman? Of a mechanical technician? Help in answering these questions can be found in the survey results.

Subjects Wanted and Percentages of Employers Wanting Each

The percentages of employers requiring various subject fields within the preparation of the technicians whom they expect to employ are shown in Table 5. Subjects under each occupational area are ranked according to the percentage of employers requiring them.

It is interesting to note that, while English is considered important by a substantial number of employers in almost every category, knowledge of mathematics ranks substantially higher, on the average, throughout most of the employment categories.

What the actual content of the math course should be for various occupations requires, of course, more careful analysis. Greater detail on the content expected in subject fields by occupation is shown in the next chapter.

Instrumentation	40.0
English	40.0
Blue Print Reading	20.0

CHAPTER IV

COURSE CONTENT REQUIRED

On the pages which follow, the specific requirements in terms of course content within the desired courses for each occupation, as revealed by employers interviewed, are shown.

Each occupational field, among those most widely in demand, is shown on a separate page. On that page, the subject areas desired by employers are indicated. Then, for each subject area, a summary of the course content as described by employers is shown.

Since these descriptions by occupational field represent the needs of all those employers requiring accountants, for example, the course content described represents a composite of the course content needs set forth. Therefore, some employers may require less than others.

An example may be found in the field of advanced secretarial training. The secretaries in an electronics firm should know basic electronics terminology, which is shown on the page. Naturally, not every secretary needs to know this. A secretary in a research and development organization may be required to know Greek alphabet symbols, as shown. Many others would not need such information. A secretary in an architectural firm might need to know vari-typing, which is shown on the form.

It therefore seems reasonable to the consultants that a good secretarial course would include not only the general requirements expected of all secretaries, but a survey, at some point in the curriculum, of the types of special

knowledge which the secretaries may be required to have in various specialized employment situations.

A similar approach would seem to be a reasonable part of preparation for work in other occupational fields.

While instrumentation, as a special field of electronics, is a sophisticated technology involving fine measurements, the term on the following pages has been used variously by the employers in various fields. To employers in the building construction business, instrumentation may have meant basic transit work, as shown on that page. For secretaries, it is the basic knowledge of terminology. In civil engineering, use of the tools of surveying is shown under the title of instrumentation. This is why it is well to analyze the specific meaning of a course in the minds of the employers in each occupational field.

URGENTLY NEEDED OCCUPATIONS,

NORTHERN VIRGINIA,

RELATED DATA

Occupation Accounting

For this occupation the worker should know

		Yes	No		Describe the content briefly:
1.	Math	X		1.	Fundamentals of Business Mathematics - Basic mathematics for accounting, statistics, finance, etc. Percentages and ratios, logarithms, interest and discount, investment accumulation, annuities, amortization, capitalization, sinking funds, interdependable variables, etc.
2.	Chemistry		X	2.	
3.	Physics		X	3.	
4.	Biology		X	4.	
5.	Drafting		X	5.	
6.	English	X		6.	Advanced training in grammar and composition
7.	Accounting	X		7.	Introductory, intermediate and advanced (consolidations branch accounting, mergers, costs, budgets, system design and installation).
8.	Typing		X	8.	
9.	Shorthand		X	9.	
10.	Data Processing	X		10.	Particular emphasis on payroll and other accounting applications
11.	Electronics		X	11.	
12.	Instrumentation		X	12.	
13.	Others Taxes			13.	Federal and state income, Social Security, property sales, etc.
14.	Internal Auditing (for control)			14.	Procedures used to verify accounts and financial statements and extent to which policies and procedures in general are being carried out as intended. Preparation of complete audit working papers of an extended audit problem up to and including audit report.
15.				15.	
16.	Business Law			16.	Contracts, Agency, Negotiable Instruments, Business Organization (partnerships, corporations, Trusts), Bailments, Sales, Property, Bankruptcy, etc. Legal concepts and functions. Court systems.

Occupation : Air Conditioning/Regrigeration Designer

For this occupation the worker should know

	Yes	No		Describe the content briefly:
1. Math	X		1.	Technical Math
2. Chemistry		X	2.	
3. Physics	X		3.	
4. Biology		X	4.	
5. Drafting	X		5.	Detail assembly and layout drafting
6. English	X		6.	Technical report writing
7. Accounting		X	7.	
8. Typing	X		8.	
9. Shorthand		X	9.	
10. Data Processing		X	10.	
11. Electronics	X		11.	Basic electrical - AC & DC
12. Instrumentation	X		12.	Automatic Controls
13. Others Building Construction			13.	Basic knowledge
14. Mechanical Design			14.	Basic knowledge
15. Refrigeration theory			15.	Basic knowledge
16.			16.	

Occupation : Air Conditioning/Refrigeration Technician

For this occupation the worker should know

		Yes	No		Describe the content briefly:
1.	Math	X		1.	Technical Math
2.	Chemistry		X	2.	
3.	Physics	X		3.	Basic principles
4.	Biology			4.	
5.	Drafting	X		5.	Layout and assembly - blue print reading
6.	English	X		6.	Grammar and composition
7.	Accounting		X	7.	
8.	Typing		X	8.	
9.	Shorthand		X	9.	
10.	Data Processing		X	10.	
11.	Electronics	X		11.	Basic knowledge
12.	Instrumentation	X		12.	Automatic controls
13.	Others Refrigeration theory			13.	
14.	Heat transform theory			14.	
15.				15.	
16.				16.	

Occupation : Automotive Technician

For this occupation the worker should know

		Yes	No		Describe the content briefly:
1.	Math	X		1.	Technical Math
2.	Chemistry	X		2.	Knowledge of fuels and lubricants
3.	Physics	X		3.	Basic laws of heat and energy as applicable
4.	Biology		X	4.	
5.	Drafting	X		5.	Blue print reading
6.	English	X		6.	Grammar and composition
7.	Accounting		X	7.	
8.	Typing		X	8.	
9.	Shorthand		X	9.	
10.	Data Processing		X	10.	
11.	Electronics	X		11.	Electrical circuits
12.	Instrumentation	X		12.	Hand and power tools and their use
13.	Others Internal combustion motors			13.	Complete knowledge of automobiles
14.	Chart Analysis			14.	
15.				15.	
16.				16.	

Occupation : Bank Executive

For this occupation the worker should know

		Yes	No		Describe the content briefly:
1.	Math	X		1.	Business Math - Aptitude for figures
2.	Chemistry		X	2.	
3.	Physics		X	3.	
4.	Biology		X	4.	
5.	Drafting		X	5.	
6.	English	X		6.	Ability to speak well with customers
7.	Accounting	X		7.	Knowledge of financial statements
8.	Typing	X		8.	Helpful
9.	Shorthand		X	9.	
10.	Data Processing	X		10.	Basic knowledge
11.	Electronics			11.	
12.	Instrumentation			12.	
13.	Others Currency			13.	Familiarity with domestic and foreign currency
14.				14.	Good personality and pleasing appearance
15.	Loans			15.	Knowledge of FHA and VA loans
16.	Business Law			16.	

Occupation : Bookkeeper

For this occupation the worker should know

		Yes	No		Describe the content briefly:
1.	Math	X		1.	Business Math - knowledge of statistics and finance, etc.
2.	Chemistry		X	2.	
3.	Physics		X	3.	
4.	Biology		X	4.	
5.	Drafting		X	5.	
6.	English	X		6.	Advanced training in grammar and composition
7.	Accounting	X		7.	Basic knowledge
8.	Typing	X		8.	Basic
9.	Shorthand	X		9.	Basic
10.	Data Processing	X		10.	Application to payroll and other basic bookkeeping systems
11.	Electronics		X	11.	
12.	Instrumentation		X	12.	
13.	Others Business Law			13.	
14.				14.	
15.				15.	
16.				16.	

Occupation : Building Construction Technician

For this occupation the worker should know

		Yes	No		Describe the content briefly:
1.	Math	X		1.	Basic - Algebra, Geometry & Trigonometry Cost estimating
2.	Chemistry		X	2.	
3.	Physics		X	3.	
4.	Biology		X	4.	
5.	Drafting	X		5.	Basic architectural and mechanical - blue print reading
6.	English	X		6.	Business English
7.	Accounting	X		7.	How to cost material
8.	Typing		X	8.	
9.	Shorthand		X	9.	
10.	Data Processing		X	10.	
11.	Electronics		X	11.	
12.	Instrumentation	X		12.	Basic transit work
13.	Others			13.	
14.				14.	
15.				15.	
16.				16.	

Occupation : Civil Engineering, Technician

For this occupation the worker should know

	Yes	No	Describe the content briefly:
1. Math	X		1. Algebra - Trigonometry
2. Chemistry	X		2. General chemistry
3. Physics	X		3. General physics
4. Biology		X	4.
5. Drafting	X		5. Blue print reading - structural design
6. English	X		6. Technical English - report writing
7. Accounting	X		7. Basic
8. Typing		X	8.
9. Shorthand		X	9.
10. Data Processing	X		10. Knowledge of capabilities
11. Electronics	X		11.
12. Instrumentation	X		12. Use of transit -level and basic instrumentation
13. Others Strength of Materials			13. Basic knowledge of materials desirable
14.			14.
15.			15.
16.			16.

Occupation : Clerk-typist

For this occupation the worker should know

		Yes	No		Describe the content briefly:
1.	Math	X		1.	Business Math
2.	Chemistry		X	2.	
3.	Physics		X	3.	
4.	Biology		X	4.	
5.	Drafting		X	5.	
6.	English	X		6.	Business English - necessary
7.	Accounting	X		7.	Helpful
8.	Typing	X		8.	Necessary
9.	Shorthand	X		9.	Desirable
10.	Data Processing	X		10.	Key punch operation
11.	Electronics		X	11.	
12.	Instrumentation	X		12.	Desk calculators
13.	Others			13.	
14.				14.	
15.				15.	
16.				16.	

Occupation : Commercial Artist

For this occupation the worker should know

		Yes	No		Describe the content briefly:
1.	Math	X		1.	Business Math with some Algebra
2.	Chemistry		X	2.	
3.	Physics		X	3.	
4.	Biology		X	4.	
5.	Drafting	X		5.	Technical and figure illustrations - freehand drawing
6.	English	X		6.	
7.	Accounting		X	7.	
8.	Typing		X	8.	
9.	Shorthand		X	9.	
10.	Data Processing		X	10.	
11.	Electronics		X	11.	
12.	Instrumentation		X	12.	
13.	Others Layout & Design			13.	
14.	Basic Printing Methods			14.	
15.				15.	
16.				16.	

Occupation : Communications Technician

For this occupation the worker should know

		Yes	No		Describe the content briefly:
1.	Math	X		1.	Algebra, trigonometry, some Calculus
2.	Chemistry		X	2.	
3.	Physics	X		3.	Basic electrical and mechanical principles
4.	Biology		X	4.	
5.	Drafting	X		5.	Read drawings and plot charts - simple sketches
6.	English	X		6.	Composition and grammar - technical report writing
7.	Accounting		X	7.	
8.	Typing		X	8.	
9.	Shorthand		X	9.	
10.	Data Processing	X		10.	Basic knowledge of processes
11.	Electronics	X		11.	See below
12.	Instrumentation	X		12.	Electronic instrumentation desirable
13.	Others Electronics			13.	Basic electricity - AC & DC theory Basic electronics - vacuum tube, transistor, circuit theory, schematic drawing reading, Class II radio license
14.				14.	
15.				15.	
16.				16.	

Occupation : Data Processing Machine Operator

For this occupation the worker should know

	Yes	No		Describe the content briefly:
1. Math	X		1.	General math ability required to advance in field
2. Chemistry		X	2.	
3. Physics		X	3.	
4. Biology		X	4.	
5. Drafting		X	5.	
6. English	X		6.	Enough English knowledge so instructions can be followed and can communicate with personnel
7. Accounting	X		7.	Principles of accounting desirable
8. Typing		X	8.	
9. Shorthand		X	9.	
10. Data Processing	X		10.	Have basic wiring knowledge of E.A.M. equipment and ability to operate machines
11. Electronics	X		11.	Knowledge of computer operations
12. Instrumentation		X	12.	
13. Others			13.	
14.			14.	
15.			15.	
16.			16.	

Occupation : Data Processing Programmer

For this occupation the worker should know

	Yes	No		Describe the content briefly:
1. Math	X			Equal to 2 years college math
2. Chemistry		X	2.	
3. Physics	X		3.	
4. Biology		X	4.	
5. Drafting	X		5.	Ability to abstract info. from B/Ps and Schematics
6. English	X		6.	Equal to 1 year college Technical writing and language
7. Accounting	X		7.	Application of EAM equipment to accounting systems
8. Typing		X	8.	
9. Shorthand		X	9.	
10. Data Processing	X		10.	Programming, tab machine - business application and languages - knowledge of computer capability
11. Electronics		X	11.	
12. Instrumentation		X	12.	
13. Others			13.	Ability to recognize and solve problems and properly document procedures
14.			14.	
15.			15.	
16.			16.	

Occupation : Dental Assistant

For this occupation the worker should know

	Yes	No	Describe the content briefly:
1. Math	X		1. College math, at least 1 year
2. Chemistry	X		2. 1 or 2 yr. chemistry with laboratory
3. Physics	X		3. 1 yr. physics with laboratory
4. Biology	X		4. 1 yr. biology with laboratory
5. Drafting		X	5.
6. English		X	6.
7. Accounting	X		7. Basic
8. Typing	X		8. Basic
9. Shorthand		X	9.
10. Data Processing		X	10.
11. Electronics		X	11.
12. Instrumentation	X		12.
13. Others Dental anatomy			13.
14. Physical Properties of Dental Materials			14.
15. Physiology			15.
16. Pathology			16.
17. X-ray techniques			

Occupation : Drafting & Machine Design

For this occupation the worker should know

		Yes	No		Describe the content briefly:
1.	Math	X		1.	Technical Descriptive Geometry, College Math., Analytic Geometry, College Algebra
2.	Chemistry		X	2.	
3.	Physics	X		3.	Basic Physics Principles
4.	Biology		X	4.	
5.	Drafting	X		5.	Detail Drafting, Assembly Drafting, Layout Drafting, Machine Design
6.	English	X		6.	Composition, Report Writing (technical)
7.	Accounting		X	7.	
8.	Typing		X	8.	
9.	Shorthand		X	9.	
10.	Data Processing		X	10.	Basic knowledge helpful
11.	Electronics	X		11.	Basic Electronics, Basic Electrical Engineering, AC & DC
12.	Instrumentation		X	12.	
13.	Others Machine Shop Practices			13.	Lathe, Drill press, milling machine, shaper, planer, spinning equipment, production equipment
14.	Engineering Mechanics			14.	Principles employed to solve Mechanics problems
15.	Materials			15.	Mechanics of Materials (stress, strain, etc.)
16.				16.	

Occupation : Electrical Technician

For this occupation the worker should know

		Yes	No		Describe the content briefly:
1.	Math	X		1.	Algebra, Trigonometry, Analytical Geometry and Calculus, Calculus
2.	Chemistry		X	2.	
3.	Physics	X		3.	General Physics with physics laboratory
4.	Biology		X	4.	
5.	Drafting	X		5.	Engineering Drawing - emphasis on blue print reading
6.	English	X		6.	English composition, technical English
7.	Accounting		X	7.	
8.	Typing		X	8.	
9.	Shorthand		X	9.	
10.	Data Processing		X	10.	
11.	Electronics	X		11.	Basic to complex including applications. Microwaves, Semiconductors
12.	Instrumentation	X		12.	Measurements, Instrumentation, Industrial Controls
13.	Others Electrical Fundamentals			13.	Electrical shop, electrical circuits, AC & DC machinery, associated laboratories electrical power and transmission
14.				14.	
15.				15.	
16.				16.	

Occupation : Electronics Technician

For this occupation the worker should know

		Yes	No		Describe the content briefly:
1.	Math	X		1.	Equal to 2 years college math - algebra, geometry, trigonometry
2.	Chemistry	X		2.	Basic 1st year college chemistry
3.	Physics	X		3.	2 years college physics - mechanics, electricity and magnetism
4.	Biology		X	4.	
5.	Drafting	X		5.	Basic 1st year college drafting Ability to read B/Ps and Schematics
6.	English	X		6.	Technical Report writing
7.	Accounting		X	7.	
8.	Typing		X	8.	
9.	Shorthand		X	9.	
10.	Data Processing	X		10.	Fundamentals of computer programming - Fortran
11.	Electronics	X		11.	2 years Electronics - DC circuits, AC circuits, AC machines, pulse & digital circuits
12.	Instrumentation	X		12.	1 year Test Equipment, lab measurement techniques
13.	Others Circuit theory			13.	
14.	Knowledge of soldering and welding techniques			14.	
15.				15.	
16.				16.	

Occupation : Food Administrator

For this occupation the worker should know

		Yes	No		Describe the content briefly:
1.	Math	X		1.	Business Math
2.	Chemistry	X		2.	Organic & inorganic or food chemistry
3.	Physics		X	3.	
4.	Biology	X		4.	Basic
5.	Drafting		X	5.	
6.	English			6.	
7.	Accounting	X		7.	Basic bookkeeping, ledger - cost accounting - inventory control
8.	Typing		X	8.	
9.	Shorthand		X	9.	
10.	Data Processing	X		10.	Basic knowledge
11.	Electronics		X	11.	
12.	Instrumentation			12.	
13.	Others Food production - Preparation			13.	Techniques of food preparation, quality control, sanitation
14.	Business Administration			14.	Personnel management - business law
15.	Public Relations			15.	
16.	Labor Relations			16.	Unions, union relations, labor laws, grievance handling, recruiting

Occupation : General Business

For this occupation the worker should know

		Yes	No		Describe the content briefly:
1.	Math	X		1.	Business Math - Statistics
2.	Chemistry		X	2.	
3.	Physics		X	3.	
4.	Biology		X	4.	
5.	Drafting		X	5.	
6.	English	X		6.	Grammar and Composition
7.	Accounting			7.	Knowledge of internal auditing for control
8.	Typing	X		8.	Helpful
9.	Shorthand		X	9.	
10.	Data Processing	X		10.	Basic fundamentals of computer sciences
11.	Electronics		X	11.	
12.	Instrumentation		X	12.	
13.	Others Economics			13.	Basics
14.	Psychology			14.	
15.	Public Speaking			15.	
16.	Business Law			16.	

Occupation : Hotel-Motel Manager

For this occupation the worker should know

	Yes	No	Describe the content briefly:
1. Math	X		1. Business Math
2. Chemistry		X	2.
3. Physics		X	3.
4. Biology		X	4.
5. Drafting	X		5. Minimum for remodeling
6. English	X		6. Meeting public
7. Accounting	X		7. Cost accounting and knowledge of financial statements
8. Typing	X		8. Helpful
9. Shorthand		X	9.
10. Data Processing	X		10. Basic knowledge
11. Electronics		X	11.
12. Instrumentation		X	12.
13. Others Business Law			13.
14. Food Services			14.
15. Restaurant Management			15.
16. Public Relations			16.

Occupation : Insurance Agent

For this occupation the worker should know

		Yes	No		Describe the content briefly:
1.	Math	X		1.	Working knowledge - through Algebra
2.	Chemistry		X	2.	
3.	Physics		X	3.	
4.	Biology		X	4.	
5.	Drafting		X	5.	
6.	English	X		6.	Business English
7.	Accounting	X		7.	Basic
8.	Typing		X	8.	Helpful
9.	Shorthand		X	9.	
10.	Data Processing		X	10.	
11.	Electronics		X	11.	
12.	Instrumentation		X	12.	
13.	Others Public Speaking			13.	Group Discussions
14.	Business Law			14.	
15.	Ethics			15.	
16.	Insurance			16.	Fundamentals of all types of insurance

Occupation : Key Punch Operator - Data Processing

For this occupation the worker should know

		Yes	No		Describe the content briefly:
1.	Math	X		1.	Business Math
2.	Chemistry		X	2.	
3.	Physics		X	3.	
4.	Biology		X	4.	
5.	Drafting		X	5.	
6.	English	X		6.	Business English
7.	Accounting	X		7.	Basic Principles helpful
8.	Typing	X		8.	Desirable
9.	Shorthand		X	9.	
10.	Data Processing	X		10.	Knowledge of machine capability and other data processing machines
11.	Electronics			11.	
12.	Instrumentation			12.	
13.	Others			13.	
14.				14.	
15.				15.	
16.				16.	

Occupation : Laboratory Technician

For this occupation the worker should know

	Yes	No		Describe the content briefly:
1. Math	X		1.	Algebra and Trigonometry
2. Chemistry	X		2.	Basic laboratory technical and fundamental understanding
3. Physics	X		3.	
4. Biology		X	4.	
5. Drafting		X	5.	
6. English	X		6.	Business English - technical report writing
7. Accounting		X	7.	
8. Typing		X	8.	
9. Shorthand		X	9.	
10. Data Processing	X		10.	Basic knowledge of processes
11. Electronics	X		11.	Basic knowledge of electrical circuits
12. Instrumentation	X		12.	Measurements, basic instrumentation
13. Others			13.	
14.			14.	
15.			15.	
16.			16.	

Occupation : Mechanical Technician

For this occupation the worker should know

	Yes	No		Describe the content briefly:
1. Math	X		1.	College math
2. Chemistry	X		2.	Metal testing
3. Physics	X		3.	Strength of materials
4. Biology		X	4.	
5. Drafting	X		5.	Engineering drawing - emphasis on blue print reading
6. English	X		6.	Technical report writing
7. Accounting		X	7.	
8. Typing		X	8.	
9. Shorthand		X	9.	
10. Data Processing		X	10.	
11. Electronics		X	11.	
12. Instrumentation	X		12.	Precision tools and gauges
13. Others Diesel tech.			13.	Engines, power transmission units
14. Welding tech.			14.	Hand and automatic
15. Hydraulics Systems			15.	
16. Heavy Machinery			16.	Fixed and mobile

Occupation : Merchandising Manager

For this occupation the worker should know

		Yes	No		Describe the content briefly:
1.	Math	X		1.	Arithmetic, Algebra, Geometry
2.	Chemistry		X	2.	
3.	Physics		X	3.	
4.	Biology		X	4.	
5.	Drafting	X		5.	Freehand for display
6.	English	X		6.	Grammar, composition
7.	Accounting	X		7.	Elementary course
8.	Typing		X	8.	
9.	Shorthand		X	9.	
10.	Data Processing	X		10.	Knowledge of capabilities
11.	Electronics		X	11.	
12.	Instrumentation		X	12.	
13.	Others Marketing			13.	Basic principles
14.	Statistics			14.	Basic principles
15.	Personnel Management			15.	Personnel Relations
16.	Fashion Designing			16.	

Occupation : Nursing

For this occupation the worker should know

		Yes	No		Describe the content briefly:
1.	Math	X		1.	Thru Algebra
2.	Chemistry	X		2.	Basic nursing course
3.	Physics	X		3.	Basic nursing course
4.	Biology	X		4.	Basic nursing course
5.	Drafting		X	5.	
6.	English	X		6.	Grammar, composition
7.	Accounting		X	7.	
8.	Typing	X		8.	Helpful
9.	Shorthand		X	9.	
10.	Data Processing		X	10.	
11.	Electronics		X	11.	
12.	Instrumentation	X		12.	
13.	Others Anatomy			13.	
14.	Nursing Arts			14.	Two semesters
15.	Physiology			15.	
16.	Sociology			16.	

Occupation : Radio News Broadcaster

For this occupation the worker should know

		Yes	No		Describe the content briefly:
1.	Math	X		1.	Basic knowledge
2.	Chemistry		X	2.	Knowledge would be desirable

CHAPTER V

EMPLOYER PARTICIPATION IN THE COMMUNITY COLLEGE PROGRAM

Employers, when interviewed, were asked about their willingness to participate in the program of the college, either through work on curriculum advisory committees or through providing work experience for students. A substantial number of employers responded cordially and affirmatively in both areas.

Advisory Committees

Not all employers were asked if they would be willing to serve on advisory committees. Not all who were asked responded. But the question was asked particularly to employers in occupations related to the technical fields considered in this report. Among those who were asked if they would participate, 55 percent said "yes." This tends to indicate that, in the development of advisory committees, at least half of the employers in the affected fields will be willing to participate on such committees. The names and addresses of those who were asked and who did respond affirmatively to the question of serving on a curriculum advisory committee are shown in the companion exhibit which accompanies the report.

Work Experience

Among employers who had businesses specializing in fields relating to technical occupations to be offered by the college, a number responded to the

question of their willingness to provide work experience for students at the college.

Of those asked about their willingness to provide such experience, 40 percent said they would provide on-the-job work experience for a few hours a week to students. Nineteen percent said no, and 41 percent indicated that they would not be able to make a decision without further facts for consideration. The probability is that many of these employers might also participate.

Names and addresses of those employers willing to participate in such a program are shown in the companion exhibit to this report.

*GRADUATE SURVEYS; GRADUATE STUDY; *TEACHER EDUCATION; *TRADE AND INDUSTRIAL EDUCATION; *INDUSTRIAL ARTS; TECHNICAL EDUCATION; *TEACHER SALARIES; SALARIES; QUESTIONNAIRES
FERRIS STATE COLLEGE

Questionnaires were sent to 50 persons who had graduated between March 1961 and January 1966. Responses, obtained from 46, indicated: (1) 2 were in graduate school, (2) 13 were teaching in senior high, (3) 2 were teaching in junior high, (4) 4 were teaching in post high schools, (5) 2 were teaching in corrective institutions, (6) 20 were employed in industry, and (7) 1 was in the United States Air Force. Better salaries were listed by 14 persons as the reason for working in industry. Graduate study at the Master's level was being done by 12, and 2 were working beyond the Master's level. Graduate study was planned by seven others. The salary range for the group was from $5,000 to over $12,000. The modal salary was $8,200 for non-teachers and $6,658 for teachers. However, when adjusted by contract length the difference was not great. Conclusions were: (1) Graduates exhibit a professional interest in teaching, (2) Non-teachers felt work experience was a necessary part of their teacher preparation, (3) Teachers are interested in graduate study for professional growth, (4) Most teachers are high school vocational teachers, and (5) Post secondary and college level teaching was the future employment choice for both groups. Questionnaires, comments, and graduates' names, addresses, and occupations are included. (EM)

ACKNOWLEDGEMENT

The writer wishes to express his gratitude and appreciation to all who have assisted in the conducting of this study and especially to Kenneth Masck, a student in Trade-Technical Education who assisted in gathering and categorizing the data.

Appreciation is expressed to the staff of the Department of Education of Ferris State College who provided valuable assistance including: Dr. Chris Buethe who reviewed the data and made suggestions concerning the handling and reporting of findings; Dr. William Day who acted as a critic and advisor; and to Dr. Robert Hitch who edited the text.

Special recognition goes to Mrs. Michael Warren, secretary, Department of Education, for her cheerful and loyal efforts in typing and producing the report.

Questionnaire Forms	Appendix	A
Comments from Graduates who are Teaching	Appendix	B
Directory of Trade-Technical Education Graduates	Appendix	C

INTRODUCTION

The first students were accepted in Trade-Technical Education the Spring Quarter of 1961. At this time a total of twelve applicants were considered and eleven were accepted. Six have since been graduated with the B. S. Degree in Trade-Technical Education. Three are currently teaching in public schools and three are employed in industry. One additional member of the original applicants returned to Ferris State College following his military service and is completing his degree requirements during summer sessions while teaching on the secondary level during the regular school year.

In the period since March 1961 to January 1966, a total of fifty students have completed the teacher education program. These graduates were accepted in the period from March 1961 to February 1964. During this period a total of 111 applications were processed and 94 students were accepted. In addition to the number who have been graduated, nine are still in school or have graduated since January 1966.

STATEMENT OF THE PROBLEM

This study is concerned with what has happened to the fifty graduates of the Trade-Technical Education program as of the end of the Winter Quarter of the 1965-66 school year. Statistical treatment of the data is limited because of the small population which is divided into two major classifications (teachers and non-teachers). Six areas of specialization (Automotive Service, Heavy Equipment and

Diesel, Drafting, Printing, Radio and Television, and Machine Tool) further complicate the treatment of the data. The following information about the graduates is provided:

1. Name, address, place of employment and job title of each graduate.
2. Salaries earned from employment by teachers and non-teachers.
3. Additional schooling since graduation.
4. Marital status and family size.
5. Additional work experience since graduation.
6. Future professional plans.

The above information was obtained through the use of a two-part questionnaire which was sent to each graduate.[1] One part was to be used if the graduate was actually engaged in public school teaching or attending school. The other part is to be used if employed in industry.

Of the fifty graduates, responses were received from a total of forty-six representing 92 percent return. One graduate is known to be in the Marine Corps, leaving only three for whom there is no specific information. The data are presented under two main headings, treating first the teacher group and second those working in industry.

PRESENTATION AND INTERPRETATION OF DATA

Teachers and Graduate Students

A total of twenty-five graduates reported being directly associated with teaching, twenty-three of whom were teaching during the 1965-66 school year. The other two were attending graduate school on a full-time basis. Twenty-one teachers reported they were teaching in the area of their specialization. In the two exceptions

1. See Appendix A for questionnaire forms.

one indicated he was teaching mathematics and working on plans for a machine shop in which he would later teach. In the other case, the graduate was working as a coordinator in the neighborhood youth corps program.

In response to the question of the level at which they were teaching, the largest number (thirteen) indicated the senior high school. Two reported junior high school, four post high school and two in corrective institutions. In four cases supplemental employment on the adult level was indicated.

Twelve graduates reported they were teaching in vocational programs with two additional teaching in training units which were vocational in nature. Five indicated they were teaching in Industrial Arts programs and one reported a combination of Industrial Arts and Vocational program.

The graduates were asked to report their contract salary, supplemental income and total salary. All twenty-three supplied this information and the results are shown in Table I, which shows a distribution of salaries in increments of 1,000 dollars. The modal salary for the twenty-three teachers was 6,658 dollars.

TABLE I

SALARIES OF TEACHING GRADUATES

Salary increments	Number of graduates
11,000 - 12,000	2
10,000 - 11,000	0
9,000 - 10,000	0
8,000 - 9,000	2
7,000 - 8,000	5
6,000 - 7,000	10
5,000 - 6,000	4

The wide range of salaries can be partially explained by the number of years of teaching experience and the length of the contract period. In Table II, the salaries are equated with the number of years of teaching experience. Graduates with two and three years of experience were all making in excess of 6,000 dollars per year. Further, only one with less than two years of teaching experience was making over 7,000 dollars per year.

TABLE II

SALARIES OF TEACHING GRADUATES
AND YEARS OF TEACHING EXPERIENCE

Salary	Teaching experience	Number
11,000 - 12,000	3 years	2
8,000 - 9,000	2 years	3
7,000 - 8,000	3 years	3
	1 year	1
6,000 - 7,000	3 years	2
	2 years	5
	1 year	1
	Less than 1 year	3
5,000 - 6,000	Less than 1 year	4

Table III reflects salaries as compared to length of contract period. These figures show an average of 400 dollars additional for a 10-month contract and 1,700 dollars additional for a 12-month contract over the nine-month contract.

TABLE III

MEDIAN SALARIES OF TEACHING GRADUATES AND LENGTH
OF CONTRACT

Length of contract period	Number	Median salary(dollars)
12 months	5	7,800
10 months	8	6,500
9 months	10	6,100

Other factors which may have had a bearing on salaries were the level and the type of program in which the teacher was working, the amount of graduate study completed, the geographic area in which he was teaching and the amount of work experience in the trade.

Graduates were asked to report the number of months of work experience they have accumulated in their trade since graduation. This being a factor in certification as well as salary, it was important along with teaching experience and graduate study. Nine teachers reported a total of 70 months of work experience as shown in Table IV.

TABLE IV

TEACHING GRADUATES AND MONTHS OF WORK EXPERIENCE

Work experience	Teachers
2 months	1
3 months	3
5 months	1
7 months	1
9 months	1
14 months	1
24 months	1

Other information of interest that was obtained from the questionnaire was the age of the teacher, his marital status and the number of children. The mean age of the twenty-five teachers was 26.8 years which was thought to be somewhat older than the typical teacher with from one to three years teaching experience. Seventeen reported they were married and had a total of eighteen children.

The twenty-five teaching graduates were asked to supply information about advanced study since being graduated from Ferris. Two had completed their master's at the University of Michigan and were working beyond the master's. Twelve were working for the master's degree and seven contemplated graduate study in the future. Table V shows this information tabulated by school.

TABLE V

TEACHING GRADUATES AND THEIR PARTICIPATION IN GRADUATE STUDY BY SCHOOLS

School	Plan graduate study	Working on Master's	Completed master's	Working beyond
Colorado State University	1			
Eastern Michigan University	1	1		
Michigan State University	2	4		
Northern Michigan University		1		
University of Michigan	2	2	1	1
Wayne State University		3		
Western Michigan University	1	1		
Totals	7	12	1	1

NON-TEACHERS

Twenty graduates reported they were employed in industry and one reported he was a navigator in the United States Air Force. Of the four graduates who did not return their questionnaires one was known to be in the Marine Corps. The other three were believed to be working in industry.

Four graduates reported their employment was not closely related to their education at Ferris State College. Another graduate indicated he had taken a temporary job while waiting to begin graduate

study. In the other two cases, they had changed occupations because of better opportunities. Three of the twenty-one reporting said their employment was in some way related to teaching in industry. Six others reported that a teaching degree was necessary for obtaining their present position. Fourteen indicated they were giving consideration to teaching in the future.

In responding to the question of why positions were sought and obtained in industry rather than in teaching, the most frequent reason was better salaries. This was mentioned fourteen times. Other frequently-mentioned reasons were better advancement opportunities, need for more work experience, and teaching positions were not available at time of graduation.

Five reported they were going to school on a part-time basis. Three of these were in organized programs leading to advanced degrees.

The salaries of the twenty-one non-teachers reporting were ranked. The modal salary was 8,200 dollars. Table VI shows a distribution of salaries in increments of 1,000 dollars.

TABLE VI

SALARIES OF NON-TEACHING GRADUATES

Salary increments	Number of graduates
Above 12,000	1
11,000 - 12,000	1
10,000 - 11,000	1
9,000 - 10,000	3
8,000 - 9,000	6
7,000 - 8,000	6
6,000 - 7,000	3

In comparing the two groups (teachers and non-teachers) it is found that twenty-five (exactly half) were assiciated with teaching in public schools or are attending graduate schools. At least three others were engaged in a teaching situation in industry. The responses of the non-teachers definitely suggested an interest in teaching for the future. Fourteen of the nineteen reporting so indicated. In most cases the reasons for being in industry relate to salary and/or a need for additional work experience.

SUMMARY

Table VII reveals a breakdown of the fifty graduates by majors and classified as teachers, non-teachers and non-reporting.

TABLE VII

TEACHING GRADUATES AND NON-TEACHING GRADUATES
CLASSIFIED BY MAJORS

	Teachers	Non-Teachers	Non-reporting
1. Automotive Service	5	3	1
2. Drafting	1	2	
3. Heavy Equipment & Diesel	2	1	
4. Machine Tool	7	3	
5. Printing	7	9	2
6. Radio and Television	3	3	1
	25	21	4

A comparison of the two groups reveals the salaries are substantially better for non-teachers. However, the mean contract period for teachers was found to be ten months. Other factors were involved which tended to render any attempt to make a comparison difficult. Such things as the opportunity for supplemental income, holidays, paid vacations, fringe benefits and the opportunity for

advancement could only be evaluated on a personal basis. Table VIII compares salaries as they were reported with no attempt to adjust for the work year or other factors mentioned above.

TABLE VIII

COMPARISON OF SALARIES OF TEACHING GRADUATES WITH NON-TEACHING GRADUATES

Salary increments	Number of teachers	Number of non-teachers
Over 12,000	0	1
11,000 - 12,000	2	1
10,000 - 11,000	0	1
9,000 - 10,000	0	1
8,000 - 9,000	2	6
7,000 - 8,000	5	6
6,000 - 7,000	10	3
5,000 - 6,000	4	0

The teaching graduates were asked to comment on their professional preparation at Ferris State College.[2] These comments reflected an attitude of interest and a desire to contribute to the study on the part of the graduates. Some of the comments were edited in the interest of brevity. Several respondents made similar comments in which case they were not repeated.

A directory listing the names of the fifty graduates, their addresses, the names and addresses of their employers and their job titles was prepared.[3] This information may be of interest and value to the reader in one or more of the following ways:

a. Renewing contacts with former friends.

b. Locating qualified personnel for filling vacancies.

---

2. See Appendix B for comments.
3. See Appendix C for directory.

c. Creating better rapore between Ferris State College and the graduates.

d. Encouraging participation in future follow-up studies.

CONCLUSIONS

The data gathered within the limitations of this study would seem to support the following conclusions concerning the graduates of the Trade-Technical Education program at Ferris State College.

1. The graduates appear to have a high professional interest in teaching as evidenced by the fact that twenty-three taught during the 1965-66 school year and two others attended graduate school. Only six of the forty-six graduates reporting indicated no future interest in teaching. Of the twenty employed in industry, three were engaged in teaching activity. Fourteen of this group indicated a definite interest in teaching in the future.

2. As a group, the non-teachers seemed to feel their work experience was a necessary part of their preparation for teaching.

3. Better salaries offered by industry constituted a major contributing factor for not teaching. This reason does not appear to be sound when actual salaries are compared. Although salaries reported were somewhat higher for the non-teaching group, the difference did not seem great when the length of contract year, work week, vacation, opportunities for graduate study and other intangables were taken into consideration.

4. Interest in graduate study as a means of professional growth was high with the teacher group. A total of twenty-one of the twenty-five had completed, were working on, or planned to work on an advanced

degree. The teachers appeared to prefer graduate study over work experience as a means of professional growth. Only nine of the teachers had collected work experience outside of teaching since graduation. These nine had accumulated a total of 64 months of such experience.

5. Most of the teachers had found employment at the high school level in vocational-type programs.

6. Their preference for future employment as expressed by both teachers and non-teachers was at the post-high-school level in community colleges and four year institutions. They seemed to feel that additional work experience and an advanced degree would qualify them for this level of teaching.

It was evident that graduates of the Ferris State College Trade-Technical Education program, whether teaching or not teaching were enthusiastic about their undergraduate preparation. This conclusion was drawn from the nature of the comments made by the participants along with the enthusiasm with which the information for this report was supplied.

APPENDIX A - QUESTIONNAIRE FORMS

April 26, 1966

To Graduates of Ferris State College
With Majors in Trade-Technical Education

Gentlemen

Because of the tremendous response received from Trade-Technical Education graduates to a follow-up questionnaire last year, it has been decided to make this contact with you annually each spring. I hope you like the idea and will respond spontaneously.

The follow-up study is intended to perform a real service for you in assisting you in your professional growth. For example, I have a folder of many good job opportunities--especially for teachers who have the Masters degree with work and teaching experience. Many jobs are not being filled because of the short supply of teachers, and believe it or not, salaries are getting better.

You will note that some of the questions are rather detailed and personal. I must have this kind of information if I am to be of maximum service to you. For example, there would be little sense in my recommending you for a $10,000 job if you are already making $12,000 per year; or of recommending you at all if you have no desire to move.

Many inquiries come from industry as well as from the teaching profession, therefore, I need to maintain the contact with you non-teaching graduates as well. Then too you might just be interested in coming back into teaching if the economics were conducive.

In any event, we have gone to a good deal of work to put together a two part follow-up questionnaire which is intended primarily to help us help you. I trust that you will fill out the appropriate part as applicable to you and fire it back in the envelope provided. We in turn will send you a summary of the study when available.

Sincerely

W. F. VanTrump, Director
Trade-Technical Education

WFVT:dmw

APPENDIX A - Questionnaire Forms

May 17, 1966

Forms designed to gather information from the graduate of the Ferris State College Trade-Technical Education program were mailed on April 27, 1966.

The response to the forms has been very encouraging. To date, 21 replies have been received out of the 51 mailed; however, our records indicate that your form has not yet been received. We realize, of course, that you are busy and may have put the form aside temporarily. The information requested is needed in order to secure an appraisal of the teacher education program. Also, it is intended to provide information of value to you, the graduate of Trade-Technical Education.

Would you therefore, please fill out the form today and return it so we can include your information in the study.

An additional form and return envelope is provided in the event the original has been misplaced. If you have already mailed the completed form, please disregard this letter.

A summary of the information gathered will be available for you at a later date.

Sincerely

W. F. VanTrump, Director
Trade-Technical Education

APPENDIX B

COMMENTS FROM GRADUATES WHO ARE TEACHING

1. Need a course in student discipline.

2. Need a course on the culturally deprived student--how to help them with their problems which they face.

3. Need some experience with students on the secondary level.

4. Need a practical course dealing with problem students and discipline. Things were too ideal at Ferris State College.

5. Need more training in technical research. Have more problems in keeping up with the trade area than with presenting information to students.

6. Need a brief introduction to the use of the opaque and overhead projector.

7. I am planning a new shop. Many concepts were not covered in the college course.

8. I feel that the Ferris Trade-Technical Education program will not take second place to any college which offers a similar type of program. The standards are high--the Trade program is the best--the teacher education program is the best. Keep the standards high, and our good reputation will always follow us.

9. Need more secondary education experience and more information in the teaching of specific areas.

10. Need better organized and supervised work experience requirements.

11. Need more diversified work experience both in school and in industry. Six months is really a rather short time. Fewer students for each piece of equipment at Ferris would help a great deal.

12. A good instructional materials course, including visual aids would have been most helpful. By good, I mean one programmed exclusively for vocational technical educators and preferably taught by someone with a background in vocational teaching.

13. Somewhere along the line educational statistics should be introduced to give the student enough background so he can understand research.

14. Some knowledge of how local, city, county, and state education is organized.

Appendix B (continued)

15. A course in psychology dealing with the understanding of human beings would have been helpful.

16. Would liked to have had my student teaching in a high school.

17. How to sell the need for up-to-date equipment to the school administration.

18. I feel I would have benefited more by doing my student teaching on the high school level.

19. I would of liked a class in federal vocational laws and how to apply for federal funds.

20. Possibly a course in adolescent psychology.

Moore, James W.
Reducing the School Dropout Rate--A Report on the Holding Power Project.
New York State Education Dept., Albany. Bureau of Guidance
MF AVAILABLE IN VT-ERIC SET.
Pub Date - Jul65 18p.

*DROPOUT RESEARCH; *DROPOUTS; *DROPOUT CHARACTERISTICS; *SECONDARY SCHOOLS
NEW YORK

Objectives of the project were: (1) to improve the holding power of the secondary schools, (2) to determine factors for predicting and preventing dropouts, and (3) to continue improvement of guidance services. In 1954, more than 12,000 pupils, who would complete high school as the class of 1960, in 89 school districts, were selected as a sample for a longitudinal study. The schools were selected from 54 of the state's 62 counties. A reporting system was established which provided information on the progress of all the sample, especially dropouts or potential dropouts. Percentages, by grade, of pupils who stayed in school are: (1) grade 7, 99.5 percent, (2) grade 8, 17.7 percent, (3) grade 9, 94.2 percent, (4) grade 10, 89.4 percent, (5) grade 11, 84.1 percent, (6) grade 12, 80.5 percent and (7) graduates, 77.9 percent. During the study, dropouts totalled 2,616. Dropouts occurred all during the year with the summer months accounting for 24 percent and September and January accounting for 11 percent. The project revealed that school retention rates can be improved if personnel: (1) work on the problem, (2) involve the parents, and (3) take advantage of the predictive possibilities of the project-developed checklist, "Pupil Holding Power Data." FOREWORD

"Nation Needs More Skilled Manpower," "Youth Unemployment Grows," "School Dropouts Unprepared for Work"—such headlines are numerous. They emphasize the great concern in the nation for fuller utilization of human potentialities and the greater implementation of the concept of universal secondary school education for all our youth.

The phrase, "stay in school," has been used over and over as an admonition and encouragement for youth to be persistent in their school attendance. A companion phrase, "keep them in school," might well be coined and used to highlight the school's responsibility for a deeper commitment to providing appropriate education for all children and youth.

Over the years, there have been many studies of school dropouts. A unique feature of the study reported in this bulletin is its longitudinal aspect. In this project, school and pupil characteristics and outcomes in relation to holding power were studied for six years.

This report gives a brief summary of more extensive information gathered and compiled by the Bureau of Guidance. Much of this information has been presented to project schools and other group meetings of school personnel throughout the State. Materials mentioned in the report have been distributed widely and are still available through the Bureau of Guidance. The 1958 "Stay-in-School" letter of Associate Commissioner Walter Crewson, which is still very timely, can also be obtained through the Bureau of Guidance.

When do dropouts leave school? What are the characteristics of dropouts? How can a school improve its holding power? These are some of the questions on which this report focuses attention. The project was carried out by 89 school districts in co-operation with the Bureau of Guidance, during the years when Bruce E. Shear was Chief. The concept of the 6-year holding power study was Mr. Shear's. Dr. Harold L. Munson, now of The University of Rochester, was project co-ordinator for the first 5 years, followed by James W. Moore. The latter has been responsible for preparation of this report, under the supervision of Dr. Irving Ratchick, present Chief.

June 1, 1963

Erwin Kleeck

Assistant Commissioner for Pupil Personnel Services and Adult Education

Reducing the School Dropout Rate

(A Report on the Holding Power Project)

I. Purpose

The Holding Power Project was conducted by the Bureau of Guidance in co-operation with 89 school districts between 1954 and 1960. The specific objectives of the project were these:

1. The improvement of the holding power of the secondary units of the co-operating school districts
2. The determination of factors by which early school leaving might be predicted and prevented
3. The continuous improvement of the guidance services in the co-operating districts

II. Procedures

Holding power was defined as the ratio of the number of graduates from a single class in a secondary school, to the potential number of graduates from that class, expressed as a per cent. All pupils who were ever members of the class during its secondary school years and who did not voluntarily leave the group were considered potential graduates. Thus, pupils entering the group by transfer or retardation were considered potential graduates, and pupils transferred or retarded out of the group were not so listed. Dropouts were included as potential graduates.

The project began in 1954, when members of the class of 1960 in the co-operating schools entered grade 7 and commenced their secondary program. More than 12,000 pupils, including all those enrolled in grade 7 in the schools, were involved initially.

As with the other projects co-ordinated by the Bureau, the Holding Power Project was primarily conceived for demonstration purposes. For this reason, wide geographical distribution of co-operating districts was sought and achieved. Because the U.S. Office of Educa-

tion was pursuing a study of the school retention rates in large cities at the time the Holding Power Project was being developed, the largest cities in the State were not included in the project. The 89 participating districts were located in 54 of the 62 counties in the State. The number of project pupils in the districts ranged from less than 20 to approximately 700. Twenty per cent of the districts enrolled 50 per cent of the total project population.

The aims of the project were pursued through activities which emphasized early identification of potential dropouts and the development of effective measures to retain them in school. A reporting system was established which provided information on the progress of all members of the pupil population, especially those thought to be potential dropouts and those who did become dropouts.

Individual members of the class were carefully identified. This practice was repeated for all members entering and leaving the study group at each grade level until graduation of the class in June 1960. The disposition of each member of the group toward early school leaving was estimated annually through reference to a list of student characteristics known to be associated with "dropping out." This instrument *(Pupil Holding Power Data)* was prepared by the Bureau. Special efforts were made by the school personnel to prolong the attendance of students whose ratings included a preponderance of "vulnerable" items. Annual reports describing the status of all members of the project population were prepared for school use and copies forwarded to the Bureau. Additional data were supplied concerning those pupils who did withdraw voluntarily from school; i.e., the dropouts.

To assist schools in the systematic collection of information concerning project activities, several forms were developed by the Bureau. The *Record Check List* outlined the types of pupil information that the districts were advised to collect, maintain, and use concerning each pupil. The rating scale, *Pupil Holding Power Data,* has been described above. The *Identification and Separation Record* detailed for each pupil in the study population, the conditions under which he arrived in or departed from the group. The *Voluntary Withdrawal Data Sheet,* prepared only for dropouts, included an account of certain critical pupil characteristics. The *Annual Holding Power Summary Sheet* summarized, at the end of each year, the movements of individual members of the population during the year and listed the net registration at the end of the year. The *Annual Sum-*

mary Sheet was forwarded each year to the Bureau, together with all data pertaining to dropouts during the year.

These forms — as well as a series of bulletins prepared at the end of each project year which described effective practices noted in the schools *(Holding Power Practices Bulletin 1–6)* — may be obtained from the Bureau of Guidance, State Education Department, Albany, New York 12201, upon request. These practices were observed by Bureau supervisors during their visits to the schools to assist local staff members in implementing project objectives. Beginning in 1954–55, and continuing through the term of the project, each school was visited by a Bureau supervisor twice each year. To provide for exchange of ideas, area meetings of project district representatives were held the first 2 years of the project.

Beyond the preparation of certain uniform reports and the annual survey to discover potential dropouts, the co-operating schools did vary in their project efforts. In some instances the reduction of early school leaving was accepted as a challenge by the co-operating school staffs and truly fruitful attacks on the problem were made. In some cases, project activity gradually became limited to record keeping. The consistent intent of the Bureau was to stimulate and encourage schools in their attempts to reduce the incidence of early school leaving rather than merely to observe and describe the situation as it existed.

III. Findings

A. Holding Power Rates

1. The total pupil population

   a. The percent of potential graduates retained in school at the end of each grade level is recorded below:

Grade	% of retention (holding power)
7	99.5
8	97.7
9	94.2
10	89.4
11	84.1
12	80.5
Graduated	77.9 (data from 81 of 89 schools reported)

b. The per cent of males graduated was 73.1 and of females, 82.8.

2. School holding power rates

   a. The median per cent of potential graduates retained through the end of grade 12 in all 89 districts was 80.

   b. The median per cent of potential graduates actually graduated in the 81 districts which reported this figure was 77.

   c. In 81 districts which reported, the per cent of potential graduates actually graduated both for the class of 1954 and the class of 1960, the median rate improved from 72 per cent in 1954 to 77 per cent in 1960.

3. During the project term, a total of 2,616 pupils left the total study population as dropouts, distributed by grade level as follows:

Grade	Number of dropouts
7	55
8	211
9	519
10	679
11	657
12	495

B. Factors Affecting School Holding Power

1. **Size of the Class:** Schools in which the study population included less than 100 pupils or more than 200 pupils did not retain proportionately as many pupils as those with classes in the range between 100 and 200 pupils. This, of course, relates to the community factor, below.

2. **Community Type:** The retention rates in large cities and small rural districts were not so high as those in communities of intermediate size and location.

3. **School Retention Efforts:** Schools which improved their holding power rates the most over the term of the project exerted more efforts of all types to retain pupils than did schools which improved their rates the least. The difference between the levels of efforts was statistically significant.

4. **Educational Appreciations:** On a pupil questionnaire, seniors in high holding power schools indicated more appreciation of the values inherent in education than did seniors in low holding power schools. The difference between the degrees of appreciation was statistically significant.

C. Dropout Mobility

The careful identification of members of the project group in each school has been mentioned. This process was essential to the accurate determination of holding power per cent. However, a further advantage has been its usefulness in determining the mobility of the project group, and particularly the voluntary withdrawals from it.

Of those pupils who left the class as dropouts, approximately one third came to be in the class because they were members of it when the project started, another third entered as transfers from other school systems, and the final third joined the class when they failed to be promoted to a higher secondary grade within the school system.

Of all those pupils who joined the class because of retardation, nearly 40 per cent eventually chose to drop out of school, frequently before a year had elapsed. The negative effect of retardation was further highlighted by the fact that only 3 per cent of a sample of project pupils who remained in school through grade 12 joined this class as retardees during their secondary school years.

The act of transferring from school to school did not appear to predispose pupils to early school leaving, since the per cent of dropouts who entered the project class as transfers and the per cent of pupils who remained in school but who joined their graduating class as transfers were approximately equal.

The pupil accounting process made available information concerning the apparent destinations of voluntary withdrawals. Of those known by school officials, " employment " was the largest, at each grade level. However, the popularity of this item declined as the project progressed with " enlistment " for boys and " marriage " for girls assuming ever increasing importance. In grade 12, 31 per cent of the dropouts entered employment, 31 per cent of the dropout boys joined the armed services, and 25 per cent of the girls left to become married.

D. Reasons for Dropout

The reflections of pupils who chose to leave school and the reflec-

tions of their counselors, upon this decision, were collected for study. Ostensibly, these were recorded following an exit interview which project practice required for each voluntary withdrawal. In some cases, particularly those of summer withdrawals, an interview was impossible, but the counselors' comments were nonetheless solicited.

More than half of the situations described by counselors as affecting the decision to depart grew out of factors inherent in the reactions of pupils to their school environment. It was considered impractical to attempt to assign the precipitating role to either the pupil or the school in these situations. The per cent of such problems ascribed to males was nearly one and one-half times that for females.

Two other categories included most of the other withdrawal influences identified by school officials. Those associated with the family of the dropout accounted for one quarter, and those resident uniquely in the pupils themselves (physical, social-emotional problems), another seventh.

The specific elements most often described by counselors included the attitude of the pupil's parents, the pupil's lack of success in school, his low ability, and his indifference to the demands of the school environment. For girls alone, considerations related to marriage were frequently mentioned.

Following the exit interview, the counselors also noted the reasons advanced by pupils for their decision to leave. Most frequently cited were " dislike school," " prefer job to school," " failure in subjects," "want own income," and for females, " desire to marry."

A comparison of the rationale of interviewers and dropouts shows a surprising degree of agreement.

E. School Retention Efforts

Together with the attention cited above to the reasons for withdrawal, interviewers were asked to note briefly, for individuals who left school, the efforts expended before their departure to assist them to remain. Slightly more than one third received no special attention according to the information provided. It is, of course, possible that this statistic reflects a weakness in record keeping rather than a lack of service. The counselor assisted 42 per cent, program adjustments were reported for 23 per cent, and the parents of 20 per cent were sought out for help with the problem.

The program adjustments generally took the form of admission to courses of study closer to the needs of the pupil than the offerings

otherwise available, or exemption from some of the school's regulations.

Female dropouts were less well served than males. No efforts were reported for a greater percentage of females. Also, counselors, teachers, and other staff members were listed as making efforts to retain a greater percentage of males than females. Further, a greater percentage of males than females was granted program adjustments, and more contacts were attempted with their parents.

F. Characteristics of Voluntary Withdrawals

Beginning with voluntary withdrawals in grade 8, the second year of the project, information concerning certain of the characteristics of the departing pupils was recorded. To add meaning to our analysis of these data, similar studies were made of the characteristics of pupils who remained in school, on topics where this treatment was pertinent.

1. **Month of Withdrawal:** During the summer months, when school was not in session, 24 per cent of the dropouts severed their connection with the school. September and January, months of new beginnings in school, were each chosen by 11 per cent as the date of departure. Smaller percentages were recorded for all other months during the school year.

2. **Age at Withdrawal:** As the project shifted its emphasis from grade level to grade level in concert with the progress of the class of 1960, an increase in the median age of withdrawal was noted. From 16–0 for pupils leaving in grade 7, the range extended to more than 18 years for senior boys and 17½ years for senior girls.

3. **Academic Accomplishments:** Pupils who chose to withdraw voluntarily did not fare well academically before departure, although the performance of girls was more satisfactory than that of boys. On the last report before departure, only one in five boys was credited with " passing work " in all his subjects in contrast with one in three girls. The academic subjects of English, social studies, mathematics, and science were more troublesome to early school leavers than other areas of study, although the failure rate of those in business education approached that of the academic subjects mentioned. Of special interest is the observation that the rate of failure in English was twice as high for males as females. Most programs of departing pupils included some combination of these subjects: English, social studies, mathematics, science, business education, and art. To this

list, boys most often added industrial arts; girls, homemaking education.

4. **Grades Repeated:** To be legally eligible to leave school at the median ages reported for the early grades of the study, it is obvious that our voluntary withdrawals must have spent more than the usual interval at some of the preceding grade levels. At least one grade had been repeated by 71 per cent of male withdrawals and 50 per cent of the girls. Only 9 per cent of the project members who completed the final year in the study population had this history.

The early secondary grades were most frequently repeated by early school leavers followed by grades at the elementary school level. At the former level, 44 per cent were not promoted regularly, 36 per cent at the latter. By way of contrast, among those pupils who did not drop out but who repeated some grades, 62 per cent were "held back" during the elementary years, but only 15 per cent repeated in the early secondary grades. The percentages who were not regularly advanced through the senior high school are approximately equal for the two pupil classifications.

5. **Measured Ability:** Some explanation of the scholastic difficulties of those who withdrew is apparent in their reported measured abilities, especially for withdrawals from the junior high school grades. Their median intelligence quotient was 84. For pupils who left during the senior high school grades, the median was 96. Most striking was the regular increase in the median quotient of pupils leaving at the several grade levels through which the project group progressed. From 75 in grade 7, this figure ascended to 100 in grade 12.

In comparison with pupils who remained in the group, voluntary withdrawals typically did not score well on measures of ability, although there was some overlapping in the distributions of the scores of the two groups. Intelligence quotients of more than 100 were reported for 75 per cent of those who remained in school but for only 36 per cent of those who left from the senior high school grades. The median quotient reported for pupils who remained in school was 108.

6. **Physical Condition:** Five of every six early school leavers were considered to be in good or excellent health. Females were regarded as slightly less robust than males. However, 17 per cent of the dropouts were described as in fair or poor health, but only 6 per cent of the retained students.

7. Attendance: Before withdrawal, students who eventually became dropouts attended school less regularly than students generally. Their percentage of attendance was 3 points less than that of all pupils in the year prior to withdrawal but 8 points less in the year during which they departed.

8. Family Attributes: The family structure of both junior and senior high school dropouts was less often "usually" organized (both parents present in the home) than were those of students who remained in school. However, as with other characteristics, the greatest disparity appeared among the junior high school group. The percentages of families so described were 64 for junior high school dropouts, 71 for those who left from the senior high school grades, and 84 among pupils who did not leave school before the end of grade 12.

The attitude of the parents of pupils toward continued school attendance for their children seemed to be of crucial importance. According to school officials, only one third of the parents of pupils who withdrew were positively oriented toward this question, in contrast with 90 per cent of the parents of pupils who remained in school.

G. Characteristics Reviewed

Our data suggest that to speak of a typical dropout is inaccurate. For example, what we have called the "asymptotic trend" was discovered, which suggests that, as students leave from successively higher grade levels, they become more and more similar to pupils who remain in school, in the degree to which they manifest certain characteristics, such as age at grade levels, measured ability, rated vulnerability to early school leaving, and academic success. Neither are the attributes of male and female dropouts interchangeable. Before citing some of these general differences, it may be of interest to note that the ratio of male to female dropouts was two to one in grades 7–9, five to four in grades 10–12, and three to two for the full project term.

Although very alike in measured ability, females were much more successful in their school work than males. Males, however, received more attention from school officials. Perhaps this was due to their poor work. Although we have no specific measure of the relative aggressiveness of the two sexes, it seems reasonable to expect more from the males, which also would bring them more often to the attention of school personnel. Problems growing out of reactions

of the pupil to his school setting were more often attributed to males. In the later phases of the study, females tended to leave at a younger age than males, frequently because of impending marriages.

H. The Reactions of Retained Pupils

An attempt was made to determine if the reactions of pupils to their educational programs generally, and specifically their guidance programs, were related to the holding power of their classes. The responses to two questionnaires of pupils in schools in the top and bottom quarters of the holding power distribution were compared.

Although the results for the two groups were more similar than dissimilar, certain important differences did appear. In high holding power schools, more pupils than in low holding power schools:

1. Exhibited needs for assistance in matters revealing a desire to exploit fully their present educational opportunities, including those which related to assistance in continuing their education
2. Had plans to continue their education
3. Had plans to enter professional occupations
4. Had tentative, rather than specific, choices of the eventual occupations they planned to enter
5. Did not plan to obtain a job following graduation

Further, in high holding power schools, more parents of pupils had been in contact with the counselor than was the case in low holding power schools. Also, pupils in the lower group of schools indicated a higher availability of counseling service, which was sufficient to their needs. This last was interpreted as perhaps due to less pressure in these schools for counseling assistance.

The types of assistance by the counselor to the two groups of pupils were not as distinctly unique as the differences portrayed above. There was evidence, however, that, in the important matters of educational and occupational planning, the counselor was regarded as the prime source of help more often by the lower than the higher group. Paralleling and partially explaining this preference is the suggestion, in our data, that high holding power school pupils seemed more independent of school resources in several areas than their counterparts in low holding power schools.

Previous experiences with one of the questionnaires, which had included an analysis of the results in terms of the socioeconomic status of the pupil respondents, revealed much the same variation

in counselor regard and general independence, between high and low status pupils as we have discovered between pupils in high and low holding power schools.

I. Prediction

A major objective of the project was " the determination of factors by which dropouts might be predicted and prevented." Prediction was attempted through a technique which required the annual rating of all pupils in the population on a scale, the items of which were associated in the literature with early school leaving. This device, developed by Bureau members, was entitled *Pupil Holding Power Data.* A study of the results for pupils who voluntarily withdrew, and for those who remained in school, indicated that the scale did predict future dropouts with acceptable accuracy. The ratings revealed, however, that greater success may be expected in the detection of potential male dropouts than female. Approximately 80 per cent of the males were identified as possible early school leavers at least a year before withdrawal, and the figure was about 70 per cent for females.

Two trends, which appeared together, were discovered. The first was another manifestation of the " asymptotic trend " earlier noted. In this instance, it was displayed as a decreasing average vulnerability rating as withdrawals from successively higher grades were studied. The second was the increase of the average annual vulnerability ratings for withdrawals at specific grade levels as the year of their withdrawal approached. This was interpreted as evidence that staff members were sensitive to the pupils' growing inclinations to leave.

The items on the scale which most effectively distinguished early school leavers from their peers who did not leave were "age," "grade retardation," "learning rate," and "pupil's interest." The items which had the least predictive value were "physical size," "health," "father's occupation," and "school to school transfers." Because of the importance of occupation as a determinant of status, and the apparent relation of that factor to school holding power, an explanation was attempted of the low predictive value of the "occupation" item. It was suggested that, in future use, the structure of this item should be revised.

J. Practices and Results

Prevention factors were less specifically identified. An attempt

to relate the use of each of a number of project techniques in a sample of schools to the holding power for the project group in these schools was unsuccessful. Turning to the broader "retention efforts" listed for dropouts, and examining these efforts in the two groups of schools whose holding power had improved the most and the least over the project term, did yield statistically significant results. More efforts were expended to retain pupils by schools which displayed the greatest gains. Interestingly, it was discovered that these efforts in high gain schools had been emphasized for males. However, these findings were qualified by the suggestions that the status of communities in which the high gains were realized was higher than that of the communities in which the low gain schools were situated. In effect, successful retention efforts and favorable community dispositions seemed to be concomitant essentials to the improvement of holding power. This finding argues powerfully for the involvement of community leaders, and especially parents, in any attempt to increase the holding power of schools.

IV. Conclusions

In sum, the project has revealed that school retention rates can be improved when counselors and staff members together attack the problem, when they earnestly work to involve the parents of potential dropouts in their efforts, and when they take advantage of the predictive possibilities of the project-developed check list (*Pupil Holding Power Data*) to focus their efforts on potential dropouts.

The special role of the counselor may be to provide a communication center for the staff team attempting to assist individual students. By virtue of his position, he has greater access to students, parents, and teachers, as well as to pupil record information, than do some of his colleagues. This is not to say his contribution is any more vital than that of any other staff members, and certainly not to indicate that he alone must bear the responsibility for the reduction of early school leaving. Each member of the staff must offer his own unique assistance to individual potential dropouts. The counselor, in addition, serves as a liaison between the team members.

Specifically, school districts interested in improving their holding power rates may wish to consider the following steps: (1) Ascertain the holding power of one or more recent graduating classes and study

the reasons that pupils left school in grades 7–12. (2) Develop and keep up to date a good record of pertinent information for each pupil. (3) Identify potential dropouts systematically. (4) Be particularly alert to dropout proneness in nonpromoted students and those whose school marks take a marked turn downward. (5) Arrange and co-ordinate staff efforts to prevent early school leaving. (6) Consider for potential dropouts school program adjustments, school-work experience programs, additional counseling, summer contacts by school personnel, and extracurricular activities. (7) Closely involve the parents of potential dropouts in all retention efforts.

Schools frequently seek standards with which to compare their retention (holding power) rates. Logically, the only relevant standard is the local school's capacity to assist pupils. If a study of the characteristics of pupils who have dropped out of the local school reveals that substantial numbers could have been assisted to remain with "reasonable" efforts on the part of the local staff, then the retention rate, regardless of its magnitude, cannot be termed satisfactory. A consensus on the definition of "reasonable" must be reached by the local staff, since the problem seems to yield only to long-term commitments by the majority of those working with individual potential dropouts. Unless most staff members accept the finding that something can be done to assist such pupils, those otherwise in a minority will find it most difficult to improve effectively the local retention rate.

Our results suggest that small-rural and large-urban school districts, in which the socioeconomic level of parents may be somewhat less than in districts that fall between these extremes, may have special problems in improving their holding power rate. In terms of the high rate of dropouts and the large number of pupils served, particular and early attention should be given to increasing the holding power of schools in the larger urban centers of the State.

V. Summary

The Holding Power Project was conducted by the Bureau of Guidance between 1954 and 1960 in co-operation with 89 secondary schools in New York State. Its purpose was essentially to launch an attack on the problem of early school leaving through extended

and improved programs of guidance service. Members of the class of 1960 were designated as the study population, and project efforts were concentrated on these students from the time they entered grade 7 in 1954 until the class was graduated in 1960. A number of forms and procedures for the collection of data and the prediction of potential dropouts was developed by the Bureau.

It was determined that potential school dropouts can be systematically identified well in advance of their departure, that the attitude of parents significantly affects the decision of students to leave school early, and that only combined efforts of many types by counselors and their professional colleagues are positively related to a reduction of early school leaving. It was also found that small-rural and large-urban districts tend to retain a smaller percentage of pupils than districts of intermediate size and location.

The study suggests that more pupils will remain in school when their counselors and teachers co-operate closely in retention efforts, when the parents of potential dropouts participate actively in the attempts of school personnel to assist their children, and when potential dropouts are systematically identified for early and increased attention.

Pub Date - May64 24p.

*STATISTICAL ANALYSIS; *EMPLOYMENT TRENDS; *LABOR FORCE
COLORADO; LEAST SQUARES ANALYSIS

The main purpose of this analysis was to provide projections of major Colorado non-farm employment classifications to 1970: (1) government, (2) retail and wholesale, (3) manufacturing, (4) service, (5) transportation, communication, and public utilities, (6) construction, and (7) mining. The projections of employment are based on data from the Bureau of Labor Statistics. Figures have been available by major classifications since 1939, and these figures through 1963 were used to develop the trend line. No attempt was made to analyze the reasons for the increases and decreases which occur. The middle year (1951) was taken as the origin year and assigned the X value of 0. Total non-farm employment in Colorado in 1963 was 560,400 an increase of 329,000 jobs since 1939. An average annual increase of 13,404 was calculated. The projection for 1970 was 643,600 jobs. Retail and wholesale trades will remain the largest employment classification. Government employment was the fastest growing industry. (SL)

Introduction

The economic growth in Colorado and the importance of the state in relation to the economy of the Rocky Mountain region has resulted in a considerable interest in projections of nonfarm employment to 1970. The major purpose of this analysis is to provide such projections by major employment classifications. It is hoped that these projections will provide a guide to businessmen, economists, and others in analyzing potential economic growth in Colorado.

The projections of employment to 1970 are based on data from the Bureau of Labor Statistics. Although the major employment classifications can be further subdivided, comparable figures for Colorado were available only from 1947. However, figures were available by major classifications since 1939, and these figures through 1963 were used to develop the trend line.

The use of Bureau of Labor Statistics classifications does present problems. Several areas are grouped together and reported as one figure, such as Finance, Insurance and Real Estate. However, it is not the purpose of this study to attempt to project employment for each of these areas. Nor has any attempt been made to analyze the reasons for the increases and decreases which occur. The projections given in this report are comparable to the basic figures found in the report Employment and Earnings Statistics for States and Areas, 1939-1962, United States Department of Labor, Bureau of Labor Statistics, Washington, D. C., 1963.

Note: The statistical method for computing the trend in employment was "The Least Squares Method--Linear." The Short Method for Computing Trend--Odd Number of Years was used for the trend computation. Some of the advantages of using the Least Squares method are (1) the method expresses trend in the form of a mathematical formula which may be easily interpreted, (2) results obtained under the method are definite and independent of any subjective estimate on the part of the statistician, and (3) the resulting equation is in convenient form for extension into the future or past. Some of the disadvantages of this method are (1) the technique used is mathematical, and (2) the method is based on the assumption that the data follows a trend that can be expressed by a mathematical equation.

The middle year (1951) is taken as the origin year, thereby assigning to it an X value of zero. A minus sign is generally given to the X values for the years previous to the origin year and a plus sign to those following the origin year. The Simplified "Normal" Equations for Straight Line (Origin at midpoint of data) is:

I Sum (Y) = Na

II Sum (XY) = b sum (X^2)

Solve: a which is Y
b which is X

Where:

Sum Y = Total Employment for Years

N = Total Number of Years

Sum XY = Total Value of (X x Y)

Sum X^2 = Total Value of all Squares of X

Thus in the calculation, 1951 is considered as the base year and "a" the estimated trend value of the series for 1951 and "b" the annual increase.

A Least Squares Analysis of Colorado's Nonfarm Employment, 1939-1963, With Projections to 1970

One of the most common methods used to measure growth is employment. The remainder of this report is a presentation of nonfarm employment projections by year to 1970 by industry classification.

Nonfarm Employment

Total nonfarm employment in Colorado in 1963 was 560,400, an increase of 329,000 jobs since 1939. An average annual increase of 13,404 has been calculated. The following table shows the projected employment figures to 1970.

Total Nonfarm Employment
Projections to 1970

Year	Computed Trend
1964	563,200
1965	576,600
1966	590,000
1967	603,400
1968	616,800
1969	630,200
1970	643,600

Government Employment

Total government employment was 126,900 in 1963, an increase of 86,200 jobs since 1939. 1963 was the first year that government replaced retail and wholesale trade as the largest employer of the nonfarm classifications. The average annual increase is 3,427 jobs each year.

Government Employment
Projections to 1970

Year	Computed Trend
1964	121,700
1965	125,100
1966	128,600
1967	132,000
1968	135,400
1969	138,900
1970	142,300

Retail and Wholesale Trade Employment

Employment in retail and wholesale trade increased 63,700 jobs from 59,900 in 1939 to 123,600 in 1963. Prior to a decline of 5,300 jobs in 1963 over 1962, trade was the largest nonfarm employer. The computed trend indicates an increase of 3,197 jobs per year.

Retail and Wholesale Trade Employment
Projections to 1970

Year	Computed Trend
1964	135,500
1965	138,700
1966	141,900
1967	145,100
1968	149,300
1969	151,500
1970	154,700

Manufacturing Employment

Manufacturing, the third largest employer in Colorado, employed 93,900 persons in 1963, an increase of 58,900 from the 1939 figure of 35,000. The computed trend is 1,963 jobs per year.

Manufacturing Employment
Projections to 1970

Year	Computed Trend
1964	92,500
1965	94,500
1966	96,500
1967	98,400
1968	100,400
1969	102,300
1970	104,300

Service Employment

Employment in the service industry was 81,900 jobs in 1963, an increase of 51,800 jobs since 1939. The computed trend is an increase of 2,221 jobs per year.

Service Employment
Projections to 1970

Year	Computed Trend
1964	82,600
1965	84.900
1966	87,000
1967	89,300
1968	91,500
1969	93.800
1970	96,000

Transportation, Communication and Public Utilities Employment

More people are employed in this area than are employed in construction or finance or mining. In 1963 employment was 43,800, an increase of 15,100 jobs from 1939. However, the computed trend is only an increase of 476 jobs per year.

Transportation, Communication and Public Utilities Employment
Projections to 1970

Year	Computed Trend
1964	47,800
1965	48,300
1966	48.800
1967	49,300
1968	49,700
1969	50,200
1970	50.700

Construction Employment

Employment in construction has provided 22,100 new jobs since the 1939 figure of 13,100. The computed trend is 1,112 jobs per year.

Construction Employment
Projections to 1970

Year	Computed Trend
1964	38,500
1965	39,600
1966	40,700
1967	41,800
1968	42,900
1969	44,000
1970	45,200

Finance, Insurance and Real Estate Employment

Other than mining, fewer people are employed in this classification. In 1963 employment was 28,900, an increase of 19,200 jobs since 1939. However, this increase of jobs exceeded that of the transportation and public utilities employment, which employs over 43,000 persons. The computed trend is 859 jobs per year.

Finance, Insurance and Real Estate Employment
Projections to 1970

Year	Computed Trend
1964	28,200
1965	29,000
1966	29,900
1967	30,800
1968	31,600
1969	32,500
1970	33,400

Mining Employment

Fewer people are employed in mining than any of the other nonfarm classifications. This is also the only industry of this group which has shown a decline in employment since 1939. In 1963 employment was 11,900, a decline of 2,300 jobs from 1939. However, the computed trend shows that employment will probably increase, but at the rate of only 13 jobs per year.

Mining Employment
Projections to 1970

Year	Computed Trend
1964	13,900
1965	13,900
1966	13,900
1967	13,900

Mining Employment
Projections to 1970
(Continued)

Year	Computed Trend
1968	13,900
1969	13,900
1970	13,900

Conclusions

Several observations can be drawn from the projection of the trend lines. Total nonfarm employment should continue to grow, reaching an estimated 643,000 jobs by 1970. Employment since 1960 has been above the trend line, with a slightly decreasing curve line in 1963. Changes will also occur in the ranking of the various industry groups.

Retail and wholesale trade will continue to remain the largest single employer. However, government employment is increasing faster than trade employment. In fact the trend line indicates that government employment is the fastest growing industry. Service industries is the second fastest growing industry, growing more rapidly than manufacturing. However, manufacturing will continue to employ more people than service for many years. A major change which will probably occur in the next twenty years is in construction. By the early 1980's construction employment may overtake and pass employment in transportation, communication and public utilities. The following table presents a brief outline of what has happened over the years. The industries are ranked according to computed trend increases.

Colorado Nonfarm Employment

Industry	Least-Squares Trend, Yearly Increases	1963 Employment	Number Increase 1939-1963
Total Nonfarm Employment	13,404	560,400	329,000
Government	3,427	126,900	86,200
Retail and Wholesale Trade	3,197	123,600	63,700
Service	2,221	81,900	51,800

Colorado Nonfarm Employment
(Continued)

Industry	Least-Squares Trend, Yearly Increases	1963 Employment	Number Increase 1939-1963
Manufacturing	1,963	93,900	58,900
Construction	1,112	35,200	22,100
Finance, Insurance and Real Estate	859	28,900	19,200
Transportation, Communication, Public Utilities	476	43,800	15,100
Mining	13	11,900	-2,300

It would thus appear that government and trade will dominate the increases in total nonfarm employment, followed closely by service, manufacturing and construction. Projected increases in transportation, communication and public utilities, and especially mining, will have relatively minor effect on the total employment increases.

Nonfarm Employment in Colorado

	1940	1950	1960	1970
Retail and Wholesale Trade	61,200	92,300	123,600	154,700
Government	41,500	66,800	110,100	148,300

Education and Career Study.

Napa County Superintendent of Schools, Calif.
MF AVAILABLE IN VT-ERIC SET.
Pub Date - 8Dec66 56p.

*VOCATIONAL INTERESTS; SURVEYS; *CAREER CHOICE; *STUDENT OPINION; *QUESTIONNAIRES; *HIGH SCHOOL STUDENTS
NAPA COUNTY SCHOOLS; CALIFORNIA

This study was undertaken to identify student vocational education needs based on student opinions. It, therefore, represents only a segment of information to be used with other sources. A questionnaire was administered to 543 female juniors, 503 male juniors, 480 female seniors, and 547 male seniors; all were high school students in Napa County schools, a rural county with no town larger than 30,000 population. The data are categorized by grade, sex, and school and are presented in table form showing response to individual and groups of items. Some of the questions asked concerned: (1) field chosen as a career choice, (2) occupational choices, (3) source of advice sought for occupational guidance, and (4) occupational mobility of students. It was recommended that an answer be sought for the question, "What are the trends of students' vocational certainty and how does this relate to the accuracy of vocational selection as determined by longitudinal studies?" The appendix contains the survey instrument. (SL)

I. PROBLEM

There is in the United States an increasing awareness of public responsibility for the economic and social well being of all the American people. This is attested to by the many laws and acts being passed and by programs promoted by federal, state, and private organizations for minority and other groups with special needs.

Education may be seen as one of the greatest tools in the fight to strengthen America. Education has in varying degrees appeared as a luxury to various people of the world and has, to a great extent, been reserved for a select few. However, we in this country have progressively taken steps to provide educational opportunities for all people with equal consideration.

In recent years we have become more aware of the gap that exists between theory and practice. More nearly adequate education programs must be provided to help bridge this gap. Occupational education may not only help bring theory and practice closer together, but in so doing can play an increasingly important part in aiding this country's efforts to become an even stronger world power. In the United States, fewer opportunities are available each year for those who qualify for only unskilled or semi-skilled jobs. Occupational education must accept the challenge of meeting the need for training and retraining programs to provide skills for the unemployable or underemployed.

The secondary school has an important part to play in the planning, developing and/or expanding its occupational education offerings to assist in filling this nation's need for occupational training, for increasing the enjoyment of its citizens through a better understanding of our technological culture, and to strengthen our national defenses. A knowledge of the present status of the occupational programs in the public secondary schools of Napa County would help provide a "taking-off-point" for sound planning of future programs.

The rapidly changing industrial and technological scene requires an extreme alertness on the part of educators. Future planning must anticipate and involve the interests and needs of students.

It is in the spirit of this anticipation of student vocational education needs that this study was conducted.

II. METHODOLOGY

Instrument

Literature was surveyed and those variables which authors suggested to be related to occupational success were built into the instrument. Additional variables included were based on a priori assumption by the author.

The majority of the items were quite well structured and required only an opinion from the Ss. Some of the items, however, were open-ended allowing for free responses. There were a total of twenty-one items dealing with areas of career selection, vocational guidance and vocational course offerings.

Sample

The questionnaire was administered to 543 number of female juniors, 503 number of male juniors, 480 number of female seniors and 547 number of male seniors.

Due to the nature of the questionnaire no special instructions other than to inform the Ss:

1. The data would not be used for grading purposes.
2. The purpose as explained to the Ss was:

   The purpose of this survey is to use the data to identify areas in Vocational Education that need to be maintained, extended, and improved so that persons of all ages in Napa County will have ready access to vocational training which is of high quality, which is realistic in the light of actual or anticipated opportunities for gainful employment. It would also be used as an initial instrument for the establishment of a comprehensive and continuing follow-up study of high school graduates and/or dropouts.

Controls

Several of the questionnaires were not filled out completely. These were returned to the students for completion. All questionnaires were used and the only missing data was where a particular S did not respond to a specific item. The "no responses" were accepted on the assumption that the S had no opinions on that particular item.

Limitation

This sample is representative only of high school students in Napa County. Therefore, the findings cannot be generalized to other populations. Napa County, however, is a typical rural county with no students living in a town larger than 30,000.

The findings then could be similar in other similar counties, but in reality this project was tailor-made for Napa County schools.

Another limitation of this project is that the findings represent only the opinions of students. Obviously occupational programs must include other types of activities and sources of information such as curriculum studies, needs of industry, expert opinions, etc.

This study then represents only a segment of information to be used in addition to other cources.

III FINDINGS

The data was analyzed according to the following variables: grade, sex, and school. The data are presented in table form showing responses of individual items or groups of items.

Students were asked, "How certain are you now what your career will be when you have completed your education?"

It may be seen in tables 1-4 that there were significant differences among the schools. Seventeen percent of the students from Napa said they had selected their life's work, while only seven percent from St. Helena and only six percent from Calistoga said they had done so. The percentage of students who indicated they were uncertain of career choice seemed to be significantly higher in St. Helena and Calistoga when compared with Napa.

Table 1. Degree of certainty of career choice upon completion of education as indicated by 11th grade female students.

Tables 5-8 give student responses to the question, "Even though you may or may not be certain what your 'final career' will be, which school subjects do you think will best fit you for a career?" Male students indicate that occupational courses would be most beneficial to them. Occupational courses were ranked no lower than second place by any group of students with the exception of eleventh grade female students from St. Helena and Calistoga who rank them sixth in importance.

It is interesting to note that male students place greater importance on mathematics and science than female students.

Foreign Languages were rated last in importance in every instance.

Tables 9-12 pertain to the question, "How important do you think your school marks are to your future?"

The responses of students in all grade levels, in all schools and of both sexes were generally the same in regard to this question. Very few students believe school marks to be unimportant, while the large majority believe them to be very important.

In summarizing tables 9-12, 46% of all students believe school marks are very important, 49% fairly important and only 5% unimportant.

Tables 13-16 pertain to the question, "How important do you think school marks are to your popularity?". The responses of all students were generally the same in regard to this question. Only a relative few believed that school marks were "very important". About 50% of the students indicated they thought grades were unimportant and had little to do with student popularity.

Students were asked to indicate which of a list of factors would have the greatest effect on their career. Differences in grade level, schools, and sex were very slight with hard work, intelligence, and personality listed as the factors having the greatest effect. This information may be seen in tables 17-20.

The students were asked to make a 1st, 2nd, and 3rd career choice from a list of occupational fields.

Tables 21-24 show student responses. Business, teaching, and clerical fields were considered highest in choices by girls of 11th and 12th grades, while boys indicated skilled trades and engineering. Other items considered highly as a career choice by boys were: business, armed forces, law, teaching, and science. Included high on the girls list were: social service, medicine, the arts, sales, and public relations.

Students were asked, "If the specific occupation you have chosen is not found on the above list, what is it?"

Tables 25-28 have been provided to show unsolicited responses given by students pertaining to career choices. These responses were placed on a line marked "other".

Because they were free responses a given number of write-in responses are likely to be more indicative of intent than a like number responding to an item that was listed.

Important "write-in" responses by the girls were; airline stewardesses, beautician, and marriage. The boys "write-in" responses included: forestry, airline pilot, and law enforcement.

Students were asked, "Have you studied and have some knowledge of the training required for the career of your choice?"

Tables 29-32 show the findings pertaining to this question. It may be noted that a higher percentage of girls indicated they have studied and have knowledge about needed career training than boys. With the exception of the 12th grade girls in Calistoga, students indicated "yes" less than did other students in general.

Students were asked which factors they believed were most important when choosing a career. The findings may be seen on tables 33-36. Male students listed future security first and opportunity for advancement second. Though numbers are small, St. Helena and Calistoga students rate challenging and interesting work first and opportunity for advancement second.

The girls listed challenging, interesting work first, future security second, and opportunity for advancement third.

Some differences exist in the rank order of responses between students from the different schools, but the general rank order is the same. The larger number of students from Napa dominate the rank order. Standing in the community was listed last by all the schools, grades, and sexes.

Tables 37-40 show student responses to the question. "In planning your career, to which three of the following would you go for the most helpful advice?" Students believed that a business or professional man would provide the most helpful advice in every instance, except the 12th grade girls who indicated the school counselor would be most helpful.

Students in every instance list friends their own age as being the least helpful. Students in the Napa Valley Unified School District placed teachers next to last in providing vocational guidance. The importance of teacher advice was rated somewhat higher in the St. Helena and Calistoga districts.

Students were asked where they believed they would obtain their occupational training. Tables 49-52 show that the largest number of students plan 2 or 4 years of college. Approximately 1/4 of all students plan to obtain occupational training on the job. The least indicated source for training was the high school.

Students were asked how many years of schooling beyond high school they anticipated obtaining. The findings are shown in tables 53-56. The number of students who did not plan on some schooling beyond high school was extremely small.

The largest number of male students plan on attending 4 years of college, while the largest number of female students plan on 2 years. Fewer female students plan on more than 4 years of college than male students.

Almost 50% of all students indicated that they would enroll in vocational courses in the high schools if they were fairly sure that these courses would provide them with job entry skills upon graduation. The highest percentage of students indicating that they would not enroll in vocational courses, were the 12th grade girls from St. Helena. This information may be seen in tables 63-66.

The question was asked, "Would you take vocational courses for general value or background rather than preparation for an occupation?" Approximately 50% of the students surveyed answered they would be interested in taking courses for general background. There were relatively few students who did not respond to this question. The findings may be found in tables 67-70.

Tables 75-76 have been provided to show the results when asked, "What subject or subjects do you think should be offered at the senior high school level that are not now offered?". The largest number of students responding believed that psychology, sociology, and languages (Russian and Italian) should be taught. 30 St. Helena boys indicated they thought auto mechanics should be offered. Many students responding to this question requested courses that were already offered at their respective high schools.

RECOMMENDATIONS

The involvement of students in the assessment and planning of programs has proven to be useful in this project and it is hoped that such an approach will continue to be utilized.

Based on the results of this project the following questions have arisen.

1. To investigate and improve the techniques in using the opinions of students in the development of vocational programs.

2. To investigate the correlation between the certainty of student vocational selection and the accuracy of vocational selection.

3. What are the trends of students vocational certainty and how does this relate to the accuracy of vocational selection as determined by longitudinal studies?

4. In what ways can we improve student accuracy and certainty of vocational selection?

The above information when obtained would be very valuable in the structuring of a vocational training system which would provide more effective guidance, training, and experience.

The author is presently developing a vocational training system which enlarges upon the concepts involved in this project.

SURVEY INSTRUMENT

Office of
NAPA COUNTY SUPERINTENDENT OF SCHOOLS
Piercy C. Holliday

Purpose: The purpose of this survey is to use the data to identify areas in Vocational Education that need to be maintained, extended, and improved so that persons of all ages in Napa County will have ready access to vocational training which is of high quality, which is realistic in the light of actual or anticipated opportunities for gainful employment. It would also be used as an initial instrument for the establishment of a comprehensive and continuing follow-up study of high school graduates and/or dropouts.

Directions: Please answer all questions as honestly as you can.

Name of High School _____

Name of Student _____

Grade 11th ( ) 12th ( )

7. If the specific occupation you have chosen is not found on the above list, what is it? _____ 7

8. Have you studied and have some knowledge of the training required for the career of your choice? 8

Yes ( ) No ( )

9. When you look for your first full-time job, which three of the following do you think would be most important to you?

		9
a.	future security	( )a
b.	opportunity for advancement	( )b
c.	challenging, interesting work	( )c
d.	pleasant working conditions	( )d
e.	service to mankind	( )e
f.	high pay	( )f
g.	standing in my community	( )g

10. In planning your career, to which three of the following would you go for the most helpful advice?

		10
a.	my father	( )a
b.	my mother	( )b
c.	my school counselor	( )c
d.	my teachers	( )d
e.	a business or professional man	( )e
f.	books, magazines or other published material	( )f
g.	friends about my own age	( )g

11. Have you consulted your parents about the career of your choice? 11

Yes ( ) No ( )

12. Do they approve? Yes ( ) No ( ) 12

13. Where do you expect to get the training needed to prepare you for your occupation? 13

a. high school ( )a
b. junior college ( )b
c. 4 year college ( )c
d. on the job (apprentice or other) ( )d

14. How many years of schooling beyond high school do you think will be required to prepare you for your occupational objective? 14

1 ( ) 2 ( ) 3 ( ) 4 ( ) 5 ( ) 6 ( ) 7 ( ) 8 ( )

15. If you plan to continue your education beyond 12th grade what institutions do you plan to attend? 15

_____

_____

16. If you do not at present plan to continue your education beyond the 12th grade, would you attend Napa Junior College if vocational courses were offered that would prepare you for your life's work? 16

Yes ( ) No ( )

17. If you do not at present plan to continue your education beyond 12th grade, would you enroll in vocational courses at your high school if you were fairly certain that upon graduation you could be placed on a job? 17

Yes ( ) No ( )

18. Would you take vocational courses for general value or background rather than preparation for an occupation? 18

Yes ( ) No ( )

19. Would you be interested in participating in a work experience program where part of your school time is spent learning on the job? 19

Yes ( ) No ( )

20. What subject or subjects do you think should be offered at the senior high school level that are not now offered?

a. _____ 20

b. _____

c. _____

*TECHNOLOGICAL ADVANCEMENT; *EDUCATIONAL NEEDS; INTERAGENCY COOPERATION; *COOPERATIVE PLANNING; EDUCATIONAL COORDINATION; JOB TRAINING; *VOCATIONAL EDUCATION; JOB SKILLS; IMPROVEMENT; LABOR MARKET

We do not have definitive information concerning the extent of unemployment caused by technological change, but we do have good reason to believe that the rate of change has increased and that institutions have not kept pace with technological change. While larger numbers of labor force members are affected by skill obsolescence, there has also developed an increasingly imperfect market mechanism for labor. The basic point is that in order to provide for quicker anticipation of changes, better utilization of information, and development of new types of programs, our institutions concerned with education, placement, counseling, and the utilization of skills must have closer and new relationships. Our philosophy of education in this technologically advanced period must be geared toward a program of life-cycle education that permits people to return again and again for retraining or further education, with a minimal loss of income whenever the need is urgent. Military training is an example of one of a number of precedents for such a plan. The new educational institution must use complicated, sophisticated, job market surveys to devise curriculum content and assure variety of course offerings, with the advice and involvement of industry. State and Federal agencies must work out new, more effective survey and analytical techniques and more effective communication and cooperation with schools, industry, and other government agencies. Discussion followed the address by Dr. Striner, an economist. (ET)

Training in the Perspective of Technological Change

by HERBERT E. STRINER

U.S. DEPARTMENT OF LABOR, W. Willard Wirtz, Secretary
MANPOWER ADMINISTRATION, Office of Manpower, Automation and Training

- This report is one in a series of proceedings of Seminars on Manpower Policy and Program sponsored by the Office of Manpower, Automation and Training. It presents a condensed transcript of the seminar held in Washington, D.C., February 5, 1965.

- The purpose of the seminars is to provide a platform for guest speakers and for members of the Department of Labor and other agencies concerned with manpower problems to discuss issues arising from the development of an Active Manpower Policy.

- Expressions of opinion by the speaker, the moderator, and those participating from the audience are not to be construed as official opinions of the U.S. Government or the Department of Labor.

SEMINAR ON MANPOWER POLICY AND PROGRAM
January 1966

Training in the Perspective of Technological Change

by HERBERT E. STRINER

U.S. DEPARTMENT OF HEALTH, EDUCATION & WELFARE
OFFICE OF EDUCATION

THIS DOCUMENT HAS BEEN REPRODUCED EXACTLY AS RECEIVED FROM THE PERSON OR ORGANIZATION ORIGINATING IT. POINTS OF VIEW OR OPINIONS STATED DO NOT NECESSARILY REPRESENT OFFICIAL OFFICE OF EDUCATION POSITION OR POLICY.

OPENING REMARKS

Chairman—Dr. John P. Walsh, Assistant Manpower Administrator, Manpower Administration

DR. WALSH: Welcome to today's Seminar on Manpower Policy and Program, sponsored by the Office of Manpower, Automation and Training. The purpose of the seminars is to discuss the issues raised in the *Manpower Report of the President* and the development of an active manpower policy.

This Nation's manpower policy recognizes that effective manpower utilization during a period of continued technological change requires a fluidity within the labor force in order to match manpower requirements and resources. Thus education and training become identified as the manpower utilization catalyst. This aspect of our manpower policy will be examined in today's address, "Training in the Perspective of Technological Change."

Dr. Sar Levitan, who is a research associate at the W. E. Upjohn Institute for Employment Research, here in Washington, is the moderator this afternoon. Dr. Levitan has been a member of the faculties of Johns Hopkins and George Washington Universities and is the author of several published articles dealing with aspects of manpower policy.

We are honored today to have as our guest speaker Dr. Herbert E. Striner, director of program development for the W. E. Upjohn Institute for Employment Research. Before assuming his present post he was Washington director of the Urban Studies Program and senior economist with Stanford Research Institute. He has also served on the staff of the Brookings Institution and on the faculty of Johns Hopkins University. Dr. Striner currently serves on the Review Panel of the President's Cabinet Committee on Juvenile Delinquency and Youth Crime and on several other committees.

May I present Dr. Herbert Striner.

TRAINING IN THE PERSPECTIVE OF TECHNOLOGICAL CHANGE

An Address by Dr. Herbert E. Striner

DR. STRINER: Thank you very much, Dr. Walsh.

I want to discuss with you this afternoon some of my ideas on the problem of job training, especially in light of the changes taking place in our economy. I hope to avoid the controversy regarding the problem of structural unemployment vs. aggregate demand. Let me say at the outset that I, for one, feel that there are strong arguments on both sides of the question. I don't mean to straddle the issue, but I do feel strongly that perhaps the continuing argument has done a great disservice to our ability to deal with chronic unemployment and high residual unemployment.

I would like to speak for a while about conclusions I have come to about these problems after serving for about a year and a half on the Review Panel of the President's Cabinet Committee on Juvenile Delinquency and Youth Crime. This may seem to be a bit far afield from the topic "Training in the Perspective of Technological Change." However, I feel that if I spend the opening 10 or 15 minutes discussing training and education in the light of my experience on the Juvenile Delinquency Review Panel, you will begin to see the relevance of this experience to what I think should be done to develop a logical, long-term training program that will help to meet the demands of social and technological change.

IMPORTANCE OF UP-TO-DATE VOCATIONAL TRAINING

I imagine you suspect that the juvenile delinquency program of the Federal Government has to do with corrections and courts. Only in part is this so. This juvenile delinquency program was set up as a pioneering effort to study a social problem—youth crime—not merely from the traditional point of view of courts and corrections and welfare, but also from the standpoint of education, training, and employment. Our objective at the outset was to provide communities with a comprehensive approach to the problem of juvenile delinquency. For this purpose a panel with representatives from various disciplines was established to counsel with community representatives who applied to the Federal Government for funds to combat juvenile delinquency. This panel was supposed to provide the communities with some insight into the meaning of a comprehensive program and to establish criteria for the development of such a program.

As the economist on this team, I was interested in the reactions of my colleagues and the community representatives to my ideas on manpower development in our economy. My colleagues on this panel represented the fields of education, sociology, law, welfare, and corrections. I told these people that vocational training in our new economy could only be effective if information concerning actual job vacancies was gathered and given to the planners of school curricula. This concept was completely new to them. Although for some years people have talked about training in the schools so youngsters can graduate with skills that will enable them to become productive, contributing members of our society, I discovered that no one from the field of manpower or economics had been involved in the development of these programs. And only one member of the panel who happened to have a background in manpower and economics saw such programs as the logical, straightforward attack which I feel they are.

What was most disturbing to me was the indifference or lack of a sense of urgency of many of the community representatives concerning the value of training specifically for employment in light of changing technology and the changing mix of industries, services, and business establishments in their own towns. The

representatives were the community officials—the mayor, the school superintendent, the head of the local employment service, the health and welfare officials—and, interestingly enough, a few citizens from the target area who would usually meet with us to study the prospects after a proposal for a program to deal with juvenile delinquency had been submitted. With one or two exceptions, representatives of roughly 19 communities had no questions about the failure of trainees to find suitable jobs, the adequacy of the educational institutions, or the availability of statistics on job opportunities. Questions were raised about welfare programs, correctional institutions, family agencies, and welfare counseling activities. But, apparently, education and training and other manpower development activities were somehow outside this bailiwick and unrelated to juvenile delinquency. The assumption seemed to be that the pioneering efforts had been made, and that somehow every training program, every educational program, was virtually as good as it could possibly be.

As time went on and I began to observe real problems in existing vocational training programs, it became increasingly apparent to me that very few of the business leaders in the various communities were aware that they had a crucial role to play. Most of the members of the demand side of the spectrum (if education is viewed as the side supplying workers, and business and industry as the side demanding them) seemed content, as representatives of a power structure, to approve the proposed program. The school superintendents did not show much enthusiasm for the idea that their institutions could play a new role (in the solution of the grave problem of juvenile delinquency) through providing better technical and vocational training. Juvenile delinquency was viewed generally as a problem having very little to do with employment and manpower resources. Even in communities where we had an input from the local employment service people, there seemed to be very little interest in new and imaginative programs for job development. For the most part the public employment service was concerned with providing statistics on job orders to the local vocational training people who, hopefully, would use these job orders as a basis for programs to train skilled workers for the open jobs.

Dialogue with Educators

Throughout all the discussion and debate I couldn't help having (and being the object of) a number of very negative reactions. My reaction to the school representatives—and most of them were from metropolitan areas—was: "Don't you see?" I am talking about educators in cities like New York, Chicago, Los Angeles, and San Francisco; I think the smallest community involved was Charleston, West Virginia. I asked the educators: "Don't you see how important it is that you understand the nature of the economic changes taking place in your area and that you understand the meaning of technological change with regard to new skills and job vacancies? You should be attempting to relate your vocational and industrial training programs to the changes in the economy."

Their reaction to my assigning them some responsibility for an entirely new and different function was, very interestingly, a defensive one:

"Dr. Striner, you are not an educator, are you?"

"No, I am an economist."

"I see. Well, you don't have a feeling for the problems of the educator."

"I suppose not. But for what are you educating these people? Apparently one of the reasons you are here is that you are concerned with the high rate of juvenile delinquency and I would assume then that the children you are talking about are not the ones who are going on to a university education. These are children whom we are, I hope, training in a skill which will give them entry into the job market in some position where they can utilize to the fullest whatever abilities they have. Isn't this the role of an educator?"

"Well, yes."

In short, in all but 2 out of 19 communities, each school superintendent seemed to feel that I was prying into educational matters well beyond my scope and understanding, and that their problems could be dealt with much better internally. They were very upset.

Dialogue with Employment Service Personnel

Then there was the reaction of the public employment service. I assume there are some people here today from that organization. It was only with great difficulty that I could get the message through to them that, in spite of what I say, I am really one of the best friends the public employment service has. I sincerely feel that if the United States is to develop a truly effective active manpower policy the public employment service is the mechanism upon which we must pin our fondest hopes. However, we are never going to have more than fond hopes unless we soon recognize where our deficiencies are and decide what to do about them.

The public employment service reaction followed my asking a series of questions: "What do you do to determine the nature of the job market? Do you undertake large-scale, depth surveys of your local or regional industries, business firms, to determine their present needs and the projection of their skill needs for the next 2 to 4 years? Are your people involved in the development or the utilization of new types of testing devices?" (I asked the question on testing because I think that one of our problems, especially with respect to teaching for Manpower Development and Training Act programs, is that many young people cannot take the General Aptitude Test Battery or other types of tests. We must encourage the development and use of non-verbal techniques, which I understand is being done in the experimental and demonstration training programs.)

Their usual reaction was: "Well, we have job information." This was always a little embarrassing; one dislikes hanging dirty linen in front of the sociologists, psychologists, and educators.

So, I gradually had to get my friends from the public employment service to define the difference between job order information and vacancies. This experience proved to be quite a revelation for a number of the businessmen and educators present. They had been assuming that when the public employment service said, "There are 'X' number of job openings in the 'X' trade," this was complete information on local job vacancies. It was a further revelation for them to understand that there are actually no job vacancy statistics in the United States and

that, as a matter of fact, businessmen do not report all jobs that are available. The educators did not know that there is no official program of any sort, that is, a compulsory program, forcing businessmen to report information on job vacancies.

This was a very interesting, mutually educational experience. I felt that some of the public employment service people were equally surprised that the educators relied so completely on the statistics they were getting from the public employment service and on which they based curriculum and course offerings. In a number of communities the public employment service staff very frankly admitted that they would like to get into more sophisticated activity. They would very much like to have the charter and the funds to do a broad vacancy survey in that community—they agreed that this would be ideal.

Dialogue with Businessmen

The reaction of the businessmen was interesting to me. Of the three groups the businessmen emerged best. Their reaction was awfully upsetting to many of my fellow panelists. We all cherish certain images; and usually, of all of the groups in a community, we tend to rate the businessmen down at the bottom—crass, interested only in profit, having very little time for involvement in community activity, and not too much interested in research or in participating in public service programs. But the businessmen, I found, began to lean forward and ask questions. They did not counter with "Whom are you accusing of not getting involved in these programs?" The reaction more frequently was something like this: "Now this is interesting. I have never really thought about it this way, but actually the vocational technical training programs should be equipped to provide me with the skills I need in my work force. I know of a number of businesses in my community where there are severe shortages and no well-trained people to fill them. What you are saying is that perhaps there is a role for me to play. Somehow, I should be getting involved with education and working with the employment service people in a way in which, perhaps, I have never been involved before."

The businessmen give us quite a bit of hope for the changes we have to consider seriously, given the problem of training for

a changing technology. They are, I believe, one of the great untapped resources we must use far more effectively in our efforts to develop more rational programs.

Now to the question, "What does this mean for long-term technological change?" Many of us here probably have read most of the literature on the question of technological change. And I speak for a large number of people in the manpower area when I say that most of us are still very uncomfortable with the data on which we must rely to analyze the rate of technological change and the numbers of workers displaced by it. I don't think we have any definitive studies or data which deal specifically enough with this question to allow us to say with great certainty that there are "X" hundred thousand people unemployed as a result of technological change. I think that after examining all the data we can say only that there seems to be good reason for believing that the rate of change has increased and that, apparently, institutions have not kept pace with technological change.

NECESSITY FOR BASIC CHANGES

Here we are brought to the point of considering training, counseling, early warning devices, and new institutional arrangements, all of which can help us deal with the new problems growing out of increasing obsolescence of skills and products. Unfortunately we have not yet learned to understand the harmful effects of the obsolescent nature of the very institutions that are intended to deal with these problems. The painful truth is twofold: The situation involves larger and larger numbers in the labor force; and, while there is a more rapid rate of technological change, there has also developed an increasingly imperfect market mechanism. Here we come to the heart of an interesting problem in economic theory. Economics teaches that man is concerned essentially with the allocation of resources in a market involving factors for demand and factors for supply. Classically the market is supposed to provide the means by which we can obtain demand information on the basis of which we do something on the supply side to deal with indicated changes in demand. But at the present time—with an increasingly volatile manpower situation—we are being asked to provide information on changes in demand, to process that informa-

tion, digest it, and apply it in better training programs, using a mechanism which is becoming hopelessly inadequate. Our information system is incapable of dealing with these changes in demand.

Now what do we have to do? To begin, we have to recognize that the average rate of unemployment is inadequate as an instrument for indicating needed policy changes. Although we have an average unemployment rate of, let us say, 5 percent, we must always bear in mind that our real problem is dealing with rates of unemployment for sub-groups; these rates may be two or three times higher than the average. It is no news to this sophisticated audience that young male Negroes are in the, let us say, 15- to 20-percent unemployment category. And we all know that there is about 8 or 10 percent unemployment in the group (both white and nonwhite) at the other end of the age spectrum.

The problem is that we are not creating institutions that can deal effectively with unemployment at these levels. Increasing aggregate demand will probably not as quickly affect these rates of unemployment as will the changes in institutions and the development of other devices. If we are to deal with the structural changes in our local economies, we should try to understand what new relationships must be developed. Without these new relationships we will not only continue to have juvenile delinquency problems, but we will also continue to suffer from poor matching between skills (or the potential for providing skills) and jobs.

Change in Schools

The school system should no longer regard itself as guardian of an autonomous function, independent of employment problems and vocational and industrial training. The schools must see themselves as part of a system in which they relate to other institutions. I am referring here to the development of a much closer relationship between schools and the industrial and business community.

What I hope to see develop is a vocational training program geared to a 4- or 5-year planning horizon. I limit myself to this time period because I really do not think, other than as an

interesting academic exercise, we do very well in terms of 10- or 15- or 20-year projections. We all want such projections, but there is a serious difference between wanting something that is helpful, and getting something that is hopeless.

The new educational institution must use complicated, sophisticated, job market surveys to devise curriculum content and assure variety of course offerings. State and Federal agencies must work out new, more effective survey and analytical techniques.

Change in Industry's Relation to Education

In addition, we must utilize active inputs from industry. The industry people themselves must be heavily involved in curriculum design and projections of curriculum changes. They should also be heavily involved in training and retraining instructional staff. We must build an entirely new relationship now.

I find that when you speak of this new relationship with industry people, they do not regard it as something outside their scope. Nor do they regard it as the imposition of an unfair expense. Business people—especially those in industries suffering skill shortages—often indicate a willingness to participate in what they consider a most reasonable investment of their time and funds. In my visits to various communities (in New York, for example, in connection with the Mobilization for Youth Programs) I was surprised at the number of industrial representatives who were interested in retraining vocational training staff in order to provide first-rate, up-to-the-minute training for the students. Here in Washington, a number of printing trades employers have said they would be happy to provide retraining for printing teachers in the school system. Apparently, while visiting one of the vocational programs in printing, they found the level of instruction so far below modern standards that it was practically useless. For wholly selfish reasons, industry wants to be involved. Here is an instance where self-interest can be used to a high degree in achieving an important social goal.

The schools themselves are probably at the core of the problem of change. The public employment service has recognized

the need for modification in the system of education that would include a new relationship between the vocational schools, for example, and the employment service itself. But, because the public employment service is made up of 50 State agencies, the problem cannot be easily solved. Much depends on the State staff's level of sophistication and how far the staff can be prodded or pushed.

Change in Philosophy of Education

It is important also to change our basic philosophy of education. This is the old saw—you have heard it a thousand times—of the theory of continuing education. Now, however, with the stimulus of President Johnson's new program in education, we should emphasize the point that public education should not be limited to a 12- or even a 14-year program. What I am referring to is life-long education. As certain people have emphasized, we can learn much from our experience under the GI Bill about continuing education and the practical nature of this "investment." All of us here know that technological change means the obsolescence of some skills. I hesitate to ask how many in this audience started out doing something they are no longer doing, or how many career changes they have had!

For people who don't have clearly in mind what they are going to be doing for the next 10 or 15 years, or who will be forced to change skills and jobs because of economic and social changes, the effort now must be toward a program of life-cycle education. We must strive for a system of education that permits people to return again and again for retraining or further education, with a minimal loss of income whenever the need is urgent. There are, of course, a number of precedents for such a plan. The military is one example. In the military the high number of inadequately trained men makes training of great importance. The GI Bill after World War II and the recent efforts under MDTA also point the way. In a number of European countries subsidized training is viewed not as a giveaway but as the most logical means of benefiting the entire society through the achievement of individuals who have high-level skills.

Change in Federal Agencies

To make another point: We should be aware that some of our Government agencies—for example, the Department of Labor, the Department of Commerce, and the Department of Health, Education, and Welfare—continually relate to a "constituency." This constituency relationship results in some very significant penalties. For example, the Upjohn Institute has been conducting a study in Erie, Pennsylvania, and one of the things we are learning in discussions and interviews with employers is that a remarkably small percentage of them are aware of MDTA training provisions. A notably high percentage of these people are quite interested in on-the-job training provisions; they are quite interested in programs where, with partial subsidization, they would be able to take on people and provide them with skill training.

I suspect that what easily happens—I don't think that we should be interested any longer in assessing blame—is that there has been a "hardening of the categories" with whom we communicate or do business. Each Department must look at its charter and new legislative responsibilities to determine anew what channels of communication must be developed in order to carry out most effectively the legislative intent of the Congress.

This may mean that the Department of Commerce must have a far different relationship with labor, both union and nonunion. It may mean that the Department of Labor must develop a new relationship with business and management. It may mean that the Department of Health, Education, and Welfare will perceive new relations which it, too, must establish if it is going to make more impact through its programs.

In closing, may I say that the major point I have tried to make today is this: If we expect increasingly rapid changes involving even larger numbers of people and organizations, then we must try to understand the importance of relating our basic institutions to one another. In order to provide for quicker anticipation of changes, better utilization of the information, and development of new types of programs, our institutions concerned with education, placement, counseling, and the utilization of skills must have closer relationships and new relationships.

I do not know if there is really as close a relationship between the physical and the social systems as many believe. I have been somewhat bothered by those who contend that the second law of thermodynamics also has meaning with respect to social institutions. If they are right, then certainly with larger numbers and activities there will be increasing noise in the system and increasing entropy. If this happens, then perhaps we can only throw up our hands and say there is nothing much to be done about it. Hopefully, however, we can develop new, effective filters as we generate more noise in the system.

But in order to do something about all of these problems, we will have to look very closely at some of our institutions and their relationships to determine ways in which they must change. Without new plans which will demand painful adjustments, we cannot reasonably expect to solve the problems that are being generated by increasing rates of technological change and a more fluid society and economy.

Thank you.

DISCUSSION PERIOD

Moderator—Dr. Sar A. Levitan, Research Associate
W. E. Upjohn Institute for Employment Research

DR. LEVITAN: Thank you very much, Dr. Striner. The meeting is now open for questions and comments from the floor.

FROM THE FLOOR: You have implied, Dr. Striner, that technological change is beginning to affect the change makers—engineers and scientists, for example. It is said now that the half life of an engineering graduate is 10 years. This means that in 20 years he retains one fourth of his capability and in 30 years, an eighth—which is a rather small percentage. Will you discuss what can be done to alleviate this type of skill or knowledge obsolescence or what can be done to adjust to the problem?

DR. STRINER: I could talk about this one for a long time. Back in 1953 and 1954 I was with the National Science Foundation and involved in the first survey of research and development in industry. We asked the question, "How many engineers are employed by General Motors?" The answer was, "What do you mean by 'engineer'? You don't mean that fellow we hired

25 years ago as a very good mechanical engineer, but who is now an administrator, do you?" I think that such professionals now will also have to be retrained if they need new skills.

Let me give an example: In agricultural vocational training there are many individuals who teach courses which they should not teach. A teacher of dairy chemistry in Minnesota teaches children how to increase productivity in milk yield at the same time their parents are being asked by the Federal Government to reduce milk output. Someone says, logically, "Why are we funding this program in agricultural vocational training when we are trying to curtail output? This is nonsense. This man shouldn't be teaching this at all." If the teacher hears, of course, that someone is attempting to do away with his job, one of his first reactions is purely defensive. He wants to keep his job. I suggest that we consider retraining this teacher—who is probably a graduate of a first-rate agricultural college and has taken courses in basic chemistry, zoology, botany, physics, mathematics—to teach general chemistry in the local high school, where there is very probably a shortage of good general chemistry teachers.

Returning to the question of the engineer, I think there is nothing wrong with a man trained as an engineer for work in industry considering the possibility of teaching. Neither is there anything wrong with a retraining program which moves an engineer from one area into another. The problem is that one would like to feel that he has been trained for life once he has finished his formal education; this is true whether he is trained as a physician, an engineer, an economist, or a sheet metal worker. But the world changes, and we have to change our perspective and our goals and objectives. Increasingly, individuals during a life period will experience two or three substantial changes in occupation. We must alter our institutions so that this change-over is not done in a sloppy, wasteful manner. If the individual wishes to train even for a basic change—from, let us say, biology to engineering—there should be an opportunity for him to do so. I don't think that this opportunity exists now.

There is another problem, of course, in the physical sciences. The Federal Government now provides the major market for physicists and mathematicians. The Government's demands have

caused the number of such scientists to increase. But changes in the military, political, or diplomatic relationships of the Government can create a glut. An income adjustment, perhaps a painful one, will occur for many scientists as a result. For example, a physicist, recently out of graduate school with a Ph.D., may be hired at $14,000 per year by a private company on contract with the National Aeronautics and Space Administration or with the Department of Defense. After the emergency ends which provided the job, this physicist may have to accept an assistant professorship at a university. His new income level, probably $9,000 to $11,000 per year, is then dictated by a more normal supply-demand relationship.

FROM THE FLOOR: I remember that from 1939 to 1941 and then during wartime, tremendous emphasis was put on in-plant and on-the-job training. Now, in the recent literature, I see almost no reference to the development of on-the-job and in-plant training programs. My question is two-part: First, has there been any change in emphasis by management in industry on these programs? Is the emphasis increasing or decreasing? Second, if there still are such programs, what is their relation to the more formal kind of vocational training programs that you are talking about?

DR. STRINER: I don't think that I can answer the question completely. I will try to answer the part that I am competent to answer, and if Dr. Levitan wants to add something, fine. He probably knows a good deal more about this particular problem than I do.

On-the-job training (OJT) has, I think, been terribly underestimated as a source of skill acquisition and employment. I have not discerned in the past 12 to 18 months any major increase in OJT. It has not been pushed in this country as far as it should be. There is a considerable amount of room for OJT.

In other countries I have observed that OJT is conducted with much more interest and success than in our country. To stimulate OJT here it is necessary to establish a new relationship with industry. Industrial leaders must be asked to give their ideas on development of OJT. They may sometimes reply: "Should we subsidize OJT at all?"

Here perhaps I can anticipate the question of whether industry should do more of its own training. There are real reasons why many industries look to a common source for training rather than do it themselves. Some classical economists feel that industrial policy in this area should be governed by the market mechanism. When the situation gets bad enough, industry will begin to train because the marginal cost of not training is much higher than the marginal cost of training. My reaction is that a number of large, highly competitive industries will not train, because there is no guarantee that they will be able to keep the trainee long enough to get any investment return.

I have asked men in the automobile industry why they don't train more of their own personnel. They gave an honest, reasonable reply. They find that after they train a good carburetor man, for example, it may be only a few weeks before he is hired by another firm. After this happens a few times, they stop training—they merely steal from each other. One individual stated that many auto industry officials would be quite interested, however, in providing some funds and training personnel to a public vocational training program.

In Japan the 1958 Vocational Training Act provides vocational training both for adults and children. (In most countries, vocational training is for adults as well as youngsters.) The Japanese emphasize on-the-job training; their federal government, working through the prefectural government, provides help for curriculum development and capital facilities. Apparently this has worked very well.

FROM THE FLOOR: In Japan isn't there a tendency on the part of the worker to stay with the firm?

DR. STRINER: Only in the very large firms is this true. This training program was not developed for the large firms, because the large ones have their own. The Japanese were trying in 1958 to encourage the growth of small and medium-sized firms. Their efforts have been fairly effective. In Japan a rather paternalistic relationship still exists between the large firm and the worker; usually the worker is there for life.

FROM THE FLOOR: Your comment on on-the-job training is interesting because some recent Office of Manpower, Automa-

tion and Training mimeographed material indicates that firms are having a lot of trouble with middle management people. Such firms train recent college graduates at considerable expense for 2 or 3 years. The trainees work for a couple of years after training and then accept employment with another firm. The companies are seriously reconsidering their training programs.

DR. LEVITAN: I have one footnote on OJT. Private industry does an extremely poor job of publicizing the amount of training that it does. Consequently, the public is not aware of it. Someone remarked to me the other day that General Electric spends more on education and training than Harvard University. I haven't verified this statement, but it indicates the amount of training in private industry.

FROM THE FLOOR: Has automation produced machines and techniques for forecasting production changes in industries so that better predictions concerning job openings can be made?

DR. STRINER: By means of computers and inventory models, we can estimate possible changes in production in certain industries. But machines for making large models concerning future behavior of the economy or the society are well in advance of methodology in using them. We haven't put sufficient research money into the development of long-range forecasting techniques. We are developing better data, but in some cases we don't have enough information. For example, we start out with input-output analyses. We have an input-output table for 1958 which should be a very helpful tool for making predictions. But a 90-order table is really not adequate. A much more complicated table is needed, probably a 400-order table, in order to predict iterative effects of changes in any one column or row.

There are some advances in techniques such as the Program Evaluation and Review Techniques (PERT) which have been applied by the military. They are concerned for the most part with the trade between dollars and time. This is very relevant to education. I wonder whether anyone in the Office of Education is aware of the application of PERT costing techniques to the establishment of criteria for developing new educational programs or even building programs. PERT techniques were

used very successfully in the development of military programs to answer the question: "To what degree is there more money than time?" This discussion is very relevant to education and training, because I suspect that the problems of education and training, especially of the disadvantaged groups in the urban areas, involve trading money for time. I have taken part in a number of discussions where this question has been raised but where no one has been aware of critical evaluation techniques or PERT costing techniques. This is an example of moving technology from one area into another.

A worth-while expenditure of investment funds by OMAT or by other agencies would be the financing of a study of research that has been done by generic areas (categories) to determine to what degree there is a transfer value of research, let us say, from military programs to civilian programs. Another big area which could be explored is research which some major companies have done on logistic problems in military programs. Much of the research and development of decision-making models concerning logistic problems is completely applicable to large urban transportation problems. The names are different, but the generic character of the problem is very much the same.

FROM THE FLOOR: Your experience in the Juvenile Delinquency Committee of orienting 19 cities to the need for training poses the broad question of how to develop the institutional forms for spreading this or any significant information relating to the well-being of the Nation. Will you comment on this.

DR. STRINER: I think the problem of transfer of knowledge is an important one. During 3½ years in military research work I was impressed by the very systematic use that the military makes of its research. The research is step one; the use of the research is step two. We civilians sometimes forget step two.

What civilians should do after research is completed is ask themselves: "Who are the customers? Who are the people for whom this is intended? Is it intended for my next-door colleague? Is it a basis for a good article in the *American Economic Review* or the *Industrial Relations Research Association Bulletin*?" What we really want to do with research is to communicate its results to the proper individuals for action programs.

In the military usually the researchers re-package their research in the form of lectures and seminars appropriate to the varying level of sophistication and understanding of the user organizations. The first briefing, for example, may be for a full colonel or a two-star general. The briefing is intended to indicate to him the import of the research for his operation. He in turn makes sure that this information is passed along in the form of briefings and discussions to others in the organization. I have seen research reports which took a year to prepare and then were briefed for 8, 9, or 10 months. Here almost as much money is spent on the dissemination of that research as on the research itself.

Is this a waste? It's not half as wasteful as doing the research, putting it on a shelf, and then perhaps because no one knows of it, seeing it redone somewhere. I would like to have a hundred dollars for every wheel that has been re-invented unknowingly. This happens in the military, too. When there is a scarce resource—research people or administrators—the question should be not just "How do we get this done?" but "How do we get this done in such a way that we maximize the transfer of this information to the individuals with whom we are really concerned?"

Civilians can profit by this lesson. For example, after the juvenile delinquency panel had been meeting and funding programs for about a year, it was suggested that an analysis be made of what was going on in each city, what had been learned, and the degree to which some of what had been learned in New York, Cleveland or Boston might be relevant for the program in Los Angeles or Houston. This had not been thought of. Each city was operating by itself. What had been learned in the other communities was not being disseminated.

DR. LEVITAN: I want to add a remark dealing with research done on contract for OMAT. One way to disseminate information and speed up publication of the final product would be to eliminate the review process. And as a general rule—there may be exceptions—every time OMAT gives a grant for a research study, "X" number of dollars should be allocated for printing and distributing the product. Copies could then be sent to a number of researchers.

FROM THE FLOOR: We have to give equal time to the Government Printing Office and to the Solicitor's Office.

DR. LEVITAN: Why?

FROM THE FLOOR: Because this isn't the military.

DR. LEVITAN: You mean you are not allowed to have the contractor publish his study?

FROM THE FLOOR: We cannot supply funds for private printing, except under exceptional circumstances, and there are reasons why this makes sense. But I think that you are uncorking a subject that would involve quite another seminar.

DR. STRINER: Let me suggest one simple, inexpensive solution. Every Government contracting grant, except in a security area, should have a stipulation stating that after 90 days the contractor is free to publish any part of the information contained in the report. There may be some exceptions to this, but what I want to do is to make this the rule.

FROM THE FLOOR: This is done.

DR. STRINER: It is done occasionally.

FROM THE FLOOR: True.

DR. STRINER: I have gone through a number of arguments at the Department of Health, Education, and Welfare (HEW). I don't know about all bureaus in the Labor Department and their restrictions.

FROM THE FLOOR: You have broken new ground in the Labor Department.

DR. STRINER: The attitude exists that the contractor does not have the right to publish without consent for 1 year. I finally was able to persuade HEW to change the rule to 3 months. I know that OMAT has this rule, but I do not know if every one of the Labor bureaus has it. I think that in a number of Government agencies the rule tends to be to withhold publication for a year. Unless it can be shown that security is involved or that the nature of the data is so tenuous because the sample was so poor, I think that contractors should be free, and encouraged, to publish.

FROM THE FLOOR: May I change the subject and say that I feel it is not necessary for the government and industry to provide all vocational retraining. The spare time that society generates by technological change—for example, the change in the work day from 16 hours to the present 8—is capital for the individual to invest in learning a hobby, in having a good time, or in teaching himself something. The issue is: "What is the responsibility distribution for training?" Certainly the individual should have some. Certainly the governmental agencies and the companies should have some. Perhaps the companies and the agencies could assist individuals in working out a program for themselves which will, in the light of broader knowledge about possible obsolescences in skills, help to decrease this obsolescence.

DR. STRINER: I agree that there should be more counseling. There is a critical shortage of first-rate counseling at the high school level. We should have complete life-cycle education and complete counseling for people who recognize that they have an obsolescent skill or are in an obsolescent industry. Counseling could assist them in their decisions on type and location of training.

I have not worried very much about the problem of increased leisure time. I have been more concerned—I am not saying this derogatorily—with the problems of the underemployed and the unemployed.

FROM THE FLOOR: We have talked about life-cycle training on the optimistic assumption that if everyone works hard enough and studies enough, there will be enough jobs for everyone. But what about automation? If we don't have enough jobs, what will happen to the unemployed?

DR. STRINER: I have not yet seen studies which contain sufficient evidence to tell us the number of jobs which will be disappearing. Most of the studies concerning technological displacement are based on very simple linear extrapolations of productivity change. Nothing has been done to determine the degree to which there can be transference or to predict increases in the demand for other types of services. The degree to which we need training to move people from one area into

another area is not known. We can look to the services sector, especially semiprofessional services, and to the educational sector for a large number of open jobs, but even there we do not know how many.

I am not trying to "weasel"; unfortunately, we are operating with data such as productivity analyses which do not tell us how many people are being put out of work. One would almost have to trace individuals to find out if they are unemployed. In 1951, when I was in the Bureau of Mines, the United States was producing about the same tonnage of bituminous coal as it is now. But in 1951 there was a bituminous coal labor force of approximately 430,000. Today it consists of about 135,000 miners. This is technological displacement. The real question is to what degree there were job opportunities, perhaps involving some mobility, for which we did not train these individuals.

OMAT is supporting the first study (which should have been supported years ago by other organizations) concerning the psychological, sociological, and economic factors affecting ways in which the unemployed look for work. This is a great credit to the Department of Labor. Three hundred thousand miners were thrown out of work and were never given the opportunity of being re-absorbed into the economy because of various factors which should have been dealt with. This research study will help us learn the factors and give us something to build on.

We tend to look at technological change as a device either for assuaging our consciences or for writing off analyses of the problem. We have yet to come up with an answer as to why we have so much unemployment. Unfortunately we have had neither the courage nor the good luck frequently needed to get the necessary data.

Let me congratulate the Department of Labor. It has made a number of attempts to obtain funds for new types of information for new types of problems. Many of these requests have been turned down by officials who perhaps do not realize that it takes more than just numbers; it takes relevant numbers. I think that everyone in this room has been in the situation of a man dying of thirst in a rowboat in the middle of the Atlantic Ocean. Someone from Mars dropped down who didn't know the difference between salt water and drinking water and asked

him "What is wrong?" The man said, "I am dying of thirst." The Martian replied: "This is nonsense. Look at all this water!" This is very frequently the reaction of someone to whom you say "We need more data," when you have statistical abstracts and Bureau of the Census publications lying on your desk.

I'd like to mention one more thing with respect to unemployment—the problem of too low a level of aggregate demand. Without a sufficiently high level of economic growth, training programs cannot be a solution to unemployment, because only demand creates jobs.

THE CHAIRMAN: Thank you, Dr. Striner and Dr. Levitan, for a very interesting discussion.

STANISLAUS COUNTY MULTI-OCCUPATIONAL ADULT RETRAINING PROJECT; MODESTO; CALIFORNIA

Designed to prepare adult trainees to assist the professional staffs in nursing homes, convalescent homes, and retirement centers, the program developed by college personnel was based upon an outline prepared by representatives of professional associations and the State Department of Health, Welfare, and Education. It began on a five week basis but with the fifth class, began to operate six hours a day for ten weeks. The major phases were: (1) classroom lectures and demonstrations during weeks one through three, (2) clinical work at the State Hospital during weeks four and five, (3) three days in the classroom and two days on field trips during the sixth week, and (4) three days in nursing homes and two days in the classroom during weeks seven through ten. The curriculum centered about: (1) patient care including such activities as admitting and discharging patients, taking temperature and pulse, taking blood pressure, bathing patients, bed-making, specimen collection, and assisting patients to eat and move about, and (2) room and equipment care. Attitudes, personal hygiene, and effective communications are stressed. The teacher was a registered nurse with 33 years of experience including supervision and administration. The 134 students enrolled in the nine classes ranged in age from 18 to 58 with an average age of 35 and an average of nine years of education. At the time of enrollment they had been unemployed, working less than full time, or working at a skill below their ability levels. Selection standards were established by the Department of Employment and the school with screening handled by the Department and including components of the General Ability Aptitude Test Battery as well as personal evaluation by the counselor. Sixty-four of the 121 graduates reported that they were employed at the time of follow-up. (JK)

Facility: Modesto Multi-Occupational Project

Class: Nurse's Aide

Objective: To prepare adult trainees to perform successfully as nurse's aides in nursing homes, convalescent hospitals, and retirement centers.

Background of Trainees: The trainees were either unemployed women who could not find appropriate work because of their lack of education and/or training, or women working less than full time or at a skill below their ability level. Most women who entered the program had some prior work experience, primarily in unskilled work. A few of them had cared for chronically ill persons or individuals with long-term illness in their own family before entering this training.

Nine classes, with a total enrollment of 134 have been completed. The age of these women was between 18 and 58 with an average age of 35. Fifty-six percent of the women were married, 32% were divorced, widowed, or separated, and 12% were single. Forty-one percent were the primary support of their family, with an average of one dependent each. Average number of children for the entire group was 3. They had lived in California an average of 21 years and in Stanislaus County an average of 12 years.

They had completed an average of 9 years of school. All had been employed previously in such jobs as food processing (29%), domestic work (28%), and the culinary field (12%), and had worked an average of 4 years with an average hourly wage of $1.29. Thirty-six were receiving either

unemployment or welfare assistance, and 47% were re-entrants to the labor force. The average annual income per family was less than $3,000 for 54% and under $5,000 for 76%.

Source of Trainees: All trainees were referred to the class by the Department of Employment. Any woman who was unemployed or under-employed, lacking in a skill in demand in the local labor market, 18 years of age or older, available for employment at the end of training and having two years of work experience met the basic eligibility requirements for training. After eligibility had been established, trainees for the course were selected through a specific program of testing and counseling.

Women possessing those attributes that would suggest the ability to profit from the course were referred directly to the nurse's aide class. Those lacking basic skills in reading, writing, arithmetic, or interpersonal relationships were referred to classes designed to provide these abilities before they entered the nurse's aide program. Through this procedure, individuals who were qualified to succeed in this course and find employment upon completion of the course were selected.

Selecting Trainees: Standards for admission to the class were established by the Department of Employment, Modesto office, in conjunction with the educational staff of the Modesto Multi-Occupational Project.

The General Aptitude Test Battery was used for establishing aptitude of the trainees, who were tested at the Department of Employment. Four specific aptitudes were identified by the Employment Service through studying nurse's aides in the labor force. They were as follows:

Intelligence or General Learning Ability - This measures the ability to "catch on" or understand instructions and underlying principles; the ability to reason and make judgments. It is closely related to doing well in school.

Verbal Aptitude - This indicates the ability to understand meaning of words and ideas associated with them, and to use them effectively. An attempt is made to determine the ability to comprehend language, to understand relationships between words, and to understand meanings of whole sentences and paragraphs. It indicates the ability to present information or ideas clearly.

Motor Coordination - This indicates the ability to coordinate eyes and hands or fingers rapidly and accurately in making precise movements with speed. It indicates the ability to make a movement response accurately and swiftly, and is related to reaction time.

Manual Dexterity - This indicates the ability to move the hands easily and skillfully, and the ability to work with the hands in placing and turning motions.

The level of ability needed by a nurse's aide in each area was determined through studying the scores earned by working nurse's aides. These scores were used as guidelines to select the trainees. Those persons who clearly fell below the necessary ability level were not referred to this program.

In addition to a testing program, each trainee received a personal evaluation by an Employment Service counselor. The evaluation was based on such factors as: previous education and/or training, work experience, including skills and abilities, occupational interests and goals, including ambitions, leisure time activities of the prospective trainee,

personal characteristics, including personality and attitudes, environment and financial background, health and physical capacity.

The following standards were established as personal attributes which were needed before one could enter nurse aide training: (1) Adaptability to changing work assignments, (2) Physical strength as required for the job, (3) Ability to read with understanding and to write legibly, (4) Neatness of appearance, (5) A desire to help others, (6) Stability to remain calm under work pressures and in emergency situations, and (7) Education at the eighth grade level.

Background of Teacher: The teacher was required to be a Registered Nurse with a teaching credential.

The present teacher has had 33 years of experience as a nurse, of which twelve have been supervisory, including the following assignments:

4 years as Assistant Director of Nurses, Modesto City Hospital

4 years as Surgical Floor Supervisor, Modesto City Hospital

4 years as Night Supervisor, Medina Community Hospital, Medina, Ohio.

As a nurse, teacher, and supervisor she had accepted for herself and others in her profession a high level of requirements in education, performance standards, and responsibility. She had come to regard these standards as natural, normal, and inevitable. They were the price one paid for the privilege of being a part of the medical profession -- a highly desirable profession -- and the individual had to rise to meet the profession; the profession did not lower its standards to accommodate the individual. This concept of her profession had formulated, to a large degree, her philosophy, her attitude, and certain personality characteristics.

She had developed a thorough knowledge of all the requirements of her profession, both personal and professional, skill, techniques, administrative ability, resourcefulness, determination, and the ability to work with other people in the medical profession. She enjoyed a challenge, and was indefatigable in meeting that challenge, once it had been accepted. She had retired from active duty as a nurse without actually being either mentally, physically, or emotionally ready for or in need of retirement. The establishment of a program to train nurse's aides appealed to her as a challenge worthy of her efforts.

The medical profession had no established program for training nurse's aides. The only known program, in another MDTA project, was in the formative stage also, and the first class of that program had not been particularly successful.

Therefore, in order to establish and successfully conduct such a program, she had to utilize the information, experience, characteristics, and ability developed in her professional life. In this position other characteristics were emphasized such as involvement, personal concern for the individual, imagination, and empathy.

She was empathic and realistic enough to set standards of performance within the reach of the trainees and at the same time acceptable to the work situation they planned to enter.

She understood that the background, previous training, and educational level of the trainees caused many difficulties for them, but she evidenced a conviction that they could, with diligence, overcome those difficulties and pull themselves up. She was direct and candid in pointing out to a trainee that her attitude, personal hygiene, or job

performance required improvement. She was strict, but fair and impartial in evaluating the trainee's progress, and unyielding in requiring that established standards be met.

Much of her success as a teacher was attributable to the fact that she exemplified in her knowledge, attitudes, personal hygiene, and techniques the profession she represented and obviously respected. Her students were, by observing and associating with her, moved to respect her and her profession and try to acquire similar knowledge, attitudes, and techniques.

By setting high standards she prompted good performance.

Time: The course was set up for 10 weeks of training with six hours of instruction a day for a total of 300 hours. (The first four classes were only five weeks long, but this was found to be too short a time to provide the necessary training.) The class was arranged in the following schedule:

Weeks 1 - 3	Classroom for lectures and demonstration
Weeks 4 - 5	State Hospital - Clinical work
Week 6	Three days in classroom Two days on field trips
Weeks 7 - 10	Three days in nursing homes Two days in classroom

Space and Equipment: The class was conducted in the nursing classroom and nursing arts laboratory of Modesto Junior College, in selected nursing homes in this area, and in the State Hospital in Modesto.

Instructional supplies and equipment provided within the budget for the program included binders, paper, pens, pencils, textbooks,

uniforms, shoes, and expendable supplies to be used in classroom demonstration. Specialized equipment needed for demonstrating and practicing methods and techniques was available in the hospital where clinical experience was gained and in the homes where work experience took place.

Curriculum Development: The original curriculum was developed by a committee composed of Dr. Evelyn Pederson, Director of Nurses at Modesto Junior College, Miss Anna Lindbloom, retiring Director of Licensed Vocational Nursing at the Modesto Junior College, and Mrs. Alta Walter, the teacher. These three women consulted with administrators in nursing homes regarding their needs, and with teachers in the nursing program at the Modesto Junior College as to how these needs could be met.

Based upon the information gathered, an outline provided by the medical profession, and their own experience, these women established the curriculum for the first class. The outline of a nurse's aide program, which had been prepared by representatives of the California Medical Association, California League for Nurses, California Hospital Administrators Association, California Association of Nursing Homes, and the State Department of Health, Welfare, and Education, was used as a basis and revised to make it adaptable to this area.

The original curriculum was modified by experience gained with each succeeding class. Student's suggestions arising from their own problems and needs, the comments and suggestions from supervisors at the state hospital and private homes, and the teacher's observation affected and helped to form the curriculum.

Of particular assistance in improving the on-going program and solving problems which arose was an advisory committee which was

established for the class. The committee was composed of six representatives of nursing homes, a representative from a retirement center, the director of nurses from a private hospital, the director of nurses from a state hospital, and a representative of the California Nurses' Association.

This committee offered suggestions and advice on such diverse subjects as length of time needed for the program, need for future classes, methods of orienting nursing home owners to the areas with which the student was familiar, areas needing greater emphasis, budgets, and planning.

Since nine classes have now been completed the program is well established, but it is continually being enlarged in scope to meet community needs.

Course Offering: The contents of the curriculum were developed to train nurse's aides to assist the professional staff in nursing homes, convalescent hospitals, and retirement centers by performing routine tasks, such as the following:

1. Patient Care

    a. Admitting and discharging patients

    b. Watching and answering call lights

    c. Taking temperature, pulse rate, and blood pressure

    d. Assisting patients in personal hygiene, bathing patients, and helping them walk and eat

    e. Bed making

    f. Assisting patients into wheel chairs, on to stretchers, into bed or walker through the use of proper body mechanics

    g. Collecting urine and fecal specimens

h. Making hot and cold applications

i. Attending to the religious and legal aspects of their job in relation to the patients.

2. Room and Equipment Care

a. Cleaning rooms and instruments

b. Caring for equipment and flowers

In addition, the curriculum was designed to help the trainee develop the following:

1. Acceptable attitudes and personality traits

2. Acceptable personal hygiene, cleanliness of self and clothing

3. Understandable written and oral communication with other staff members

4. Understandable oral communication with patients

5. A knowledge of how to apply for and hold a job, and what to expect in a work situation.

Additions to future classes will include training in occupational rehabilitation therapy.

Teaching Methods: The teacher was more concerned with the "matter" of teaching than the "manner," and her emphasis was on subject matter rather than method. She prepared a complete, well-organized course outline and adopted a systematic approach to presentation of the material which stated, illustrated, demonstrated, and re-stated the necessary information.

1. Classroom Work - 1st session

The class started with three weeks of lecture, film, workbook study and demonstrations in the classroom. During this period the teacher covered the essential information the trainees needed before they entered the second phase of their training, clinical experience.

2. Clinical Experience

During the fourth and fifth weeks of the course the trainees were taught through clinical experience in the geriatric wards for women in the state hospital. Here, in teamwork with an employee of the hospital, the trainee helped care for senile women. The purpose of this experience was to allow her to practice what she had been taught about body mechanics, making an occupied bed, communicating with a patient, feeding a patient -- in short, to perform in an actual hospital situation what she had only play acted in a classroom before. To help her learn from this experience, her work was observed and evaluated by supervision in the hospital and by the teacher. On the basis of this observation and evaluation the teacher helped individual trainees improve their performance.

A second purpose of clinical experience was to give the trainee an opportunity to get a true conception of what was involved in being a nurse's aide, and to decide whether she was both capable and desirous of continuing in this occupation.

3. Classroom Work - 2nd session

Clinical experience was both accompanied and followed by classroom study during which the teacher reviewed previous instructions and introduced new material in preparation for work experience in nursing homes and retirement centers.

4. Field Trips

Instruction during the second period of classroom study included two field trips. Field trips were made to physio-therapy, occupational therapy, and rehabilitation centers of the state hospital and to the city morgue or a funeral home. The purpose of the trip to the therapy

center was to introduce trainees to an area of work they would not study in the class but might be interested in learning. Interest and need for this type of training had been increasing steadily since the classes were started, and it will be included in the curriculum for the future nurse's aide training class. The purpose of the visit to the city morgue or funeral home was to have the trainees instructed by a mortician in the correct method of handling and caring for bodies of the deceased until they are placed in the care of the mortician.

5. Guest Speakers

Films and guest speakers were used to augment the lectures and demonstrations given by the teacher. The films were used to illustrate work techniques, acceptable dress, neatness standards, and personality requirements for women working in hospitals and nursing homes. Guest speakers were invited to bring specific information about an area in which they were well qualified. The correct method of emergency lifting was described and demonstrated by a fireman. Provisions and benefits of the Social Security program were presented by an employee from the Social Security office.

6. Work Experience

Presentation of this material was preparation for the seventh through the tenth weeks of the class when the women were placed in nursing homes for work experience. Each woman worked in three different homes, and met the standards and requirements of the home. Purpose of this work experience was to provide additional practice in procedures and techniques, and to re-affirm the classroom instruction as to acceptable dress, personal appearance, health standards, and attitudes

required of the nurse aide. A trainee who was not allowed to work because she had a cold learned very quickly that health standards were vital to her job. Once again work performance was observed and evaluated. A final summing up and review took place in the classroom.

Job Placement: Job placement has been good for women who have been trained in the nine classes so far completed. This has been due to:

1. The demand for nurse's aides in this area, which has exceeded the supply during the period covered by these classes.
2. The work experience in the homes, which acquaints the supervision with the program and the trainees and leads to employment of these women.
3. The job performance of many of the earlier trainees from these classes, which caused their supervisors to hire additional trainees. The four homes which use the greatest number of women employ 15, 10, 8, and 6 respectively. One of these homes hires exclusively from this program unless help is absolutely necessary when trainees are not available.
4. The wide acquaintance and good working relationship of the teacher with supervisory personnel in nursing homes, convalescent homes, retirement centers, and hospitals has helped this program become well known. As a result the teacher is kept informed of job openings and her recommendation of a prospective nurse's aide carries a great deal of influence.
5. The advisory committee and its active interest in the program has helped bring about knowledge and acceptance of the program in homes and centers.

6. The number of hospitals in this area also helps in the placement of nurse's aides. While hospitals will not employ women directly from the course, they will accept them after eight months or more of work experience. As experienced women move into the hospital jobs they leave jobs which can be filled by beginners.
7. The local Employment Service office has personnel assigned to assist in job placement of women who complete this class.

As of December, 1965, there were 722 beds in nursing homes in this area. In addition, there were approximately 585 beds in hospitals, exclusive of the state mental hospital, and plans for the addition of at least 223 beds within two years.

The Stanislaus County Health Planning Council is presently working on a master plan for this county. Their findings and recommendations, coupled with demands for medical personnel which result from the new medi-care program, and a survey to be conducted by the Employment Service, will predict the future demand for nurse's aides and related personnel such as orderlies and home health aides. A greatly increased demand is anticipated.

Conclusion: Some indication of the success of this program may be found from studying the follow-up statistics accumulated by the Department of Employment as shown in the following charts.

Employment Status of Nurse Aide Trainees At Time of Current Follow-Up

Classes 1 through 8

No. Trainees		Currently Employed		Currently Unemployed		Out of Labor Force		No Response	
No.	%	No.	%	No.	%	No.	%	No.	%
121	100	64	53	34	28	10	8	13	11

Classes 1 through 4 *

No.	%	No.	%	No.	%	No.	%	No.	%
62	100	28	45	28	45			6	10

Classes 5 through 8

No.	%	No.	%	No.	%	No.	%	No.	%
59	100	36	61	6	10	10	17	7	11

* Classes 1 through 4 were only 5 weeks in length, and it is considered that the insufficient time allowed for training was responsible for the significant difference in the number and percent of trainees employed.

The guidelines, developed as a result of the State Health Careers Councils Personnel Workshop in March, 1966, provide assistance to the states to establish or strengthen councils devoted to seeking solutions to health manpower problems through coordinated activities of the individual agencies working in this area. Presented in question and answer form, the manual treats the need for councils, modes of organization, agency membership, objectives, direct and indirect services, membership activation, committee responsibilities, roles of the board of directors and advisory committees, responsibilities of the executive, fund raising, federal funds, research by the council, and program evaluation. November 1966

PREFACE

The State Health Careers Councils Personnel Workshop met in St. Louis, Missouri, at the end of March 1966. The Workshop made recommendations for national action in the recruitment and training of health personnel and provided a source of new information for the development of additional State Health Careers Councils.

The following guidelines were developed as a result of this meeting. In the form of questions and answers, they provide criteria for States to establish Health Careers Councils and for already existent Councils to strengthen their programs and to develop new approaches to their organizational pattern.

TABLE OF CONTENTS

Page

Definition of State health careers council; need for council; affiliation of council; representation of membership 1

Broad objectives of council; difference between direct and indirect service; components of direct service 2

Components of indirect service; criteria for membership; relationship of member agency. 3

ORGANIZING COMPREHENSIVE STATE HEALTH CAREERS COUNCILS

1. What is a State Health Careers Council or Committee?

   An organization whose program is devoted to seeking solutions to the health manpower problems of the State through coordinated activities of individual agencies working in this area.

   (Throughout this document, "council" is defined as either a council or committee, depending on organizational structure. It may refer to either a State or a metropolitan organization.)

2. Why do we need a State health careers council?

   To coordinate all educational facilities fully to utilize existing staff as instructors; to conserve the staff and facilities and use these to their maximum.

   Counselors cannot meet the demands of all health practitioner groups and need assistance to provide opportunities for students to be exposed to occupational areas of health. The time has come when health occupations must assume and assert a competitive approach with art, business, industry, and allied science in drawing on a common pool of manpower. A State health careers council can organize programs to reach housewives, the retired, and the handicapped to encourage their entry into health careers. In such programs, the romance and satisfaction of such careers and the potential for advancement should be stressed. Health careers is a field where there is little possibility of complete automation, thereby providing some security.

3. What is the affiliation of a State health careers council?

   There are two types:

   a. A voluntary nonprofit organization with its articles of incorporation, board of directors, advisory committees, program and staff.

   b. A committee or program of an existing voluntary nonprofit agency, such as a health council or a hospital association.

4. What is the representation of the membership of a State health careers council?

   Membership should include all official and nonofficial State agencies relating to health, education and coun-

seling. This would include health practitioners' associations, voluntary health agencies, educational, counseling, parent and civic groups, as well as representatives of business, industry and the legislature.

The strength of the council is the broad representation and support of the entire community.

5. What are the broad objectives of a State health careers council?

Decision has to be made early in the planning whether the objective of the State health careers council is merely to recruit or if it is to marshall all the resources in the State to attack the health manpower problems. This implies identification of resources and stimulation and coordination of the members to accomplish the objective.

Once the objective of the organization has been established, then the articles of incorporation can be developed and the program priorities established before seeking funds and staff to activate this program.

The objectives will also dictate whether the council's program will be on a direct or an indirect service basis.

6. What is the difference between direct and indirect service?

Indirect service is providing consultation and coordinating information to local groups to assist them to develop programs to meet student and counselor needs.

Direct service is providing consultation and information to students and counselors.

Whether the State health careers council is organized to give direct or indirect service, or both, some provision should be made for special research projects and for regular evaluation of the program.

7. What are some of the components of a direct service program?

a. Provision of speakers, panels, and publications aimed at students and counselors.

b. Development and presentation of assembly programs.

c. Conducting specific career days.

d. Conducting field trips to health facilities.

e. Providing scholarship information to students and their families.

f. Referral resources to meet individual student needs.

g. Formation and development of health career clubs.

8. What are the components of an indirect service program?

a. Coordination services for resources and referrals.

b. Publications.

c. Consultation to local groups in organizing career days, field trips.

d. Clearinghouse for materials available on recruitment, educational facilities available in the State, and scholarship information.

e. Conducting seminars for local health career personnel, educators and counselors, as well as volunteers and local committee and Board members.

f. Research projects directed toward State needs and manpower problems, including implementation of findings.

9. What are the criteria for membership?

Any group whose program is directed toward providing service in health or education or whose interest relates to one of these. For example: business and industry should be interested in the health and educational standards and facilities of the community; parents should be interested in the future of their children; students in realistic work situations to assist them in setting their goals for the future.

The State departments of health and education, as well as the practitioners' associations, have as their vital responsibility these two areas and should provide leadership to the State health careers council. Provision for individual memberships may be included in the by-laws.

10. What is the relationship of the member agency to the State health careers council?

Because the program and objectives of the State health careers council are directed toward providing students with educational facilities that will lead toward a career in health services,

the member agencies should have an equal responsibility. There should be joint cooperation to fulfill the objectives of the agency--which is to provide solutions to the broad health manpower and student needs as identified in the individual States.

While each agency must retain its responsibility to its own membership and programs, these should in no way conflict with the broad objectives of the health careers council. In addition there should be assurance that each agency will have equal opportunity to participate and to assume responsibility without a dominant role being assumed by any of the "professions." The council should be the highest form of democratic organization and all members should put their own organization in a subordinate role for the purpose of the council. This should be the prevailing philosophy in a public council and of all those represented on the council.

11. How do we insure the maximum use of the membership?

The success of the council depends on the understanding and close working relationship of the membership.

The entire membership should be aware of the activities of the staff, the Board and the committees, and should assume responsibility in serving and actively participating in all aspects of the council's program.

Each member should protect the entire membership of the council from developing into a passive, static group dominated by the vocal, aggressive members.

It would be a major achievement simply to get representatives of the various professional associations to commit themselves on more than a superficial basis to cooperate in recruitment for all health professions.

12. Should organizations that are not related to health have full membership in a State health careers council?

Yes, including serving on Board and committees, with full vote. These agencies or representatives of groups within the community can do much toward stimulating progressive thinking of the educators and health professions because of their interest and involvement as consumers of health services.

13. What are the steps in organizing a State health careers council?

The first step in organizing a State health careers council would be the formation of a committee representing all of

the State agencies interested in health, education, and the related manpower problems.

The first meeting could be called by anyone who is willing to assume the responsibility of organizing the meetings, making reports of these meetings, and keeping all members of the committee advised.

This initial group should be representative, not only of the organized health practitioner groups, but should include representatives of counseling, education, and voluntary health agencies. Start with a nucleus of people who will do the job--people who can relate to each other.

The agenda for the first meeting should provide for a general discussion and the identification of the health manpower problems and training facilities available in the health area, and the employment potential within the State for these workers. At this first meeting, a chairman should be appointed and a committee to develop the objectives of the organization. A second committee should develop the by-laws and identify which organization in the State would provide the strongest affiliation during the planning period. This by-laws committee should be responsible for investigating the strengths of developing an independent tax-exempt agency or the strengths that would be forthcoming by affiliating with an existing agency.

Another committee should be appointed to investigate the potential sources of funds for financing the program of the incorporated council. In addition, this committee should make recommendations to the full membership concerning the establishment of dues and potential sources to finance the interim period of the committee prior to the organization of the council. This Finance Committee could be reappointed after the organization is incorporated as a Ways and Means Committee.

The date of the next meeting should be established and invitations sent to those agencies which have been identified by this initial committee as having a responsibility and an interest in the proposed council.

The second meeting of this committee should be the organizational meeting of the council at which there should be discussion of the basic philosophy, objectives and proposed by-laws and/or affiliation, and the possible resources available for financing the proposed program. This meeting should terminate in having a date set at

which time the membership present will vote on the type of organization, its affiliation, its by-laws, and its program, with responsibility for election of the Board of Directors or Advisory Committee, and a committee responsible for employing an executive director. A Ways and Means Committee should be appointed to solicit funds for the new organization.

14. What are the responsibilities of the committee to develop the objectives?

Because the entire program and the development of the by-laws of a council depend upon the objectives identified as the responsibility of the group, it is necessary that this committee be broadly representative of the potential membership. The report of their considerations should be presented to the entire membership for discussion and recommendations should be adopted by the membership.

This committee should be a permanent and active committee in the council and should continuously evaluate the objectives and the program jointly with the Program Committee.

15. What is the responsibility of the By-laws Committee?

The By-laws Committee should be broadly representative of the agencies identified as members of the council. This committee should be composed of at least six members who will be charged with the responsibility of drafting the by-laws and constitution of the proposed council. This committee should readily utilize existing by-laws of other agencies and should have the consultation of a lawyer familiar with the legal aspects inherent in an organization of this type.

16. Why is it necessary for this agency to be incorporated?

If the State health careers council is an independent agency it should be incorporated under the laws of the State and secure tax-exempt status to assure that it can be eligible to accept funds for its programming.

If a State health careers committee is a part of an existing agency, this agency should have tax-exempt status and be incorporated under the State.

17. What are the responsibilities of the Finance Committee?

The Finance Committee should be broadly representative

of the agencies identified as members of the council. It should include representatives both of organizations supported by membership dues and those organizations who engage in public fundraising campaigns. It would be wise, wherever possible, to have a representative of a local foundation on this committee.

One important source of financing frequently overlooked by such committees is the support of those agencies which can give services in kind. This type of service is frequently important in the beginning stages of an organization such as a State health careers council. An additional asset frequently available is the fund-raising department of the State voluntary health agencies.

The success of this committee's endeavors frequently depends upon the clarity with which the broad objectives of the council are presented. The vested interests of meeting the needs for specific professionals has less appeal than meeting the general health needs of the public and the needs of the students and counselors.

The Finance Committee should present to the entire membership at its second meeting a proposed projected budget and sources of potential financing. This budget should include salaries with adequate amounts for fringe benefits, travel, rent for adequate office space, operating expenses, and a contingency fund. This budget should be approved at the organizational meeting which forms the council.

This committee would then be dissolved at the organizational meeting and a Ways and Means Committee, under the new Board of Directors, should be appointed (it may include the original members) to carry on the work initiated in identifying sources of financing. The permanent committee should have the entire membership available as resources for contacting various organizations or individuals for funds.

18. What is the Board of Directors (Trustees)?

In organizations that have annual or semiannual meetings of the total membership, the by-laws should provide for the duties, responsibilities and election of a Board of Directors (Trustees). This group conducts the business of the organization between annual meetings and reports its actions and decisions to the parent body (the mem-

bership). The Board of Directors may be authorized to appoint an executive committee and such other committees as it deems necessary.

The by-laws should clearly define the membership and duties of the Board of Directors.

19. How can advisory committees be used?

A State health careers council that is independently incorporated as a nonprofit agency does not have an advisory committee. However, a State health careers committee that is a part of a parent organization, such as a health council or hospital association, should have an Advisory Committee on Health Careers. This group should be broadly representative of the membership of the State health careers committee.

It is important that advisory committee members recognize that they are advisory only and not policy-making. However, they can make suggestions for policy to the Board of Directors of the parent organization.

The primary purpose of the advisory committee is to establish a forum for the discussion of problems relating specifically to health careers. Therefore, it should be broadly representative of health, counseling, education, and the community.

The executive director and the Board of the parent agency must assume the responsibility of utilizing and activating this committee so that it is an implicit part of the program.

20. How do we establish the needs?

Study the curricula available for all levels of health personnel. Determine the employment potential for the health careers students who are being trained and the employment potential for students who would make use of additional studies and courses if the curricula provided for these.

21. What are the qualifications for an executive director of a State health careers council?

There are no specific qualifications for this position. However, it is important that the person who is employed has an understanding of education, counseling, and health occupations. It is imperative that he have a good sense

of public relations and an ability to work with committees, and to coordinate a program which is directed to the specific objectives which are influenced by several vested interest groups.

22. What are the responsibilities of the executive director?

The executive director should be ex officio on all committees and the Board of Directors. He should be responsible for keeping the members advised of progress, or lack thereof, toward meeting the objectives as set by the Board of Directors and members. In some cases, it may be proper for the executive director to make personal contacts with foundations for support.

23. Does the executive director have any responsibility for fundraising?

The main responsibility for fundraising should be the function of a committee--Ways and Means, or Finance. The responsibility of the executive director should be to provide materials and facts to the committee on which they may base their appeals. He also should keep track of what the committee is doing and the progress made.

24. Should professional fundraisers be used?

No, but professional fundraising consultants can give great assistance when the campaign is conducted by the membership and volunteers from within the community.

When the whole effort is conducted by an outside fundraising organization, broken fences can be a long time in the mending when the delicacies of the local situation are not fully understood by the imported fundraisers who leave the community once the campaign is over.

25. How can volunteers be used?

Never underestimate the public relations value of a truly dedicated volunteer who has received satisfaction in the performance of his assignments.

Careful consideration must be given to the orientation and supervision of all volunteers by providing written assignments of duties. Volunteers may be utilized in organizing and administering the health career days, on speakers bureaus, to establish contacts with community leaders, educators, and in public relations appearances.

In addition, they may be used to accomplish the work of the various committees as well as to assist the staff during the peak workloads.

Provision should be made to pay out-of-pocket expenses of volunteers in carrying out their duties as provided by Board action.

26. Are federal funds available for the operation of a State health careers council?

No funds are at present available on a national level from the Federal Government for the operation of a State health careers council. However, there is money available for special projects which can be presented as demonstration or research projects.

27. What are the resources to be utilized in field programs for students to become acquainted with work situations?

Hospitals have been more frequently used in the past for setting up programs where students have opportunity to see a career in action. Women's auxiliaries of hospitals and medical societies have been active in planning and helping to carry out these projects. Youngsters have opportunity to visit laboratories, X-ray rooms, even to watch in an amphitheater at times when minor surgery is being carried out.

Rehabilitation centers have set up summer programs for students who act as assistants to the regular staffs. Many have provided some payment and, if the program is conducted in cooperation with the school, extra credits are allowed after the student prepares a report on his experience.

Day care centers, public health agencies, crippled children's camps, and homes for the aged are resources that should be tapped for such inservice training or orientation.

28. What should be the underlying philosophy of a State health careers council in its program?

Man prizes health and will always need assistance in maintaining his health, whether he be in an air polluted community, on a farm, under the sea, or on the moon. How many health occupations can be identified in the program of the National Aeronautics and Space Administration? There is a place for all levels in health careers. For

the student who likes people there are many opportunities; for the boy who is a loner, there is always the laboratory; for he who is an animal lover, how about veterinary medicine?

With the inroads of automation that are being made, the health occupations will never be outmoded or extinct for there is and will always be a need for man relating to health, be it preventive, curative, or rehabilitative.

29. If a State health careers council is organized and conducting a program, what steps should be taken to broaden the program?

A committee of the Board of Directors should be appointed to evaluate the continued need for the present program and to identify additional needs relating to educational facilities available at all levels. The need may be for new facilities in a different part of the State or for enlarging existing programs; there may be a need to evaluate the programs--or lack of programs--in the State for preparing instructors for educational programs in health areas; or a need for increased emphasis to be placed on career programs directed to the housewife, the college student, the retired person, or the handicapped.

The committee might well have several subcommittees with representatives of the organizations relating to the area under study. It should certainly be broadly representative of the membership of the council and the executive director should serve ex officio or staff the committee.

30. When does a State health careers council begin to evaluate its ability to participate in or initiate research projects?

Formal research projects should be considered by the Board of Directors and the executive director only after they have a well-developed and continuing program which meets the health needs of their State and region. It is wise for the Board of Directors to appoint a committee to identify areas which require research projects and to investigate sources of financial assistance to activate these projects.

31. What kinds of research are pertinent for a State health careers council?

Research should be operational research. It should have something to do with the organization rather than just research for its own sake. There are plenty of interesting questions that can be answered by research because someone wants to know something, but it may not have much relevance to the program. Ask: what will we do with it, once we have it?

The following are examples of pertinent research:

a. Studies of the mobility of people who have been educated and trained in health occupations--both intra-State and inter-State.

b. At what age do students make the decision to embark on a career?

c. Utilization of modern techniques of educational approaches.

d. Evaluation of the effectiveness of the existing program.

e. Education and health professionals should carefully study the contents of secondary school curricula in relation to the requirements for entrance to health occupations, at all levels.

32. What types of evaluation should be carried on?

The council should continuously evaluate the employment potential and health manpower needs of the State. They should keep a sharp eye on the major forces which would influence health and health careers; for example, the impact of Federal legislation. A truly effective and dynamic program is one which is constantly evaluated and adjusted to meet changing needs.

Provision should be made for the Board of Directors to evaluate the effectiveness of the executive director in conducting his responsibilities and should provide the executive director with guidance in evaluating his staff's productivity and effectiveness.

33. How can a State health careers committee obtain information from other State health careers organizations?

National Health Council has a listing of all State health careers committees and councils which may be obtained free on request.

*WAGES; *EMPLOYMENT PRACTICES; *OCCUPATIONAL SURVEYS; *SEX (CHARACTERISTICS); FINANCE OCCUPATIONS; INSURANCE OCCUPATIONS; MANUFACTURING OCCUPATIONS; PUBLIC UTILITY OCCUPATIONS; WHOLESALE OCCUPATIONS; RETAIL OCCUPATIONS; SERVICE OCCUPATIONS
CLACKAMAS COUNTY; MULTNOMAH COUNTY; WASHINGTON COUNTY; CLARK COUNTY; WASHINGTON; OREGON

The area reported is one of 85 in which the United States Department of Labor's Bureau of Labor Statistics conducts surveys of occupational earnings and related wage benefits. Data were obtained by personal visits of Bureau Field Economists to representative establishments within six broad industry divisions: (1) manufacturing, (2) transportation, communication, and other public utilities, (3) wholesale trade, (4) retail trade, (5) finance, insurance, and real estate, and (6) services. The contents are reported under two broad categories with subtopics: (1) occupational earnings (office occupations, professional and technical occupations, maintenance and power plant occupations, and custodial and material movement occupations), and (2) establishment practices and supplementary wage provisions practices (minimum entrance salaries for women office workers, shift differentials, schedules weekly hours, paid holidays, paid vacations, health, insurance, pension plans, and profit-sharing plans). The appendix presents clarifications of occupational descriptions. (SL)

Preface

The Bureau of Labor Statistics program of annual occupational wage surveys in metropolitan areas is designed to provide data on occupational earnings, and establishment practices and supplementary wage provisions. It yields detailed data by selected industry divisions for each of the areas studied, for economic regions, and for the United States. A major consideration in the program is the need for greater insight into (1) the movement of wages by occupational category and skill level, and (2) the structure and level of wages among areas and industry divisions.

At the end of each survey, an individual area bulletin presents survey results for each area studied. After completion of all of the individual area bulletins for a round of surveys, a two-part summary bulletin is issued. The first part brings data for each of the metropolitan areas studied into one bulletin. The second part presents information which has been projected from individual metropolitan area data to relate to economic regions and the United States.

Eighty-five areas currently are included in the program. Information on occupational earnings is collected annually in each area. Information on establishment practices and supplementary wage provisions is obtained biennially in most of the areas.

This bulletin presents results of the survey in Portland, Oreg.–Wash., in May 1966. The Standard Metropolitan Statistical Area, as defined by the Bureau of the Budget through March 1965, consists of Clackamus, Multnomah, and Washington Counties, Oreg.; and Clark County, Wash. This study was conducted by the Bureau's regional office in San Francisco, Calif., Max D. Kossoris, Director; by Merlin Meyer, under the direction of William P. O'Connor. The study was under the general direction of John L. Dana, Assistant Regional Director for Wages and Industrial Relations.

* NOTE: Similar tabulations are available for other areas. (See inside back cover.)

Current reports on occupational earnings and supplementary wage provisions in the Portland area are also available for the machinery industries (June 1965) and nursing homes and related facilities (April 1965). Union scales, indicative of prevailing pay levels, are available for building construction, printing, local-transit operating employees, and motortruck drivers and helpers.

Area Wage Survey—

The Portland, Oreg.—Wash., Metropolitan Area

Introduction

This area is 1 of 85 in which the U.S. Department of Labor's Bureau of Labor Statistics conducts surveys of occupational earnings and related wage benefits on an areawide basis. In this area, data were obtained by personal visits of Bureau field economists to representative establishments within six broad industry divisions: Manufacturing; transportation, communication, and other public utilities; wholesale trade; retail trade; finance, insurance, and real estate; and services. Major industry groups excluded from these studies are government operations and the construction and extractive industries. Establishments having fewer than a prescribed number of workers are omitted because they tend to furnish insufficient employment in the occupations studied to warrant inclusion. Separate tabulations are provided for each of the broad industry divisions which meet publication criteria.

These surveys are conducted on a sample basis because of the unnecessary cost involved in surveying all establishments. To obtain optimum accuracy at minimum cost, a greater proportion of large than of small establishments is studied. In combining the data, however, all establishments are given their appropriate weight. Estimates based on the establishments studied are presented, therefore, as relating to all establishments in the industry grouping and area, except for those below the minimum size studied.

Occupations and Earnings

The occupations selected for study are common to a variety of manufacturing and nonmanufacturing industries, and are of the following types: (1) Office clerical; (2) professional and technical; (3) maintenance and powerplant; and (4) custodial and material movement. Occupational classification is based on a uniform set of job descriptions designed to take account of interestablishment variation in duties within the same job. The occupations selected for study are listed and described in appendix B. Earnings data for some of the occupations listed and described are not presented in the A-series tables because either (1) employment in the occupation is too small to provide enough data to merit presentation, or (2) there is possibility of disclosure of individual establishment data.

Occupational employment and earnings data are shown for full-time workers, i.e., those hired to work a regular weekly schedule in the given occupational classification. Earnings data exclude premium pay for overtime and for work on weekends, holidays, and late shifts. Nonproduction bonuses are excluded, but cost-of-living bonuses and incentive earnings are included. Where weekly hours are reported, as for office clerical occupations, reference is to the work schedules (rounded to the nearest half hour) for which straight-time salaries are paid; average weekly earnings for these occupations have been rounded to the nearest half dollar.

The averages presented reflect composite, areawide estimates. Industries and establishments differ in pay level and job staffing and, thus, contribute differently to the estimates for each job. The pay relationship obtainable from the averages may fail to reflect accurately the wage spread or differential maintained among jobs in individual establishments. Similarly, differences in average pay levels for men and women in any of the selected occupations should not be assumed to reflect differences in pay treatment of the sexes within individual establishments. Other possible factors which may contribute to differences in pay for men and women include: Differences in progression within established rate ranges, since only the actual rates paid incumbents are collected; and differences in specific duties performed, although the workers are appropriately classified within the same survey job description. Job descriptions used in classifying employees in these surveys are usually more generalized than those used in individual establishments and allow for minor differences among establishments in the specific duties performed.

Occupational employment estimates represent the total in all establishments within the scope of the study and not the number actually surveyed. Because of differences in occupational structure among establishments, the estimates of occupational employment obtained from the sample of establishments studied serve only to indicate the relative importance of the jobs studied. These differences in occupational structure do not materially affect the accuracy of the earnings data.

Establishment Practices and Supplementary Wage Provisions

Information is presented (in the B-series tables) on selected establishment practices and supplementary wage provisions as they relate to plant and office workers. Administrative, executive, and professional employees, and force-account construction workers who are utilized as a separate work force are excluded. "Plant workers" include working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in nonoffice functions. "Office workers" include working supervisors and nonsupervisory workers performing clerical or related functions. Cafeteria workers and routemen are excluded in manufacturing industries, but included in nonmanufacturing industries.

Minimum entrance salaries (table B-1) relate only to the establishments visited. They are presented in terms of establishments with formal minimum entrance salary policies.

Shift differential data (table B-2) are limited to plant workers in manufacturing industries. This information is presented both in terms of (1) establishment policy,[1] presented in terms of total plant worker employment, and (2) effective practice, presented in terms of workers actually employed on the specified shift at the time of the survey. In establishments having varied differentials, the amount applying to a majority was used or, if no amount applied to a majority, the classification "other" was used. In establishments in which some late-shift hours are paid at normal rates, a differential was recorded only if it applied to a majority of the shift hours.

The scheduled weekly hours (table B-3) of a majority of the first-shift workers in an establishment are tabulated as applying to all of the plant or office workers of that establishment. Paid holidays; paid vacations; health, insurance, and pension plans; and profit-sharing plans (tables B-4 through B-8) are treated statistically on the basis that these are applicable to all plant or office workers if a majority of such workers are eligible or may eventually qualify for the practices listed. Sums of individual items in tables B-2 through B-8 may not equal totals because of rounding.

Data on paid holidays (table B-4) are limited to data on holidays granted annually on a formal basis; i.e., (1) are provided for in written form, or (2) have been established by custom. Holidays ordinarily granted are included even though they may fall on a nonworkday, even if the worker is not granted another day off. The first part of the paid holidays table presents the number of whole and half holidays actually granted. The second part combines whole and half holidays to show total holiday time.

The summary of vacation plans (table B-5) is limited to formal policies, excluding informal arrangements whereby time off with pay is granted at the discretion of the employer. Estimates exclude vacation-savings plans and those which offer "extended" or "sabbatical" benefits beyond basic plans to workers with qualifying lengths of service. Typical of such exclusions are plans in the steel, aluminum, and can industries. Separate estimates are provided according to employer practice in computing vacation payments, such as time payments, percent of annual earnings, or flat-sum amounts. However, in the tabulations of vacation pay, payments not on a time basis were converted to a time basis; for example, a payment of 2 percent of annual earnings was considered as the equivalent of 1 week's pay.

Data are presented for all health, insurance, and pension plans (tables B-6 and B-7) for which at least a part of the cost is borne by the employer, excepting only legal requirements such as workmen's compensation, social security, and railroad retirement. Such plans include those underwritten by a commercial insurance company and those provided through a union fund or paid directly by the employer out of current operating funds or from a fund set aside for this purpose. Death benefits are included as a form of life insurance. Selected health insurance benefits provided employees and dependents are also presented.

Sickness and accident insurance is limited to that type of insurance under which predetermined cash payments are made directly to the insured on a weekly or monthly basis during illness or accident disability. Information is presented for all such plans to which the employer contributes. However, in New York and New Jersey, which have enacted temporary disability insurance laws which require employer contributions,[2] plans are included only if the employer (1) contributes more than is legally required, or (2) provides the employee with benefits which exceed the requirements of the law. Tabulations of paid sick leave plans are limited to formal plans[3] which provide full pay or a proportion of the worker's pay during absence from work because of illness. Separate tabulations are presented according to (1) plans which provide full pay and no waiting period, and (2) plans which provide either partial pay or a waiting period. In addition to the presentation of the proportions of workers who are provided sickness and accident insurance or paid sick leave, an unduplicated total is shown of workers who receive either or both types of benefits.

Catastrophe insurance, sometimes referred to as extended medical insurance, includes those plans which are designed to protect employees in case of sickness and injury involving expenses beyond the normal coverage of hospitalization, medical, and surgical plans. Medical insurance refers to plans providing for complete or partial payment of doctors' fees. Such plans may be underwritten by commercial insurance companies or nonprofit organizations or they may be self-insured. Tabulations of retirement pension plans are limited to those plans that provide monthly payments for the remainder of the worker's life.

Profit-sharing plans (table B-8) are limited to formal plans with definite formulas for computing profit shares to be distributed among employees and whose formulas were communicated to employees in advance of the determination of profits. Data are presented according to provisions for distributing profit shares to employees: (1) Current or cash distribution of profit shares within a short period after determination of profits; (2) deferred distribution of profit shares after a specified number of years or at retirement; (3) combination current and deferred plans; and (4) elective distribution plans, under which each participant is required to select whether to take his share of the current year's profit in cash, have it deferred, or part in cash and part deferred.

---

[1] An establishment was considered as having a policy if it met either of the following conditions: (1) Operated late shifts at the time of the survey, or (2) had formal provisions covering late shifts. An establishment was considered as having formal provisions if it (1) had operated late shifts during the 12 months prior to the survey, or (2) had provisions in written form for operating late shifts.

[2] The temporary disability laws in California and Rhode Island do not require employer contributions.

[3] An establishment was considered as having a formal plan if it established at least the minimum number of days of sick leave available to each employee. Such a plan need not be written, but informal sick leave allowances, determined on an individual basis, were excluded.

Table 1. Establishments and workers within scope of survey and number studied in Portland, Oreg.–Wash.,[1] by major industry division,[2] May 1966

Industry division	Minimum employment in establishments in scope of study	Number of establishments		Workers in establishments				
				Within scope of study				Studied
		Within scope of study[3]	Studied	Total[4]		Plant	Office	Total[4]
				Number	Percent			
All divisions	-	656	169	133,500	100	88,300	22,700	74,490
Manufacturing	50	274	69	63,400	47	48,800	5,800	34,740
Nonmanufacturing	-	382	100	70,100	53	39,500	16,900	39,750
Transportation, communication, and other public utilities[5]	50	64	25	21,000	16	10,900	4,100	15,330
Wholesale trade	50	101	21	10,200	8	(6)	(6)	2,850
Retail trade	50	105	28	21,900	16	17,400	2,600	13,750
Finance, insurance, and real estate	50	52	10	9,500	7	(7)	(6)	5,000
Services[8]	50	60	16	7,500	6	(6)	(6)	2,820

[1] The Portland Standard Metropolitan Statistical Area, as defined by the Bureau of the Budget through March 1965, consists of Clackamas, Multnomah, and Washington Counties, Oreg.; and Clark County, Wash. The "workers within scope of study" estimates shown in this table provide a reasonably accurate description of the size and composition of the labor force included in the survey. The estimates are not intended, however, to serve as a basis of comparison with other employment indexes for the area to measure employment trends or levels since (1) planning of wage surveys requires the use of establishment data compiled considerably in advance of the payroll period studied, and (2) small establishments are excluded from the scope of the survey.

[2] The 1957 revised edition of the Standard Industrial Classification Manual and the 1963 Supplement were used in classifying establishments by industry division.

[3] Includes all establishments with total employment at or above the minimum limitation. All outlets (within the area) of companies in such industries as trade, finance, auto repair service, and motion picture theaters are considered as 1 establishment.

[4] Includes executive, professional, and other workers excluded from the separate plant and office categories.

[5] Taxicabs and services incidental to water transportation were excluded.

[6] This industry division is represented in estimates for "all industries" and "nonmanufacturing" in the Series A tables, and for "all industries" in the Series B tables. Separate presentation of data for this division is not made for one or more of the following reasons: (1) Employment in the division is too small to provide enough data to merit separate study, (2) the sample was not designed initially to permit separate presentation, (3) response was insufficient or inadequate to permit separate presentation, and (4) there is possibility of disclosure of individual establishment data.

[7] Workers from this entire industry division are represented in estimates for "all industries" and "nonmanufacturing" in the Series A tables, but from the real estate portion only in estimates for "all industries" in the Series B tables. Separate presentation of data for this division is not made for one or more of the reasons given in footnote 6 above.

[8] Hotels; personal services; business services; automobile repair shops; motion pictures; nonprofit membership organizations (excluding religious and charitable organizations); and engineering and architectural services.

Almost one-half of the workers within scope of the survey in the Portland, Oreg.–Wash. area were employed in manufacturing firms. The following table presents the major industry groups and specific industries as a percent of all manufacturing:

Industry group		Specific industries	
Lumber and wood products (except furniture)	11	Electrical transmission and distribution equipment	8
Primary metals	10	Millwork, veneer, plywood, and prefabricated structural wood products	7
Electrical machinery	9		
Fabricated metal products	8		
Transportation equipment	8		
Machinery (except electrical)	7		

This information is based on estimates of total employment derived from universe materials compiled prior to actual survey. Proportions in various industry divisions may differ from proportions based on the results of the survey as shown in table 1 above.

Wage Trends for Selected Occupational Groups

Presented in table 2 are indexes and percentages of change in average salaries of office clerical workers and industrial nurses, and in average earnings of selected plant worker groups.

For office clerical workers and industrial nurses, the percentages of change relate to average weekly salaries for normal hours of work, that is, the standard work schedule for which straight-time salaries are paid. For plant worker groups, they measure changes in average straight-time hourly earnings, excluding premium pay for overtime and for work on weekends, holidays, and late shifts. The percentages are based on data for selected key occupations and include most of the numerically important jobs within each group.

Office clerical (men and women):
- Bookkeeping-machine operators, class B
- Clerks, accounting, classes A and B
- Clerks, file, classes A, B, and C
- Clerks, order
- Clerks, payroll
- Comptometer operators
- Keypunch operators, classes A and B
- Office boys and girls
- Stenographers, general
- Stenographers, senior
- Switchboard operators, classes A and B
- Tabulating-machine operators, class B
- Typists, classes A and B

Industrial nurses (men and women):
- Nurses, industrial (registered)

Skilled maintenance (men):
- Carpenters
- Electricians
- Machinists
- Mechanics
- Mechanics (automotive)
- Painters
- Pipefitters
- Tool and die makers

Unskilled plant (men):
- Janitors, porters, and cleaners
- Laborers, material handling

NOTE: Secretaries, included in the list of jobs in all previous years, are excluded because of a change in the description this year.

Average weekly salaries or average hourly earnings were computed for each of the selected occupations. The average salaries or hourly earnings were then multiplied by employment in each of the jobs during the period surveyed in 1961. These weighted earnings for individual occupations were then totaled to obtain an aggregate for each occupational group. Finally, the ratio (expressed as a percentage) of the group aggregate for the one year to the aggregate for the other year was computed and the difference between the result and 100 is the percentage of change from the one period to the other. The indexes were computed by multiplying the ratios for each group aggregate for each period after the base year (1961).

The indexes and percentages of change measure, principally, the effects of (1) general salary and wage changes; (2) merit or other increases in pay received by individual workers while in the same job; and (3) changes in average wages due to changes in the labor force resulting from labor turnover, force expansions, force reductions, and changes in the proportions of workers employed by establishments with different pay levels. Changes in the labor force can cause increases or decreases in the occupational averages without actual wage changes. For example, a force expansion might increase the proportion of lower paid workers in a specific occupation and lower the average, whereas a reduction in the proportion of lower paid workers would have the opposite effect. Similarly, the movement of a high-paying establishment out of an area could cause the average earnings to drop, even though no change in rates occurred in other establishments in the area. Data are adjusted where necessary to remove from the indexes and percentages of change any significant effect caused by changes in scope of the survey.

The use of constant employment weights eliminates the effect of changes in the proportion of workers represented in each job included in the data. The percentages of change reflect only changes in average pay for straight-time hours. They are not influenced by changes in standard work schedules, as such, or by premium pay for overtime.

Table 2. Indexes of standard weekly salaries and straight-time hourly earnings for selected occupational groups in Portland, Oreg.—Wash., May 1966 and May 1965, and percents of increase for selected periods

Industry and occupational group	Indexes (May 1961=100)		Percents of increase					
	May 1966	May 1965	May 1965 to May 1966	May 1964 to May 1965	May 1963 to May 1964	May 1962 to May 1963	May 1961 to May 1962	May 1960 to May 1961
All industries:								
Office clerical (men and women)	116.9	113.0	3.4	3.3	4.5	2.9	1.7	2.8
Industrial nurses (men and women)	124.6	121.8	2.3	3.8	1.4	10.7	4.5	2.3

[1] Standard hours reflect the workweek for which employees receive their regular straight-time salaries and the earnings correspond to these weekly hours.

[2] The mean is computed for each job by totaling the earnings of all workers and dividing by the number of workers. The median designates position—half of the employees surveyed receive more than the rate shown; half receive less than the rate shown. The middle range is defined by 2 rates of pay; a fourth of the workers earn less than the lower of these rates and a fourth earn more than the higher rate.

[3] Transportation, communication, and other public utilities.

[4] May include workers other than those presented separately.

[5] Description for this occupation has been revised since the last survey in this area. See appendix A.

[1] Standard hours reflect the workweek for which employees receive their regular straight-time salaries and the earnings correspond to these weekly hours.
[2] Transportation, communication, and other public utilities.
[3] May include workers other than those presented separately.
[4] Description for this occupation has been revised since the last survey in this area. See appendix A.

Table A-4. Maintenance and Powerplant Occupations

(Average straight-time hourly earnings for men in selected occupations studied on an area basis by industry division, Portland, Oreg.–Wash., May 1966)

$75.00 and under $77.50	1	1	1	-	-	2	1	1	1	1
$77.50 and under $80.00	2	1	1	1	1	2	1	1	1	1
$80.00 and under $82.50	4	-	-	4	4	2	1	1	1	1
$82.50 and under $85.00	2	2	2	-	-	2	2	2	-	-
$85.00 and under $87.50	2	1	1	1	1	2	1	1	1	1
$87.50 and under $90.00	3	1	1	2	2	4	1	1	3	3
$90.00 and over	3	-	-	3	3	4	-	-	4	4
Establishments having no specified minimum	38	22	xxx	16	xxx	45	25	xxx	20	xxx
Establishments which did not employ workers in this category	65	22	xxx	43	xxx	49	17	xxx	32	xxx

[1] These salaries relate to formally established minimum starting (hiring) regular straight-time salaries that are paid for standard workweeks.
[2] Excludes workers in subclerical jobs such as messenger or office girl.
[3] Data are presented for all standard workweeks combined, and for the most common standard workweek reported.

Table B-2. Shift Differentials

(Shift differentials of manufacturing plant workers by type and amount of differential, Portland, Oreg.—Wash., May 1966)

Shift differential	Percent of manufacturing plant workers—			
	In establishments having formal provisions[1] for—		Actually working on—	
	Second shift work	Third or other shift work	Second shift	Third or other shift
Total	96.5	88.1	19.5	6.5
With shift pay differential	94.3	88.0	19.0	6.4
Uniform cents (per hour)	52.4	43.4	11.5	5.1
3 cents	3.6	-	.4	-
4 cents	2.2	-	.2	-
5 cents	3.7	-	1.0	-
7 cents	-	1.0	-	-
7½ cents	1.4	.8	.2	.1
8 cents	7.8	1.1	2.7	.2
9 cents	9.9	-	2.9	-
10 cents	14.3	6.3	1.9	.3
12 cents	1.0	7.8	.3	2.0
Over 12 and under 15 cents	4.9	4.1	1.1	.1
15 cents	1.7	18.5	.4	2.1
Over 15 cents	2.1	3.8	.4	.2
Uniform percentage	15.7	13.6	3.1	.1
5 percent	1.2	-	.4	-
10 percent	14.4	4.4	2.7	.1
15 percent	-	9.2	-	-
Full day's pay for reduced hours	1.2	1.9	.1	.1
Full day's pay for reduced hours plus cents differential	19.1	19.1	2.9	.7
Full day's pay for reduced hours plus percentage differential	1.6	1.7	.6	.1
Other formal pay differential	4.3	8.3	.9	.4
With no shift pay differential	2.2	.1	.5	.1

[1] Includes establishments currently operating late shifts, and establishments with formal provisions covering late shifts even though they were not currently operating late shifts.

Table B-3. Scheduled Weekly Hours

(Percent distribution of plant and office workers in all industries and in industry divisions by scheduled weekly hours of first-shift workers, Portland, Oreg.–Wash., May 1966)

Weekly hours	Plant workers				Office workers			
	All industries [1]	Manufacturing	Public utilities [2]	Retail trade	All industries [3]	Manufacturing	Public utilities [2]	Retail trade
All workers	100	100	100	100	100	100	100	100
30 hours	1	-	-	5	-	-	-	-
35 hours	2	4	4	-	(4)	-	-	-
Over 35 and under 37½ hours	-	-	-	-	4	-	-	-
37½ hours	-	-	-	-	15	2	-	-
Over 37½ and under 40 hours	-	-	-	-	5	1	-	-
40 hours	94	94	95	94	76	97	100	100
Over 40 and under 44 hours	-	-	-	-	(4)	(4)	-	-
44 hours	2	2	-	1	-	-	-	-
45 hours and over	(4)	-	1	-	-	-	-	-

[1] Includes data for wholesale trade, real estate, and services, in addition to those industry divisions shown separately.
[2] Transportation, communication, and other public utilities.
[3] Includes data for wholesale trade; finance, insurance, and real estate; and services, in addition to those industry divisions shown separately.
[4] Less than 0.5 percent.

Table B-4. Paid Holidays

(Percent distribution of plant and office workers in all industries and in industry divisions by number of paid holidays provided annually, Portland, Oreg.–Wash., May 1966)

Item	Plant workers				Office workers			
	All industries [1]	Manufacturing	Public utilities [2]	Retail trade	All industries [3]	Manufacturing	Public utilities [2]	Retail trade
All workers	100	100	100	100	100	100	100	100
Workers in establishments providing paid holidays	96	99	98	89	99	100	100	94
Workers in establishments providing no paid holidays	4	1	2	11	1	-	-	6
Number of days								
Less than 6 holidays	4	2	-	9	1	2	-	1
6 holidays	27	15	5	72	25	26	8	79
6 holidays plus 1 half day	-	-	-	-	(4)	1	-	-
7 holidays	34	44	34	6	42	32	29	13
7 holidays plus 1 half day	1	1	-	-	(4)	1	-	-
7 holidays plus 2 half days	2	4	-	-	2	5	-	-
8 holidays	26	31	59	2	24	31	63	-
8 holidays plus 1 half day	-	-	-	-	1	-	-	-
9 holidays	2	2	-	-	4	2	-	-
Total holiday time [5]								
9 days	2	2	-	-	4	2	-	-
8½ days or more	2	2	-	-	5	2	-	-
8 days or more	30	37	59	2	30	37	63	-
7½ days or more	31	38	59	2	30	39	63	-
7 days or more	65	83	93	8	72	71	92	13
6½ days or more	65	83	93	8	73	71	92	13
6 days or more	91	97	98	80	98	98	100	93
5 days or more	93	99	98	82	99	100	100	93
4 days or more	93	99	98	82	99	100	100	93
3 days or more	95	99	98	87	99	100	100	94
2 days or more	96	99	98	89	99	100	100	94

[1] Includes data for wholesale trade, real estate, and services, in addition to those industry divisions shown separately.
[2] Transportation, communication, and other public utilities.
[3] Includes data for wholesale trade; finance, insurance, and real estate; and services, in addition to those industry divisions shown separately.
[4] Less than 0.5 percent.
[5] All combinations of full and half days that add to the same amount are combined; for example, the proportion of workers receiving a total of 7 days includes those with 7 full days and no half days, 6 full days and 2 half days, 5 full days and 4 half days, and so on. Proportions were then cumulated.

Table B-5. Paid Vacations[1]

(Percent distribution of plant and office workers in all industries and in industry divisions by vacation pay provisions, Portland, Oreg.–Wash., May 1966)

Vacation policy	Plant workers				Office workers			
	All industries[2]	Manufacturing	Public utilities[3]	Retail trade	All industries[4]	Manufacturing	Public utilities[3]	Retail trade
All workers	100	100	100	100	100	100	100	100
Method of payment								
Workers in establishments providing paid vacations	100	100	100	100	100	100	100	100
Length-of-time payment	97	98	84	100	99	100	96	100
Percentage payment	3	2	16	-	1	-	4	-

Over 4 weeks	7	10	4	2	2	6	1	-

[1] Includes basic plans only. Excludes plans such as vacation-savings and those plans which offer "extended" or "sabbatical" benefits beyond basic plans to workers with qualifying lengths of service. Typical of such exclusions are plans in the steel, aluminum, and can industries.

[2] Includes data for wholesale trade, real estate, and services, in addition to those industry divisions shown separately.

[3] Transportation, communication, and other public utilities.

[4] Includes data for wholesale trade; finance, insurance, and real estate; and services, in addition to those industry divisions shown separately.

[5] Includes payments other than "length of time," such as percentage of annual earnings or flat-sum payments, converted to an equivalent time basis; for example, a payment of 2 percent of annual earnings was considered as 1 week's pay. Periods of service were arbitrarily chosen and do not necessarily reflect the individual provisions for progressions. For example, the changes in proportions indicated at 10 years' service include changes in provisions occurring between 5 and 10 years. Estimates are cumulative. Thus, the proportion receiving 3 weeks' pay or more after 5 years includes those who receive 3 weeks' pay or more after fewer years of service.

[6] Less than 0.5 percent.

Table B-6. Health, Insurance, and Pension Plans

(Percent of plant and office workers in all industries and in industry divisions employed in establishments providing health, insurance, or pension benefits,[1] Portland, Oreg.–Wash., May 1966)

Type of benefit	Plant workers				Office workers			
	All industries[2]	Manufacturing	Public utilities[3]	Retail trade	All industries[4]	Manufacturing	Public utilities[3]	Retail trade
All workers	100	100	100	100	100	100	100	100
Workers in establishments providing:								
Life insurance	77	89	89	43	89	93	81	75
Accidental death and dismemberment insurance	65	78	49	46	62	80	41	74
Sickness and accident insurance or sick leave or both[5]	80	84	77	75	86	82	81	79
Sickness and accident insurance	66	77	45	52	51	61	28	39
Sick leave (full pay and no waiting period)	11	9	9	13	47	52	28	27
Sick leave (partial pay or waiting period)	21	11	36	40	9	1	36	22
Hospitalization insurance	97	97	100	95	98	96	100	96
Surgical insurance	96	95	100	95	98	94	100	96
Medical insurance	92	88	100	95	97	88	100	96
Catastrophe insurance	54	49	83	52	79	70	97	55
Retirement pension	78	87	77	68	82	77	70	77
No health, insurance, or pension plan	1	1	-	-	(6)	1	-	(6)

[1] Includes those plans for which at least a part of the cost is borne by the employer, except those legally required, such as workmen's compensation, social security, and railroad retirement.
[2] Includes data for wholesale trade, real estate, and services, in addition to those industry divisions shown separately.
[3] Transportation, communication, and other public utilities.
[4] Includes data for wholesale trade; finance, insurance, and real estate; and services, in addition to those industry divisions shown separately.
[5] Unduplicated total of workers receiving sick leave or sickness and accident insurance shown separately below. Sick leave plans are limited to those which definitely establish at least the minimum number of days' pay that can be expected by each employee. Informal sick leave allowances determined on an individual basis are excluded.
[6] Less than 0.5 percent.

Table B-7. Health Insurance Benefits Provided Employees and Their Dependents

(Percent of plant and office workers in all industries and in industry divisions employed in establishments providing health insurance benefits covering employees and their dependents, Portland, Oreg.–Wash., May 1966)

Type of benefit, coverage, and financing [1]	Plant workers				Office workers			
	All industries [2]	Manufacturing	Public utilities [3]	Retail trade	All industries [4]	Manufacturing	Public utilities [3]	Retail trade
All workers	100	100	100	100	100	100	100	100
Workers in establishments providing:								
Hospitalization insurance	97	97	100	95	98	96	100	96
Covering employees only	27	16	18	53	24	22	16	44
Employer financed	21	10	18	40	19	17	16	23
Jointly financed	6	6	-	13	4	6	1	20
Covering employees and their dependents	70	81	82	42	75	73	84	53
Employer financed	35	35	37	27	23	40	20	2
Jointly financed	13	11	26	15	32	11	38	38
Employer financed for employees; jointly financed for dependents	20	35	-	-	15	21	-	12
Employer financed for dependents; jointly financed for employees	2	-	19	-	5	-	25	-
Surgical insurance	96	95	100	95	98	94	100	96
Covering employees only	27	16	18	53	24	22	16	44
Employer financed	21	10	18	40	19	17	16	23
Jointly financed	6	6	-	13	4	6	1	20
Covering employees and their dependents	69	79	82	42	74	71	84	53
Employer financed	35	35	37	27	23	40	20	2
Jointly financed	12	9	26	15	31	10	38	38
Employer financed for employees; jointly financed for dependents	20	35	-	-	15	21	-	12
Employer financed for dependents; jointly financed for employees	2	-	19	-	5	-	25	-
Medical insurance	92	88	100	95	97	88	100	96
Covering employees only	27	16	18	53	24	22	16	44
Employer financed	21	10	18	40	19	17	16	23
Jointly financed	6	6	-	13	4	6	1	20
Covering employees and their dependents	66	73	82	42	73	66	84	53
Employer financed	31	28	37	27	22	35	20	2
Jointly financed	12	9	26	15	31	10	38	38
Employer financed for employees; jointly financed for dependents	20	35	-	-	15	21	-	12
Employer financed for dependents; jointly financed for employees	2	-	19	-	5	-	25	-
Catastrophe insurance	54	49	83	52	79	70	97	55
Covering employees only	10	8	13	13	15	19	13	12
Employer financed	8	8	12	8	13	17	12	7
Jointly financed	1	-	1	6	1	1	1	5
Covering employees and their dependents	44	42	70	39	65	51	84	43
Employer financed	22	14	43	27	19	24	40	2
Jointly financed	9	9	9	12	27	11	19	38
Employer financed for employees; jointly financed for dependents	11	19	-	-	14	16	-	3
Employer financed for dependents; jointly financed for employees	2	-	19	-	5	-	25	-

[1] Includes plans for which at least a part of the cost is borne by the employer. See footnote 1, table B-6. An establishment was considered as providing benefits to employees for their dependents if such coverage was available to at least a majority of those employees one would usually expect to have dependents, e.g., married men, even though they were less than a majority of all plant or office workers. The employer bears the entire cost of "employer financed" plans. The employer and employee share the cost of "jointly financed" plans.

[2] Includes data for wholesale trade, real estate, and services, in addition to those industry divisions shown separately.

[3] Transportation, communication, and other public utilities.

[4] Includes data for wholesale trade; finance, insurance, and real estate; and services, in addition to those industry divisions shown separately.

Table B-8. Profit-Sharing Plans

(Percent of plant and office workers in all industries and in industry divisions employed in establishments providing profit-sharing plans,[1] by type of plan, Portland, Oreg.–Wash., May 1966)

Type of plan	Plant workers				Office workers			
	All industries[2]	Manufacturing	Public utilities[3]	Retail trade	All industries[4]	Manufacturing	Public utilities[3]	Retail trade
All workers	100	100	100	100	100	100	100	100
Workers in establishments providing profit-sharing plans	18	19	2	37	34	29	8	73
Plans providing for current distribution	2	3	-	-	3	5	-	9
Plans providing for deferred distribution	12	7	2	37	24	12	8	64
Plans providing for both current and deferred distribution	5	9	-	-	6	12	-	-
Plans providing for employee's choice of method of distribution	-	-	-	-	1	-	-	-
Workers in establishments providing no profit-sharing plans	82	81	98	63	66	71	92	27

[1] The study was limited to formal plans (1) having established formulas for the allocation of profit shares among employees: (2) whose formulas were communicated to the employees in advance of the determination of profits; (3) that represent a commitment by the company to make periodic contributions based on profits: and (4) in which eligibility extends to a majority of the plant or office workers.

[2] Includes data for wholesale trade, real estate, and services, in addition to those industry divisions shown separately.

[3] Transportation, communication, and other public utilities.

[4] Includes data for wholesale trade; finance, insurance, and real estate; and services, in addition to those industry divisions shown separately.

Appendix A. Changes in Occupational Descriptions

Since the Bureau's last survey, occupational descriptions for draftsman, secretary, and switchboard operator were revised in order to obtain salary information for more specific categories.

Secretary. The revised descriptions for secretary (classes A, B, C, and D) classify these workers according to levels of responsibility. The size of the organization and the scope of the supervisor's position are considered in distinguishing these levels. Data published under the composite title of secretary are not comparable to data previously published.

Switchboard operator. The revised description for switchboard operator arranges these workers into two defined classes (A and B) instead of a single category, clarifying the criteria of types of calls handled and types of information provided. The combination of class A and class B data, where both are published, is comparable to the single designation, if previously published.

Draftsman. The revised descriptions for draftsman (classes A, B, and C; and draftsman-tracer) replace the previous designations for draftsman (leader, senior, and junior; and tracer) and emphasize the distinction between drafting and design skills. Therefore, data presented for any of these occupations are not comparable to data previously published.

The revised occupational descriptions are included in appendix B.

Appendix B. Occupational Descriptions

The primary purpose of preparing job descriptions for the Bureau's wage surveys is to assist its field staff in classifying into appropriate occupations workers who are employed under a variety of payroll titles and different work arrangements from establishment to establishment and from area to area. This permits the grouping of occupational wage rates representing comparable job content. Because of this emphasis on interestablishment and interarea comparability of occupational content, the Bureau's job descriptions may differ significantly from those in use in individual establishments or those prepared for other purposes. In applying these job descriptions, the Bureau's field economists are instructed to exclude working supervisors, apprentices, learners, beginners, trainees, handicapped, part-time, temporary, and probationary workers.

OFFICE

BILLER, MACHINE

Prepares statements, bills, and invoices on a machine other than an ordinary or electromatic typewriter. May also keep records as to billings or shipping charges or perform other clerical work incidental to billing operations. For wage study purposes, billers, machine, are classified by type of machine, as follows:

Biller, machine (billing machine). Uses a special billing machine (Moon Hopkins, Elliott Fisher, Burroughs, etc., which are combination typing and adding machines) to prepare bills and invoices from customers' purchase orders, internally prepared orders, shipping memorandums, etc. Usually involves application of predetermined discounts and shipping charges, and entry of necessary extensions, which may or may not be computed on the billing machine, and totals which are automatically accumulated by machine. The operation usually involves a large number of carbon copies of the bill being prepared and is often done on a fanfold machine.

Biller, machine (bookkeeping machine). Uses a bookkeeping machine (Sundstrand, Elliott Fisher, Remington Rand, etc., which may or may not have typewriter keyboard) to prepare customers' bills as part of the accounts receivable operation. Generally involves the simultaneous entry of figures on customers' ledger record. The machine automatically accumulates figures on a number of vertical columns and computes, and usually prints automatically the debit or credit balances. Does not involve a knowledge of bookkeeping. Works from uniform and standard types of sales and credit slips.

BOOKKEEPING-MACHINE OPERATOR

Operates a bookkeeping machine (Remington Rand, Elliott Fisher, Sundstrand, Burroughs, National Cash Register, with or without a typewriter keyboard) to keep a record of business transactions.

Class A. Keeps a set of records requiring a knowledge of and experience in basic bookkeeping principles, and familiarity with the structure of the particular accounting system used. Determines proper records and distribution of debit and credit items to be used in each phase of the work. May prepare consolidated reports, balance sheets, and other records by hand.

Class B. Keeps a record of one or more phases or sections of a set of records usually requiring little knowledge of basic bookkeeping. Phases or sections include accounts payable, payroll, customers' accounts (not including a simple type of billing described under biller, machine), cost distribution, expense distribution, inventory control, etc. May check or assist in preparation of trial balances and prepare control sheets for the accounting department.

CLERK, ACCOUNTING

Class A. Under general direction of a bookkeeper or accountant, has responsibility for keeping one or more sections of a complete set of books or records relating to one phase of an establishment's business transactions. Work involves posting and balancing subsidiary

CLERK, ACCOUNTING—Continued

ledger or ledgers such as accounts receivable or accounts payable; examining and coding invoices or vouchers with proper accounting distribution; and requires judgment and experience in making proper assignations and allocations. May assist in preparing, adjusting, and closing journal entries; and may direct class B accounting clerks.

Class B. Under supervision, performs one or more routine accounting operations such as posting simple journal vouchers or accounts payable vouchers, entering vouchers in voucher registers; reconciling bank accounts; and posting subsidiary ledgers controlled by general ledgers, or posting simple cost accounting data. This job does not require a knowledge of accounting and bookkeeping principles but is found in offices in which the more routine accounting work is subdivided on a functional basis among several workers.

CLERK, FILE

Class A. In an established filing system containing a number of varied subject matter files, classifies and indexes file material such as correspondence, reports, technical documents, etc. May also file this material. May keep records of various types in conjunction with the files. May lead a small group of lower level file clerks.

Class B. Sorts, codes, and files unclassified material by simple (subject matter) headings or partly classified material by finer subheadings. Prepares simple related index and cross-reference aids. As requested, locates clearly identified material in files and forwards material. May perform related clerical tasks required to maintain and service files.

Class C. Performs routine filing of material that has already been classified or which is easily classified in a simple serial classification system (e.g., alphabetical, chronological, or numerical). As requested, locates readily available material in files and forwards material; and may fill out withdrawal charge. Performs simple clerical and manual tasks required to maintain and service files.

CLERK, ORDER

Receives customers' orders for material or merchandise by mail, phone, or personally. Duties involve any combination of the following: Quoting prices to customers; making out an order sheet listing the items

CLERK, ORDER—Continued

to make up the order; checking prices and quantities of items on order sheet; and distributing order sheets to respective departments to be filled. May check with credit department to determine credit rating of customer, acknowledge receipt of orders from customers, follow up orders to see that they have been filled, keep file of orders received, and check shipping invoices with original orders.

CLERK, PAYROLL

Computes wages of company employees and enters the necessary data on the payroll sheets. Duties involve: Calculating workers' earnings based on time or production records; and posting calculated data on payroll sheet, showing information such as worker's name, working days, time, rate, deductions for insurance, and total wages due. May make out paychecks and assist paymaster in making up and distributing pay envelopes. May use a calculating machine.

COMPTOMETER OPERATOR

Primary duty is to operate a Comptometer to perform mathematical computations. This job is not to be confused with that of statistical or other type of clerk, which may involve frequent use of a Comptometer but, in which, use of this machine is incidental to performance of other duties.

DUPLICATING-MACHINE OPERATOR (MIMEOGRAPH OR DITTO)

Under general supervision and with no supervisory responsibilities, reproduces multiple copies of typewritten or handwritten matter, using a Mimeograph or Ditto machine. Makes necessary adjustment such as for ink and paper feed counter and cylinder speed. Is not required to prepare stencil or Ditto master. May keep file of used stencils or Ditto masters. May sort, collate, and staple completed material.

KEYPUNCH OPERATOR

Class A. Operates a numerical and/or alphabetical or combination keypunch machine to transcribe data from various source documents to keypunch tabulating cards. Performs same tasks as lower level keypunch operator but, in addition, work requires application

KEYPUNCH OPERATOR—Continued

of coding skills and the making of some determinations, for example, locates on the source document the items to be punched; extracts information from several documents; and searches for and interprets information on the document to determine information to be punched. May train inexperienced operators.

Class B. Under close supervision or following specific procedures or instructions, transcribes data from source documents to punched cards. Operates a numerical and/or alphabetical or combination keypunch machine to keypunch tabulating cards. May verify cards. Working from various standardized source documents, follows specified sequences which have been coded or prescribed in detail and require little or no selecting, coding, or interpreting of data to be punched. Problems arising from erroneous items or codes, missing information, etc., are referred to supervisor.

OFFICE BOY OR GIRL

Performs various routine duties such as running errands, operating minor office machines such as sealers or mailers, opening and distributing mail, and other minor clerical work.

SECRETARY

Assigned as personal secretary, normally to one individual. Maintains a close and highly responsive relationship to the day-to-day work activities of the supervisor. Works fairly independently receiving a minimum of detailed supervision and guidance. Performs varied clerical and secretarial duties, usually including most of the following: (a) Receives telephone calls, personal callers, and incoming mail, answers routine inquiries, and routes the technical inquiries to the proper persons; (b) establishes, maintains, and revises the supervisor's files; (c) maintains the supervisor's calendar and makes appointments as instructed; (d) relays messages from supervisor to subordinates; (e) reviews correspondence, memoranda, and reports prepared by others for the supervisor's signature to assure procedural and typographic accuracy; and (f) performs stenographic and typing work.

May also perform other clerical and secretarial tasks of comparable nature and difficulty. The work typically requires knowledge of office routine and understanding of the organization, programs, and procedures related to the work of the supervisor.

SECRETARY—Continued

Exclusions

Not all positions that are titled "secretary" possess the above characteristics. Examples of positions which are excluded from the definition are as follows: (a) Positions which do not meet the "personal" secretary concept described above; (b) stenographers not fully trained in secretarial type duties; (c) stenographers serving as office assistants to a group of professional, technical, or managerial persons; (d) secretary positions in which the duties are either substantially more routine or substantially more complex and responsible than those characterized in the definition; and (e) assistant type positions which involve more difficult or more responsible technical, administrative, supervisory, or specialized clerical duties which are not typical of secretarial work.

NOTE: The term "corporate officer," used in the level definitions following, refers to those officials who have a significant corporate-wide policymaking role with regard to major company activities. The title "vice president," though normally indicative of this role, does not in all cases identify such positions. Vice presidents whose primary responsibility is to act personally on individual cases or transactions (e.g., approve or deny individual loan or credit actions; administer individual trust accounts; directly supervise a clerical staff) are not considered to be "corporate officers" for purposes of applying the following level definitions.

Class A

a. Secretary to the chairman of the board or president of a company that employes, in all, over 100 but fewer than 5,000 persons; or

b. Secretary to a corporate officer (other than the chairman of the board or president) of a company that employs, in all, over 5,000 but fewer than 25,000 persons; or

c. Secretary to the head (immediately below the corporate officer level) of a major segment or subsidiary of a company that employs, in all, over 25,000 persons.

Class B

a. Secretary to the chairman of the board or president of a company that employs, in all, fewer than 100 persons; or

b. Secretary to a corporate officer (other than chairman of the board or president) of a company that employs, in all, over 100 but fewer than 5,000 persons; or

SECRETARY—Continued

c. Secretary to the head (immediately below the officer level) over either a major corporate-wide functional activity (e.g., marketing, research, operations, industrial relations, etc.) or a major geographic or organizational segment (e.g., a regional headquarters; a major division) of a company that employs, in all, over 5,000 but fewer than 25,000 employees; or

d. Secretary to the head of an individual plant, factory, etc. (or other equivalent level of official) that employs, in all, over 5,000 persons; or

e. Secretary to the head of a large and important organizational segment (e.g., a middle management supervisor of an organizational segment often involving as many as several hundred persons) of a company that employs, in all, over 25,000 persons.

Class C

a. Secretary to an executive or managerial person whose responsibility is not equivalent to one of the specific level situations in the definition for class B, but whose subordinate staff normally numbers at least several dozen employees and is usually divided into organizational segments which are often, in turn, further subdivided. In some companies, this level includes a wide range of organizational echelons; in others, only one or two; or

b. Secretary to the head of an individual plant, factory, etc. (or other equivalent level of official) that employs, in all, fewer than 5,000 persons.

Class D

a. Secretary to the supervisor or head of a small organizational unit (e.g., fewer than about 25 or 30 persons); or

b. Secretary to a nonsupervisory staff specialist, professional employee, administrative officer, or assistant, skilled technician or expert. (NOTE: Many companies assign stenographers, rather than secretaries as described above, to this level of supervisory or nonsupervisory worker.)

STENOGRAPHER, GENERAL

Primary duty is to take dictation involving a normal routine vocabulary from one or more persons either in shorthand or by Stenotype or similar machine; and transcribe dictation. May also type from written copy.

STENOGRAPHER, GENERAL—Continued

May maintain files, keep simple records, or perform other relatively routine clerical tasks. May operate from a stenographic pool. Does not include transcribing-machine work. (See transcribing-machine operator.)

STENOGRAPHER, SENIOR

Primary duty is to take dictation involving a varied technical or specialized vocabulary such as in legal briefs or reports on scientific research from one or more persons either in shorthand or by Stenotype or similar machine; and transcribe dictation. May also type from written copy. May also set up and maintain files, keep records, etc.

OR

Performs stenographic duties requiring significantly greater independence and responsibility than stenographers, general as evidenced by the following: Work requires high degree of stenographic speed and accuracy; and a thorough working knowledge of general business and office procedures and of the specific business operations, organization, policies, procedures, files, workflow, etc. Uses this knowledge in performing stenographic duties and responsible clerical tasks such as, maintaining followup files; assembling material for reports, memorandums, letters, etc.; composing simple letters from general instructions; reading and routing incoming mail; and answering routine questions, etc. Does not include transcribing-machine work.

SWITCHBOARD OPERATOR

Class A. Operates a single- or multiple-position telephone switchboard handling incoming, outgoing, intraplant or office calls. Performs full telephone information service or handles complex calls, such as conference, collect, overseas, or similar calls, either in addition to doing routine work as described for switchboard operator, class B, or as a full-time assignment. ("Full" telephone information service occurs when the establishment has varied functions that are not readily understandable for telephone information purposes, e.g., because of overlapping or interrelated functions, and consequently present frequent problems as to which extensions are appropriate for calls.)

Class B. Operates a single- or multiple-position telephone switchboard handling incoming, outgoing, intraplant or office calls. May handle routine long distance calls and record tolls. May perform limited telephone information service. ("Limited" telephone information service occurs if the functions of the establishment serviced are readily understandable for telephone information purposes, or if the requests are routine, e.g., giving extension numbers when specific names are furnished, or if complex calls are referred to another operator.)

SWITCHBOARD OPERATOR-RECEPTIONIST

In addition to performing duties of operator on a single position or monitor-type switchboard, acts as receptionist and may also type or perform routine clerical work as part of regular duties. This typing or clerical work may take the major part of this worker's time while at switchboard.

TABULATING-MACHINE OPERATOR

Class A. Operates a variety of tabulating or electrical accounting machines, typically including such machines as the tabulator, calculator, interpreter, collator, and others. Performs complete reporting assignments without close supervision, and performs difficult wiring as required. The complete reporting and tabulating assignments typically involve a variety of long and complex reports which often are of irregular or nonrecurring type requiring some planning and sequencing of steps to be taken. As a more experienced operator, is typically involved in training new operators in machine operations, or partially trained operators in wiring from diagrams and operating sequences of long and complex reports. Does not include working supervisors performing tabulating-machine operations and day-to-day supervision of the work and production of a group of tabulating-machine operators.

Class B. Operates more difficult tabulating or electrical accounting machines such as the tabulator and calculator, in addition to the sorter, reproducer, and collator. This work is performed under specific instructions and may include the performance of some wiring from diagrams. The work typically involves, for example, tabulations involving a repetitive accounting exercise, a complete but small tabulating study, or parts of a longer and more complex report. Such reports and studies are usually of a recurring nature where the procedures are well established. May also include the training of new employees in the basic operation of the machine.

Class C. Operates simple tabulating or electrical accounting machines such as the sorter, reproducing punch, collator, etc., with

TABULATING-MACHINE OPERATOR—Continued

specific instructions. May include simple wiring from diagrams and some filing work. The work typically involves portions of a work unit, for example, individual sorting or collating runs or repetitive operations.

TRANSCRIBING-MACHINE OPERATOR, GENERAL

Primary duty is to transcribe dictation involving a normal routine vocabulary from transcribing-machine records. May also type from written copy and do simple clerical work. Workers transcribing dictation involving a varied technical or specialized vocabulary such as legal briefs or reports on scientific research are not included. A worker who takes dictation in shorthand or by Stenotype or similar machine is classified as a stenographer, general.

TYPIST

Uses a typewriter to make copies of various material or to make out bills after calculations have been made by another person. May include typing of stencils, mats, or similar materials for use in duplicating processes. May do clerical work involving little special training, such as keeping simple records, filing records and reports, or sorting and distributing incoming mail.

Class A. Performs one or more of the following: Typing material in final form when it involves combining material from several sources or responsibility for correct spelling, syllabication, punctuation, etc., of technical or unusual words or foreign language material; and planning layout and typing of complicated statistical tables to maintain uniformity and balance in spacing. May type routine form letters varying details to suit circumstances.

Class B. Performs one or more of the following: Copy typing from rough or clear drafts; routine typing of forms, insurance policies, etc.; and setting up simple standard tabulations, or copying more complex tables already setup and spaced properly.

PROFESSIONAL AND TECHNICAL

DRAFTSMAN

Class A. Plans the graphic presentation of complex items having distinctive design features that differ significantly from established drafting precedents. Works in close support with the design originator, and may recommend minor design changes. Analyzes the effect of each change on the details of form, function, and positional relationships of components and parts. Works with a minimum of supervisory assistance. Completed work is reviewed by design originator for consistency with prior engineering determinations. May either prepare drawings, or direct their preparation by lower level draftsmen.

Class B. Performs nonroutine and complex drafting assignments that require the application of most of the standardized drawing techniques regularly used. Duties typically involve such work as: Prepares working drawings of subassemblies with irregular shapes, multiple functions, and precise positional relationships between components; prepares architectural drawings for construction of a building including detail drawings of foundations, wall sections, floor plans, and roof. Uses accepted formulas and manuals in making necessary computations to determine quantities of materials to be used, load capacities, strengths, stresses, etc. Receives initial instructions, requirements, and advice from supervisor. Completed work is checked for technical adequacy.

Class C. Prepares detail drawings of single units or parts for engineering, construction, manufacturing, or repair purposes. Types of drawings prepared include isometric projections (depicting three dimensions in accurate scale) and sectional views to clarify positioning of components and convey needed information. Consolidates details from a number of sources and adjusts or transposes scale as required.

DRAFTSMAN—Continued

Suggested methods of approach, applicable precedents, and advice on source materials are given with initial assignments. Instructions are less complete when assignments recur. Work may be spot-checked during progress.

DRAFTSMAN-TRACER

Copies plans and drawings prepared by others by placing tracing cloth or paper over drawings and tracing with pen or pencil. (Does not include tracing limited to plans primarily consisting of straight lines and a large scale not requiring close delineation.)

and/or

Prepares simple or repetitive drawings of easily visualized items. Work is closely supervised during progress.

NURSE, INDUSTRIAL (REGISTERED)

A registered nurse who gives nursing service under general medical direction to ill or injured employees or other persons who become ill or suffer an accident on the premises of a factory or other establishment. Duties involve a combination of the following: Giving first aid to the ill or injured; attending to subsequent dressing of employees' injuries; keeping records of patients treated; preparing accident reports for compensation or other purposes; assisting in physical examinations and health evaluations of applicants and employees; and planning and carrying out programs involving health education, accident prevention, evaluation of plant environment, or other activities affecting the health, welfare, and safety of all personnel.

MAINTENANCE AND POWERPLANT

CARPENTER, MAINTENANCE

Performs the carpentry duties necessary to construct and maintain in good repair building woodwork and equipment such as bins, cribs, counters, benches, partitions, doors, floors, stairs, casings, and trim made of wood in an establishment. Work involves most of the following: Planning and laying out of work from blueprints, drawings, models, or verbal instructions; using a variety of carpenter's handtools, portable power tools,

CARPENTER, MAINTENANCE—Continued

and standard measuring instruments; making standard shop computations relating to dimensions of work; and selecting materials necessary for the work. In general, the work of the maintenance carpenter requires rounded training and experience usually acquired through a formal apprenticeship or equivalent training and experience.

ELECTRICIAN, MAINTENANCE

Performs a variety of electrical trade functions such as the installation, maintenance, or repair of equipment for the generation, distribution, or utilization of electric energy in an establishment. Work involves most of the following: Installing or repairing any of a variety of electrical equipment such as generators, transformers, switchboards, controllers, circuit breakers, motors, heating units, conduit systems, or other transmission equipment; working from blueprints, drawings, layouts, or other specifications; locating and diagnosing trouble in the electrical system or equipment; working standard computations relating to load requirements of wiring or electrical equipment; and using a variety of electrician's handtools and measuring and testing instruments. In general, the work of the maintenance electrician requires rounded training and experience usually acquired through a formal apprenticeship or equivalent training and experience.

ENGINEER, STATIONARY

Operates and maintains and may also supervise the operation of stationary engines and equipment (mechanical or electrical) to supply the establishment in which employed with power, heat, refrigeration, or air-conditioning. Work involves: Operating and maintaining equipment such as steam engines, air compressors, generators, motors, turbines, ventilating and refrigerating equipment, steam boilers and boiler-fed water pumps; making equipment repairs; and keeping a record of operation of machinery, temperature, and fuel consumption. May also supervise these operations. Head or chief engineers in establishments employing more than one engineer are excluded.

FIREMAN, STATIONARY BOILER

Fires stationary boilers to furnish the establishment in which employed with heat, power, or steam. Feeds fuels to fire by hand or operates a mechanical stoker, or gas or oil burner; and checks water and safety valves. May clean, oil, or assist in repairing boilerroom equipment.

HELPER, MAINTENANCE TRADES

Assists one or more workers in the skilled maintenance trades, by performing specific or general duties of lesser skill, such as keeping

HELPER, MAINTENANCE TRADES—Continued

a worker supplied with materials and tools; cleaning working area, machine, and equipment; assisting journeyman by holding materials or tools; and performing other unskilled tasks as directed by journeyman. The kind of work the helper is permitted to perform varies from trade to trade: In some trades the helper is confined to supplying, lifting, and holding materials and tools and cleaning working areas; and in others he is permitted to perform specialized machine operations, or parts of a trade that are also performed by workers on a full-time basis.

MACHINE-TOOL OPERATOR, TOOLROOM

Specializes in the operation of one or more types of machine tools, such as jig borers, cylindrical or surface grinders, engine lathes, or milling machines, in the construction of machine-shop tools, gages, jigs, fixtures, or dies. Work involves most of the following: Planning and performing difficult machining operations; processing items requiring complicated setups or a high degree of accuracy; using a variety of precision measuring instruments; selecting feeds, speeds, tooling, and operation sequence; and making necessary adjustments during operation to achieve requisite tolerances or dimensions. May be required to recognize when tools need dressing, to dress tools, and to select proper coolants and cutting and lubricating oils. For cross-industry wage study purposes, machine-tool operators, toolroom, in tool and die jobbing shops are excluded from this classification.

MACHINIST, MAINTENANCE

Produces replacement parts and new parts in making repairs of metal parts of mechanical equipment operated in an establishment. Work involves most of the following: Interpreting written instructions and specifications; planning and laying out of work; using a variety of machinist's handtools and precision measuring instruments; setting up and operating standard machine tools; shaping of metal parts to close tolerances; making standard shop computations relating to dimensions of work, tooling, feeds, and speeds of machining; knowledge of the working properties of the common metals; selecting standard materials, parts, and equipment required for his work; and fitting and assembling parts into mechanical equipment. In general, the machinist's work normally requires a rounded training in machine-shop practice usually acquired through a formal apprenticeship or equivalent training and experience.

MECHANIC, AUTOMOTIVE (MAINTENANCE)

Repairs automobiles, buses, motortrucks, and tractors of an establishment. Work involves most of the following: Examining automotive equipment to diagnose source of trouble; disassembling equipment and performing repairs that involve the use of such handtools as wrenches, gages, drills, or specialized equipment in disassembling or fitting parts; replacing broken or defective parts from stock; grinding and adjusting valves; reassembling and installing the various assemblies in the vehicle and making necessary adjustments; and alining wheels, adjusting brakes and lights, or tightening body bolts. In general, the work of the automotive mechanic requires rounded training and experience usually acquired through a formal apprenticeship or equivalent training and experience.

MECHANIC, MAINTENANCE

Repairs machinery or mechanical equipment of an establishment. Work involves most of the following: Examining machines and mechanical equipment to diagnose source of trouble; dismantling or partly dismantling machines and performing repairs that mainly involve the use of handtools in scraping and fitting parts; replacing broken or defective parts with items obtained from stock; ordering the production of a replacement part by a machine shop or sending of the machine to a machine shop for major repairs; preparing written specifications for major repairs or for the production of parts ordered from machine shop; reassembling machines; and making all necessary adjustments for operation. In general, the work of a maintenance mechanic requires rounded training and experience usually acquired through a formal apprenticeship or equivalent training and experience. Excluded from this classification are workers whose primary duties involve setting up or adjusting machines.

MILLWRIGHT

Installs new machines or heavy equipment, and dismantles and installs machines or heavy equipment when changes in the plant layout are required. Work involves most of the following: Planning and laying out of the work; interpreting blueprints or other specifications; using a variety of handtools and rigging; making standard shop computations relating to stresses, strength of materials, and centers of gravity; alining and balancing of equipment; selecting standard tools, equipment, and parts to be used; and installing and maintaining in good order power transmission equipment such as drives and speed reducers. In general, the millwright's work normally requires a rounded training and experience in the trade acquired through a formal apprenticeship or equivalent training and experience.

OILER

Lubricates, with oil or grease, the moving parts or wearing surfaces of mechanical equipment of an establishment.

PAINTER, MAINTENANCE

Paints and redecorates walls, woodwork, and fixtures of an establishment. Work involves the following: Knowledge of surface peculiarities and types of paint required for different applications; preparing surface for painting by removing old finish or by placing putty or filler in nail holes and interstices; and applying paint with spray gun or brush. May mix colors, oils, white lead, and other paint ingredients to obtain proper color or consistency. In general, the work of the maintenance painter requires rounded training and experience usually acquired through a formal apprenticeship or equivalent training and experience.

PIPEFITTER, MAINTENANCE

Installs or repairs water, steam, gas, or other types of pipe and pipefittings in an establishment. Work involves most of the following: Laying out of work and measuring to locate position of pipe from drawings or other written specifications; cutting various sizes of pipe to correct lengths with chisel and hammer or oxyacetylene torch or pipe-cutting machine; threading pipe with stocks and dies; bending pipe by hand-driven or power-driven machines; assembling pipe with couplings and fastening pipe to hangers; making standard shop computations relating to pressures, flow, and size of pipe required; and making standard tests to determine whether finished pipes meet specifications. In general, the work of the maintenance pipefitter requires rounded training and experience usually acquired through a formal apprenticeship or equivalent training and experience. Workers primarily engaged in installing and repairing building sanitation or heating systems are excluded.

PLUMBER, MAINTENANCE

Keeps the plumbing system of an establishment in good order. Work involves: Knowledge of sanitary codes regarding installation of vents and traps in plumbing system; installing or repairing pipes and fixtures; and opening clogged drains with a plunger or plumber's snake. In general, the work of the maintenance plumber requires rounded training and experience usually acquired through a formal apprenticeship or equivalent training and experience.

SHEET-METAL WORKER, MAINTENANCE

Fabricates, installs, and maintains in good repair the sheet-metal equipment and fixtures (such as machine guards, grease pans, shelves, lockers, tanks, ventilators, chutes, ducts, metal roofing) of an establishment. Work involves most of the following: Planning and laying out all types of sheet-metal maintenance work from blueprints, models, or other specifications; setting up and operating all available types of sheet-metal-working machines; using a variety of handtools in cutting, bending, forming, shaping, fitting, and assembling; and installing sheet-metal articles as required. In general, the work of the maintenance sheet-metal worker requires rounded training and experience usually acquired through a formal apprenticeship or equivalent training and experience.

TOOL AND DIE MAKER

(Die maker; jig maker; tool maker; fixture maker; gage maker)

Constructs and repairs machine-shop tools, gages, jigs, fixtures or dies for forgings, punching, and other metal-forming work. Work in-

TOOL AND DIE MAKER—Continued

volves most of the following: Planning and laying out of work from models, blueprints, drawings, or other oral and written specifications; using a variety of tool and die maker's handtools and precision measuring instruments, understanding of the working properties of common metals and alloys; setting up and operating of machine tools and related equipment; making necessary shop computations relating to dimensions of work, speeds, feeds, and tooling of machines; heattreating of metal parts during fabrication as well as of finished tools and dies to achieve required qualities; working to close tolerances; fitting and assembling of parts to prescribed tolerances and allowances; and selecting appropriate materials, tools, and processes. In general, the tool and die maker's work requires a rounded training in machine-shop and toolroom practice usually acquired through a formal apprenticeship or equivalent training and experience.

For cross-industry wage study purposes, tool and die makers in tool and die jobbing shops are excluded from this classification.

CUSTODIAL AND MATERIAL MOVEMENT

ELEVATOR OPERATOR, PASSENGER

Transports passengers between floors of an office building, apartment house, department store, hotel, or similar establishment. Workers who operate elevators in conjunction with other duties such as those of starters and janitors are excluded.

GUARD

Performs routine police duties, either at fixed post or on tour, maintaining order, using arms or force where necessary. Includes gatemen who are stationed at gate and check on identity of employees and other persons entering.

JANITOR, PORTER, OR CLEANER

(Sweeper; charwoman; janitress)

Cleans and keeps in an orderly condition factory working areas and washrooms, or premises of an office, apartment house, or commercial

JANITOR, PORTER, OR CLEANER—Continued

or other establishment. Duties involve a combination of the following: Sweeping, mopping or scrubbing, and polishing floors; removing chips, trash, and other refuse; dusting equipment, furniture, or fixtures; polishing metal fixtures or trimmings; providing supplies and minor maintenance services; and cleaning lavatories, showers, and restrooms. Workers who specialize in window washing are excluded.

LABORER, MATERIAL HANDLING

(Loader and unloader; handler and stacker; shelver; trucker; stockman or stock helper; warehouseman or warehouse helper)

A worker employed in a warehouse, manufacturing plant, store, or other establishment whose duties involve one or more of the following: Loading and unloading various materials and merchandise on or from freight cars, trucks, or other transporting devices; unpacking, shelving, or placing materials or merchandise in proper storage location; and transporting materials or merchandise by handtruck, car, or wheelbarrow. Longshoremen, who load and unload ships are excluded.

ORDER FILLER

(Order picker; stock selector; warehouse stockman)

Fills shipping or transfer orders for finished goods from stored merchandise in accordance with specifications on sales slips, customers' orders, or other instructions. May, in addition to filling orders and indicating items filled or omitted, keep records of outgoing orders, requisition additional stock or report short supplies to supervisor, and perform other related duties.

PACKER, SHIPPING

Prepares finished products for shipment or storage by placing them in shipping containers, the specific operations performed being dependent upon the type, size, and number of units to be packed, the type of container employed, and method of shipment. Work requires the placing of items in shipping containers and may involve one or more of the following: Knowledge of various items of stock in order to verify content; selection of appropriate type and size of container; inserting enclosures in container; using excelsior or other material to prevent breakage or damage; closing and sealing container; and applying labels or entering identifying data on container. Packers who also make wooden boxes or crates are excluded.

SHIPPING AND RECEIVING CLERK

Prepares merchandise for shipment, or receives and is responsible for incoming shipments of merchandise or other materials. Shipping work involves: A knowledge of shipping procedures, practices, routes, available means of transportation, and rates; and preparing records of the goods shipped, making up bills of lading, posting weight and shipping charges, and keeping a file of shipping records. May direct or assist in preparing the merchandise for shipment. Receiving work involves: Verifying or directing others in verifying the correctness of shipments against bills of lading, invoices, or other records; checking for shortages and rejecting damaged goods; routing merchandise or materials to proper departments; and maintaining necessary records and files.

For wage study purposes, workers are classified as follows:

Receiving clerk
Shipping clerk
Shipping and receiving clerk

TRUCKDRIVER

Drives a truck within a city or industrial area to transport materials, merchandise, equipment, or men between various types of establishments such as: Manufacturing plants, freight depots, warehouses, wholesale and retail establishments, or between retail establishments and customers' houses or places of business. May also load or unload truck with or without helpers, make minor mechanical repairs, and keep truck in good working order. Driver-salesmen and over-the-road drivers are excluded.

For wage study purposes, truckdrivers are classified by size and type of equipment, as follows: (Tractor-trailer should be rated on the basis of trailer capacity.)

Truckdriver (combination of sizes listed separately)
Truckdriver, light (under $1^1/_2$ tons)
Truckdriver, medium ($1^1/_2$ to and including 4 tons)
Truckdriver, heavy (over 4 tons, trailer type)
Truckdriver, heavy (over 4 tons, other than trailer type)

TRUCKER, POWER

Operates a manually controlled gasoline- or electric-powered truck or tractor to transport goods and materials of all kinds about a warehouse, manufacturing plant, or other establishment.

For wage study purposes, workers are classified by type of truck, as follows:

Trucker, power (forklift)
Trucker, power (other than forklift)

WATCHMAN

Makes rounds of premises periodically in protecting property against fire, theft, and illegal entry.

GREENVILLE; PICKENS COUNTY; SOUTH CAROLINA

The area reported is one of 85 in which the United States Department of Labor's Bureau of Labor Statistics conducts surveys of occupational earnings and related wage benefits. Data were obtained by personal visits of Bureau Field Economists to representative establishments within six broad industry divisions: (1) manufacturing, (2) transporation, communication, and other public utilities, (3) wholesale trade, (4) retail trade, (5) finance, insurance, and real estate, and (6) services. The contents are reported under two broad categories with subtopics: (1) occupational earnings (office occupations, professional and technical occupations, maintenance and power plant occupations, and custodial and material movement occupations), and (2) establishment practices and supplementary wage provisions practices (minimum entrance salaries for women office workers, shift differentials, scheduled weekly hours, paid holidays, paid vacation, health, insurance, pension plans, and profit-sharing plans). The appendix presents clarifications of occupational descriptions. (SL)

Preface

The Bureau of Labor Statistics program of annual occupational wage surveys in metropolitan areas is designed to provide data on occupational earnings, and establishment practices and supplementary wage provisions. It yields detailed data by selected industry divisions for each of the areas studied, for economic regions, and for the United States. A major consideration in the program is the need for greater insight into (1) the movement of wages by occupational category and skill level, and (2) the structure and level of wages among areas and industry divisions.

At the end of each survey, an individual area bulletin presents survey results for each area studied. After completion of all of the individual area bulletins for a round of surveys, a two-part summary bulletin is issued. The first part brings data for each of the metropolitan areas studied into one bulletin. The second part presents information which has been projected from individual metropolitan area data to relate to economic regions and the United States.

Eighty-five areas currently are included in the program. Information on occupational earnings is collected annually in each area. Information on establishment practices and supplementary wage provisions is obtained biennially in most of the areas.

This bulletin presents results of the survey in Greenville, S.C., in May 1966. The Standard Metropolitan Statistical Area, as defined by the Bureau of the Budget through March 1965, consists of Greenville and Pickens Counties. This study was conducted by the Bureau's regional office in Atlanta, Ga., Brunswick A. Bagdon, Director; by Robert F. McNeely, under the direction of James D. Garland. The study was under the general direction of Donald M. Cruse, Assistant Regional Director for Wages and Industrial Relations.

Area Wage Survey—

The Greenville, S.C., Metropolitan Area

Introduction

This area is 1 of 85 in which the U.S. Department of Labor's Bureau of Labor Statistics conducts surveys of occupational earnings and related wage benefits on an areawide basis. In this area, data were obtained by personal visits of Bureau field economists to representative establishments within six broad industry divisions: Manufacturing; transportation, communication, and other public utilities; wholesale trade; retail trade; finance, insurance, and real estate; and services. Major industry groups excluded from these studies are government operations and the construction and extractive industries. Establishments having fewer than a prescribed number of workers are omitted because they tend to furnish insufficient employment in the occupations studied to warrant inclusion. Separate tabulations are provided for each of the broad industry divisions which meet publication criteria.

These surveys are conducted on a sample basis because of the unnecessary cost involved in surveying all establishments. To obtain optimum accuracy at minimum cost, a greater proportion of large than of small establishments is studied. In combining the data, however, all establishments are given their appropriate weight. Estimates based on the establishments studied are presented, therefore, as relating to all establishments in the industry grouping and area, except for those below the minimum size studied.

Occupations and Earnings

The occupations selected for study are common to a variety of manufacturing and nonmanufacturing industries, and are of the following types: (1) Office clerical; (2) professional and technical; (3) maintenance and powerplant; and (4) custodial and material movement. Occupational classification is based on a uniform set of job descriptions designed to take account of interestablishment variation in duties within the same job. The occupations selected for study are listed and described in appendix B. Earnings data for some of the occupations listed and described are not presented in the A-series tables because either (1) employment in the occupation is too small to provide enough data to merit presentation, or (2) there is possibility of disclosure of individual establishment data.

Occupational employment and earnings data are shown for full-time workers, i.e., those hired to work a regular weekly schedule in the given occupational classification. Earnings data exclude premium pay for overtime and for work on weekends, holidays, and late shifts. Nonproduction bonuses are excluded, but cost-of-living bonuses and incentive earnings are included. Where weekly hours are reported, as for office clerical occupations, reference is to the work schedules (rounded to the nearest half hour) for which straight-time salaries are paid; average weekly earnings for these occupations have been rounded to the nearest half dollar.

The averages presented reflect composite, areawide estimates. Industries and establishments differ in pay level and job staffing and, thus, contribute differently to the estimates for each job. The pay relationship obtainable from the averages may fail to reflect accurately the wage spread or differential maintained among jobs in individual establishments. Similarly, differences in average pay levels for men and women in any of the selected occupations should not be assumed to reflect differences in pay treatment of the sexes within individual establishments. Other possible factors which may contribute to differences in pay for men and women include: Differences in progression within established rate ranges, since only the actual rates paid incumbents are collected; and differences in specific duties performed, although the workers are appropriately classified within the same survey job description. Job descriptions used in classifying employees in these surveys are usually more generalized than those used in individual establishments and allow for minor differences among establishments in the specific duties performed.

Occupational employment estimates represent the total in all establishments within the scope of the study and not the number actually surveyed. Because of differences in occupational structure among establishments, the estimates of occupational employment obtained from the sample of establishments studied serve only to indicate the relative importance of the jobs studied. These differences in occupational structure do not materially affect the accuracy of the earnings data.

Establishment Practices and Supplementary Wage Provisions

Information is presented (in the B-series tables) on selected establishment practices and supplementary wage provisions as they relate to plant and office workers. Administrative, executive, and professional employees, and force-account construction workers who are utilized as a separate work force are excluded. "Plant workers" include working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in nonoffice functions. "Office workers" include working supervisors and nonsupervisory workers performing clerical or related functions. Cafeteria workers and routemen are excluded in manufacturing industries, but included in nonmanufacturing industries.

Minimum entrance salaries (table B-1) relate only to the establishments visited. They are presented in terms of establishments with formal minimum entrance salary policies.

Shift differential data (table B-2) are limited to plant workers in manufacturing industries. This information is presented both in terms of (1) establishment policy,[1] presented in terms of total plant worker employment, and (2) effective practice, presented in terms of workers actually employed on the specified shift at the time of the survey. In establishments having varied differentials, the amount applying to a majority was used or, if no amount applied to a majority, the classification "other" was used. In establishments in which some late-shift hours are paid at normal rates, a differential was recorded only if it applied to a majority of the shift hours.

The scheduled weekly hours (table B-3) of a majority of the first-shift workers in an establishment are tabulated as applying to all of the plant or office workers of that establishment. Paid holidays; paid vacations; health, insurance, and pension plans; and profit-sharing plans (tables B-4 through B-8) are treated statistically on the basis that these are applicable to all plant or office workers if a majority of such workers are eligible or may eventually qualify for the practices listed. Sums of individual items in tables B-2 through B-8 may not equal totals because of rounding.

Data on paid holidays (table B-4) are limited to data on holidays granted annually on a formal basis; i.e., (1) are provided for in written form, or (2) have been established by custom. Holidays ordinarily granted are included even though they may fall on a nonworkday, even if the worker is not granted another day off. The first part of the paid holidays table presents the number of whole and half holidays actually granted. The second part combines whole and half holidays to show total holiday time.

The summary of vacation plans (table B-5) is limited to formal policies, excluding informal arrangements whereby time off with pay is granted at the discretion of the employer. Estimates exclude vacation-savings plans and those which offer "extended" or "sabbatical" benefits beyond basic plans to workers with qualifying lengths of service. Typical of such exclusions are plans in the steel, aluminum, and can industries. Separate estimates are provided according to employer practice in computing vacation payments, such as time payments, percent of annual earnings, or flat-sum amounts. However, in the tabulations of vacation pay, payments not on a time basis were converted to a time basis; for example, a payment of 2 percent of annual earnings was considered as the equivalent of 1 week's pay.

Data are presented for all health, insurance, and pension plans (tables B-6 and B-7) for which at least a part of the cost is borne by the employer, excepting only legal requirements such as workmen's compensation, social security, and railroad retirement. Such plans include those underwritten by a commercial insurance company and those provided through a union fund or paid directly by the employer out of current operating funds or from a fund set aside for this purpose. Death benefits are included as a form of life insurance. Selected health insurance benefits provided employees and dependents are also presented.

Sickness and accident insurance is limited to that type of insurance under which predetermined cash payments are made directly to the insured on a weekly or monthly basis during illness or accident disability. Information is presented for all such plans to which the employer contributes. However, in New York and New Jersey, which have enacted temporary disability insurance laws which require employer contributions,[2] plans are included only if the employer (1) contributes more than is legally required, or (2) provides the employee with benefits which exceed the requirements of the law. Tabulations of paid sick leave plans are limited to formal plans[3] which provide full pay or a proportion of the worker's pay during absence from work because of illness. Separate tabulations are presented according to (1) plans which provide full pay and no waiting period, and (2) plans which provide either partial pay or a waiting period. In addition to the presentation of the proportions of workers who are provided sickness and accident insurance or paid sick leave, an unduplicated total is shown of workers who receive either or both types of benefits.

Catastrophe insurance, sometimes referred to as extended medical insurance, includes those plans which are designed to protect employees in case of sickness and injury involving expenses beyond the normal coverage of hospitalization, medical, and surgical plans. Medical insurance refers to plans providing for complete or partial payment of doctors' fees. Such plans may be underwritten by commercial insurance companies or nonprofit organizations or they may be self-insured. Tabulations of retirement pension plans are limited to those plans that provide monthly payments for the remainder of the worker's life.

Profit-sharing plans (table B-8) are limited to formal plans with definite formulas for computing profit shares to be distributed among employees and whose formulas were communicated to employees in advance of the determination of profits. Data are presented according to provisions for distributing profit shares to employees: (1) Current or cash distribution of profit shares within a short period after determination of profits; (2) deferred distribution of profit shares after a specified number of years or at retirement; (3) combination current and deferred plans; and (4) elective distribution plans, under which each participant is required to select whether to take his share of the current year's profit in cash, have it deferred, or part in cash and part deferred.

---

[1] An establishment was considered as having a policy if it met either of the following conditions: (1) Operated late shifts at the time of the survey, or (2) had formal provisions covering late shifts. An establishment was considered as having formal provisions if it (1) had operated late shifts during the 12 months prior to the survey, or (2) had provisions in written form for operating late shifts.

[2] The temporary disability laws in California and Rhode Island do not require employer contributions.

[3] An establishment was considered as having a formal plan if it established at least the minimum number of days of sick leave available to each employee. Such a plan need not be written, but informal sick leave allowances, determined on an individual basis, were excluded.

Table 1. Establishments and workers within scope of survey and number studied in Greenville, S.C.,[1] by major industry division,[2] May 1966

Industry division	Minimum employment in establishments in scope of study	Number of establishments		Workers in establishments				
		Within scope of study[3]	Studied	Within scope of study				Studied
				Total[4]		Plant	Office	Total[4]
				Number	Percent			
All divisions	-	214	97	55,500	100	45,900	4,100	33,710
Manufacturing	50	135	56	45,500	82	39,600	2,500	26,530
Nonmanufacturing	-	79	41	10,000	18	6,300	1,600	7,180
Transportation, communication, and other public utilities[5]	50	20	11	2,400	4	1,600	300	1,760
Wholesale trade	50	10	4	800	2	(6)	(6)	340
Retail trade	50	31	14	4,400	8	(6)	(6)	3,160
Finance, insurance, and real estate	50	10	6	1,300	2	(7)	(6)	1,050
Services[8]	50	8	6	1,100	2	(6)	(6)	870

[1] The Greenville Standard Metropolitan Statistical Area, as defined by the Bureau of the Budget through March 1965, consists of Greenville and Pickens Counties. The "workers within scope of study" estimates shown in this table provide a reasonably accurate description of the size and composition of the labor force included in the survey. The estimates are not intended, however, to serve as a basis of comparison with other employment indexes for the area to measure employment trends or levels since (1) planning of wage surveys requires the use of establishment data compiled considerably in advance of the payroll period studied, and (2) small establishments are excluded from the scope of the survey.

[2] The 1957 revised edition of the Standard Industrial Classification Manual and the 1963 Supplement were used in classifying establishments by industry division.

[3] Includes all establishments with total employment at or above the minimum limitation. All outlets (within the area) of companies in such industries as trade, finance, auto repair service, and motion picture theaters are considered as 1 establishment.

[4] Includes executive, professional, and other workers excluded from the separate plant and office categories.

[5] Taxicabs and services incidental to water transportation were excluded.

[6] This industry division is represented in estimates for "all industries" and "nonmanufacturing" in the Series A tables, and for "all industries" in the Series B tables. Separate presentation of data for this division is not made for one or more of the following reasons: (1) Employment in the division is too small to provide enough data to merit separate study, (2) the sample was not designed initially to permit separate presentation, (3) response was insufficient or inadequate to permit separate presentation, and (4) there is possibility of disclosure of individual establishment data.

[7] Workers from this entire industry division are represented in estimates for "all industries" and "nonmanufacturing" in the Series A tables, but from the real estate portion only in estimates for "all industries" in the Series B tables. Separate presentation of data for this division is not made for one or more of the reasons given in footnote 6 above.

[8] Hotels; personal services; business services; automobile repair shops; motion pictures; nonprofit membership organizations (excluding religious and charitable organizations); and engineering and architectural services.

The Greenville Standard Metropolitan Statistical Area was defined in 1961 as Greenville County. The area, as defined through March 1965, includes the addition of Pickens County. This survey, conducted in May 1966, is the first to include the added county.

The increase in scope due to the added county was confined almost exclusively to manufacturing. Manufacturing employment in Pickens County, primarily concentrated in the apparel, machinery, and textile industries, accounted for over a fifth of the total manufacturing employment. Although there were numerous exceptions, salaries of office workers were slightly higher in Greenville County, while wages of plant workers were slightly higher in Pickens County. Wage trends were adjusted to eliminate the effect of the change in area definition.

Four-fifths of the workers within scope of the survey in Greenville and Pickens Counties were employed in manufacturing firms. The following table presents the major industry groups and specific industries as a percent of all manufacturing:

Industry group		Specific industries	
Textile mill products	50	Broad woven fabric mills (cotton)	24
Apparel	20	Broad woven fabric mills (man-made fiber and silk)	15
Machinery (except electrical)	11	Women's, misses', and juniors' outerwear	11
		Special industry machinery (except metalworking)	8
		Men's and boys' furnishings	7

This information is based on estimates of total employment derived from universe materials compiled prior to actual survey. Proportions in various industry divisions may differ from proportions based on the results of the survey as shown in table 1 above

Wage Trends for Selected Occupational Groups

Presented in table 2 are indexes and percentages of change in average salaries of office clerical workers and industrial nurses, and in average earnings of selected plant worker groups.

For office clerical workers and industrial nurses, the percentages of change relate to average weekly salaries for normal hours of work, that is, the standard work schedule for which straight-time salaries are paid. For plant worker groups, they measure changes in average straight-time hourly earnings, excluding premium pay for overtime and for work on weekends, holidays, and late shifts. The percentages are based on data for selected key occupations and include most of the numerically important jobs within each group.

Office clerical (men and women):
- Bookkeeping-machine operators, class B
- Clerks, accounting, classes A and B
- Clerks, file, classes A, B, and C
- Clerks, order
- Clerks, payroll
- Comptometer operators
- Keypunch operators, classes A and B
- Office boys and girls
- Stenographers, general
- Stenographers, senior
- Switchboard operators, classes A and B
- Tabulating-machine operators, class B
- Typists, classes A and B

Industrial nurses (men and women):
- Nurses, industrial (registered)

Skilled maintenance (men):
- Carpenters
- Electricians
- Machinists
- Mechanics
- Mechanics (automotive)
- Painters
- Pipefitters
- Tool and die makers

Unskilled plant (men):
- Janitors, porters, and cleaners
- Laborers, material handling

NOTE: Secretaries, included in the list of jobs in all previous years, are excluded because of a change in the description this year.

Average weekly salaries or average hourly earnings were computed for each of the selected occupations. The average salaries or hourly earnings were then multiplied by employment in each of the jobs during the period surveyed in 1961. These weighted earnings for individual occupations were then totaled to obtain an aggregate for each occupational group. Finally, the ratio (expressed as a percentage) of the group aggregate for the one year to the aggregate for the other year was computed and the difference between the result and 100 is the percentage of change from the one period to the other. The indexes were computed by multiplying the ratios for each group aggregate for each period after the base year (1961).

The indexes and percentages of change measure, principally, the effects of (1) general salary and wage changes; (2) merit or other increases in pay received by individual workers while in the same job; and (3) changes in average wages due to changes in the labor force resulting from labor turnover, force expansions, force reductions, and changes in the proportions of workers employed by establishments with different pay levels. Changes in the labor force can cause increases or decreases in the occupational averages without actual wage changes. For example, a force expansion might increase the proportion of lower paid workers in a specific occupation and lower the average, whereas a reduction in the proportion of lower paid workers would have the opposite effect. Similarly, the movement of a high-paying establishment out of an area could cause the average earnings to drop, even though no change in rates occurred in other establishments in the area. Data are adjusted where necessary to remove from the indexes and percentages of change any significant effect caused by changes in scope of the survey.

The use of constant employment weights eliminates the effect of changes in the proportion of workers represented in each job included in the data. The percentages of change reflect only changes in average pay for straight-time hours. They are not influenced by changes in standard work schedules, as such, or by premium pay for overtime.

Table 2. Indexes of standard weekly salaries and straight-time hourly earnings for selected occupational groups in Greenville, S.C., May 1966 and May 1965, and percents of increase for selected periods

Industry and occupational group	Indexes (April 1961=100)		Percents of increase					
	May 1966	May 1965	May 1965 to May 1966	May 1964 to May 1965	May 1963 to May 1964	May 1962 to May 1963	April 1961 to May 1962	May 1960 to April 1961
All industries:								
Office clerical (men and women)	122.1	114.8	6.4	3.1	4.3	3.3	3.3	2.7
Industrial nurses (men and women)	115.1	113.4	1.8	3.0	4.5	4.7	.7	2.1

[1] Standard hours reflect the workweek for which employees receive their regular straight-time salaries and the earnings correspond to these weekly hours.

[2] The mean is computed for each job by totaling the earnings of all workers and dividing by the number of workers. The median designates position—half of the employees surveyed receive more than the rate shown; half receive less than the rate shown. The middle range is defined by 2 rates of pay; a fourth of the workers earn less than the lower of these rates and a fourth earn more than the higher rate.

[3] May include workers other than those presented separately.

[4] Description for this occupation has been revised since the last survey in this area. See appendix A.

[1] Data limited to men workers except where otherwise indicated.
[2] Excludes premium pay for overtime and for work on weekends, holidays, and late shifts.
[3] For definition of terms, see footnote 2, table A-1.
[4] Includes all drivers regardless of size and type of truck operated.
[5] Transportation, communication, and other public utilities.

B. Establishment Practices and Supplementary Wage Provisions

Table B-1. Minimum Entrance Salaries for Women Office Workers

(Distribution of establishments studied in all industries and in industry divisions by minimum entrance salary for selected categories of inexperienced women office workers, Greenville, S. C., May 1966)

Minimum weekly straight-time salary[1]	Inexperienced typists					Other inexperienced clerical workers[2]				
	All industries	Manufacturing		Nonmanufacturing		All industries	Manufacturing		Nonmanufacturing	
		Based on standard weekly hours[3] of—					Based on standard weekly hours[3] of—			
		All schedules	40	All schedules	40		All schedules	40	All schedules	40
Establishments studied	97	56	xxx	41	xxx	97	56	xxx	41	xxx
Establishments having a specified minimum	21	12	11	9	7	40	25	23	15	11
Under $50.00	-	-	-	-	-	1	-	-	1	-
$50.00 and under $52.50	6	2	2	4	3	13	5	4	8	6
$52.50 and under $55.00	3	1	1	2	2	5	3	3	2	2
$55.00 and under $57.50	5	4	3	1	-	7	6	5	1	-
$57.50 and under $60.00	1	1	1	-	-	4	3	3	1	1
$60.00 and under $62.50	4	3	3	1	1	7	6	6	1	1
$62.50 and under $65.00	1	-	-	1	1	1	-	-	1	1
$65.00 and under $67.50	1	1	1	-	-	2	2	2	-	-
Establishments having no specified minimum	7	7	xxx	-	xxx	14	12	xxx	2	xxx
Establishments which did not employ workers in this category	69	37	xxx	32	xxx	43	19	xxx	24	xxx

[1] These salaries relate to formally established minimum starting (hiring) regular straight-time salaries that are paid for standard workweeks.
[2] Excludes workers in subclerical jobs such as messenger or office girl.
[3] Data are presented for all standard workweeks combined, and for the most common standard workweek reported.

Table B-2. Shift Differentials

(Shift differentials of manufacturing plant workers by type and amount of differential, Greenville, S.C., May 1966)

Shift differential	Percent of manufacturing plant workers—			
	In establishments having formal provisions[1] for—		Actually working on—	
	Second shift work	Third or other shift work	Second shift	Third or other shift
Total	70.8	68.6	20.1	14.8
With shift pay differential	25.6	65.1	6.1	14.1
Uniform cents (per hour)	22.1	60.8	5.3	13.8
5 cents	15.9	49.4	3.4	12.1
6 cents	1.9	1.1	.6	-
8 cents	3.6	3.6	1.0	.6
9 cents	-	1.4	-	.2
10 cents	.1	3.3	([2])	.4
12 cents	-	1.7	-	.6
18 2/3 cents	.5	-	.2	-
Uniform percentage	3.5	4.3	.8	.3
4 percent	3.5	3.5	.8	.1
5 percent	-	.8	-	.2
With no shift pay differential	45.2	3.6	14.1	.7

[1] Includes establishments currently operating late shifts, and establishments with formal provisions covering late shifts even though they were not currently operating late shifts.
[2] Less than 0.05 percent.

Table B-3. Scheduled Weekly Hours

(Percent distribution of plant and office workers in all industries and in industry divisions by scheduled weekly hours of first-shift workers, Greenville, S.C., May 1966)

Weekly hours	Plant workers			Office workers		
	All industries[1]	Manufacturing	Public utilities[2]	All industries[3]	Manufacturing	Public utilities[2]
All workers	100	100	100	100	100	100
36 1/4 hours	-	-	-	4	-	-
37 1/2 hours	([4])	([4])	-	6	7	26
Over 37 1/2 and under 40 hours	2	-	-	4	1	-
40 hours	68	72	84	80	90	64
Over 40 and under 44 hours	2	-	-	2	-	10
44 hours	4	3	-	2	1	-
Over 44 and under 48 hours	3	2	6	1	([4])	-
48 hours	20	22	-	1	1	-
50 hours	1	-	6	-	-	-
54 hours	([4])	-	5	-	-	-

[1] Includes data for wholesale trade, retail trade, real estate, and services, in addition to those industry divisions shown separately.
[2] Transportation, communication, and other public utilities.
[3] Includes data for wholesale trade; retail trade; finance, insurance, and real estate; and services, in addition to those industry divisions shown separately.
[4] Less than 0.5 percent.

Table B-4. Paid Holidays

(Percent distribution of plant and office workers in all industries and in industry divisions by number of paid holidays provided annually, Greenville, S.C., May 1966)

Item	Plant workers			Office workers		
	All industries[1]	Manufacturing	Public utilities[2]	All industries[3]	Manufacturing	Public utilities[2]
All workers	100	100	100	100	100	100
Workers in establishments providing paid holidays	68	65	100	89	83	100
Workers in establishments providing no paid holidays	32	35	-	11	17	-
Number of days						
1 holiday	5	5	-	1	1	-
2 holidays	11	12	-	1	2	-
3 holidays	7	6	6	3	3	6
4 holidays	13	14	-	13	20	-
5 holidays	15	11	12	36	30	12
6 holidays	10	10	15	22	17	18
7 holidays	7	6	47	12	10	52
8 holidays	1	-	21	1	-	12
Total holiday time						
8 days	1	-	21	1	-	12
7 days or more	8	6	67	12	10	64
6 days or more	18	16	82	34	26	82
5 days or more	33	27	94	71	56	94
4 days or more	46	41	94	84	76	94
3 days or more	53	47	100	87	79	100
2 days or more	63	59	100	88	81	100
1 day or more	68	65	100	89	83	100

[1] Includes data for wholesale trade, retail trade, real estate, and services, in addition to those industry divisions shown separately.
[2] Transportation, communication, and other public utilities.
[3] Includes data for wholesale trade; retail trade; finance, insurance, and real estate; and services, in addition to those industry divisions shown separately.

Table B-5. Paid Vacations[1]

(Percent distribution of plant and office workers in all industries and in industry divisions by vacation pay provisions, Greenville, S.C., May 1966)

Vacation policy	Plant workers			Office workers		
	All industries[2]	Manufacturing	Public utilities[3]	All industries[4]	Manufacturing	Public utilities[3]
All workers	100	100	100	100	100	100
Method of payment						
Workers in establishments providing paid vacations	99	99	94	100	100	100
Length-of-time payment	39	30	94	91	85	100

After 25 years of service						
1 week	16	16	-	6	9	-
2 weeks	59	62	7	44	51	18
Over 2 and under 3 weeks	2	2	-	1	1	-
3 weeks	12	12	12	29	28	27
Over 3 and under 4 weeks	([5])	-	5	-	-	-
4 weeks	10	7	71	19	7	56
Over 4 weeks		-	-	2	3	-
After 30 years of service						
1 week	16	16	-	6	9	-
2 weeks	59	62	7	44	51	18
Over 2 and under 3 weeks	2	2	-	1	1	-
3 weeks	12	12	-	27	28	4
Over 3 and under 4 weeks	([5])	-	5	-	-	-
4 weeks	10	6	82	20	7	78
Over 4 weeks	1	1	-	2	3	-

[1] Includes basic plans only. Excludes plans such as vacation-savings and those plans which offer "extended" or "sabbatical" benefits beyond basic plans to workers with qualifying lengths of service. Typical of such exclusions are plans in the steel, aluminum, and can industries.

[2] Includes data for wholesale trade, retail trade, real estate, and services, in addition to those industry divisions shown separately.

[3] Transportation, communication, and other public utilities.

[4] Includes data for wholesale trade; retail trade; finance, insurance, and real estate; and services, in addition to those industry divisions shown separately.

[5] Less than 0.5 percent.

[6] Includes payments other than "length of time," such as percentage of annual earnings or flat-sum payments, converted to an equivalent time basis; for example, a payment of 2 percent of annual earnings was considered as 1 week's pay. Periods of service were arbitrarily chosen and do not necessarily reflect the individual provisions for progressions. For example, the changes in proportions indicated at 10 years' service include changes in provisions occurring between 5 and 10 years. Estimates are cumulative. Thus, the proportion receiving 3 weeks' pay or more after 5 years includes those who receive 3 weeks' pay or more after fewer years of service.

Table B-6. Health, Insurance, and Pension Plans

(Percent of plant and office workers in all industries and in industry divisions employed in establishments providing health, insurance, or pension benefits,[1] Greenville, S.C., May 1966)

Type of benefit	Plant workers			Office workers		
	All industries[2]	Manufacturing	Public utilities[3]	All industries[4]	Manufacturing	Public utilities[3]
All workers	100	100	100	100	100	100
Workers in establishments providing:						
Life insurance	96	97	100	98	98	100
Accidental death and dismemberment insurance	50	50	68	51	45	73
Sickness and accident insurance or sick leave or both[5]	53	50	74	66	58	59
Sickness and accident insurance	47	49	21	43	46	22
Sick leave (full pay and no waiting period)	5	([6])	19	43	37	22
Sick leave (partial pay or waiting period)	3	1	34	5	([6])	26
Hospitalization insurance	93	94	100	98	98	100
Surgical insurance	92	93	100	97	98	100
Medical insurance	32	29	66	50	39	71
Catastrophe insurance	30	26	69	55	36	78
Retirement pension	48	47	74	63	57	74
No health, insurance, or pension plan	?	1	-	([6])	-	-

[1] Includes those plans for which at least a part of the cost is borne by the employer, except those legally required, such as workmen's compensation, social security, and railroad retirement.
[2] Includes data for wholesale trade, retail trade, real estate, and services, in addition to those industry divisions shown separately.
[3] Transportation, communication, and other public utilities.
[4] Includes data for wholesale trade; retail trade; finance, insurance, and real estate; and services, in addition to those industry divisions shown separately.
[5] Unduplicated total of workers receiving sick leave or sickness and accident insurance shown separately below. Sick leave plans are limited to those which definitely establish at least the minimum number of days' pay that can be expected by each employee. Informal sick leave allowances determined on an individual basis are excluded.
[6] Less than 0.5 percent.

Table B-7. Health Insurance Benefits Provided Employees and Their Dependents

(Percent of plant and office workers in all industries and in industry divisions employed in establishments providing health insurance benefits covering employees and their dependents, Greenville, S.C., May 1966)

Type of benefit, coverage, and financing[1]	Plant workers			Office workers		
	All industries[2]	Manufacturing	Public utilities[3]	All industries[4]	Manufacturing	Public utilities[3]
All workers	100	100	100	100	100	100
Workers in establishments providing:						
Hospitalization insurance	93	94	100	98	98	100
Covering employees only	29	30	24	38	31	35
Employer financed	15	15	24	21	17	35
Jointly financed	14	14	-	16	15	-
Covering employees and their dependents	64	65	76	60	67	65
Employer financed	5	3	41	7	7	23
Jointly financed	50	51	35	41	40	42
Employer financed for employees; jointly financed for dependents	9	11	-	10	17	-
Employer financed for dependents; jointly financed for employees	(5)	(5)	-	1	2	-
Surgical insurance	92	93	100	97	98	100
Covering employees only	28	29	24	37	31	35
Employer financed	15	15	24	21	17	35
Jointly financed	13	13	-	16	15	-
Covering employees and their dependents	64	65	76	60	67	65
Employer financed	5	3	41	7	7	23
Jointly financed	50	51	35	41	40	42
Employer financed for employees; jointly financed for dependents	9	11	-	10	17	-
Employer financed for dependents; jointly financed for employees	(5)	(5)	-	1	2	-
Medical insurance	32	29	66	50	39	71
Covering employees only	6	4	17	16	8	23
Employer financed	4	3	17	9	6	23
Jointly financed	2	1	-	7	1	-
Covering employees and their dependents	26	24	50	34	32	48
Employer financed	2	1	21	4	3	16
Jointly financed	17	15	29	20	13	32
Employer financed for employees; jointly financed for dependents	7	8	-	9	15	-
Employer financed for dependents; jointly financed for employees	-	-	-	-	-	-
Catastrophe insurance	30	26	69	55	36	78
Covering employees only	13	13	19	29	20	34
Employer financed	6	5	19	16	8	34
Jointly financed	8	8	-	13	12	-
Covering employees and their dependents	17	14	50	26	16	44
Employer financed	2	(5)	50	5	2	38
Jointly financed	15	13	-	19	10	6
Employer financed for employees; jointly financed for dependents	-	-	-	1	2	-
Employer financed for dependents; jointly financed for employees	(5)	(5)	-	1	2	-

[1] Includes plans for which at least a part of the cost is borne by the employer. See footnote 1, table B-6. An establishment was considered as providing benefits to employees for their dependents if such coverage was available to at least a majority of those employees one would usually expect to have dependents, e.g., married men, even though they were less than a majority of all plant or office workers. The employer bears the entire cost of "employer financed" plans. The employer and employee share the cost of "jointly financed" plans.

[2] Includes data for wholesale trade, retail trade, real estate, and services, in addition to those industry divisions shown separately.

[3] Transportation, communication, and other public utilities.

[4] Includes data for wholesale trade; retail trade; finance, insurance, and real estate; and services, in addition to those industry divisions shown separately.

[5] Less than 0.5 percent.

Table B-8. Profit-Sharing Plans

(Percent of plant and office workers in all industries and in industry divisions employed in establishments providing profit-sharing plans,[1] by type of plan, Greenville, S. C., May 1966)

Type of plan	Plant workers			Office workers		
	All industries[2]	Manufacturing	Public utilities[3]	All industries[4]	Manufacturing	Public utilities[3]
All workers	100	100	100	100	100	100
Workers in establishments providing profit-sharing plans	15	13	7	27	21	11
Plans providing for current distribution	-	-	-	-	-	-
Plans providing for deferred distribution	14	13	7	25	21	11
Plans providing for both current and deferred distribution	2	-	-	2	-	-
Plans providing for employee's choice of method of distribution	-	-	-	-	-	-
Workers in establishments providing no profit-sharing plans	85	87	93	73	79	89

[1] The study was limited to formal plans (1) having established formulas for the allocation of profit shares among employees; (2) whose formulas were communicated to the employees in advance of the determination of profits; (3) that represent a commitment by the company to make periodic contributions based on profits; and (4) in which eligibility extends to a majority of the plant or office workers.

[2] Includes data for wholesale trade, retail trade, real estate, and services, in addition to those industry divisions shown separately.

[3] Transportation, communication, and other public utilities.

[4] Includes data for wholesale trade; retail trade; finance, insurance, and real estate; and services, in addition to those industry divisions shown separately.

Appendix A. Changes in Occupational Descriptions

Since the Bureau's last survey, occupational descriptions for draftsman, secretary, and switchboard operator were revised in order to obtain salary information for more specific categories.

Secretary. The revised descriptions for secretary (classes A, B, C, and D) classify these workers according to levels of responsibility. The size of the organization and the scope of the supervisor's position are considered in distinguishing these levels. Data published under the composite title of secretary are not comparable to data previously published.

Switchboard operator. The revised description for switchboard operator arranges these workers into two defined classes (A and B) instead of a single category, clarifying the criteria of types of calls handled and types of information provided. The combination of class A and class B data, where both are published, is comparable to the single designation, if previously published.

Draftsman. The revised descriptions for draftsman (classes A, B, and C; and draftsman-tracer) replace the previous designations for draftsman (leader, senior, and junior; and tracer) and emphasize the distinction between drafting and design skills. Therefore, data presented for any of these occupations are not comparable to data previously published.

The revised occupational descriptions are included in appendix B.

Appendix B. Occupational Descriptions

The primary purpose of preparing job descriptions for the Bureau's wage surveys is to assist its field staff in classifying into appropriate occupations workers who are employed under a variety of payroll titles and different work arrangements from establishment to establishment and from area to area. This permits the grouping of occupational wage rates representing comparable job content. Because of this emphasis on interestablishment and interarea comparability of occupational content, the Bureau's job descriptions may differ significantly from those in use in individual establishments or those prepared for other purposes. In applying these job descriptions, the Bureau's field economists are instructed to exclude working supervisors, apprentices, learners, beginners, trainees, handicapped, part-time, temporary, and probationary workers.

OFFICE

BILLER, MACHINE

Prepares statements, bills, and invoices on a machine other than an ordinary or electromatic typewriter. May also keep records as to billings or shipping charges or perform other clerical work incidental to billing operations. For wage study purposes, billers, machine, are classified by type of machine, as follows:

Biller, machine (billing machine). Uses a special billing machine (Moon Hopkins, Elliott Fisher, Burroughs, etc., which are combination typing and adding machines) to prepare bills and invoices from customers' purchase orders, internally prepared orders, shipping memorandums, etc. Usually involves application of predetermined discounts and shipping charges, and entry of necessary extensions, which may or may not be computed on the billing machine, and totals which are automatically accumulated by machine. The operation usually involves a large number of carbon copies of the bill being prepared and is often done on a fanfold machine.

Biller, machine (bookkeeping machine). Uses a bookkeeping machine (Sundstrand, Elliott Fisher, Remington Rand, etc., which may or may not have typewriter keyboard) to prepare customers' bills as part of the accounts receivable operation. Generally involves the simultaneous entry of figures on customers' ledger record. The machine automatically accumulates figures on a number of vertical columns and computes, and usually prints automatically the debit or credit balances. Does not involve a knowledge of bookkeeping. Works from uniform and standard types of sales and credit slips.

BOOKKEEPING-MACHINE OPERATOR

Operates a bookkeeping machine (Remington Rand, Elliott Fisher, Sundstrand, Burroughs, National Cash Register, with or without a typewriter keyboard) to keep a record of business transactions.

Class A. Keeps a set of records requiring a knowledge of and experience in basic bookkeeping principles, and familiarity with the structure of the particular accounting system used. Determines proper records and distribution of debit and credit items to be used in each phase of the work. May prepare consolidated reports, balance sheets, and other records by hand.

Class B. Keeps a record of one or more phases or sections of a set of records usually requiring little knowledge of basic bookkeeping. Phases or sections include accounts payable, payroll, customers' accounts (not including a simple type of billing described under biller, machine), cost distribution, expense distribution, inventory control, etc. May check or assist in preparation of trial balances and prepare control sheets for the accounting department.

CLERK, ACCOUNTING

Class A. Under general direction of a bookkeeper or accountant, has responsibility for keeping one or more sections of a complete set of books or records relating to one phase of an establishment's business transactions. Work involves posting and balancing subsidiary

CLERK, ACCOUNTING—Continued

ledger or ledgers such as accounts receivable or accounts payable; examining and coding invoices or vouchers with proper accounting distribution; and requires judgment and experience in making proper assignations and allocations. May assist in preparing, adjusting, and closing journal entries; and may direct class B accounting clerks.

Class B. Under supervision, performs one or more routine accounting operations such as posting simple journal vouchers or accounts payable vouchers, entering vouchers in voucher registers; reconciling bank accounts; and posting subsidiary ledgers controlled by general ledgers, or posting simple cost accounting data. This job does not require a knowledge of accounting and bookkeeping principles but is found in offices in which the more routine accounting work is subdivided on a functional basis among several workers.

CLERK, FILE

Class A. In an established filing system containing a number of varied subject matter files, classifies and indexes file material such as correspondence, reports, technical documents, etc. May also file this material. May keep records of various types in conjunction with the files. May lead a small group of lower level file clerks.

Class B. Sorts, codes, and files unclassified material by simple (subject matter) headings or partly classified material by finer subheadings. Prepares simple related index and cross-reference aids. As requested, locates clearly identified material in files and forwards material. May perform related clerical tasks required to maintain and service files.

Class C. Performs routine filing of material that has already been classified or which is easily classified in a simple serial classification system (e.g., alphabetical, chronological, or numerical). As requested, locates readily available material in files and forwards material; and may fill out withdrawal charge. Performs simple clerical and manual tasks required to maintain and service files.

CLERK, ORDER

Receives customers' orders for material or merchandise by mail, phone, or personally. Duties involve any combination of the following: Quoting prices to customers; making out an order sheet listing the items

CLERK, ORDER—Continued

to make up the order; checking prices and quantities of items on order sheet; and distributing order sheets to respective departments to be filled. May check with credit department to determine credit rating of customer, acknowledge receipt of orders from customers, follow up orders to see that they have been filled, keep file of orders received, and check shipping invoices with original orders.

CLERK, PAYROLL

Computes wages of company employees and enters the necessary data on the payroll sheets. Duties involve: Calculating workers' earnings based on time or production records; and posting calculated data on payroll sheet, showing information such as worker's name, working days, time, rate, deductions for insurance, and total wages due. May make out paychecks and assist paymaster in making up and distributing pay envelopes. May use a calculating machine.

COMPTOMETER OPERATOR

Primary duty is to operate a Comptometer to perform mathematical computations. This job is not to be confused with that of statistical or other type of clerk, which may involve frequent use of a Comptometer but, in which, use of this machine is incidental to performance of other duties.

DUPLICATING-MACHINE OPERATOR (MIMEOGRAPH OR DITTO)

Under general supervision and with no supervisory responsibilities, reproduces multiple copies of typewritten or handwritten matter, using a Mimeograph or Ditto machine. Makes necessary adjustment such as for ink and paper feed counter and cylinder speed. Is not required to prepare stencil or Ditto master. May keep file of used stencils or Ditto masters. May sort, collate, and staple completed material.

KEYPUNCH OPERATOR

Class A. Operates a numerical and/or alphabetical or combination keypunch machine to transcribe data from various source documents to keypunch tabulating cards. Performs same tasks as lower level keypunch operator but, in addition, work requires application

KEYPUNCH OPERATOR—Continued

of coding skills and the making of some determinations, for example, locates on the source document the items to be punched; extracts information from several documents; and searches for and interprets information on the document to determine information to be punched. May train inexperienced operators.

Class B. Under close supervision or following specific procedures or instructions, transcribes data from source documents to punched cards. Operates a numerical and/or alphabetical or combination keypunch machine to keypunch tabulating cards. May verify cards. Working from various standardized source documents, follows specified sequences which have been coded or prescribed in detail and require little or no selecting, coding, or interpreting of data to be punched. Problems arising from erroneous items or codes, missing information, etc., are referred to supervisor.

OFFICE BOY OR GIRL

Performs various routine duties such as running errands, operating minor office machines such as sealers or mailers, opening and distributing mail, and other minor clerical work.

SECRETARY

Assigned as personal secretary, normally to one individual. Maintains a close and highly responsive relationship to the day-to-day work activities of the supervisor. Works fairly independently receiving a minimum of detailed supervision and guidance. Performs varied clerical and secretarial duties, usually including most of the following: (a) Receives telephone calls, personal callers, and incoming mail, answers routine inquiries, and routes the technical inquiries to the proper persons; (b) establishes, maintains, and revises the supervisor's files; (c) maintains the supervisor's calendar and makes appointments as instructed; (d) relays messages from supervisor to subordinates; (e) reviews correspondence, memoranda, and reports prepared by others for the supervisor's signature to assure procedural and typographic accuracy; and (f) performs stenographic and typing work.

May also perform other clerical and secretarial tasks of comparable nature and difficulty. The work typically requires knowledge of office routine and understanding of the organization, programs, and procedures related to the work of the supervisor.

SECRETARY—Continued

Exclusions

Not all positions that are titled "secretary" possess the above characteristics. Examples of positions which are excluded from the definition are as follows: (a) Positions which do not meet the "personal" secretary concept described above; (b) stenographers not fully trained in secretarial type duties; (c) stenographers serving as office assistants to a group of professional, technical, or managerial persons; (d) secretary positions in which the duties are either substantially more routine or substantially more complex and responsible than those characterized in the definition; and (e) assistant type positions which involve more difficult or more responsible technical, administrative, supervisory, or specialized clerical duties which are not typical of secretarial work.

NOTE: The term "corporate officer," used in the level definitions following, refers to those officials who have a significant corporate-wide policymaking role with regard to major company activities. The title "vice president," though normally indicative of this role, does not in all cases identify such positions. Vice presidents whose primary responsibility is to act personally on individual cases or transactions (e.g., approve or deny individual loan or credit actions; administer individual trust accounts; directly supervise a clerical staff) are not considered to be "corporate officers" for purposes of applying the following level definitions.

Class A

a. Secretary to the chairman of the board or president of a company that employes, in all, over 100 but fewer than 5,000 persons; or

b. Secretary to a corporate officer (other than the chairman of the board or president) of a company that employs, in all, over 5,000 but fewer than 25,000 persons; or

c. Secretary to the head (immediately below the corporate officer level) of a major segment or subsidiary of a company that employs, in all, over 25,000 persons.

Class B

a. Secretary to the chairman of the board or president of a company that employs, in all, fewer than 100 persons; or

b. Secretary to a corporate officer (other than chairman of the board or president) of a company that employs, in all, over 100 but fewer than 5,000 persons; or

SECRETARY—Continued

c. Secretary to the head (immediately below the officer level) over either a major corporate-wide functional activity (e. g., marketing, research, operations, industrial relations, etc.) or a major geographic or organizational segment (e. g., a regional headquarters; a major division) of a company that employs, in all, over 5,000 but fewer than 25,000 employees; or

d. Secretary to the head of an individual plant, factory, etc. (or other equivalent level of official) that employs, in all, over 5,000 persons; or

e. Secretary to the head of a large and important organizational segment (e. g., a middle management supervisor of an organizational segment often involving as many as several hundred persons) of a company that employs, in all, over 25,000 persons.

Class C

a. Secretary to an executive or managerial person whose responsibility is not equivalent to one of the specific level situations in the definition for class B, but whose subordinate staff normally numbers at least several dozen employees and is usually divided into organizational segments which are often, in turn, further subdivided. In some companies, this level includes a wide range of organizational echelons; in others, only one or two; or

b. Secretary to the head of an individual plant, factory, etc. (or other equivalent level of official) that employs, in all, fewer than 5,000 persons.

Class D

a. Secretary to the supervisor or head of a small organizational unit (e. g., fewer than about 25 or 30 persons); or

b. Secretary to a nonsupervisory staff specialist, professional employee, administrative officer, or assistant, skilled technician or expert. (NOTE: Many companies assign stenographers, rather than secretaries as described above, to this level of supervisory or nonsupervisory worker.)

STENOGRAPHER, GENERAL

Primary duty is to take dictation involving a normal routine vocabulary from one or more persons either in shorthand or by Stenotype or similar machine; and transcribe dictation. May also type from written copy.

STENOGRAPHER, GENERAL—Continued

May maintain files, keep simple records, or perform other relatively routine clerical tasks. May operate from a stenographic pool. Does not include transcribing-machine work. (See transcribing-machine operator.)

STENOGRAPHER, SENIOR

Primary duty is to take dictation involving a varied technical or specialized vocabulary such as in legal briefs or reports on scientific research from one or more persons either in shorthand or by Stenotype or similar machine; and transcribe dictation. May also type from written copy. May also set up and maintain files, keep records, etc.

OR

Performs stenographic duties requiring significantly greater independence and responsibility than stenographers, general as evidenced by the following: Work requires high degree of stenographic speed and accuracy; and a thorough working knowledge of general business and office procedures and of the specific business operations, organization, policies, procedures, files, workflow, etc. Uses this knowledge in performing stenographic duties and responsible clerical tasks such as, maintaining followup files; assembling material for reports, memorandums, letters, etc.; composing simple letters from general instructions; reading and routing incoming mail; and answering routine questions, etc. Does not include transcribing-machine work.

SWITCHBOARD OPERATOR

Class A. Operates a single- or multiple-position telephone switchboard handling incoming, outgoing, intraplant or office calls. Performs full telephone information service or handles complex calls, such as conference, collect, overseas, or similar calls, either in addition to doing routine work as described for switchboard operator, class B, or as a full-time assignment. ("Full" telephone information service occurs when the establishment has varied functions that are not readily understandable for telephone information purposes, e. g., because of overlapping or interrelated functions, and consequently present frequent problems as to which extensions are appropriate for calls.)

Class B. Operates a single- or multiple-position telephone switchboard handling incoming, outgoing, intraplant or office calls. May handle routine long distance calls and record tolls. May perform limited telephone information service. ("Limited" telephone information service occurs if the functions of the establishment serviced are readily understandable for telephone information purposes, or if the requests are routine, e. g., giving extension numbers when specific names are furnished, or if complex calls are referred to another operator.)

SWITCHBOARD OPERATOR-RECEPTIONIST

In addition to performing duties of operator on a single position or monitor-type switchboard, acts as receptionist and may also type or perform routine clerical work as part of regular duties. This typing or clerical work may take the major part of this worker's time while at switchboard.

TABULATING-MACHINE OPERATOR

Class A. Operates a variety of tabulating or electrical accounting machines, typically including such machines as the tabulator, calculator, interpreter, collator, and others. Performs complete reporting assignments without close supervision, and performs difficult wiring as required. The complete reporting and tabulating assignments typically involve a variety of long and complex reports which often are of irregular or nonrecurring type requiring some planning and sequencing of steps to be taken. As a more experienced operator, is typically involved in training new operators in machine operations, or partially trained operators in wiring from diagrams and operating sequences of long and complex reports. Does not include working supervisors performing tabulating-machine operations and day-to-day supervision of the work and production of a group of tabulating-machine operators.

Class B. Operates more difficult tabulating or electrical accounting machines such as the tabulator and calculator, in addition to the sorter, reproducer, and collator. This work is performed under specific instructions and may include the performance of some wiring from diagrams. The work typically involves, for example, tabulations involving a repetitive accounting exercise, a complete but small tabulating study, or parts of a longer and more complex report. Such reports and studies are usually of a recurring nature where the procedures are well established. May also include the training of new employees in the basic operation of the machine.

Class C. Operates simple tabulating or electrical accounting machines such as the sorter, reproducing punch, collator, etc., with

TABULATING-MACHINE OPERATOR—Continued

specific instructions. May include simple wiring from diagrams and some filing work. The work typically involves portions of a work unit, for example, individual sorting or collating runs or repetitive operations.

TRANSCRIBING-MACHINE OPERATOR, GENERAL

Primary duty is to transcribe dictation involving a normal routine vocabulary from transcribing-machine records. May also type from written copy and do simple clerical work. Workers transcribing dictation involving a varied technical or specialized vocabulary such as legal briefs or reports on scientific research are not included. A worker who takes dictation in shorthand or by Stenotype or similar machine is classified as a stenographer, general.

TYPIST

Uses a typewriter to make copies of various material or to make out bills after calculations have been made by another person. May include typing of stencils, mats, or similar materials for use in duplicating processes. May do clerical work involving little special training, such as keeping simple records, filing records and reports, or sorting and distributing incoming mail.

Class A. Performs one or more of the following: Typing material in final form when it involves combining material from several sources or responsibility for correct spelling, syllabication, punctuation, etc., of technical or unusual words or foreign language material; and planning layout and typing of complicated statistical tables to maintain uniformity and balance in spacing. May type routine form letters varying details to suit circumstances.

Class B. Performs one or more of the following: Copy typing from rough or clear drafts; routine typing of forms, insurance policies, etc.; and setting up simple standard tabulations, or copying more complex tables already setup and spaced properly.

PROFESSIONAL AND TECHNICAL

DRAFTSMAN

Class A. Plans the graphic presentation of complex items having distinctive design features that differ significantly from established drafting precedents. Works in close support with the design originator, and may recommend minor design changes. Analyzes the effect of each change on the details of form, function, and positional relationships of components and parts. Works with a minimum of supervisory assistance. Completed work is reviewed by design originator for consistency with prior engineering determinations. May either prepare drawings, or direct their preparation by lower level draftsmen.

Class B. Performs nonroutine and complex drafting assignments that require the application of most of the standardized drawing techniques regularly used. Duties typically involve such work as: Prepares working drawings of subassemblies with irregular shapes, multiple functions, and precise positional relationships between components; prepares architectural drawings for construction of a building including detail drawings of foundations, wall sections, floor plans, and roof. Uses accepted formulas and manuals in making necessary computations to determine quantities of materials to be used, load capacities, strengths, stresses, etc. Receives initial instructions, requirements, and advice from supervisor. Completed work is checked for technical adequacy.

Class C. Prepares detail drawings of single units or parts for engineering, construction, manufacturing, or repair purposes. Types of drawings prepared include isometric projections (depicting three dimensions in accurate scale) and sectional views to clarify positioning of components and convey needed information. Consolidates details from a number of sources and adjusts or transposes scale as required.

DRAFTSMAN—Continued

Suggested methods of approach, applicable precedents, and advice on source materials are given with initial assignments. Instructions are less complete when assignments recur. Work may be spot-checked during progress.

DRAFTSMAN-TRACER

Copies plans and drawings prepared by others by placing tracing cloth or paper over drawings and tracing with pen or pencil. (Does not include tracing limited to plans primarily consisting of straight lines and a large scale not requiring close delineation.)

and/or

Prepares simple or repetitive drawings of easily visualized items. Work is closely supervised during progress.

NURSE, INDUSTRIAL (REGISTERED)

A registered nurse who gives nursing service under general medical direction to ill or injured employees or other persons who become ill or suffer an accident on the premises of a factory or other establishment. Duties involve a combination of the following: Giving first aid to the ill or injured; attending to subsequent dressing of employees' injuries; keeping records of patients treated; preparing accident reports for compensation or other purposes; assisting in physical examinations and health evaluations of applicants and employees; and planning and carrying out programs involving health education, accident prevention, evaluation of plant environment, or other activities affecting the health, welfare, and safety of all personnel.

MAINTENANCE AND POWERPLANT

CARPENTER, MAINTENANCE

Performs the carpentry duties necessary to construct and maintain in good repair building woodwork and equipment such as bins, cribs, counters, benches, partitions, doors, floors, stairs, casings, and trim made of wood in an establishment. Work involves most of the following: Planning and laying out of work from blueprints, drawings, models, or verbal instructions; using a variety of carpenter's handtools, portable power tools,

CARPENTER, MAINTENANCE—Continued

and standard measuring instruments; making standard shop computations relating to dimensions of work; and selecting materials necessary for the work. In general, the work of the maintenance carpenter requires rounded training and experience usually acquired through a formal apprenticeship or equivalent training and experience.

ELECTRICIAN, MAINTENANCE

Performs a variety of electrical trade functions such as the installation, maintenance, or repair of equipment for the generation, distribution, or utilization of electric energy in an establishment. Work involves most of the following: Installing or repairing any of a variety of electrical equipment such as generators, transformers, switchboards, controllers, circuit breakers, motors, heating units, conduit systems, or other transmission equipment; working from blueprints, drawings, layouts, or other specifications; locating and diagnosing trouble in the electrical system or equipment; working standard computations relating to load requirements of wiring or electrical equipment; and using a variety of electrician's handtools and measuring and testing instruments. In general, the work of the maintenance electrician requires rounded training and experience usually acquired through a formal apprenticeship or equivalent training and experience.

ENGINEER, STATIONARY

Operates and maintains and may also supervise the operation of stationary engines and equipment (mechanical or electrical) to supply the establishment in which employed with power, heat, refrigeration, or air-conditioning. Work involves: Operating and maintaining equipment such as steam engines, air compressors, generators, motors, turbines, ventilating and refrigerating equipment, steam boilers and boiler-fed water pumps; making equipment repairs; and keeping a record of operation of machinery, temperature, and fuel consumption. May also supervise these operations. Head or chief engineers in establishments employing more than one engineer are excluded.

FIREMAN, STATIONARY BOILER

Fires stationary boilers to furnish the establishment in which employed with heat, power, or steam. Feeds fuels to fire by hand or operates a mechanical stoker, or gas or oil burner; and checks water and safety valves. May clean, oil, or assist in repairing boilerroom equipment.

HELPER, MAINTENANCE TRADES

Assists one or more workers in the skilled maintenance trades, by performing specific or general duties of lesser skill, such as keeping

HELPER, MAINTENANCE TRADES—Continued

a worker supplied with materials and tools; cleaning working area, machine, and equipment; assisting journeyman by holding materials or tools; and performing other unskilled tasks as directed by journeyman. The kind of work the helper is permitted to perform varies from trade to trade: In some trades the helper is confined to supplying, lifting, and holding materials and tools and cleaning working areas; and in others he is permitted to perform specialized machine operations, or parts of a trade that are also performed by workers on a full-time basis.

MACHINE-TOOL OPERATOR, TOOLROOM

Specializes in the operation of one or more types of machine tools, such as jig borers, cylindrical or surface grinders, engine lathes, or milling machines, in the construction of machine-shop tools, gages, jigs, fixtures, or dies. Work involves most of the following: Planning and performing difficult machining operations; processing items requiring complicated setups or a high degree of accuracy; using a variety of precision measuring instruments; selecting feeds, speeds, tooling, and operation sequence; and making necessary adjustments during operation to achieve requisite tolerances or dimensions. May be required to recognize when tools need dressing, to dress tools, and to select proper coolants and cutting and lubricating oils. For cross-industry wage study purposes, machine-tool operators, toolroom, in tool and die jobbing shops are excluded from this classification.

MACHINIST, MAINTENANCE

Produces replacement parts and new parts in making repairs of metal parts of mechanical equipment operated in an establishment. Work involves most of the following: Interpreting written instructions and specifications; planning and laying out of work; using a variety of machinist's handtools and precision measuring instruments; setting up and operating standard machine tools; shaping of metal parts to close tolerances; making standard shop computations relating to dimensions of work, tooling, feeds, and speeds of machining; knowledge of the working properties of the common metals; selecting standard materials, parts, and equipment required for his work; and fitting and assembling parts into mechanical equipment. In general, the machinist's work normally requires a rounded training in machine-shop practice usually acquired through a formal apprenticeship or equivalent training and experience.

MECHANIC, AUTOMOTIVE (MAINTENANCE)

Repairs automobiles, buses, motortrucks, and tractors of an establishment. Work involves most of the following: Examining automotive equipment to diagnose source of trouble; disassembling equipment and performing repairs that involve the use of such handtools as wrenches, gages, drills, or specialized equipment in disassembling or fitting parts; replacing broken or defective parts from stock; grinding and adjusting valves; reassembling and installing the various assemblies in the vehicle and making necessary adjustments; and alining wheels, adjusting brakes and lights, or tightening body bolts. In general, the work of the automotive mechanic requires rounded training and experience usually acquired through a formal apprenticeship or equivalent training and experience.

MECHANIC, MAINTENANCE

Repairs machinery or mechanical equipment of an establishment. Work involves most of the following: Examining machines and mechanical equipment to diagnose source of trouble; dismantling or partly dismantling machines and performing repairs that mainly involve the use of handtools in scraping and fitting parts; replacing broken or defective parts with items obtained from stock; ordering the production of a replacement part by a machine shop or sending of the machine to a machine shop for major repairs; preparing written specifications for major repairs or for the production of parts ordered from machine shop; reassembling machines; and making all necessary adjustments for operation. In general, the work of a maintenance mechanic requires rounded training and experience usually acquired through a formal apprenticeship or equivalent training and experience. Excluded from this classification are workers whose primary duties involve setting up or adjusting machines.

MILLWRIGHT

Installs new machines or heavy equipment, and dismantles and installs machines or heavy equipment when changes in the plant layout are required. Work involves most of the following: Planning and laying out of the work; interpreting blueprints or other specifications; using a variety of handtools and rigging; making standard shop computations relating to stresses, strength of materials, and centers of gravity; alining and balancing of equipment; selecting standard tools, equipment, and parts to be used; and installing and maintaining in good order power transmission equipment such as drives and speed reducers. In general, the millwright's work normally requires a rounded training and experience in the trade acquired through a formal apprenticeship or equivalent training and experience.

OILER

Lubricates, with oil or grease, the moving parts or wearing surfaces of mechanical equipment of an establishment.

PAINTER, MAINTENANCE

Paints and redecorates walls, woodwork, and fixtures of an establishment. Work involves the following: Knowledge of surface peculiarities and types of paint required for different applications; preparing surface for painting by removing old finish or by placing putty or filler in nail holes and interstices; and applying paint with spray gun or brush. May mix colors, oils, white lead, and other paint ingredients to obtain proper color or consistency. In general, the work of the maintenance painter requires rounded training and experience usually acquired through a formal apprenticeship or equivalent training and experience.

PIPEFITTER, MAINTENANCE

Installs or repairs water, steam, gas, or other types of pipe and pipefittings in an establishment. Work involves most of the following: Laying out of work and measuring to locate position of pipe from drawings or other written specifications; cutting various sizes of pipe to correct lengths with chisel and hammer or oxyacetylene torch or pipe-cutting machine; threading pipe with stocks and dies; bending pipe by hand-driven or power-driven machines; assembling pipe with couplings and fastening pipe to hangers; making standard shop computations relating to pressures, flow, and size of pipe required; and making standard tests to determine whether finished pipes meet specifications. In general, the work of the maintenance pipefitter requires rounded training and experience usually acquired through a formal apprenticeship or equivalent training and experience. Workers primarily engaged in installing and repairing building sanitation or heating systems are excluded.

PLUMBER, MAINTENANCE

Keeps the plumbing system of an establishment in good order. Work involves: Knowledge of sanitary codes regarding installation of vents and traps in plumbing system; installing or repairing pipes and fixtures; and opening clogged drains with a plunger or plumber's snake. In general, the work of the maintenance plumber requires rounded training and experience usually acquired through a formal apprenticeship or equivalent training and experience.

SHEET-METAL WORKER, MAINTENANCE

Fabricates, installs, and maintains in good repair the sheet-metal equipment and fixtures (such as machine guards, grease pans, shelves, lockers, tanks, ventilators, chutes, ducts, metal roofing) of an establishment. Work involves most of the following: Planning and laying out all types of sheet-metal maintenance work from blueprints, models, or other specifications; setting up and operating all available types of sheet-metal-working machines; using a variety of handtools in cutting, bending, forming, shaping, fitting, and assembling; and installing sheet-metal articles as required. In general, the work of the maintenance sheet-metal worker requires rounded training and experience usually acquired through a formal apprenticeship or equivalent training and experience.

TOOL AND DIE MAKER

(Die maker; jig maker; tool maker; fixture maker; gage maker)

Constructs and repairs machine-shop tools, gages, jigs, fixtures or dies for forgings, punching, and other metal-forming work. Work involves most of the following: Planning and laying out of work from models, blueprints, drawings, or other oral and written specifications; using a variety of tool and die maker's handtools and precision measuring instruments, understanding of the working properties of common metals and alloys; setting up and operating of machine tools and related equipment; making necessary shop computations relating to dimensions of work, speeds, feeds, and tooling of machines; heattreating of metal parts during fabrication as well as of finished tools and dies to achieve required qualities; working to close tolerances; fitting and assembling of parts to prescribed tolerances and allowances; and selecting appropriate materials, tools, and processes. In general, the tool and die maker's work requires a rounded training in machine-shop and toolroom practice usually acquired through a formal apprenticeship or equivalent training and experience.

For cross-industry wage study purposes, tool and die makers in tool and die jobbing shops are excluded from this classification.

CUSTODIAL AND MATERIAL MOVEMENT

ELEVATOR OPERATOR, PASSENGER

Transports passengers between floors of an office building, apartment house, department store, hotel, or similar establishment. Workers who operate elevators in conjunction with other duties such as those of starters and janitors are excluded.

GUARD

Performs routine police duties, either at fixed post or on tour, maintaining order, using arms or force where necessary. Includes gatemen who are stationed at gate and check on identity of employees and other persons entering.

JANITOR, PORTER, OR CLEANER

(Sweeper; charwoman; janitress)

Cleans and keeps in an orderly condition factory working areas and washrooms, or premises of an office, apartment house, or commercial or other establishment. Duties involve a combination of the following: Sweeping, mopping or scrubbing, and polishing floors; removing chips, trash, and other refuse; dusting equipment, furniture, or fixtures; polishing metal fixtures or trimmings; providing supplies and minor maintenance services; and cleaning lavatories, showers, and restrooms. Workers who specialize in window washing are excluded.

LABORER, MATERIAL HANDLING

(Loader and unloader; handler and stacker; shelver; trucker; stockman or stock helper; warehouseman or warehouse helper)

A worker employed in a warehouse, manufacturing plant, store, or other establishment whose duties involve one or more of the following: Loading and unloading various materials and merchandise on or from freight cars, trucks, or other transporting devices; unpacking, shelving, or placing materials or merchandise in proper storage location; and transporting materials or merchandise by handtruck, car, or wheelbarrow. Longshoremen, who load and unload ships are excluded.

ORDER FILLER

(Order picker; stock selector; warehouse stockman)

Fills shipping or transfer orders for finished goods from stored merchandise in accordance with specifications on sales slips, customers' orders, or other instructions. May, in addition to filling orders and indicating items filled or omitted, keep records of outgoing orders, requisition additional stock or report short supplies to supervisor, and perform other related duties.

PACKER, SHIPPING

Prepares finished products for shipment or storage by placing them in shipping containers, the specific operations performed being dependent upon the type, size, and number of units to be packed, the type of container employed, and method of shipment. Work requires the placing of items in shipping containers and may involve one or more of the following: Knowledge of various items of stock in order to verify content; selection of appropriate type and size of container; inserting enclosures in container; using excelsior or other material to prevent breakage or damage; closing and sealing container; and applying labels or entering identifying data on container. Packers who also make wooden boxes or crates are excluded.

SHIPPING AND RECEIVING CLERK

Prepares merchandise for shipment, or receives and is responsible for incoming shipments of merchandise or other materials. Shipping work involves: A knowledge of shipping procedures, practices, routes, available means of transportation, and rates; and preparing records of the goods shipped, making up bills of lading, posting weight and shipping charges, and keeping a file of shipping records. May direct or assist in preparing the merchandise for shipment. Receiving work involves: Verifying or directing others in verifying the correctness of shipments against bills of lading, invoices, or other records; checking for shortages and rejecting damaged goods; routing merchandise or materials to proper departments; and maintaining necessary records and files.

For wage study purposes, workers are classified as follows:

Receiving clerk
Shipping clerk
Shipping and receiving clerk

TRUCKDRIVER

Drives a truck within a city or industrial area to transport materials, merchandise, equipment, or men between various types of establishments such as: Manufacturing plants, freight depots, warehouses, wholesale and retail establishments, or between retail establishments and customers' houses or places of business. May also load or unload truck with or without helpers, make minor mechanical repairs, and keep truck in good working order. Driver-salesmen and over-the-road drivers are excluded.

For wage study purposes, truckdrivers are classified by size and type of equipment, as follows: (Tractor-trailer should be rated on the basis of trailer capacity.)

Truckdriver (combination of sizes listed separately)
Truckdriver, light (under $1^1/_2$ tons)
Truckdriver, medium ($1^1/_2$ to and including 4 tons)
Truckdriver, heavy (over 4 tons, trailer type)
Truckdriver, heavy (over 4 tons, other than trailer type)

TRUCKER, POWER

Operates a manually controlled gasoline- or electric-powered truck or tractor to transport goods and materials of all kinds about a warehouse, manufacturing plant, or other establishment.

For wage study purposes, workers are classified by type of truck, as follows:

Trucker, power (forklift)
Trucker, power (other than forklift)

WATCHMAN

Makes rounds of premises periodically in protecting property against fire, theft, and illegal entry.

Available On Request—

The sixth annual report on salaries for accountants, auditors, attorneys, chemists, engineers, engineering technicians, draftsmen, tracers, job analysts, directors of personnel, managers of office services, and clerical employees.

Order as BLS Bulletin 1469, National Survey of Professional, Administrative, Technical, and Clerical Pay, February–March 1965. 45 cents a copy.

Area Wage Surveys*

A list of the latest available bulletins is presented below. A directory indicating dates of earlier studies, and the prices of the bulletins is available on request. Bulletins may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C., 20402, or from any of the BLS regional sales offices shown on the inside front cover.

Criteria for Determining Approval of Vocational Units and Fractional Units in Home Economics.

Ohio State Dept. of Education, Columbus. Home Economics Section
MF AVAILABLE IN VT-ERIC SET.
Pub Date - 64 11p.

*HOMEMAKING EDUCATION; *OCCUPATIONAL HOME ECONOMICS; STATE LEGISLATION; *EDUCATIONAL FINANCE; SECONDARY SCHOOLS; *PROGRAM DEVELOPMENT; CRITERIA; TEACHER QUALIFICATIONS; COOPERATIVE EDUCATION; *STATE STANDARDS OHIO

The home economics program and the various forms that it may take are described. Suggested as possibilities for secondary schools are: 4-year programs, a 3-year program, 2-year programs, and additional offerings in family living, non-prerequisite home economics, a class for slow learners, special interest classes, and occupational home economics. Specific regulations are listed which apply to time schedules, class size, teacher qualifications, course content, and other aspects of the program. Whole or fractional units are listed for homemaking and occupational home economics as well as for cooperative work experience programs. (MS)

Revised 1964

The State Department of Education
Division of Vocational Education
Home Economics Section
220 South Parsons Avenue
Columbus, Ohio

CRITERIA FOR DETERMINING APPROVAL OF VOCATIONAL UNITS AND FRACTIONAL UNITS IN HOME ECONOMICS

I. Approval of vocational units under the School Foundation Program for home economics shall be based on the following:

A. A complete home economics program includes the following:

1. Instruction to prepare youth (girls and boys) who are 14 or older for those responsibilities and activities in homemaking.
2. Supervision of home experience work.
3. Home visits.
4. Employment of teacher for instruction beyond the regular school year.
5. Sponsorship of the Association of Future Homemakers of America organization.
6. Provision for instruction of out-of-school youth who are 16 years of age or older and adults.

B. A program may be selected from any one of the following types:

1. 4-year program (Home Economics I, II, III & IV in sequence).
2. 4-year program in sequence with alternating III & IV.
3. 3-year program (Home Economics I, II & III in sequence).
4. 2-year basic program (Home Economics I & II, in sequence), <u>with</u> one or more additional program offerings listed under 1-B-6. These additional program offerings may be structured on a semester or yearly basis and are not part of a sequence.
5. 2-year program (Home Economics I and II in sequence).

6. Additional program offerings:

   a. Class in the Family Living area for students, girls or girls and boys, on the advanced level (11th and 12th grades). This course may be offered to students having no previous home economics in high school.

   b. Class in home economics for girls, irrespective of course major, academic or commercial, etc., on the advanced level (11th and 12th grades). This course may be offered to students having no previous home economics in high school. The offerings of this course should include several areas of homemaking.

   c. Class for slow learners.

   d. Other classes on a semester or yearly basis may be approved as needs may arise.

C. Each of the above types of program shall also conform to the following criteria:

   1. <u>Time Schedule.</u>

      a. When schools operate on a 55 to 60 minute period, one period per day shall be allowed for each class.

      b. When schools operate on a 40 - 45 minute period <u>either</u> two consecutive periods five days a week or single periods three days a week and double (two consecutive) periods for two days a week shall be provided for each class in Homemaking I and II.

      c. A single 40 - 45 minute period daily with limited laboratory instruction for Homemaking III and/or IV, or other advanced level classes may be provided.

d. A double 40 - 45 minute period with laboratory instruction for Homemaking III and IV, and other advanced level classes may be provided if there is a need.

e. Each vocational home economics teacher shall have at least one conference period daily for working with students concerning home experiences and other activities included in the vocational program. An additional conference period may be approved if justifiable.

f. One half day may be allowed for a job training program utilizing home economics knowledge and skills. This time may be devoted to class instruction, planning for and supervising work experience.

2. Size of Class

Class size will be determined by the number of students which the space and equipment can accomodate. These facilities shall be sufficient to accomodate at least 12 to 26 students in any one class and preferably not more than 30 students.

3. Teacher Qualifications.

The teacher shall meet qualifications to teach vocational home economics as prescribed in the State Plan for Vocational Education.

4. Instructional Content.

The scope of instruction shall include foods and nutrition, textiles and clothing, housing, home equipment and furnishings, child development, family relations, consumer education and home management.

5. Department Requirements.

Adequate space, equipment, library, supplies, storage and maintenance must be provided by the local Board of Education.

6. Teacher Travel.

An allowance should be set up by the local Board of Education for travel of the teacher in conducting and supervising the Vocational Home Economics program, and attending State sponsored conferences and meetings. The local Board of Education will be reimbursed approximately 75% of this approved mileage for travel from the Vocational funds.

7. Annual Conferences and Workshops.

The local Board of Education will be reimbursed for a teacher's subsistence during:

a. The Annual Teachers' Conference which is a state department planned in-service training program.

b. State department sponsored non-credit workshops. The expense report must be approved by a member of the state supervisory staff.

8. Reports.

Records shall be kept and reports submitted as needed to the State Supervisor of Home Economics Education.

9. Other Factors.

a. The fiscal year for Vocational Home Economics Education is July 1 to June 30th.

b. A new Vocational program must have a minimum enrollment of 36 students.

c. If a department's total enrollment drops below 36, that department may be carried for the number of years sufficient to permit students the opportunity of completing any sequence started.

d. Pro-rating for fractional units in Vocational Home Economics applies to the regular school term only.

e. Extended Service.

(1) During the extended employment the teacher devotes full time to the program, and, therefore, is employed on a full-time basis for that period of employment chosen.

(2) All teachers on a .75 of a unit or above must be employed for a minimum of four weeks (20 working days) beyond the regular school year.

(3) A teacher may be employed for a period of eight weeks (40 working days) or twelve weeks (60 working days) beyond the regular school year when class enrollment and other planned program and community activities justify the time.

(4) The decision of the length of extended service is to be made by the local administration. This decision should be based on the needs of the community as determined by the administration, teachers and lay representatives, subject to evaluation and recommendations of the State Supervisor of Home Economics.

(5) A written plan for use of extended employment should be developed by the teacher and approved by the local administrator.

D. Programs meeting these criteria may be approved for the following units:

1. One unit of approval will be given when one teacher is employed, when all class periods of the one teacher are devoted to Vocational Home Economics, including the minimum of one conference period per day, and when the enrollment is 45 - 89 students.
2. Two units of approval will be given when two teachers are employed, when all class periods of the two teachers are devoted to Vocational Home Economics, including the minimum of one conference period per day, per teacher, and when the enrollment is from 90 - 179, with a reasonably equal distribution of students between teachers.
3. Three units of approval will be given when three teachers are employed, when all class periods of the three teachers are devoted to Vocational Home Economics, including the minimum of one conference period per day, per teacher, and when the enrollment is from 180 - 269, with a reasonably equal distribution of students among teachers.
4. Four units of approval will be given when four teachers are employed, when all class periods of the four teachers are devoted to Vocational Home Economics, including the

minimum of one conference period per day, per teacher, and when the enrollment is 270 students or above, with a reasonably equal distribution of students among teachers.

5. Departments may be approved for fractions of units based upon the enrollment in, facilities for, and number of periods devoted to Vocational Home Economics, including a minimum of one conference period per day, per teacher. These fractions will be determined on the basis of low enrollment or non-Vocational assignments, whichever is greater.

6. One unit of approval will be given when one teacher is employed, when all class periods of the one teacher are devoted to the occupational work experience program utilizing home economics knowledge and skills for the students of limited ability, and when the enrollment is 15-30 students.

One half-unit of approval will be given when one teacher is employed and devotes one half day to the occupational work experience program and when the enrollment is 8-14 students.

7. One unit of approval will be given when one teacher is employed, when all class periods of the one teacher are devoted to the cooperative work experience program utilizing home economics knowledge and skills, and when the enrollment is 15-30 students.

One-half unit of approval will be given when one teacher

is employed and devotes one-half day to the cooperative work experience program utilizing home economics knowledge and skills and when the enrollment is 8-14 students.

8. Whenever less than full time or less than half-time is devoted to the occupational work experience program or the cooperative work experience program utilizing home economics knowledge and skills, the approved vocational unit or the fraction thereof, will be reduced a corresponding amount.

The following is taken from the "Criteria for Determining Approval of Vocational Units and Fractional Units in Home Economics" - - - Page 6

1. One unit of approval will be given when one teacher is employed, when all class periods of the one teacher are devoted to Vocational Home Economics, including the minimum of one conference period per day, and when the enrollment is 45- 89 students.

2. Two units of approval will be given when two teachers are employed, when all class periods of the two teachers are devoted to Vocational Home Economics, including the minimum of one conference period per day, per teacher, and when the enrollment is from 90 - 179, with a reasonably equal distribution of students between teachers.

3. Three units of approval will be given when three teachers are employed, when all class periods of the three teachers are devoted to Vocational Home Economics, including the minimum of one conference period per day, per teacher, and when the enrollment is from 180 - 269, with a reasonably equal distribution of students among teachers.

4. Four units of approval will be given when four teachers are employed, when all class periods of the four teachers are devoted to Vocational Home Economics, including the minimum of one conference period per day per teacher, and when the enrollment is 270 students or above, with a reasonably equal distribution of students among teachers.

5. Departments may be approved for fractions of units based upon the enrollment in, facilities for, and number of periods devoted to Vocational Home Economics, including a minimum of one conference period per day per teacher. These fractions will be determined on the basis of low enrollment or non-Vocational assignments, whichever is greater.

The following is taken from, "Criteria For Determining Approval of Voc. Units & Fractional Units in Home Econ."-pp. 4 & 5

b. A new Vocational program must have a minimum enrollment of 36 students.

c. If a department's total enrollment drops below 36, that department may be carried for the number of years sufficient to permit students the opportunity of completing any sequence started.

Explanation: In light of the above Criteria pertaining to unit approval and approval of fractions of units, Column I and II apply to a second, third or fourth teacher, and to those schools whose enrollments have dropped below 36 and are being carried until the students complete their sequence.

*ADULT VOCATIONAL EDUCATION; *CONTINUATION EDUCATION; *ADULT BASIC EDUCATION; *SPECIAL EDUCATION; FAMILY LIFE EDUCATION; OCCUPATIONAL GUIDANCE
MDTA PROGRAMS; *MANPOWER DEVELOPMENT AND TRAINING ACT PROGRAMS

The bulletin explains pre-vocational and vocational offerings under continuation school, Manpower Development and Training Act, cooperative vocational training, adult basic education programs, and other programs. The continuation school program includes occupational and general education courses. The first quarter assists the student to evaluate his abilities and, in the second quarter, he generally takes basic work area courses in one of five occupational fields. The MDTA prevocational program is organized on the basis of three sections, the basic reading group to assist students to advance to functional literacy levels, the diagnostic group to assist in the determination of interests and abilities, and the special projects group to assist personal and social growth. Through cooperation between schools, courses available to a number of public school districts include power mechanics, foundry operations, metals-machine shop, and welding. Adult basic education programs emphasize elementary level education in communication and computation skills through the use of adult experiences in consumer buying practices, health habits, family and community relations, homemaking, and citizenship responsibilities. Other offerings described include a threshold program for the mentally retarded, home economics classes for low income homemakers, and a family living course for parents who had sought assistance from the Family Court. BRIDGING THE GAP *

AFTER BREAKING OFF YOUR NORMAL SCHOOL CAREER--

ANOTHER OPPORTUNITY

The State of Wisconsin established day continuation schools for youth who drop out of high school without graduating. Local Boards of Vocational, Technical and Adult Education helps continuation pupils become self-sustaining workers and good citizens.

The completion of a high school course of study is becoming America's educational common denominator. Not all students attain this goal. With parental and school consent such students may transfer to the Continuation School.

Here they get another educational opportunity. The main purpose of the Continuation School is to help each such new pupil "bridge the gap." This is the gap between his interrupted school career and his eventual place in the community as a worker, a good member of a family, and a good citizen.

Using the Milwaukee Continuation School maintained by the Milwaukee Board of Vocational, Technical and Adult Education to explain this type of "special needs" program to help the youth of the State of Wisconsin to receive educational opportunities not otherwise available.

The following is taken from the Milwaukee School Bulletin:

WHO MAY ATTEND?--Any young man or young woman who is 16 or 17 years old and has not completed high school is required by law to attend full-time public or parochial school until he completes high school or becomes 18. He may transfer to the Vocational School with parental consent and the principal's consent when he is 16 years of age and attend full time in the Milwaukee Continuation School.

A NOTE TO STUDENTS AND THEIR PARENTS ABOUT TRADES.--The day when a young man or young woman could quit high school and then study for a trade, later getting a good job in this trade, has largely passed. Very few trade opportunities or apprenticeship opportunities are open today to a student who does not have a high school diploma. Therefore, a student who quits high school and plans to come to the Continuation School of the Milwaukee Vocational, Technical and Adult Schools has closed the door on many of the better job opportunities.

Skilled vocations today require ability in arithmetic and reading, in addition to other skills. Those who do not have the high school background and cannot handle reading and arithmetic with competence cannot expect to secure genuine trade training. However, in your school work, you can develop personal characteristics that will make you valuable to employers. You will be able to take the simpler kind of work that can be learned on the job and then work for promotion on the job.

WHAT CAN A STUDENT WHO HAS DROPPED HIGH SCHOOL LEARN IN THE CONTINUATION SCHOOL? Though you cannot learn a trade immediately, you can learn:

a. Whether you have the ability to learn enough arithmetic and reading to progress toward a trade.

---

*The terminology of "Bridging the Gap" is credited to the Milwaukee Vocational, Technical and Adult School

b. Whether you have the special ability to progress in any of the trade areas.

c. How to use certain of the simpler tools that you may meet at home or on the job.

d. How to work hard, to be on time, to get along with people, to follow directions, and to be dependable. These are very important qualities to help you get a job and to help you keep a job.

e. How to be a better citizen and a more worthwhile person.

WHAT ABOUT HIGH SCHOOL CREDIT?--A continuation student cannot expect to get high school credit for his continuation work. The place to get high school credit is in your neighborhood high school. However, if a student wishes to work for his high school diploma in the Milwaukee Adult High School after he is 18 years of age, the work he did as a continuation student will be evaluated. Good attendance and satisfactory grades are essential.

HOW TO REGISTER.--If you are or have been attending a high school in Milwaukee, you may secure a transfer from your present school. Your school officials will tell you how to go about getting a transfer. In order that you and your parents understand the difference between a vocational school and the school you are now attending, both you and at least one parent will be required to attend a program at the Vocational School at which time the work at the Vocational School will be explained.

WHEN TO REGISTER.--Students are accepted at the beginning of quarters in September, November, February, and April. Announcements as to the exact dates as well as the dates for the explanatory programs mentioned above are sent to the various schools in the city.

WHAT ARE THE SCHOOL HOURS?--The continuation student attends from 8:50 to 3:15 daily. Students have 30 minutes for lunch.

WHAT DOES IT COST TO ATTEND THE VOCATIONAL SCHOOL?--This will depend upon the courses that you take. It is important that you learn this before you register for a class. The counselors will help you.

If you need materials for a class project and you want to keep the finished product, you will have to pay the cost of the materials used.

Be sure to have a good padlock to protect your property. A good one can be purchased from the school store. If the lock and two keys are returned at the end of the year, a partial refund will be paid.

WHAT ABOUT GETTING A JOB?--The Vocational School has a Placement Department to assist its students in finding work.

There are very few jobs for people without a high school diploma. If a continuation student has a good attendance record and proves that he is a good worker, the Placement Department can usually help him find after-school or vacation employment. Such students should continue in school after becoming 18 either to study in an adult shop or to complete high school.

The school encourages the continuation student to confer with the Youth Opportunity Center of the Wisconsin State Employment Service.

WHEN MAY NONRESIDENTS ATTEND?--A nonresident student may attend if there is room for him in the classes that he will take. Since there is not enough room in some types of classes, a school official must either write or call the Registrar at the Vocational School and provide information as to test scores in reading, arithmetic, and learning ability. Other than this, the registration procedure is the same for a nonresident as for a resident.

WHAT COURSES MAY YOU CHOOSE?--The first quarter (10 weeks) that you are at the Vocational School will be a "get acquainted" time. You will learn about the school as well as your own abilities. The school will learn about you. During this quarter, you will find out if you can improve your reading and arithmetic and you will learn if you have any special ability to work with your hands.

The young women will take both business and home economics courses; the young men will take two industrial shop courses during the first quarter. The exact course will depend upon the reading and arithmetic ability of the student as well as the classes that are available.

At the end of the first quarter, the student will have to decide upon a program that fits his abilities and interests. A student will usually have a program that is half in some work area and half in general education. The work areas available to the student are described in this bulletin. Once a work area has been selected, it cannot be changed for one quarter.

This first quarter plan is made so that a student can show what he can do. The more ability he shows and the more dependable he becomes, the better will be his chances of entering some skilled field. If a student can bring recommendations from his school principal showing that he has ability to progress and is dependable, the first quarter as described above will not be necessary and he can go directly into a work area.

After one semester, qualified students may enter the Milwaukee Adult School upon recommendation of their major subject teacher and the faculty counselor.

Typical Student Programs

A new student will have a program for the first quarter that looks like this:

A Young Woman's Typical First Quarter Program:

8:50 a.m.	-	10:35 a.m.	Home Economics courses
10:40 a.m.	-	11:30 a.m.	Occupations, Health, and Social Studies
11:35 a.m.	-	12:00 noon	Noon Assembly
12:05 p.m.	-	12:30 p.m.	Lunch
12:35 p.m.	-	1:25 p.m.	Reading
1:30 p.m.	-	3:15 p.m.	General Business courses

A Young Man's Typical First Quarter Program:

8:50 a.m.	-	10:05 a.m.	Shop and Related Shop courses
10:10 a.m.	-	11:30 a.m.	Shop and Related Shop courses
11:35 a.m.	-	12:00 noon	Noon Assembly
12:05 p.m.	-	12:30 p.m.	Lunch
12:35 p.m.	-	1:25 p.m.	Reading
1:30 p.m.	-	2:20 p.m.	Social Studies
2:25 p.m.	-	3:15 p.m.	Occupations and Health

A typical student's program after the first quarter will look like this:

After the First Quarter

8:50 a.m.	-	11:30 a.m.	Work Area
11:35 a.m.	-	12:00 noon	Noon Assembly
12:05 p.m.	-	12:30 p.m.	Lunch
12:35 p.m.	-	1:25 p.m.	Social Studies
1:30 p.m.	-	2:20 p.m.	Practical English
2:25 p.m.	-	3:15 p.m.	Other General Education courses

Milwaukee Continuation School

Diagnostic Quarter

A student entering the Vocational School is called a "diagnostic student" and must normally complete the first quarter of his work in the Diagnostic Quarter. This is a "get acquainted" period. The student learns about the school and about his or her abilities, and the school learns more about the student.

Young women take both business and home economics courses during this quarter; young men usually take two industrial shop courses during this quarter.

The Diagnostic Quarter plan is made so that a student can show what he can do. The more ability he shows and the more dependable he becomes, the better will be his chances of entering some semi-skilled field. If a student can bring recommendations from his school principal showing that he has ability to progress and is dependable, the Diagnostic Quarter as described above will not be necessary and he can go directly into a Work Area.

At the end of the first quarter, the student will have to decide upon a program that best fits his abilities and interests. The program usually is half in some Work Area and half in General Education. The Work Areas available to the student are described later in this bulletin. One a Work Areas has been selected, it cannot be changed for one quarter.

Courses in the diagnostic quarter are as follows: Reading, Measurement, Social Studies, Health, Social Living, General Homemaking I, General Homemaking II, General Business I, General Business II, General Auto Servicing, General Cabinet Making, General Metal--Foundry, General Metal--Welding, General Woodworking--Drawing, General Home Maintenance--Crafts, General Drafting, and General Machine Shop.

Work Area Courses

After completion of the Diagnostic Quarter, most students are given a program that is half in the Work Area and half in General Education. These Work Area courses are three periods in length and enable a student to gain work experiences and to develop work habits and attitudes which may assist him in getting initial employment as a helper.

A student wanting to qualify for better employment opportunities should complete his high school education and then enter a chosen field through an apprenticeship or through completion of a special program in the Milwaukee Adult School.

The exceptional student who shows special skill and ability may be transferred to the Adult School upon recommendation of his major teacher and the faculty counselor.

However, the average student, without his high school training, needs special classwork to develop good work habits and attitudes. This training helps him, after getting his first job, to hold it better and to move ahead faster. The Work Area courses are for this purpose.

The student completing the Diagnostic Quarter who has not decided upon a program that best fits his abilities and interests is assigned to continue in a diagnostic shop program. However, his academic and related work will be in regular General Education courses.

Business Division

Young men and young women who complete the business courses of the diagnostic quarter and have further desire and interest in business training may continue in the business work area courses. The student in a work area course will find the training directed primarily toward the building of proper business habits and attitudes rather than the development of business skills.

Courses available in the work area are:

Introduction to General Record Keeping
Principles of General Business
Typewriting

Graphic and Applied Arts Division

The Division of Graphic and Applied Arts was created to meet the increasing demand for skilled workers in the fields of advertising, commercial arts, photography, printing and publishing, and applied arts and crafts. Commercial art and printing and publishing courses are available to continuation students in this division. These fields are experiencing steady growth spurred on by new equipment, processes, techniques, and materials. Students entering this area of training will find it necessary to have a high school diploma to advance in this vocation. The Milwaukee Continuation School courses do not qualify a student for a job, but are designed to develop interest, attitudes, and work habits that will encourage the student to take further training in the graphic and applied arts field as an adult student.

Several courses in the Graphic and Applied Arts Division are referred to as work area courses. Students who take these courses need not have any previous training or experience. The courses are designed to develop interests, work habits, and attitudes rather than skill. Courses in this area are:

General Visual Communications
General Printing

Students who complete the work area courses in commercial art or printing may continue in more advanced courses in commercial art or printing. These courses are designed for the development of skill. They do not prepare a student for employment but help to determine the feasibility of continuing training in the field of commercial art or printing. Courses of this type are:

Visual Communication Skills
Typesetting and Makeup
Presswork

Home Economics Division

The program in the Home Economics Division is planned for young women who are seeking employment as well as for the ones who expect to become homemakers.

Through its various course offerings the Home Economics Division aims to help students solve problems which arise from social and economic changes affecting home and family life; to prepare them for more effective participation in community affairs and wage-earning occupations; and to develop in them new interests, appreciations, judgments, and ideals related to the various aspects of homemaking.

A description of each department in the Home Economics Division and the courses available is given.

In the classes offered by the Clothing Department, the young woman who likes to sew for herself and for other members of the family is given the opportunity to learn the basic skills required in the construction of clothing. A student may enroll in clothing any semester in which she is in attendance and may progress from the sewing of simple garments to more advanced dress construction.

Students must furnish their own supplies, such as a bobbin, thread, pins, and sewing needles. These items may be purchased at the school store at an approximate cost of sixty cents. The pattern and material for each clothing project also must be furnished by the student.

Garments to be sewn are selected on the basis of the student's ability and with the consent of the instructor. Cotton material is used in making these garments. As soon as one project is completed, the pattern and fabric for the next must be furnished.

It is the responsibility of the parents to see that their daughters have sewing materials and supplies at the time they are needed.

Courses available in this department are:

Clothing I
Clothing II
You and Your Clothes
Needlecraft
Dry Cleaning and Laundry Aide Training

A well-groomed and healthy family is an asset to any community. Members of such a family have a feeling of personal satisfaction as well as more time to devote to church, community, and social activities.

The following courses in the Family Health Department give practical instruction in the areas of personal grooming and family health.

Grooming
Infant and Child Care
Home Nursing
Physiology

To live happily within a family group is something which all persons try to achieve. In order to meet the demands of our changing society, today's teen-ager must understand social poise, manners and behavior at home and away from home, etiquette and conduct at social affairs, table manners, social correspondence, and travel. Preparation for the future also includes an awareness of employment qualifications and job opportunities. Each student will evaluate her reactions to her family and other people.

Courses available in the Family Relations Department are:

Building Your Life
Personal Improvement
You and Your Family
Occupational Orientation

Young women gain practical experience in planning, preparing, and serving meals. Special emphasis is given to planning time and work schedules; establishing good food buying habits; and balancing the food budget. The objectives of the foods program are to develop confidence in the preparation and serving of meals to one's family and friends.

Courses available in the Foods Department are:

Know-How in Food Preparation
Meals for the Family

Good management is to the home what good organization is to industry. A well-regulated home brings happiness to the entire family. It gives the homemaker a feeling of satisfaction in her work and allows her more time to devote to her family, church, community, and social life.

Through the courses offered, the student is taught efficient methods of housekeeping; selection, construction, and care of equipment and furnishings for the home; and good management of time and money.

Students who are desirous of securing part-time or full-time employment as homemaker's assistants will discover that numerous job opportunities exist. Many homemakers need help to perform various tasks, such as weekly and seasonal cleaning, the family meals, and care of clothing. Interested persons should enroll in the Brides' Course.

Courses available in the Home Management and Furnishings Department are:

Managing Your Home
More For Your Money
Furnishing Your Home
Legal Problems for Girls
Brides' Course

Service and Health Occupations Division

The Service and Health Occupations Division, through the Food Service Department, offers young people an opportunity to obtain work experiences needed to enable them to get and hold a beginning job and to make a wise choice of a vocation. Young women interested in becoming waitresses (employment opportunities are limited because of state and local age regulations) are offered the opportunity to acquire the necessary knowledge and skills required to serve food in cafeterias, lunch counters, and other food establishments where alcoholic beverages are not served.

Courses available in the work area are:

General Foods
Waitress Training

Industrial Division

The Milwaukee community is made up of many different types of industries. A large number of continuation students will eventually become workers in these industries. A prospective employer might ask these questions--"What educational background and

skills do you have?" "Do you know how to work?" "Can you take orders and follow through on them?" "Can you read a blueprint, specification, chart, or job order and complete the job with a minimum of help?" "Is your work accurate and up to production standards?"

The Industrial Division offers young people an opportunity to obtain work experiences needed to enable them to get and hold a beginning job and to make a wise choice of a vocation. In making a selection from an industrial work area, remember that these work experiences are stepping stones to a vocation.

The work area courses are for the purpose of developing the proper work habits and attitudes required in a trade. Neatness of work, ability to get along with fellow workers, respect for the boss, reliability, and the proper care of tools are stressed in the work area courses.

Work area courses are:

General Baking
General Cabinetmaking
General Foundry
General Masonry
General Machine Shop
General Mechanical Drafting
General Power Servicing
General Shoe Servicing

For those students who complete a work area course and have the interest and the ability to continue in the Industrial Division, several more advanced courses are available. These courses emphasize the development of shop skills. Students taking the courses listed below are rated on their accomplishment in shop work and their knowledge of course content.

Courses of this type are:

Auto Servicing
Cabinet Making
Carpentry
Bricklaying
Machine Shop
Single--Needle Lockstitch Machines
Shoe Servicing
Fundamentals of Upholstery

General Education Courses

The courses in the General Education Division are designed to help each student become a better citizen in the community and the nation, and to be happier in his daily life. One-half of his school work will be in General Education subjects.

After the first quarter, five periods a week are spent in Social Studies and five in Practical English. The Social Studies work aims to help the student become a better citizen, and the Practical English is to help him write better, speak better, listen better, and understand better. These skills are very important in his personal life and in his work life.

Other General Education subjects include driver education, physical education (including swimming), and a few special-purpose subjects.

All students are required to take driver education (classroom instruction) for a semester, and physical education.

Some General Education courses are continuous in nature--there is no ending or terminal point. A student is graded on his work habits, attitude, knowledge, and progress, whether he has been in the class for one session or for one year. Several courses in this area are required, such as Practical English, Physical Education, and Employment Skills. Some courses of this type are electives.

Course descriptions follow:

Social Living
Practical English I
Practical English II
Everyday Arithmetic
Special Mathematics
Related Shop Mathematics
Special Reading

Boys Recreation or Girls Recreation classes are required of all students. Emphasis is on the proper pupil choice of activity areas within the medical permission of the family or school doctor. Pupil choice is made each of the two times a week he comes to recreation, and he may change his activity each time, if he so chooses. Because of the daily choices possible, there will be no daily health center excuses. Instead, he will choose the area for the day that is within his physical limitations, and be encouraged to seek health center or private medical advice on his own time, before or after school.

Boys Recreation
Girls Recreation

The courses in the Social Studies Department are those that will help in the personal adjustment of the student at home, at school, and in the community.

The courses in the Social Studies Department are those that will help in the personal adjustment of the student at home, at school, and in the community.

The courses described below are available to all students.

You and Your Money 1
You and Your Money 2
Legal Problems
You, and Others

The courses described below require the successful completion of most of the lessons or units before the student receives a completed grade on the course. Most of these courses are one quarter in length, although Driver Education may require a semester to complete.

Driver Education
Behind-the-Wheel
Occupations

The Social Studies courses listed below are designed for the purpose of making the student a better citizen. These include a study of local, state, national, and world governments as well as the social, political, and economic problems that exist in these areas.

Community Social Problems
Government at Work
Human Relations
Our Country
Economics Problems
Basic Employment Skills

Note: A description of all these courses is available through the Milwaukee Vocational, Technical and Adult School.

-0-

Other Examples of Vocational Education Serving Persons with Special Needs:

MDTA Programs

Under the MDTA program in Wisconsin, we operate on the assumption that all of our trainees are students with special problems. For this reason, we resist the use of standard teaching techniques and standard curriculums. Each MDTA project training plan is developed locally with consultation from the state supervisor after a careful study has been made of the MT-1 submitted from the Employment Service. The MT-1, a well known document nationally in MDTA circles, details the skills and knowledges desired by the Employment Service officials who will be responsible for placement of our finished product, the MDTA graduate.

The MT-1 will also prescribe the general characteristics of the trainees that will be referred by WSES and specify such special training requirements as Basic Education or Pre-Vocational Training.

Milwaukee Vocational, Technical and Adult Schools

Manpower Development and Training Act
Pre-Vocational Training Program

This is a three phase program designed to prepare those students who are not presently adequately equipped academically or from the standpoint of personal and emotional attitudes to make a selection for specific occupational training. The program is specially designed to alleviate these educational and personal inadequacies so that a greater degree of vocational success may be expected. Each phase of the program is designed to serve a specialized need. There is a Basic Reading Group, a Diagnostic Group, and a Special Projects Group. The program provides for the internal transfer of a student from any one of these given groups to another (1) when the instructor feels that sufficient progress has been made, or (2) when it has been determined that the student needs specific training in one of the other groups, or (3) when an individual's progress warrants an early choice of a vocational objective. At the conclusion of the Pre-Vocational Training Program, each student will have made a selection of vocational objective, or will have been terminated.

The Basic Reading Group is designed to train students of low reading level in order to bring them up to or near functional literacy levels so that they may more successfully pursue the selected vocational training objective. This group is designed for fifteen students to attend twenty-four weeks. In cases where the student has just begun to show significant progress after completion of the twenty-four week session, he may be permitted to enter the beginning quarter of the next session and continue until the instructor feels that the student is ready for re-assignment. The maximum stay in the Basic Reading Group is forty-eight weeks.

The Diagnostic Group's purpose is to assist the student to discover his mental, emotional, and personal makeup, and to determine what his occupational interests and capabilities are. This groups is designed for a maximum of twenty students who will attend class for twelve weeks.

The Special Projects Group is an orientation course with the primary aim of aiding students' personal and social growth through individual and group guidance, therapeutic teaching, and planned activities. Success in this group will make possible the successful participation in other groups or in a vocational training program. This group is designed for a maximum of twelve students who will attend class for twelve weeks. This group should comprise one unit which enters only at the start.

Group and individual guidance will be an integral part of these three areas, with heavy emphasis in guidance concentrated in the Special Projects Group. The use both of testing and of discussion of personal and social problems will be stressed in order to help the student adjust effectively so that he may become a better trainee, and, ultimately, an understanding and contributing member of society.

REQUIRED COURSES	ALLOTTED HOURS, VARIOUS GROUPS*		
Basic Education	Basic Reading	Diagnostic	Special Project
Basic Human Relations	48		
Basic Personal Skills	48		24
Basic Job Skills	72	24	36
Jobs Today	48	24	48
Diagnostic Projects		120	
Basic Arithmetic 2	120	60	24
Basic English 2	120	24	24
Basic Reading 2	168	60	60
Basic Social Studies	48	12	36
Field Trips			36
Class and Individual Projects			36
Individual and Group Guidance	48	36	36
	720	360	360

*Indicated hours are variable where students' special needs require more time in some areas and less in others.

Cooperative Vocational Training in the High Schools

Pilot program directed and operated by one high school district, but cooperated with other high schools too small to offer a quality program of depth and breadth. Courses offered and available to a number of public school districts through the center school are power mechanics, foundry operations, metals-machine shop and welding.

Note: Program details are available by writing to the Wisconsin Department of Public Instruction.

Adult Basic Education

"Adult basic education" means (a) elementary level education for adults with emphasis on the communication and computational skills such as reading, writing, speaking, listening, and arithmetic; (b) using as content for teaching these skills such adult experiences as consumer buying practices, health habits, relations with other members of the family and community, homemaking, and citizenship responsibilities.

"Adult in need of basic education" means an individual who has attained 18 years of age and whose inability to read and write English constitutes a substantial impairment of his ability to obtain or retain employment or otherwise meet his adult responsibilities.

All adults in need of such education in the State of Wisconsin have an opportunity to (a) become less dependent on others, (b) remain employed or obtain more productive and profitable employment, (c) become better able to meet their adult responsibilities.

Vocational Schools which have developed Adult Basic Education programs under Title III in Wisconsin are: Appleton, Beloit, Fond du Lac, Fort Atkinson, La Crosse, Madison, Marshfield, Kenosha, Racine, Wausau and Wisconsin Rapids. One of the programs developed by the Milwaukee Vocational, Technical and Adult School is described as follows:

Basic Reading - Neighborhood Youth Corps

The classes under this program are designed to do the following: (1) Offer the adult with little or no schooling the opportunity to initiate or continue his education; (2) Provide understanding of the responsibilities which accompany his rights as a citizen; (3) Enable the adult to develop the fundamental skills of communication-listening, speaking, reading, and writing, and the basic skills of numbers; (4) Provide the learner with the opportunity of acquiring the elements of health, science, and social studies that will enable him to better understand and join in the life of his community and his nation; (5) Relate these learnings to the world of work; (6) Develop the confidence of each adult in his own ability to learn; (7) Furnish the learner with a constant series of successful learning experiences to better re-orient his attitudes; (8) Develop the basic skills with continual relevance to their usefulness and meaning in the life of each learner; and (9) Seek the maximum development possible in the minimum time possible.

Instruction is essentially class instruction, but both the structure of the courses and the classroom learning materials are designed to meet the many varying individual student needs.

The course length varies to accommodate the needs of different groups of students. Most students attend school 6 hours per day, 1 day per week, for 13 weeks, followed by 2 hours per day, 1 day per week, for 12 more weeks.

Required Courses are:

BASIC EDUCATION (8-13 BasEd)

371 Basic Reading 1 (or higher - as individually needed)
372 Basic Reading 2 (or lower, or higher - as individually needed)
373 Basic Reading 3 (or lower, or higher - as individually needed)

Through these three basic courses, pertinent job information and pertinent material in health, science, and social studies is introduced.

In addition, to the above, two special programs were established to meet the needs of a specific group: (1) a four week summer program for the Texas migrant workers in a three county area; (2) a winter program for two different tribal councils of Indians in Forest County.

Shoe Servicing and Metal Shop

Economic Opportunity Act--Milwaukee County, Title III
Contract with United Migrant Opportunity Service, Inc.
Objective: Occupational service or orientation

Held on Saturday's for 15 weeks. Used special general shops with 15 students in two shops.

The Madison Plan

The Madison Plan for technical and trade preparatory education for high school youth has the following objectives:

1. To make learning most meaningful and of real value to the student, and to develop in him the essential qualities of a good citizen.

2. To explore the abilities of each individual student so that he may find his best field of educational and vocational interest. This is done by offering exploratory pre-vocational try-out courses, by providing careful guidance, and by administering batteries of tests which reveal the students abilities and interests.

3. To give craftsmanship training to those students who have shown interest and ability in a chosen vocation.

4. To provide education and vocational training for the students who plan to enter industry as technicians, or the building, metal or service trades as apprentices.

Job Threshold Program

I. Students Eligible for the Program

A. Individuals with a diagnosis of mental retardation as established by the Rehabilitation Division, State Board of Vocational, Technical and Adult Education

B. Age--17 or over

II. Students not Eligible for the Course at Present
Those who do not appear to have a job potential

III. Objectives of the Program

A. Direct

1. To help students prepare for employment commensurate with their abilities
2. To orient students to the role of wage earner and citizen

B. Indirect

1. To help students develop personal adequacy as a basis for vocational adequacy
2. To help students adjust better to their homes and communities

IV. Admittance to the Program

A. Referrals must be made to the Supervisor, District Office of the Rehabilitation Division, State Board of Vocational, Technical and Adult Education, at least two months before the beginning of the school term.

B. After interviewing and testing the applicant, the District Supervisor of Rehabilitation decides whether or not the student will be eligible for the program.

C. Only after the student has been approved by the Rehabilitation Office will he be admitted to the program.

D. The student automatically becomes a client of the Rehabilitation Division case supervisor working in his area.

E. The case supervisor and the Job Threshold teacher or the Work Adjustment Training Program teacher at the Opportunity Center works together in planning realistic training for the student.

Home Economics

Home economics classes are offered for low income homemakers in the following cities in Wisconsin: Madison, Port Washington, Ashland, Marinette, Marshfield, and La Crosse.

Program offerings vary and are flexible as to meet the needs of the low income homemaker.

The home economics departments in the local schools are offering home economics classes to persons enrolled in literacy classes. Usually these are for the foreign born.

Examples of other courses offered by local schools through home economics departments.

Family living course in connection with a County Court

(a) For the third year, a fourteen week per semester, two semester course was planned for parents with problems who were seeking assistance from Family Court. A very humanitarian Family Court Judge is vitally interested in using educational techniques in an effort to break the chain of problem families in generation after generation. Parents are required to attend the classes, held in the Court Chamber. Classes were held in the evenings.

The first 30 to 45 minutes is used to present new ideas and to try to influence attitudes and actions through a speaker's presentation or a film. Specific problems are analyzed by an authority on the subject. Following

this general session, discussion groups of 10 to 15 persons meet with a trained discussion leader to analyze the presentation, or to talk about their problems and try to find some solutions. The commonality of problems is used as a basis in forming discussion groups.

About 150 persons attended these classes annually. The course content is developed by the Court's educational consultant and the School's Home Economics Supervisor.

Evaluation of such a program is extremely difficult; the results are intangible. But success might be measured by the improved personal appearance and interest in dress of some of the women, a developing concern for members of their group and efforts to help members solve problems, some response to encouraging members to attend other classes, and some changed behavior.

As visitations were made and school reports were reviewed, there was evidence that management was being included in all areas. Special courses such as the following were taught:

(b) "Home Management for the Handicapped" was offered for the first time last fall. A Home Economist and an Occupational Therapist cooperatively taught the course. Seven handicapped persons reacted very enthusiastically to the course. Being able to make a contribution to less fortunate members of our society was a very satisfying experience for us.

(c) Courses offered at one school to help women with basic homemaking skills and problems:

(1b) Meal Planning and Preparation - offered 2 units, 12 weeks each

(2b) Clothing - offered 1 unit, 12 weeks

(3b) Guiding Our Children - offered 2 units, 4 weeks each

(4b) Home Management - offered 1 unit, 5 weeks

In the Meal Preparation unit, much work was done with using surplus commodity foods and helping the homemaker stretch her food budget but "buy" nutrition.

Three women employed by the County Public Assistance Department as "Homemakers" attended the classes. These women visit clients in their homes and try to help them with specific problems. Their reasons for attending were to up-date their knowledge, and to be able to work more effectively with the clients.

*SPECIAL EDUCATION; COOPERATIVE EDUCATION; *VOCATIONAL EDUCATION; *LOW ACHIEVERS; STUDENT REHABILITATION; *DROPOUT PREVENTION; PILOT PROJECTS
OBION COUNTY; *TENNESSEE

The high drop-out rate in this county was attributed to an inadequate curriculum, students with low academic ability, and lack of motivation. A pilot instructional program was developed to more nearly meet the needs of these special students. The program was designed to meet individual student interest to giving him entry level employment preparation, and to help him become a well-adjusted and contributing citizen. The procedures included an instructional program in language arts, mathematics, social studies, science, physical education, home economics, auto mechanics, and general building trades. During the 1965-66 school year, 15 students were enrolled, average daily attendance was 96 percent, all received on-the-job instruction, and attained such levels of social vocational, and education achievement, that the program was judged highly successful. Recommendations were to continue the program and to supply additional equipment and materials needed for the work. A financial summary and employment record are included. (MS)

SUMMARY AND EVALUATION OF THE VOCATIONAL SPECIAL NEEDS PILOT PROGRAM OBION COUNTY CENTRAL HIGH SCHOOL TROY, TENNESSEE

A recent study indicated a high incidence of drop-outs in the Obion County School system and this drop-out rate was largely attributed to low academic ability and lack of motivation. It also revealed that the school program for these students was grossly inadequate. These students were being offered the same curriculum as other students which creates undesirable atmosphere and attitudes with low achievers. They also find it difficult to achieve in vocational areas in competition with more capable students. Finding that these students need constant and individual attention and specific training in one field of work and feeling that the individual student, the school and the community would be greatly benefited by some program which would provide the necessary training, an instructional program was designed to more nearly meet the needs of these special students.

The instructional program was developed to serve high school students who are normally classified as slow learners. The proposed program was designed to meet the individual student interest, and ability level which would include on-the-job training in order to prepare him for employment, make him self-supporting, happy and a contributing citizen in our society.

The specific objectives were as follows:

1. To improve academic skills.
2. To improve manipulative skills.
3. To develop wholesome attitudes.
4. To develop abilities in handling and care of tools and equipment.

VT 001 553

5. To develop vocational skills related to work preferences enabling the student to seek and hold a job upon leaving school.
6. To provide students with on-the-job experiences.
7. To provide maximum academic training for each student on his level.
8. To develop social graces that will enable the student to adjust in our society.
9. To develop good personal habits related to personal hygiene and appearance.
10. To create an environment to eliminate the problems of absenteeism and potential drop-out.

Procedures followed:

1. Instructional program consisted of:
   a. Language Arts
      (1) Speech Arts
      (2) Reading
      (3) Writing
   b. Mathematics (Elementary through Algebra I)
   c. Social Studies
   d. Science
   e. Physical Education
   f. Home Economics
   g. Auto Mechanics
   h. General Building Trades
2. Facilities:

A well designed remedial laboratory in a good location, with good lighting and well arranged for maximum learning is made available by the Obion County Board

of Education. The remedial laboratory is reasonably equipped with audio visual aids and programmed materials. All other school laboratories, departments, gymnasium, library and school audio visual facilities are available to this Special Needs Class.

3. Methods and techniques of instruction:

   a. Student selection:

      (1) Analyzing permanent records.

      (2) Conferences with principal and school staff.

      (3) Conferences with parents and prospective students.

      (4) Testing program supervised by guidance counselor.

   b. Instructional materials were selected from proven MDTA materials, those advised while instructor was attending The University of Tennessee and recommendations of other instructors of remedial classes.

   c. All instruction was on an individual basis and job related at the learning level of each student.

Following are accomplishments made during the 1965-66 school year:

1. Fifteen students were enrolled. A drop-out returned for this special program but dropped out a second time during the school year. There was one addition totaling fifteen to complete the course.

2. Out of a possible 2700 student days, there were only 82 absentees resulting in an average daily attendance of 96%.

3. Each enrollee received on-the-job instruction.

4. Student achievement:

   a. Three students transferred to the regular instructional program on completion of this special needs training. A fourth student achieved a similar level of training but will remain in the special needs class

another year at the request of his parents.

b. Nine other students advanced from one to three grade levels in reading ability and mathematical comprehension; however, these students have not achieved normal secondary levels.

c. The two non-achievers resulted from one with an IQ in the 40's and the second having a rebellious attitude due to home environment.

d. Vocational achievement is evidenced by nine students continuing employment with their cooperative employer during the summer. These students are expected to return to school for the fall term.

e. Social achievement is evident in personal appearance, hygiene and adjustment to society. This is substantiated by the employer parents and instructor.

Commentation:

It is the opinion of the evaluating team that this special needs program has been highly successful. The success of the program, to a large degree, has been due to the knowledge, patience and dedication of Mr. Hurt, the instructor.

Recommendations:

The evaluating committee highly recommends early approval be granted to continue this program for 1966-67. It is also recommended that consideration be given to supplying additional equipment and materials with which to enrich the program:

1. Cash Register
2. Tape Recorder
3. Record Player
4. Four math mates
